### Farmers Must Plan For Profits

When selling prices are low, the only sure road to profits is the one which leads to lower production costs. The farmer cannot control market buying prices. But he can control his own operating costs and he can plan to maintain a fair margin of profit. To reduce production cost (even though the farmer cultivates fewer acres) PER ACRE PRODUCTION MUST BE INCREASED.

This calls for more intensive fertilization which will make every acre under cultivation give maximum results. Since labor costs remain about the same per acre, regardless of production volume, increased per acre production really means a proportionate saving in labor cost. Better fertilizing means also better quality which in turn means higher selling prices.

This is not mere theory. It has been proved over and over again in numberless practical farm tests. Nitrogen is the growth element in all fertilizers. Arcadian Nitrate of Soda used as top dressing or side dressing supplies the growth element in a quickly available form at a time when this type of plant food is vitally needed. Only the short sighted farmer will neglect to give his fields adequate nitrogen if he hopes to make a profit.

### Pilgrim Fathers' Lives

Sustained by Hominy Hominy, golden grain of the plumed Indian maize beaten into coarse meal. Gift of welcome to the Pilgrim fathers from their red neighbors. Among the dishes of early American cookery, what the Cabots and Lodges are to the sons and daughters of the American Revolution. Of hominy as a food of the coast, late, wrote Captain Smith in 1607. "They commonly fed upon milke hominy, which is bruised Indian come pounded and boiled thicke, and milke for the sauce."

"Their ordinary diet is poane and omnia, both made of corn," wrote Lord Baltimore; and William Penn. "Their diet is maize, sometimes beaten and boiled with water, which they call hominy." One wagish scribe relates, "Our entertainer made him (a newcomer) own that a plate of hominy was the best rice pudding he did ever eat."

Today we commonly refer to the coarse meal made of white corn kernels, from which the rough threepart and the germ has been removed, as hominy grits. Hominy is the term more generally applied to the whole corn grain hulled by the hominization-Exchange.

## Fifteen Homes Bid For Tiny Lad

DALLAS—Fifteen Dallas homes were open December 6, to Johnnie Boy Miller, 4, the "dollar baby", adopted temporarily by Detective Bob Jones who found him in an upstairs hotel room here. A proxy guardian had offered to sell to self the boy for \$1.

Citizens reading the story of the boy's plight in newspapers telephoned police headquarters offering to take him into their homes. Jones retained him, however. Pawnbrokers contributed a new outfit of clothing and city fireman gave him toys.

The boy was the son of a Denison woman who said she gave him to a man she did not know, because she was unable to care for him and two other children.

## Bank Depositors To Get Dividend

According to word received by Dr. H. B. Tanner, secretary of the Eastland Chamber of Commerce, from J. H. Brown of the state banking department, a dividend of 6 per cent will be paid to depositors in the Texas State Bank.

The payment will be made on Christmas Eve, according to the telegram received from the banking department, Eastland Telegram.

Mrs. O. Stone was in Ranger Monday.

### Visits of Death Angel

#### Most Frequent at Night

The question of the time of day at which most deaths occur has engaged the attention of the French scientist, Lavastine, who are told in the *Newes Wiener Journal* (Vienna), reported by the *Literary Digest*. We read:

"On the strength of carefully collected statistical material Lavastine has come to the conclusion that the predominant majority of deaths occur at night."

"Most people die during the time of sleep, between seven o'clock in the evening and six o'clock in the morning. More rarely death occurs in the hours which man usually spends awake. Thus Lavastine observed last year that in the hospital under his direction about 120 patients died at night, whereas according to the records only 63 deaths occurred in the daytime."

"It is interesting that the French scientist, although he expressly emphasizes his rejection of astrology, traces this back to cosmic influences, still unknown to us."

"Moreover, he has also concerned himself with the problem of the hour of birth, and has collected extensive material from the memoranda of Parisian hospitals for women. Here, too, it may be proven from statistics that the number of births in nighttime is much larger than by day."

### Pagan Indian Altar

#### Latest Gift to Xi

Vaticum City—Pope Pius XI has received a pagan altar decorated with six mummified heads of enemies of the New Guinea Indian tribe that worshipped before it. The altar was included in a collection of sixty objects of pagan antiquity and religious sculpture, presented to his holiness by Father Kirschbaum, missionary in New Guinea for over twenty-six years.

The collection, which will be placed in the Ethnological museum, was given to Father Kirschbaum shortly after the tribe embraced the Catholic religion.

Sharing Fine Foods

LIVE-WIRE clubs, all over the  
country, are busy these days,  
giving benefits. These bene-  
fits stress the spirit of sharing,  
rather than the old time "charity"  
spirit.

Recently the Tourist Club of  
Deland, Florida, gave a "Canned  
Shower" for the benefit of the  
Benson Strains Orphanage, and  
each member of the club brought  
canned foods to share with these  
orphans.

Give a "Canned Shower"

The hope has been expressed  
that other organizations will fol-  
low the plan of this Florida club,  
for two reasons. First, because  
in many cases the appropriations  
for orphanages have had to be re-  
duced, owing to the lack of funds;  
and second, because this sort of  
shower is especially to be recom-  
mended for orphanages. In every  
institution, where budgets have to

be closely watched, variety in the  
diet presents a problem. Yet  
children not only need a variety  
of foods, but they eagerly enjoy  
surprises of any sort. Strawber-  
ries in winter, fish when one lives  
far away from the water, creamed  
chicken when beef stew is usual  
—these things make dinner a  
real event in lives customarily  
uneventful.

The economy of canned foods  
is another important item. The  
fact that there is no waste of  
time in preparing foods; no waste  
of the foods themselves when they  
come out of the can; and no  
waste in spoilage because the cans  
are opened as they are ready for  
use—these qualities make canned  
foods especially desirable. The  
safety of using canned foods and  
their high nutritional value has  
been proved by scientific experi-  
ment and vouched for by many  
prominent physicians who recom-  
mend their use.

Useful Gifts  
For The Whole Family

"Make Them Happy with Things Electrical!"

One useful gift for the whole family—that is sound  
advice to the modern Christmas shopper. In bygone  
days we picked individual presents for every mem-  
ber of the family—one for Dad, another for Mother  
and the same for Brother and Sister. And most of  
the time, knickknacks and trinkets were the rule be-  
cause for the average giver, four or five useful, siz-  
able gifts per family meant too great an expense.

We've solved that problem—in our store are dozens  
of low-priced, high quality electrical appliances,  
any one of which takes care of the gift requirements  
for the whole family. Look them over—electric  
ranges, percolators, irons, heaters, lamps—real,  
honest-to-goodness "family" gifts that will for years  
and years remain as reminders of your thoughtfulness.

**Fallings**  
 It is usually the small souled and narrow minded man who can defy faults and fallings with an eagle eye, but upon whom all the finer and grander qualities of humanity are lost. To him who ever walks with head bent and eyes on the ground the whole universe appears to be made of dust; but he who goes with head erect and eyes uplifted breathes the pure air and greets the rising sun, and forgets the dust that may be under his feet.

**Infantile Paralysis**  
 "Byron, who had club feet possibly resulting from infantile paralysis, or poliomyelitis as the doctors call it, was fond of athletics and found that his handicap did not apply when he was in the water. From constant exercise in water he became so strong that he eventually was able to swim the Hellespont, just as did Isander in the golden days of Greece." Dr. John Kuhn told readers of Higeia Magazine in his article entitled, "Polo."

**Shown on the Map**  
 Two little boys, age six and four, were looking at an illustrated family Bible. The elder was endeavoring to satisfy the inquisitiveness of the younger by putting his own interpretation on the various pictures.  
 "Finally they came to the colored maps and the older one was somewhat stumped, but said:  
 "That is a map."  
 "What's it for?" came the query.  
 "Why, that shows the way up to heaven," was the brother's reply.

**Magna Charta Reminder**  
 The organization known as the Society of the Daughters of the Barons of Runnymede was organized in 1915 by Mrs. Robert G. Hagan of Catonsville, Md., who conceived the idea of an organization for women similar to a men's organization, the Baronsial Order of Runnymede, which was organized but undeveloped on account of our entry into the World war. The membership is limited to those who can trace their ancestry in a direct line to a baron who in the year 1215 A. D. compelled the signing of the Magna Charta by King John at Runnymede. The organization is American
