Five Die In Oil Rig Blaze; Three Injured

(By Associated Press)
OWENSBORO, Ky., July 12.—Three boys and two men were burned to death and three men badly burned in an oil rig fire in the vicinity of Haynesville, near this city, last night.

The dead boys—James Crowe, 13; Matt Crowe, 14; and Elmer Fuqua, 13—were watching workmen repairing the derrick after oil had been brought in on the farm of Thurman Crowe, father of the first named boys. James Mattingly and Harold Cornell, men, also were burned to death.

It was reported that someone struck a match near the well, igniting gas in the air around the rig.

The injured included Thurman Crowe, A. G. Cornell, and Fred Cornell. The two Cornell brothers are said to have a slight chance of recovery.

Official "Sampler" For Texas Saves State Much Cash

(By Associated Press)
AUSTIN, July 12.—By spending hours every day in the basement room of the state house, eating, drinking and counting, Miss Alice Miller, employe of the state board of control, saves the state thousands of dollars annually.

Miss Miller is unofficial "sampler" for the state, sharing the duties with Roy L. Tennant, board member who defers to her judgment of quality on most merchandise from allspice to zinc sulphate.

Right now Miss Miller and Mr. Tennant are working overtime tasting and otherwise sampling, for the board of control has under consideration bids on food, clothing and supplies of all sorts for state institutions, to cost well over a million dollars.

A contract with the state is highly prized by wholesalers, and Miss Miller's job is to ferret out those bidders who offer the state more than they plan to deliver.

Take prunes, for instance. Only an expert prune counter could tell the difference between a "60-70 count," prune and a "70-80 count" prune, the count referring to the number in a box. But the smaller prunes sell for somewhat less, and substitution of the smaller would mean a difference of several hundred dollars on the 87,000 pounds of prunes the state will buy.

Besides knowing prunes, Miss Miller also must, literally, know her onions and dry goods. To cite a few of her sampling accomplishments she can tell when a suit or a blanket is only part wool; when a shoe has paper insoles; the number of threads in a square inch of sheeting; and the amount of sugar used in preserving a can of fruit.

Formerly it was fairly common for successful bidders to attempt to substitute an inferior article in making delivery, but Miss Miller has ferreted out so many deceptions that sellers, becoming wary, have decided honesty is the best policy.

Only last year one wholesaler lost \$15,000 when he was forced to take up a shipment of merchandise which was inferior to the sample submitted.

Miss Miller has served in her tester capacity for many years, starting before the present board of control was created. Others credit her with a larger knowledge of this phase of the state's business than any other person.

Bids this year, according to Miss Miller, are the lowest in years on many items. Dressed beef, for example, was purchased for a price six cents below last year's and lower than any other bid within at least ten years.

BALE AND HALF TO ACRE
(By Associated Press)
CUERO, July 12.—A yield of better than one bale per acre was promised on the two-acre demonstration tract sponsored by the Cuero Chamber of Commerce. Seed from the tract will be distributed to farmers of this section.

GRAIN RECORDS BROKEN AT PORT OF HOUSTON
HOUSTON, July 12.—More than 8,250,000 bushels of grain, the largest amount ever recorded for a single season, was handled at Port Houston in the season just closed, Charles Crotty of the port commission announced. Wheat was the major grain.

The public grain elevator handled 4,594,276 bushels of wheat for export; 126,714 bushels of kaffir and 80,000 bushels of barley.

One of the mills here received about 3,500,000 bushels of wheat, 2,000,000 bushels of which was exported and the remainder made into flour.

Trolley Falls in River; 60 Drown

(By Associated Press)
BUENOS AIRES, July 12.—At least sixty were killed today when a street car fell from the Riachulo bridge into the Rio Fleacho separating Buenos Aires from Avelaneda.

Seventy persons are believed to have been occupying the car. Three passengers riding outside escaped from the water.

Friday Big Day at Live-at-Home Fair

With estimated attendance of 4,000 on the second day, still greater crowds are expected on Saturday, closing day of the Winters Live-at-Home Fair. Delegations with bands came from Ballinger, Coleman, Sweetwater and Bronte. San Angelo, Abilene and Colorado representatives also attended. The largest group was from Ballinger with 35 band members and about 200 citizens, including F. M. Pearce, president of the local chamber of commerce, Coleman, Sweetwater and Bronte. San Angelo, Abilene and Colorado representatives also attended. The largest group was from Ballinger with 35 band members and about 200 citizens, including F. M. Pearce, president of the local chamber of commerce, Coleman, Sweetwater and Bronte.

River Yields Body of T. U. Athlete

(By Associated Press)
AUSTIN, July 12.—Fishermen today found the body of John Henry, 22, University of Texas athlete, son of Stanhope Henry of the state board of pardons and paroles, who had been missing for several days, in the Colorado River near here.

An investigation as to how the young man met his death has been started.

No marks were found on the body.

The father said his son had been missing since Thursday, but that no apprehension was felt as the youth was believed to have gone to San Antonio on a visit.

Sanchez Charged in Slaying of Officer

(By Associated Press)
DALLAS, July 12.—Arturo Sanchez, 27, arrested at Ft. Worth yesterday, was charged here today with the fatal shooting at Mesquite of Constable J. T. Davis on July 1st. The killing took place when Davis and his deputy, T. G. Jones, arrested four men in the act of stripping an automobile.

The thieves attacked the officers while en route to the Dallas county jail.

Three other men already had been jailed in connection with the shooting.

BELLES AND WINES OF PACIFIC ISLE LURE TARNS

(By Associated Press)
PAPEETE, Tahiti, July 12.—The Society Island in the Eastern Pacific, inhabited by dusky belles, and flowing with cheap wine, were much to the liking of the crew of the American motorship Arcturus.

A broken camshaft forced the Arcturus to put in for repairs. When the ship was ready to sail, many of the crew preferred the cozy grass huts beneath the palm trees to the bunks in the fore-castle.

Officers ordered the enchanted seamen handcuffed and literally dragged them on board, and on the eve of sailing arc lights were hung over the sides of the ship to attract sharks.

The long, gray, menacing shapes circling the vessel deterred those who felt inclined to swim ashore.

Spaghetti Wins Applause
MILAN, Italy, July 12.—(A)—Rabbits out of a silk hat don't begin to compare in effectiveness with Italian audiences with the favorite trick of magicians of this country—converting a huge handful of paper into a plate of appetizing spaghetti, steaming hot. No matter how dusty the other trick, this one always brings down the house.

Be wise and advertise.

TURKS AND KURDS CLASH ON TURKISH FRONTIER

The Turkish government hopes to break the power of fierce Kurdish tribes, who for centuries have held a stronghold on Mount Ararat, descending each spring to plunder villages. Official bulletin said Turkish forces were encircling the enemy on three sides at point indicated on map. Typical Turkish soldiers are shown above. Ismet Pasha (left) is prime minister of Turkey and Tewfik Rushdi Bey (right) is foreign minister.

Lovers Suicide by Self Electrocuting

(By Associated Press)
LINTFORD, Germany, July 12.—A pair of lovers dependent over obstacles barring their marriage today climbed a power line pole in the deep woods, clasped hands, and seized a high voltage wire. Both died.

Jones Sets Record; Takes Tournery Lead

(By Associated Press)
MINNEAPOLIS, July 12.—Bobby Jones, the champion, shot a spectacular 63, four under par and setting a new competitive for the Interlachen Club course, and taking the lead in the third round of the United States Open golf tournament here today.

Today's work gives Jones a 54-hole total of the 212.

Red Menace is Seen in Revolt Against French

(By Associated Press)
HANOI, French Indo-China, July 12.—The Viet-Nam-Quoc-Dan-Dang and the Viet-Nam-Cong-Dan-Dang, the chief native political parties, joining against French rule, are blamed by officials for the recent uprisings here.

Nearly seventy-five lives were lost and several hundred persons wounded. Among the latter were five Europeans.

Translated into English, the foregoing means that the nationalists and the communists, in spite of their entirely different political programs, formed a coalition to make life miserable for the handful of Frenchmen governing 20,000,000 Annamites and Tonkinese.

"Union for disorder," the French leaders here call the truce between the former warring parties.

Heretofore the communists while showing great enthusiasm in their demands for abolition of the tax on rice and reduction of costs of living, seemed to lack the sinews of war to organize open rebellion. But since their union with the nationalists they have acquired arms and ammunition and their attack upon Vinh-Long, fifty miles southwest of Saigon, was made with determination and military cohesion.

"You must refuse to pay the tax and allow yourself to be arrested groups," were instructions handed down by the leaders to the manifestants.

Nearly all the leaders of the Viet-Nam-Quoc-Dan-Dang—the nationalists—are behind the bars, but the movement gathered momentum with each arrest.

Charles J. Dutton's No. 1 Showing Gas

Operations on Charles J. Dutton's No. 1 Dean on the G. W. Dean place have been continuing without interruption for the past week and a depth of 800 feet had been reached Saturday. A slight showing of gas was encountered at 575, but the most promising prospect to promoters of the well is the fact that salt water has not been encountered to the present depth which is usually the case in this area.

The well is four miles southwest of Ballinger, 1,048 feet from the west line and 5,475 feet from the south line of the Johann Heil survey No. 419.

Fines Increased in Appealed Case

Two men, arrested recently by Jim Flynn, deputy game warden, who was the chief witness for the prosecution in Tom Green county court, were fined \$25 and costs each Friday. The men, E. H. Dyer and W. H. McCorkle, had appealed their cases from a Christoval justice court where they were originally assessed fines of \$10 each. They had about 40 bass minnows in a bucket which they declared they had not had time to separate from other minnows.

By agreement, McCorkle, when Dyer was pronounced guilty of possession of undersized bass, pleaded guilty and paid his fine, attorney's fees and costs without standing trial.

PHYSICIAN CONTINUES STUDY

Dr. O. R. Lasater left recently for Kansas City, Mo., and Chicago where he will take post-graduate work for about six weeks.

Henry W. Coit Dies in Dallas Today

(By Associated Press)
DALLAS, July 12.—Henry W. Coit, 67, farmer of Renner, Collin county, and former president of the Texas State Ginners' Association, died here today.

ICE CREAM SOON CONSUMED AT LIVE-AT-HOME BANQUET

Ice cream was consumed at a record rate at the live-at-home banquet in Winters Friday night. Sixty-five gallons of the frozen confection in the form of 1,536 individually wrapped green and white slices were made way with by the feasters in an elapsed time of no more than ten minutes.

New Band Class

will start July 21st. All instruments needed. Don't delay—give that boy or girl a chance to cultivate natural musical talent. Terms four dollars a month—results assured. Girls especially desired. Indicate with an X instrument interested in, cut out and mail to Homer Carsey, Box 233, Ballinger, Texas.

Cornet—Clarinet—Trombone—Saxophone—Baritone—Bass—Alto—Piccolo—Oboe—Drum—P. S. Band furnishes one alto and one bass.

Be wise and advertise.

Death List Reaches 74 In Midwest Heat Wave

Catholic Prelate Buried Saturday

(By Associated Press)
VATICAN CITY, July 12.—Cardinal Vannutelli was buried today in Verano Cemetery, near the Church of St. Laurence, outside the walls of Rome where Pope Pius IX is interred.

The papal benediction was imparted by Cardinal Belmonte, who replaced Vannutelli as dean of the sacred college.

Presbyterian Meet Is Held at Talpa

A district conference of the Ladies Auxiliary of the Southern Presbyterian Church was held at Talpa, Thursday, July 10. The object of these meetings is to bring the auxiliaries in closer touch with each other and with the work of the organization. The topic of this meeting was "Kerrville Conferences."

Mrs. Ector Smith, of Talpa, acted as district chairman. Mrs. Hudson, of Coleman, opened the morning session with a devotional on "The Holy Spirit." This was followed by an interesting talk on Kerrville conference by Mrs. Walker of Brownwood. Rev. Bolling of Paint Rock delivered a helpful sermon. Mr. Bolling sang "How Long Must We Wait?" accompanied by little Miss Wilbank, also of Paint Rock. Local presidents talked on their aims and aspirations for the year.

A delicious lunch was enjoyed at the noon hour, after which business was again resumed. Mrs. C. R. Stephens, of Ballinger, led a round table discussion of common problems. Mrs. J. M. Pyburn, of Ballinger, told about the faculty at the Kerrville training schools. A talk on Presbyterian aims was given by Mrs. Silas Keeton, of San Angelo. All present who had been to conferences at Kerrville gave interesting talks on what Kerrville had meant to them.

There were 35 present at this meeting, Ballinger, Paint Rock, San Saba, San Angelo, Coleman and Brownwood being represented. All voted the Talpa ladies excellent hostesses and a pleasant and profitable time was had.

Those attending from Ballinger were: Mmes. Estes Lynn, J. M. Pyburn, C. R. Stephens, E. W. McLaurin, Harry Lynn, Victor Miller and Miss E. Walker.

"Hoovercrats" Get Names on Ticket

(By Associated Press)
FT. WORTH, July 12.—An opinion of the Second Court of Civil Appeals here today ordered the Wichita county Democratic executive committee to print on the primary ballot the names of forty precinct chairmanship candidates who admitted voting for Hoover in 1928.

The "Hoovercrats" had contended that their request to have their names printed on the ticket was ignored by the executive committee on June 16.

American Railways Best

MOSCOW, July 12.—(AP)—Ivan Nikitich Mirinov, member of a commission which studied railroads in America and Europe, reported that the former systems are the most economical and efficient. He said that application of American technique would increase the capacities of some Russian roads ten times.

THE FOOD INDUSTRY

One-fourth of all the money spent by the American people is for food products, according to a study made by the General Foods Corporation.

The annual income of the United States is around 80 billion dollars, and of this 21 billion is used to supply the dining table, in addition to three billion more for products "consumed on premises" and not cleared through any market.

The significance of this is shown by the fact that the value of all foodstuffs in this country is about \$2 billion yearly; automobiles, including trucks, tires and accessories, five to six billion; building construction, seven to eight billion; and iron and steel about six billion.

The food industry is thus the largest, as well as the oldest, of all businesses.

WRECK SATURDAY MORNING DAMAGES AUTO SLIGHTLY

Slight damage resulted from the collision of an automobile and an auto truck on highway 30 three miles west of Ballinger about 5 o'clock Saturday morning. The car, a coupe driven by a Mr. Hayes, crashed headlong into the rear of the truck, turning the truck completely over and back on its wheels.

A wrecker from Cameron's Garage transported the coupe to the city.

SLOW MOTION MOVIES AID PIANO INSTRUCTION

PARIS, July 12.—Pianists, it is claimed, can acquire a good technique in a minimum of time by the use of the slow motion picture.

Mme. Louta Neunberg, a Russian pianist, has evolved a system for the application of these pictures to teaching. She has obtained the support of a number of eminent artists, including Iturbi, Cortot and Backhaus, who consented to play for her films.

By having them make motion pictures of the same composition she was able to analyze the effects obtained by the varying movements of the player's hands.

Grain Farmers Prosper

AMES, Iowa, July 12.—(AP)—Farmers in the north central grain area of Iowa led those in all other farming districts of the state in income in 1929. Much of the income, however, was dependent from livestock.

Quartet Ventures on Two Years Sea Trip in Shallow Chinese Junk

The junk "Maskee" with full crew aboard is shown (above) moored at Hongkong. Below, left to right, are Stephenson, Grenham and Banks.

By Morris J. Harris (Associated Press Correspondent) HONGKONG, July 12.—In a tiny, shallow Chinese junk, four young Englishmen have sailed from this port on a globe-circling voyage which they estimate will keep them busy for two years.

The junk is called "Maskee," which translates into English as "all right" or "good." The adventurers are L. J. Stephenson, a fellow of the Royal Geographical Society and a veteran seaman; Stanley C. Banks, a clerk in an electrical supply shop; John C. Grenham, former secretary of the Hongkong Y. M. C. A., and D. E. Martin, radio operator.

Stevenson, who is directing the trip, hopes to collect some scientific data in South Sea islands and in out of the way places on the Australian coast.

The ship's bows have been painted bright red with a great black eye on each side. She is 42 feet over all, with a beam of 11 feet and a depth of six feet. Her two masts carry brown matting sails with a spread of 900 square feet.

Some hard luck attended the start of the adventure but the men took it as a sign that the finish may be less strenuous. They tried to get away before the typhoon season but experienced delay and on their first three attempts were forced back by heavy winds.

The first important stop is Saigon in Indo-China. Thence the junk will head east for Sandakan in British North Borneo, stopping there long enough to let her crew investigate why the wild men of Borneo get that way.

The itinerary calls for stops at Menado, Dutch East Indies; Gilolo Island, Rabaul, New Guinea; Tuagi British Solomon Islands; Newcastle and Sydney, Australia; Auckland, New Zealand; Tahiti, Society Islands, and Honolulu. The crew expects to reach the Hawaiian capital about Christmas.

The route then continues to San Francisco and southern California points, the Panama Canal, New York and London, via the Azores. After a few weeks in the mother country, the quartet hopes to return to China via Gibraltar, the Suez Canal and Indian ports.

DAYLIGHT MOVIE SCREEN HAS ARTIFICIAL SHADOW

PARIS, July 12.—Inventors of a special cinema screen here say that through use of it motion pictures can be shown out of doors and in lighted halls.

The new screen, it is explained, consists of an ordinary opaque screen in front of which is placed

SUNDOWN STORIES

THE HORSE TRAINS

By Mary Graham Bonner "You're going to have a trip this evening I'm sure you didn't expect to have," the Little Black Clock told Peggy and John.

"We've had lots of surprises," John replied. "We never know what we're going to see or do next," Peggy added.

"I've turned the time back—one hundred and one years," the Little Black Clock said. "Come with me."

John and Peggy each took hold of one of the Clock's hand and he led them down the magic path until the whole scene was changed and they saw some railway tracks.

"We're going to have a ride on a train," John said delightedly. "Yes," the Little Black Clock agreed. "The horses will be along any moment now."

"Horses?" asked John in great surprise. "Yes, horses," agreed the Little Black Clock.

"But horses don't pull trains," John persisted. "My dad has told us how they used to pull street cars—but they can't pull trains."

"Oh, can't they?" said the Little Black Clock. "This is to be one of those Wait and See adventures. You just wait now and see if they don't."

And sure enough along came a train, a funny little old-fashioned train, and it was being pulled by horses.

"The steam locomotive was discovered some time ago," the Little Black Clock said, "but so far in this country, in the time to which I've turned, the trains

are pulled by horses." John and Peggy got into the train, and so did the Little Black Clock, and they rode along, around curves, up hills, drawn by horses.

It was quite the most amusing experience they had ever had, and they had thought they had had many amusing ones.

"But we're going to have a race soon," the Little Black Clock said.

"It will be another one of those Wait and See Adventures. You wait and we'll see the race. In fact we'll not only see it, but we will take part in the race. Don't forget to be ready for me!" "I should say we wouldn't forget," John ended.

(Monday—"The Race")

Care of Thanks

To our many friends and neighbors who ministered to our mother, grandmother and sister, we fall to find words to express our thanks.

Your thoughtful acts of kindness, your expression of sympathy together with neighborly love and Christian fellowship which has no equals has warmed our hearts and made the burden lighter.

We also want to thank the kind and efficient nurse, Miss Kilpatrick and Dr. Watson.

Also for the beautiful floral offering.

Our hearts desire is that each of you may have just such friends

E. C. Pape and family A. S. Pape and family Arthur Pape and family Lawrence Pape

Mrs. Luella Helwegler and Halley L. Afterbach and family. 1-d.

HOW'S your HEALTH

STUDY IN TONSILS Diseased tonsils often co-exist with other abnormal conditions. Whether or not the diseased tonsils are responsible for the conditions is often a matter of question.

That enlarged tonsils and adenoids may interfere with breathing is easy to see. But how diseased tonsils may be related to malnutrition asthma or hay fever, and retardation in school work, may only be conjectured.

In the light of this, a recent study made in Michigan on the effects of the removal of diseased tonsils in 736 children has special value.

The children operated on, had in addition to diseased tonsils, certain other undesirable conditions.

Thus, some of the children were not gaining weight nor developing normally; others were malnourished, some had marked enlargement of the cervical (neck) glands.

Some manifested rheumatic infections, frequent colds and sore throats was the complaint in a number of children and still others were retarded in school work.

One hundred and forty-six children in this group were mentally sub-normal. The study on the effects of the removal of the diseased tonsils in these cases revealed the following:

Tonsillectomy (removal of the diseased tonsils) offers a child considerable relief from such common complaints as sore throats, head colds and mouth breathing.

It reduces malnutrition and promotes the disappearance of enlarged cervical glands.

In 91% of the cases operated upon, the complaints were relieved. The younger children among those operated upon benefited more than the older ones.

Children with sub-normal mentality and retarded school progress showed improvement in 40% of all cases operated on.

PHONOGRAPH DISCS TO REPLACE POSTAL CARDS

(By Associated Press) BERLIN, July 12.—American tourists this summer need not write the old stereotyped postcard greetings to their friends at home.

A flexible phonograph disc designed for easy mailing of personal utterances is on sale in the stores here. The enthusiastic traveler need only step into the phonograph department, dictate "Well here I am, folks, in beer old Berlin," and slip the record into an envelope.

What is more, the traveler, months later, can hear himself enjoying Europe.

Scratch Pads, 25c per pound at Ledger office.

European Immigration Has Not Affected Labor in Southland

(By Associated Press) This is the second of a series of articles based on a survey of "Labor in the South" made by the Institute for Research in the Social Sciences of the University of Virginia.

UNIVERSITY, Va., July 12.—out of the glamor of old plantation days, when powerful if kindly despots ruled the lives of their vassals, has survived an economic influence that still works mightily in the problem of labor for the Old South's new industries.

So the Institute for Research in the Social Sciences, established at the University of Virginia in 1926 by the Rockefeller Foundation, has found in an exhaustive study of present conditions in the South and the reasons that have endured for more than half a century.

Dr. Abraham Berglund, professor of commerce and business administration; Dr. G. T. Starnes, assistant professor of commerce and business administration; and Frank T. de Vyver, research associate in labor problems, conducted the study. They extended its scope into the eleven "slave states" of Virginia, North Carolina, South Carolina, Georgia, Florida, Tennessee, Alabama, Mississippi, Louisiana, Arkansas Texas.

They found relics still existing from the system of paternalism that linked plantation owner with slave; a supply of labor large in proportion to wealth and capital; low living standards among workers; a relatively isolated communal life in some sections and a craftsmanship becoming out of date in a machine age.

"This spirit of paternalism was not greatly changed by the Civil War," they reported. "Indeed, for a time it was necessary under the conditions that followed that proprietary responsibility for dependents—a fine tradition in many respects—has survived in an environment of free labor with its assertion of the right of self-determining.

"Much of the opposition to trade union movements, to laws limiting hours of labor for women and children, and to other regulatory measures, is in part an inheritance of this tradition of paternalism. Similar opposition has indeed been manifested by employers in other parts of the country, but in the South it has to some extent assumed the form of an opposing culture—a clash between an old civilization and a new one."

The Southern industrial worker is receiving a compensation much below that of the country as a whole, the study revealed. While the eleven Southern states owned 12.6 per cent of the total number of manufacturing establishments of the United States and produced 10.2 per cent of the value of manufactured output, they employed 14 per cent of the total number of workers and paid them only 9.2 per cent of the aggregate wages.

The relatively low economic level in which the greater part of the white population of the South lived before the Civil War is still effective, the investigators found. Small farms then were very numerous, and did not yield the returns of Northern farms of similar size. This was attributed in the report to location, farming technique and lack of facilities for marketing surplus products.

European immigration has affected the South directly but little, the survey revealed, for reasons which were principally economic. The small farm of the South in the plantation era and for a long time afterward offered little in the way of gain to the prospective cultivator of soil from Europe, and the plantation required a considerable capital outlay. The manufacturing industries were for the most part in the North, and were of sufficient variety to enable the worker to take advantage of competing bids for employment.

A striking difference between the South and the remainder of the country was shown in comparisons of per capita wealth. While the eleven southern states studied contained over 26 per cent of the country's population in 1890, they had only a little more than 13 per cent of its wealth. In 1922 the figures were slightly more favorable, but even then the states referred to had only 15 per cent of the wealth of the United States with more than 25 per cent of the population.

The per capita in 1890 was \$319 for the South as against \$1,036 for the country as a whole, and 1922 the corresponding figures were \$1,747 and \$2,919. "Much has been said," the report points out, "of the lack of skill on the part of the workers

of the South as compared with those of the North and West. Attempts have been made to show that the great difference in wage levels is partly attributable to this cause.

"Labor in the South, however, has not been lacking in skill, and in skill of high order. Craftsmanship attained an advanced stage of development during the ante bellum period. Insofar as the labor situation has been affected by the worker's skill and experience, it has been influenced by a skill and experience that is now out of date.

"With the rapid spread of industries using machinery, a new kind of craftsmanship has been necessary, and the traditions of the past have to be adjusted to a new order. Steadiness and regularity have become supreme virtues under the new craftsmanship of the machine system, and these virtues are not developed suddenly."

Amusements

Last Word in Cubist Art Seen in "New York Nights"

A veritable blaze of color! Modernistic designs in furniture and drapes; triangular rugs and cubist fish bowls feature the "party" scenes of United Artists' "New York Nights." Norma Talmadge's first talking and musical picture venture, opening its run at the Palace Theatre tomorrow afternoon.

To make this a truly modern set, no small or large item was allowed to be out of character. A cubist piano, with legs that rise from small points to flat planes a foot wide and colored in red and black, is one of the unusual touches.

Another is the rug which has geometric designs in brilliant hues and is triangular in shape. The wall paper is in large pastelled squares of sympathetic colors.

William Cameron Menzies, art director for United Artists, designed this unusual set, one of the most spectacular of its kind ever constructed for talking pictures.

The story is a virile and humorous account of the trials and tribulations of the song-writing and chorus-girl fraternity along New York's Tin Pan Alley.

Under Lewis Milestone's direction, the spice of Broadway's

Looking Through the Wheat

Making a tour through the wheat belt, Secretary of Agriculture Hyde and Chairman Legge of the federal farm board are shown here at Hastings, Neb., with Chancellor F. A. Burnett of Nebraska University. Left to right: The secretary of agriculture, Mr. Legge and Chancellor Burnett.

picturesque colloquialisms are caught.

"Caught Short" Starring Marie Dressler and Polly Moran Closing Run Tonight

"I now declare you to be man and wife . . ."

The minister was just about to say these words, and then the stock market crashed!

And this situation is but one of the many filled with laughs which a Ballinger audience found last night in the new Marie Dressler-Polly Moran comedy for Metro-Goldwyn-Mayer. The title is "Caught Short," and it is an original by Willard Mack.

Marie and Polly, co-protagonists in a long list of successful fun-films, are a pair of impoverished New York landladies. Polly experiments with the stock market. Fliers in "American Cheese" and "Smellwell Soap" prove successful, and she eventually entices Marie into the mystic mazes of Wall Street. Good friends are parted frequently by the quarrels of prosperity, and when this happens it also throws the monkey wrench into a budding romance between Marie's daughter, Anita Page, and Polly's son, Charles

Morton. Amusing atmosphere is provided in two typical boarding houses of the lower Washington Square, New York, type, by those three excellent comedians, T. Roy Barnes, Herbert Prior and Edward Dillon.

Chuck Riesner has directed the production with his usual happy touch. Riesner has the rare quality of making a comedy natural. He never strains for a point, and he has due cognizance of the fact that tears and laughs are always close together. The sequence between Marie and Polly when Marie thinks her pal has been wiped out is full of guffaws one moment, and gulps of the throat the next.

WOULD ADD TO BEEF DIET OF PORTO RICO

(By Associated Press) SAN PEDRO DE MACORIS, Dominican Republic, July 12.—Governor Theodore Roosevelt of Porto Rico, finding 80 per cent of the people on that island undernourished, wants them to eat more beef.

He sent a representative to study the Dominican republic as a possible source of supply and as a result a new packing plant is to be erected either here or in Santo Domingo.

Porto Rico has 1,543,000 inhabitants or 450 to the square mile. She must practice such intensive agriculture that the raising of livestock is restricted. This republic, with scarcely 50 people to the square mile, has plenty of land for grazing.

There are only 150,000 cattle in Porto Rico and two-thirds of the animals are beasts of burden. There are not nearly enough milk cows for the island's needs and goat's milk is an important item for the poorer families.

Tuberculosis, rickets and other ailments of mal-nutrition can be reduced, Gov. Roosevelt believes, by increasing the meat diet of the people.

Gas Tax Brings State Big Fund

(By Associated Press) AUSTIN, July 12.—Despite the reduction of nearly 50 per cent in auto license fee made when the four cent gasoline tax was enacted, Texas will have collected nearly \$5,000,000 more at the end of this fiscal year for highway construction than was available a year ago, State Comptroller George H. Sheppard has estimated.

Taking receipts to June 1, estimating receipts for June, July and August, and adding an approximation of the amount collected from automobile licenses, Sheppard arrived at his estimate.

Receipts up to June 1 from the four cent tax were \$26,226,766. Receipts for June, July and August were estimated at \$4,400,000, making a total of \$34,626,766.

Of this total approximately \$1,984,056 will be used for refunds to those who used gasoline for other than motoring; and one-fourth, or \$8,150,677 will go into the state available school fund, leaving a total of \$24,482,032 for road work.

License fee collections the last fiscal year were approximately \$18,000,000. Cut in half, \$9,000,000 should be available for the road fund this year, making a total for road work in excess of \$33,000,000.

Under the two cent tax, \$11,210,603 from the gasoline tax was allotted to road work, which, added to the \$18,000,000 license fees made a total of about \$29,000,000 for road work, or about \$4,000,000 less than this year.

Estimating slightly larger receipts from license fees, and allowing that the estimated collections of June, July and August from the gas tax were conservative, Sheppard reached his belief that the state would have \$5,000,000 more for road work.

BUILDING STARTED IN '23 WILL NOW BE FINISHED

(By Associated Press) LAREDO, July 12.—A building for a great educational institution

PAINS QUIT COMING

Kentucky Lady Took Cardui and Tells How She Was Greatly Benefited.

Hopkinsville, Ky.—"I used to have headache and dizziness, and at times would have severe cramping spells," says Mrs. Mackey Scott, of 102 South Kentucky Ave., this city.

"This unfitted me for my work or any pleasures that I wanted to enter into. I am naturally a very active woman and I did not feel like I wanted to give two or three days at a time to aches and pains. So I looked around for a remedy."

"I had heard a great deal about Cardui and seeing it advertised I decided to take it. I took four bottles and it did me a world of good. It seemed to regulate and strengthen me. I quit having headaches and felt fine."

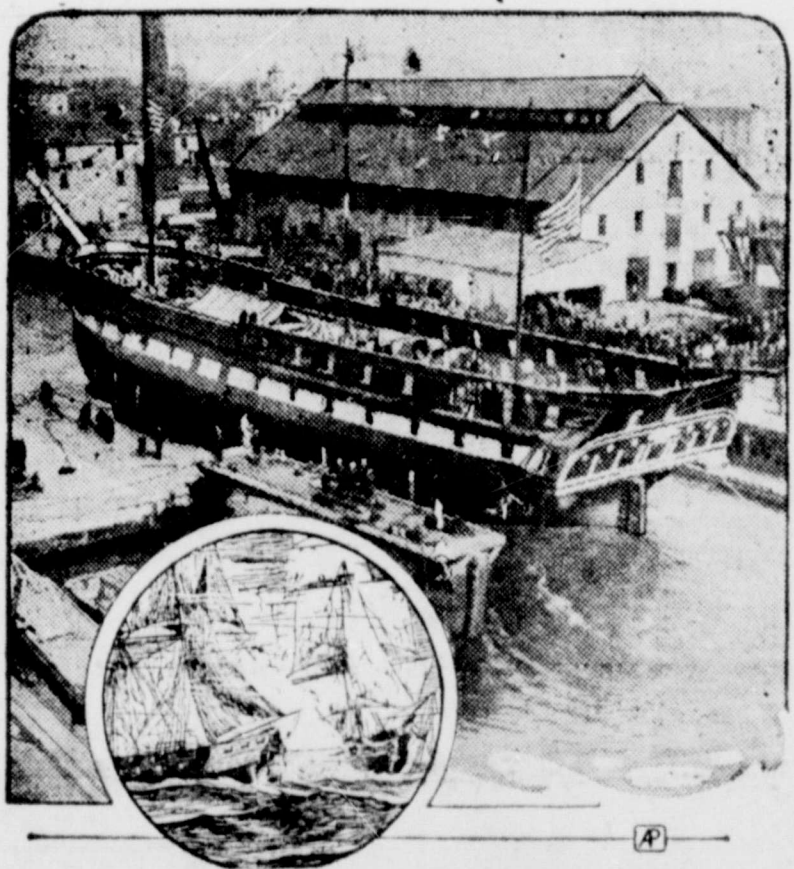

"I have never ceased praising Cardui to my friends and neighbors for what it did for me."

For more than fifty years, women who had suffered, or who had gotten into a run-down, weak condition, have been enthusiastic in praising Cardui for the benefits obtained from its use.

Cardui is extracted from herbs having high medicinal value, and contains nothing harmful or injurious. Get a bottle of Cardui from your druggist, today, and try it all your life. N.C.C.20

CARDUI

"Old Ironsides" To be Moved Soon Tour for Aged Ship In Prospect

The Constitution, rebuilt largely by pennies of school children, is shown in Charlestown navy yard near Boston.

(By Associated Press) BOSTON, July 11.—For the first time in 33 years, the famous old frigate Constitution soon will leave the Boston navy yard.

It will be a sleek, stalwart craft that will dig its stern bow into the waves it pierced generations ago when it roamed the sea in disdain of any foe.

School children's contributions have aided materially in making possible the transformation of the historic "Old Ironsides" into a seaworthy craft.

She will be taken to the dry dock at South Boston, where gigantic cranes will lift and set in place on her decks the huge masts belonging to the ship.

Within a year the Constitution is expected to be ready to sail on a tour of the nation's leading ports. Lieut. John A. Lord, last of the United States navy's wooden ship constructors, believes the frigate will be ready for public display by that time.

Its crew will contain nucleus of men familiar with the care and handling of square rigged ships. But "Old Ironsides" will not sail under her own power as

in the olden days. Instead she will be towed by a naval tug or a mine sweeper.

Old fittings, even whole oil lamps, will be used by the modern crew.

The transformation of Old Ironsides is going forward swiftly, so rapidly that changes in its appearance can be noted from week to week.

Panelled cabins, fore and aft, are taking form on her gun decks duplicates of the rooms in which commodores and even ambassadors traveled in state years ago. Lieut. Lord's research unearthed an old sketch showing the original construction of the after-cabin and from this he has worked out his plans.

The after-cabin will have an "umbrella skylight," unique in modern marine architecture.

The gun ports await the installment of the old artillery.

Old Ironsides is 204 feet long and has a beam of 45 feet. Fully manned, she carries 450 men.

Her masts will tower 186 feet from the load water line to the main truck.

ion started in 1923 in Nuevo Laredo, Mexico, at a cost of \$300,000, but on which work ceased a few months later on account of roubious conditions, is now to be finished and made into one of the greatest educational institutions of the Mexican republic. An organization which has done so much recently in civic improvement work in Nuevo Laredo, known as "Lt Junta de Mejor Material," has taken over the task of finishing the building and work will be resumed immediately. The school will not only carry all elementary and high school grades, but collegiate courses will be included. Agricultural and live stock training also will be a part of the curriculum. Russian Mortality Drops MOSCOW, July 12.—(AP)—Official figures claim that mortality in soviet Russia dropped in 1929 to 18.2 a thousand of population, the lowest in a century. Child mortality decreased to 167 a thousand for infants under one year, claimed to be the lowest rate in the world. At the age of 34 J. F. Ledbetter is seeking the post of sheriff of Muskogee county, Oklahoma.

Cow's Stomach "Window" Helps Study of Diet

(By Associated Press) STATE COLLEGE, Pa., July 12.—The mantle of Pennstate Jessie, the famous cow which lived four years at Pennsylvania State College with a "window" in her stomach, has fallen on another. Again selecting a Holstein, scientists christened her Pennstate Jessie II with a painless operation in the college veterinary hospital.

A local anesthetic was used and beyond shaking her head several times the helper gave no signs of being aware that anything out of the ordinary was taking place.

The opening to her largest stomach is kept closed with a special rubber plug which can be removed when scientists wish to study the bacterial action in Jessie's dinner.

The studies interrupted by the death of the original Pennstate Jessie now may be resumed. They open speculative features which may initiate an entirely new sphere of investigation in dietetics.

It has been found that the bacterial count content in a cow's stomach changes as new elements are introduced to her food, new bacteria appearing and developing as the new rations were continued, and disappearing when the elements are withdrawn.

How these bacteria originate, where they come from and how the findings may apply to humans and influence the general practice of dietetics, comprise a field of large potentiality.

The fact that an organism was found in the stomach of Jessie I which manufactured vitamin B when there was none in the ration, leads to the belief that special bacteria may be derived from other organisms in the stomach, or are developed from existing forms when they are required.

BUREAU OF FISHERIES TO BE ESTABLISHED SOON

(By Associated Press) GALVESTON, July 12.—One of the largest and most efficient marine biological laboratories of the United States bureau of fisheries will be established at or near Galveston. It will be the first on the Gulf coast, and will be of such size as to permit the building of 25 to 30 acres of ponds.

An item of \$75,000 for the laboratory was contained in a measure passed recently by congress. Biological experts will use the laboratory for a scientific study of the fin and shell fish of the gulf.

Iron ore deposits of high value have been found in Peru on a plateau bordering the Pacific.

Society

Entertain Bridge Club Mr. and Mrs. W. P. Denny entertained the Thursday Bridge Club with a beautiful lawn party Thursday evening at 8:30. Miss Pauline Morley directed the guests to the punch which was served throughout the evening out of a block of ice frozen around a mass of roses, carnas and crepe myrtle. Mrs. L. C. Jameson Jr. of Talpa, and Margaret Morley presided over the punch table.

Mrs. Winfield Wood won high club prize. Mrs. Al Burlison won guest prize. Guy Swann won high for men, and Mrs. J. Smith won the cut. Cantaloupe a la mode was served to Mr. and Mrs. Winfield Wood, Panzy Grippie, J. Smith, K. V. Northington, Henry Jones, Joe Beck, B. N. Wilke, Garland Thomas, Rothal O'Kelly, Al Burlison, Marcus Turner, L. C. Jameson Jr. of Talpa, Guy Swann, Henry Jameson, Ernest Mulligan, Misses Pauline and Margaret Morley, Nanell Jones, Mrs. L. C. Jameson Sr., Mrs. J. R. Lusk and Mrs. R. Denman.

Honor Departing Class Members Honoring Mrs. Clyde Cantrell and Mrs. L. R. Bradford, who are leaving to make their homes elsewhere, a delightful social affair was sponsored by Mrs. C. R. Stephens Sunday school class of the First Presbyterian Church, Tuesday evening from 8 to 9 o'clock. Chairs and a profusion of cut flowers had been placed on the cool and inviting lawn of the H. W. Lynn home, where the guests were welcomed by the hostesses. After two hours spent in conversation and a lively program of fun, a delicious refreshment plate was served.

Mmes. Thomas and Beck Joint Hostesses Mesdames Garland Thomas and J. J. Beck were joint hostesses Wednesday afternoon when they entertained with a party of particular interest at the home of the latter on Ninth Street.

Graceful summer flowers added charm to the attractive game rooms where eight tables of bridge and forty-two provided pleasant diversion for the assembled guests.

Dainty pansy corsages adorned the delectable refreshment plate which carried out the chosen color scheme of purple and gold. Those included were: Mmes. Robert Lusk, Geo. Vaughn, Joe Neff, George Pearce, Billy Denny, Jack Rudd, Jimmie Smith, Clyde Cantrell, L. R. Tigner, Alex McGregor, Leonard Stallings, Dewey Womack, D. C. Middleton, Kathleen Drake, K. V. Northington, Claud Stone, Fred Kiechle, Henry Jones, Floyd Carr, Jess Jones, Harris, W. B. Woody, C. L. Baker, R. W. Earnshaw, Troy Simpson, Ira L. Sims, Delbert Vancil, E. C. Baskin, John Weeks, Lela McAdams, C. P. Shepherd, Willie Brown, J. D. Motley, Horace Murphy, Winfield Wood, Rothal O'Kelly, Hilliard Watson, Glenn Upchurch, Chas. Cheatham, C. F. Bailey, Misses Treva Gaunt, of Dunkirk, Indiana, Ida Mae Voelkel, Imogene Jones and little Miss Marjorie McGregor.

Mrs. S. A. Thompson has returned to Abilene to visit her son there before going to her home at Rochester, Texas. She has spent several days here with her son and family, I. D. Thompson.

D. Black. Communion service following the sermon. A cordial invitation is extended to all to attend the services.

BUSINESS FAILURES IN TEXAS FOR JUNE

(By Associated Press) AUSTIN, July 12.—Forty-seven business failures were reported in Texas during June, according to a report issued by the Bureau of Business Research of the University of Texas. The liabilities of the bankrupt firms, however, were far lower than the liabilities of the 46 concerns that failed in May, being \$705,000 as compared to \$1,509,000. In June, 1929, there were 30 business failures with liabilities of \$564,000. In the first half of 1930, 312 commercial enterprises, having liabilities of \$6,392,000, were placed in the hands of receivers. This compares with 266 failures with liabilities of \$4,734,000 in the first half of 1929 and 313 defaults with liabilities of \$8,052,000 in the first six months of 1928. Five Texas banks failed during the first half of 1930 as compared with only two in the same period in 1929.

World Watches U. S. Effort to Steady Wheat

(By F. B. Coiton) (Associated Press Staff Writer) NEW YORK, July 12.—World commodity producers who failed to stabilize their own crops are watching the work of the U. S. farm board with the interest that follows a stubbed toe.

Coffee, rubber and sugar, three of the most sharply depressed commodities on the New York markets during the recent deflation, all sank to these low levels despite desperate efforts by the countries producing them to stabilize their values.

Persistent withholding of supplies from the markets, they found, without definite control of production, only served to speed up production until the supplies being withheld became unwieldy and had to be disposed of at sharply reduced prices.

Chairman Legge of the farm board and Secretary of Agriculture Hyde have been touring the grain belt to urge reduction of acreage.

It is understood that the board does not intend to finance the grain stabilization corporation in buying surplus of the 1930 crop.

Commodity dealers here regard these facts as indicating a determination to avoid such experiences as that of Brazil with coffee.

In 1924 the Brazilian Coffee Institute was organized to buy up surplus coffee and hold it back from the market to keep the price from falling. But there was no adequate provision for curtailing production, which was essential to the success of the plan.

Coffee crops continued to be large enough both to supply current demand and also to increase the surplus which grew to the enormous total of 16,500,000 bags, four-fifths of a year's supply for the world.

With this vast supply in existence which must eventually be placed on the market green coffee prices could no longer be held at their artificially-maintained level and broke to as low as 9 cents a pound wholesale.

Destruction of the surplus or permitting the 1930 crop to rot on the bushes have been suggested as emergency remedies. American and British bankers have furnished a \$100,000,000 loan to the industry, however, with provision that production be curtailed and the surplus gradually exported over 10 years.

British rubber growers in 1928 organized the "Stevenson pool" to buy up surplus rubber and control the market. The result was similar to that in Brazil. The price of crude rubber broke in half and has gone as low as 12 1/2 cents.

Cuban sugar growers tried to restrict marketing through the Single Seller agency, but this proved unsatisfactory and raw sugar prices tumbled close to 1-5 cents a pound before payment of duty, the lowest for 100 years.

Parachute craftsmen handling parachutes approved by the department of commerce must have a parachute rigger's license after July 1.

AMERICAN FIRST WOMAN TO DRIVE CAR IN SOVIET

(By Associated Press) TASHKENT, Soviet Russia, July 12.—Mrs. Arthur Powell Davis, wife of the California irrigation engineer, has won the distinction of being the first American woman to drive an automobile in Soviet Russia.

When she drove her car through the streets of Tashkent, where many women still wear the veil and are kept to the strict seclusion of the harem, crowds of excited people gathered around her automobile and questioned her.

They couldn't understand how she could be driving the car with her husband in the back seat. Mrs. Davis told the natives that women in the United States drive from both the front and rear seats.

Be wise and advertise.
