Dallas Couple Wounded; Assailant Makes Escape

(By Associated Press)
DALLAS, July 2.—J. W. McCulley, 45, and Mrs. Kathleen Achilles, 35, were shot and seriously wounded while waiting for a street car here today.

The attacker fled in an automobile. Police are searching for him.

Both victims were wounded in the head.

POTATO CROP IS STOLEN FROM FARMER

J. F. Elkins who resides near Ballinger experienced hard luck this year on what promised to be a big crop of Irish potatoes. About one-eighth of an acre formerly covered by an old hay stack had been planted in this product and when they were ready to be dug this year some one visited his place while he and his family were away and dug his crop for him and took them to some other part of the country and Mr. Elkins is minus the potatoes.

British Suggest Nations Confer

(By Associated Press)
LONDON, July 2.—The British government today officially suggested a conference of the powers chiefly interested in the Hoover moratorium plan if the Franco-American negotiations failed.

LONDON, July 2.—Reuter's News Agency today declared that the British government intended to call a conference of the powers which signed the Young plan.

Dispatches from Washington said American officials believed the conference would be in line with the United States government's moratorium memorandum to France. The United States government is not a signatory to the Young plan.

LEGION PLANNING BIG AFFAIR FOR THIRD MONDAY

The third Monday in July the local post of the American Legion will stage a big entertainment and feed here and invitations were extended to all Legionnaires, former members and ex-service men in the county. Officials of the post are trying to get a large attendance to the meeting which will be the last before the state convention of that organization. Important business that will be brought up before the state meeting will be discussed here and delegates instructed how to vote on these issues. Delegates will also be named and given their credentials at the meeting here July 19.

McClain Preaching in the Country Where it Rains

A letter received by The Ledger Thursday from Rev. J. H. McClain, pastor of the Ballinger Baptist Church, who is conducting a revival at Stockdale, stated that he realized it could still rain. He said during the past week-end a five-inch rain fell at Stockdale, and that with the heavy rains and everybody shipping watermelons conditions were hard for a religious campaign. A hundred cars of melons were shipped from that point last week and truck farmers are just entering their busy season.

Rev. McClain announced that Rev. W. D. Kirkpatrick would preach at the Ballinger Baptist Church Sunday morning and evening.

One Billion Dollars Has Been Spent to Handle the 230,000,000 Tons of Freight That Have Moved Through the Port of New Orleans Since 1896.

Dairy Scientist Dies in Wisconsin

(By Associated Press)
MADISON, Wis., July 2.—Dr. Stephen Moulton Babcock, 88, world famous dairy scientist, died at his home here some time during the night. The body was discovered by neighbors this morning.

Physicians said Dr. Babcock had suffered a heart attack.

Car Registrations Are 24 for June

Motor vehicle registrations in Runnels county showed a gain in June, records in the office of W. A. Forge, county tax collector, giving a total of 19 new passenger cars and five new commercial machines.

The Batts Chevrolet had sales of nine new passenger cars and one truck for the month. Chevrolet sales included one truck by the Patrick Company of Winters, and three passenger cars by the C. & C. Motor Co. of Miles.

Harwell Motor Company of this city reported five new Ford passenger cars and three commercial vehicles for the June registrations.

The Dickenson Motor Co., of Tuscola registered one passenger automobile, and the Allen Sales Co., of San Angelo, one Whippet.

Twenty-four new sales for the month is a nice increase and may be an indication of the return of prosperity in the country. A large number are reported to be contemplating the purchase of motor cars when their grain crop is sold.

Club Girl Makes Garden Record

One small girl in Runnels county has made a wonderful record with her garden this year and when the summer is over will have set a record that will be a mark for any person to strive for.

Mary Fuller, age 13, a member of the Herring 4-H Club, has planned her garden so that she might furnish fresh vegetables for her family the entire garden season and at the same time have a surplus for canning. On June 8 she reported 77 quarts of four varieties already canned and stored away for winter use. This is just a beginning of the canning of products for here and her pantry at the close of the season will be a close run for any ladies entered in the 4-H pantry.

Mrs. Lura Hollingsworth, county home demonstration agent, is loud in her praise of the work done by this young club member and estimated that she will have 400 or 500 cans of vegetables by the end of the summer.

The young lady is anxious to attend the short course at A & M College but due to the expense will likely not be able to attend this year unless help is given through her club work. The cost for the trip with meals, room and railroad fare will amount to about \$15.00 for each person.

The garden programs adapted through the clubs of the county have made wonderful records this year and many families will eat delicious vegetables this summer from these gardens and have enough stored for their winter use.

My home is for sale or rent. See me at home immediately. Mrs. W. L. Brown. 1-3rd

NEIGHBORS URGED TO JOIN TO BETTER COTTON GRADES

RALEIGH, N. C., July 2.—When only a few farmers in a given community grow cotton of high quality and spinning value, they rarely receive a price representing the true value, says Glenn R. Smith, field representative of the agricultural economic department at North Carolina State College. On the other hand, he says, these few growers receive the average price, and are thus penalized by their neighbors.

Where the entire community settles on one good variety, Smith says, the price per pound is increased and the whole neighborhood profits thereby.

FIRST GREEK BOY SCOUTS GET CHARTER IN FLORIDA

TARPON SPRINGS, Fla., July 2.—The first troop of Boy Scouts of America to be formed by all Greek boys, has been chartered here.

The troop is sponsored by the community of Greeks here engaged in the sponge industry.

Autogiro, Born of Airplane Wreckage, Descends Vertically "On its Shadow"

(By Oscar Leidinger, Associated Press Aviation Editor)
PHILADELPHIA, July 2.—A comparative newcomer in aviation, the autogiro, was born from the wreck of an airplane.

Its elevation to public interest is recent, heralded by production of two and three-place models for the private and sport flier, delivery of one to the navy for military experiment, and plans for autogiro cabin planes and flying boats abroad.

Yet its history reaches to 1918 when a Spanish inventor, Juan de la Cierva, saw a three-engine bomber he had designed for his nation's air force wrecked when its pilot flew it too slowly close to the ground.

He set about to discover an entirely new principle of flight by which machines would be capable of flying slowly and safely as well as fast and far.

He found it in autorotation, converting to a useful purpose what always had been a bugbear to heavier-than-air craft in the form of the deadly spin—the very thing that ended the days of his bomber.

In place of the fixed wings of the ordinary airplane, he adopted a system of rotating wings, the power for their rotation to be taken from the air reactions on the wings themselves.

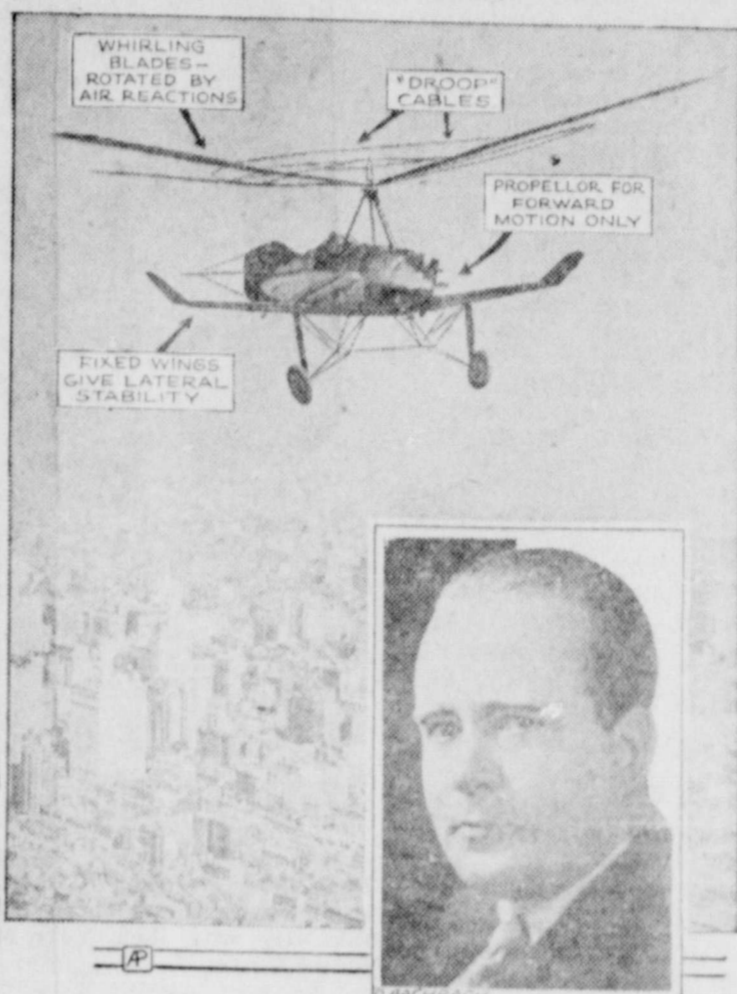

His first full size ship, built in 1922, had two sets of two blades each, rotated horizontally in opposite directions. It was unsuccessful, and it was not until 1923, with a rotor of four blades, that the first autogiro flight was made.

Where a fixed wing airplane derives its lift from high forward speed, the autogiro derives 80 per cent of its lift in flight and 100 per cent in vertical descent from its whirling "paddles."

This "buoyancy" enables the craft to take off with a short run, and to land "on its own shadow."

The "paddles" are long, narrow blades shaped in cross section like an airplane wing. They are whirled by the air reactions upon them, never receiving any power from the engine in flight.

The engine serves only to drive the propeller for forward progress of the machine and is connected

An autogiro fairly lolling over Philadelphia, with some of the mechanical innovations indicated by which safety at slow speed and vertical descent have been achieved. "Droop" cables keep blades from falling when machine is at rest. Juan de la Cierva (insert), Spanish inventor, discovered the principle of autorotation and the modern autogiro is the result.

with the "paddles" only on the ground to set them to whirling to a speed of 120-150 revolutions a minute.

The bladed motor system is mounted on a hub set a little behind the center of gravity so that, when the power driving the conventional propeller in the nose of the ship is shut off, an autogiro will assume a natural gliding angle.

Each blade is hinged two ways, for limited up and down and fore and aft movement. "Droop" cables keep them from falling when the machine is at rest on the ground.

As the blades rotate in flight they come slightly upwards, assuming a balanced position between their tendency from centrifugal force to be straight

New York Throngs Out To Greet Post and Gatty

Special Session Now Seems a Necessity

(By Associated Press)
AUSTIN, July 2.—Governor Sterling today said he doubted that East Texas oil operators would observe the new proration order of the state railroad commission and believed a special session of the legislature would be necessary. He did not announce the date but indicated he would issue the call next week.

The governor favors a law to combine conservation of oil, water and soil in a single board.

ROWENA HOME IS RAZED BY FIRE

Ballinger firemen went to Rowena Wednesday afternoon in response to a call, driving the chemical truck. The home of Burns Harwell was practically destroyed and all contents ruined. The local fire fighters arrived too late to be of any service.

The house was owned by Fred Patterson who lives several miles from Rowena, and had been rented to Mr. Harwell.

J. F. Lusk Will Visit Old Home

J. F. Lusk will leave here Friday afternoon for his old home at Morrisville, Missouri, where he will join all his brothers and sisters in a family reunion. Mr. Lusk is the eldest of the children, and the gathering will be held at the home of the youngest sister. Other brothers and sisters will attend from Belton, Texas; Florida, Tennessee and North Carolina. The entire group is expected to be present by Saturday and will visit each other for several days.

Mr. Lusk left Missouri in 1872, and has resided in Texas ever since. He came to Ballinger 42 years ago, when this city was just three years old, residing here for the remainder of his life, and is rightfully termed a pioneer of this section. Every few years he has made trips back to his old Missouri home, and has maintained acquaintanceships with many of the early day friends made when he lived there.

The Ballinger man is looking forward to a great time at which all his near relatives will be present, and stated Thursday that he was feeling fine for the trip. He will be joined at Belton by his brother and the two will make the trip together. Mrs. Lusk will not attend the reunion but will remain in Ballinger while her husband is away.

Rev. and Mrs. T. E. Bowman, Mr. and Mrs. U. E. Hartman and Mr. and Mrs. Troy Simpson and daughter, Mary, went to Winters Thursday morning to attend the marriage of George M. Garrett of this city and Miss Lura Lee Tinkle of Winters.

Judge T. T. Cross returned Thursday morning from Brownwood, where he had been to visit his sister, Mrs. C. L. McCartney, and attend a family gathering.

Scratch Pads, 20c per pound, at Ledger office. tfd.

(By Associated Press)
NEW YORK, July 2.—Cheering sirens and ticker tape marked Gotham's welcome today to Wiley Post and Harold Gatty, back in town after circling the globe in less than nine days.

Crowds jammed the streets around the Ritz Carlton Hotel long before the fliers were awake. Police held the throngs back when the aviators finally appeared and entered an automobile for a ride to North River. There they boarded the city tug Macon, which took them to the Battery and the official ceremonies.

Mrs. Gatty, delayed by bad weather, arrived during the night and awoke her husband with a kiss this morning. The two couples had breakfast together.

The fliers landed last night at 6:47 o'clock Texas time. Their elapsed time since departure was 8 days 15 hours and 51 minutes. The Graf Zeppelin's time on its round-the-world journey was more than 21 days.

(By Associated Press)
DENISON, Tex., July 2.—The body of Johnnie Hill, 9, drowned yesterday with his sister, Mildred, 14, in Red River, was recovered today.

The girl's body was recovered yesterday.

Drownings Take Toll Of Four Wednesday

(By Associated Press)
LAMESA, Tex., July 2.—"al rites were held here today for David Barrett, 2 years old, who drowned yesterday in a pond 20 miles from Lamesa. The little boy had been playing alone at the edge of the pond.

PARISH GIVES BOOKS TO BALLINGER SCHOOL

The Ballinger high school this week was the recipient of a gift of a set of books from Judge Overton L. Parish. The books, entitled "The New Encyclopedia of Texas," will be placed in the school library. The four volumes, beautifully bound, contain more than 4,000 pages.

Supt. H. C. Lyon asks The Ledger to publicly express his thanks on behalf of the school for this appreciated gift from Judge Parish.

G. O. Woodroof and Dan Woodroof left Thursday for a short vacation in the interior of Mexico. They plan to return home next week.

Lawyers in Convention Rap Texas Court System

(By Associated Press)
GALVESTON, July 2.—The committee on jurisprudence and law reform reported to the fifth annual convention of the Texas Bar Association here today that the Texas court system is antiquated and unbusiness-like and should be reconstructed.

It was proposed that a committee be named to work out a new system.

Band Concert at 8:30 Tonight

The Ballinger Band under direction of H. H. Carsey will appear in concert tonight at 8:30 on the court house lawn. The musicians will present a special program of patriotic marches and other appropriate selections which they dedicate to Independence Day. In addition Fred Welhausen will offer a special baritone solo with band accompaniment, "Down on the Farm." Four variations with a rousing finale will be used in this rendition, always a popular number.

Mysterious Shot Wounds Dentist

(By Associated Press)
HOUSTON, July 2.—County and city officers today were investigating the mysterious shooting of Dr. J. T. Botthoff, 30, dentist of Pelly.

Dr. Botthoff was found lying unconscious on the highway, shot in the back and abdomen. He said he was wounded while driving his automobile and did not know why or by whom.

To Catch Criminals

SAN FRANCISCO, July 2.—(AP)—Providing an appropriation of \$173,500, the legislature authorized a 17-city automatic telegraph hook-up for police communication. Headquarters will be in Sacramento.

Congresswoman to Be Buried Friday

(By Associated Press)
MUSKOGEE, Okla., July 2.—Miss Alice Robertson, 77, the second woman to serve in congress, is to be buried here tomorrow.

Miss Robertson died yesterday following an extended illness.

Parties who have grass and weeds on vacant lots next to them and who list it with the fire department to be burned off should be sure that the weeds are cut back from growing trees and shrubs. A small amount of heat will injure these and it will be a hard matter to protect them against the flames that will be necessary to burn the lots clean. Anyone desiring property burned off should phone the city secretary and have their property listed.

Runnels county is a perfect picture at this season and people who have not had a drive recently through the best farming regions have missed a wonderful sight. Crops are at a stage when they look the best and all are thriving at the present time. Warm weather is making cotton grow by leaps and bounds and the crops of grain sorghums are heading and without a withered blade on the stalk. The crops will continue alright for a short time but will soon be badly in need of rain.

An announcement has been made from Bronte that citizens there are planning for the calling of a bond election soon at which time they will ask the voters of that road district to vote a total of \$80,000 in Highway bonds to complete Highway 70. The designation was made at the last meeting of the commission with the provision that the district would vote bonds and the citizens were given until October to comply with these terms. Those who have favored one route and another have practically all consolidated on the road named by the commission and are willing to see it paved and made to serve the most in that section.

Directors of the Coleman County fair at a recent meeting set dates for the county annual celebration for October 21 to 24. Committees were named and plans are being made towards completing the program, issuing a catalogue and attending to other business in connection with the staging of the event. This makes dates already named for practically all permanent celebrations in this section of the county and fairs that were postponed last year have all announced that they would be staged this year and have practically arranged their programs. Much has been done in Runnels county towards staging the fair here and a meeting of directors and all committees will be held soon to make the final plans and start a campaign for exhibits and other features that make a successful fair.

My home is for sale or rent. See me at home immediately. Mrs. W. L. Brown. 1-31d

A map of Kansas showing pollination times of various weeds has been devised by a scientist for use in treating hay-fever victims.

PUFFY

"We'll start rehearsals on the Fourth, since that's a holiday and Mr. Horse and Mrs. Cow will have some time for play." With that announcement Puffy sighs, but does that mean relief? "We'll have much fun," he says, then adds: "and maybe lots of grief."

SUNDOWN STORIES

THE CIRCUS

By Mary Graham Bonner Their plane had landed and the pilot motioned to John and Peggy and the Clock to get in.

In a few moments they were away up, landing on a platform attached to a dirigible up in the air.

Everywhere they could see great excitement. It was circus day, and all the people living here for the summer were going. They were lined along the enormous platform, like a village in size, and there were mothers and fathers and uncles and aunts and boys and girls and dogs too, all waiting to see the parade.

Suddenly they heard the sound of a band. Oh, there was nothing to equal that! The sound came nearer and nearer and now they saw the parade. The Little Black Clock had turned the time ahead, but this parade was much like the old circus parade although it was in the air.

Just as they had landed the Clock had told them that he would leave them alone for a little while. Sometimes, he said, he felt shy where there were great crowds, and he knew they would be perfectly safe.

So Peggy and John stood and watched the marvelous parade. There were beautiful ladies riding beautiful horses, and the people seemed to think horses were as unusual and interesting as Peggy and John regarded lions and tigers. There were other animals too, of course.

But the dreadful thought came to John and Peggy that they would not be able to go to the circus without the Little Black Clock.

Then, suddenly, someone spoke to them.

HOW'S your HEALTH

Edited by Dr. Jago Goldstein, Academy of Medicine

ECZEMA

Eczeema, one of the most common of the skin affections, is not a single disease condition, but rather a conglomerate one.

Failure to appreciate how complicated a condition eczeema is and how much detailed study and varied trials are required to achieve effective treatment causes many a patient to wander from doctor to doctor and from clinic to clinic in the vain hope that someone will hit the right treatment on the first trial.

The term eczeema is used to describe a variety of skin conditions which run from the mildly inflamed and fairly dry skin to the markedly ulcerated and "weeping" skin.

Though the causes of eczeema are numerous, they can be divided into two general groups, the so-called external causes and the internal ones.

There are some eczemas which are due purely to some external irritants. We find these most commonly among industrial workers as the result of chemicals and other irritating substances which they are obliged to handle.

The eczemas due to internal causes appear as well influenced by outside agencies or force. The eczematous areas are usually developed where the skin is irritated.

The treatment of eczeema of external origin requires the removal of the irritating causes. These may in some instances be vegetable parasites, in others some chemical substance to which the

Natural "Platinum" Blond Approved Television Type

(By Associated Press) SAN FRANCISCO, July 2.—Ann Sawyer has been picked as a type of beauty desirable for pictures by radio.

Studio experts say she answers the two specifications, a face which "screens" and a voice that stands the "mike" test.

She is a blond with a natural "platinum" tint to her tresses. Anticipating the days of sound and sight programs Bruce Quisenberry, NBC artist service director, signed Miss Sawyer for regular appearances in the San Francisco studio of the network.

"Such broadcasts will require specially trained actors with voices and personalities to meet the demands of this medium," he said.

When Ann's not busy brushing up on her music and dramatic roles for the microphone she follows her hobby—sculpture.

sufferer is peculiarly sensitive. The eczemas of internal origin require detailed study of the patient's constitution and habits as well as of the external causes which contribute to the development of the condition.

All of this requires acute medical skill and perseverance. Self-medication for eczeema is at best a waste of time and money and may lead to further injury of an already suffering skin.

(Tomorrow—Treating Eczeema)

HATCHEL HAPPENINGS

Hatchel Club

The Up and Doing club met Thursday with twenty-one present. Five new members were enrolled and two visitors. Mrs. Hollingsworth baked a shepherd pie and served it which was delicious. She also urged the members to help promote the use more cotton movement, and she demonstrated numerous pieces of textile goods that can be substituted for silk.

The roll call was answered by "My favorite recipe," and several good recipes were given. Eight dollars was received Friday night from the cream supper.

Club meets July 9, 7:30 p. m.

The farmers are about caught up with their work and crops are looking fine, however a good rain would be beneficial.

The children of Mrs. Hope Caudle had a family reunion last week. They got together at W. S. Caudle's Friday and Saturday. They carried their lunch and repaired to the old reunion ground near Paint Rock on the Concha river where they spent the day fishing and bathing and feasting and having an all-around good time. There were five brothers and sisters, Mrs. Effie Benton of Port Arthur, W. S. Caudle and family of Hatchel, Mrs. Effie Riddle and family of Winters, Miles Caudle and family of Mineola, Curtis Caudle and family of Sweetwater. Other relatives and friends present were: Mr. and Mrs. D. E. Caudle and daughter, Almida of Hatchel and Miles Caudle and family of Pony Creek.

There were about thirty in all present. Mrs. Hope Caudle came here from Bowie county in 1903. She and her five children lived south of Ballinger for several years. The children are all married and scattered. Mrs. Caudle remained in Runnels county until her death some few years ago. This is the first time they have all been together in twenty years.

Mrs. O. B. Davis and daughter Pansy Taylor were shopping in Ballinger Saturday afternoon.

Mr. and Mrs. Blanton Smith of Silver Valley visited their daughter Mrs. Hugo Michalis Sunday.

Mr. and Mrs. D. Ferguson of

ANN SAWYER

Ballinger were among the attendance at church Sunday.

Mrs. A. S. Pables of Ballinger spent last week with her daughter Mrs. C. E. Michalis.

Mr. Reed Gasart and family went to Coleman Saturday to spend the week with relatives.

Mrs. Myrtle Spurwell and Miss Dollie Mae Ward of Big Spring spent last week and are spending this week with their sister Mrs. Burley Vinson.

C. T. Michaeles sold 50 milk fed chickens for forty cents each to be barbecued for the attorneys convention.

Mr. and Mrs. Wert Bales took dinner with her parents Mr. and Mrs. Corum at Ballinger.

Elder Harper preached at the Baptist church Sunday morning and evening.

Mrs. Scott Guin was on the sick list last week.

Little Charles Williams had another misfortune Saturday while riding a stick horse he fell and ran the stick down his throat and made an ugly wound which

INDIGESTION

"My work is confining, and often I eat hurriedly, causing me to have indigestion. Gas will form and I will smother and have pains in my chest. I had to be careful what I ate, but after someone had recommended Black-Draught and I found a small pinch after meals was so helpful, I soon was eating anything I wanted. "Now when I feel the least smothering or uncomfortable bloating, I take a pinch of Black-Draught and get relief."

—Clyde Vaughn, 19 Sultry St., Greenville, S. C. Sold in 25¢ packages.

WOMEN who are run-down, nervous, or suffer every month, should take Carolol. Used for over 50 years.

made it necessary to receive treatment of a physician.

Mrs. Elmer Cogdill, of Abilene, the daughter of Mr. and Mrs. Vinson, underwent an operation Tuesday. At last report she was doing fine.

Miss Rabbu Estes who underwent an operation last week is reported not doing so well.

We are glad to report that Mrs. T. M. Ferguson is getting along fine. She will be able to return home in a few days.

Don't forget the singing next Sunday at 2:30 p. m. at the school auditorium. We are expecting some good singing.

At last report Mrs. J. L. Hinkle was doing nicely.

Hopper's Cafe—Open all night. 8-26d

SWEET POTATO CROP IN TEXAS IS HIGH

(By Associated Press) AUSTIN, Texas, June 24.—Sweet potatoes rank seventh in value in the list of Texas agricultural products, according to a summary by E. T. Crozier, sweet potato inspector in the state department of agriculture, of the work done by the state toward developing this industry. Sweet potatoes gained seventh place in value although a large portion of the 1930 crop was sold below the market, Crozier said.

In 1930 the 109,000 acres planted in sweet potatoes yielded \$7,248,000, more than the value of the combined cabbage and spinach crop; more than the total returns on fruit, including the citrus crop, and more than the

combined cantaloupe, watermelon and cucumber crop.

Crozier pointed out the possibilities for future growth of the industry, claiming Texas last year imported into its five largest cities a total of 511 carloads of sweet potatoes from other states, the bulk furnished by Louisiana. Other cities probably imported a total as great but figures for the state were not available.

Most of the Texas production is shipped to the northwest, particularly to Colorado, Oregon and Washington, with a small amount shipped to Canada.

The Eastern markets have not been scratched by the Texas yams, partially because of a sectional preference east of the Mississippi river for dry potatoes and to the comparative newness of the Porto Rican variety of yam that constitutes a bulk of the Texas crop. The qualities of the yam also have not been advertised in the East, Crozier said.

Even should growers be able to reach the Eastern markets they are not yet in a position to care for the business and must first extend their curing facilities, Crozier saying it would be unprofitable to increase production without an equal increase in curing plant facilities. Kilm dried sweet potatoes have a higher sugar content, better flavor and better shipping advantages.

BOOTLEGGERS OF CELERY AT WORK NEAR EL PASO

(By Associated Press) EL PASO, July 2.—Good American stuff! Just brought across the river. It's celery, the latest item to be set down on smugglers' lists in this vicinity.

Since a recent order of the Mexican government, banning importation of celery from the

United States, price of the plant in Juarez, opposite El Paso in Mexico, has jumped 25 per cent, and the celery bootlegger has become a problem for the authorities.

Diners in Juarez who like celery have continued to demand it, and, despite the dangers attendant on smuggling, the smugglers and their representatives have undertaken to supply cafe owners since only a small quantity is grown in Mexico.

The plant was banned, along with beets, several flowers, straw and rhubarb, according to Manuel Alcazar, chief inspector in charge of agricultural defense in Juarez, because of the European corn borer.

Campaigns in Airplane NEWPORT, Ky., July 2.—(AP)—Arthur J. Daly, Newport city solicitor, who is a candidate for railroad commissioner of Kentucky in the August primary, is campaigning by airplane. He has planned an extensive trip by air into the counties of the district.

LOROTHY DARNIT

Comic strip by Charles McManus featuring characters and dialogue about a limousine and a car.

By Charles McManus

EXIT by Harold Bell Wright

SYNOPSIS: Pierre Donovan hopes to find Bruce hunting a lost gold coin on Mother Mountain. He sends a chance desert companion, who has been an actor since he was a boy, to undertake the search for the long lost gold coin. Unlucky to Pierre, his estranged father, Roy Donovan, has returned to his mining venture. Though hoping to bring Bruce back to his deserted wife, Ann, Pierre trembles as the journey looms. While he braves the desert, Pierre senses the change of intensity that Bruce has already acquired. And now that officers are seeking Bruce in connection with a murder that has already involved Ann's father, Pierre is afraid that the scandalous charge may be drawn out unless Bruce first comes home to her.

Chapter 26

TRAILING A MOUNTAIN

HARRIGAN'S last word to Pierre that morning was, the boy set out alone from Dripping Spring was: "Keep yer eyes on Mother Mountain. Head straight; for the little hollow between her breasts and re'll never go amiss. And remember to stick close to the trail if ye should have to come back alone. Ye'll be in no danger of stravin' into Skeleton Sink as ye do as I'm tellin' ye."

And the Irishman's heart had gone out to the boy when Pierre tried to hide his fears with a bit of burlesque acting. That the boy could force himself to undertake the adventure in spite of his terror won the old prospector's admiration.

Scarcely was Pierre beyond shouting distance from his friend when loneliness so oppressed him that he almost turned back. But with grim determination he fixed his eyes on Mother Mountain and forced himself on. He dared not halt for an instant. An hour passed. Then he ventured to stop and look around.

Far away to the southwest he could see a column of dust—Jimmie Harrigan and his burro! He watched until even that sign of another human being vanished. With a cry he turned and drove himself on.

The sun climbed up the empty sky. The heat grew more intense; the silence and the desolation more appalling.

He went on.

As he walked with his eyes on Mother Mountain, memories of childhood crowded his mind. The cruelties of those early years before his father disappeared; experiences from that period when he and his mother were together on the stage; and then his beautiful companionship with her in Orchard Hill.

Vividly, Pierre recalled that first meeting with his mother's old friend when, in his childish way, he had decided that the old actor should be his Father Tony. Never had Father Tony failed him.

On the crest of a low ridge he paused to search the desert ahead with anxious eyes. Bruce and his companion were not in sight. There was nothing moving in that vast expanse.

He went on.

He lived again those months of his mother's illness, and thought of her dreams for him that had governed all his life. He recalled his mother's sobs about the theater. He remembered her words when she spoke to him about her approaching death, and how after her exit she would stand in the wings to watch him act his part. He called her name aloud.

He wondered, was she watching him now from the wings? If he should make his exit somewhere in the desert would she be there to receive him? He recalled bits from favorite plays; he imagined himself in a theater before an immense audience, and spoke as if he were playing a part in a great play. He remembered that Ann had said she would sit in a box and throw him a kiss.

With increasing anxiety, he watched for the men that Harrigan had been so confident he would meet.

He went on.

The sun lay high overhead in an empty white hot sky.

He crouched in the shade of a rock and ate a little food and drank sparingly from his canteen.

He went on.

As he pushed on deeper and deeper into the interminable desert to find Bruce, scenes from their boyhood together passed before him. Their fight when, beside himself with rage because Bruce had spoken lightly of his mother, he had nearly killed the older boy with a stone. Their rivalry for Ann; Bruce a bank clerk; the wedding; Ann as Bruce's wife, incidents from that period when he

made his bon with Bruce and Ann.

Again he heard that hour when his love for Ann had made him surrender his school money to Bruce. Once more he endured the agony of the realization that he could not now fulfill all that his mother and Father Tony and he had planned for his future. And again he felt the madness of that moment when he and Ann, looking into each other's eyes, had seen their love, and in that same instant had ruthlessly denied it. And Bruce had gone away and left Ann because of him. And now his love for Ann was driving him on to find her husband and take him back to her.

Surely here in this desert so terrible in its vast desolation—so empty of all life—surely here there was no reason why he should not speak aloud his love. He shouted, "Ann, Ann, Ann! I love you Ann! I love you—love you—love you!"

Every endearment that he had felt but never dared to put into words even in his secret thoughts he cried aloud now to the silent desert. And then, as if she walked beside him, he reassured her with promises that she should not be ashamed in Orchard Hill through his love because he would bring her husband back; her father's innocence should be established, and everything would be as it was.

From the crest of every ridge and from every bit of high land he strained his eyes to catch a glimpse of the men he hoped with every mile to meet.

The sun moved slowly down the empty sky, the shadows lengthened.

He went on, and on, and on.

He seemed to have been walking for ages. Mother Mountain was a far away as when he first set out upon his endless journey. He looked back but could not tell the way he had come beyond a hundred yards of faintly marked trail.

The shadows deepened, dusk crept over the desert, night came. He hid a tiny campfire, crouched staring into the darkness which shut him in, listening, listening in the awful silence—feeling in every taut nerve the menace of that lonely land.

The night was an eternity.

Pierre Donovan had no illusions about himself, nor was he given to that self-deception which so commonly marks small natures. He believed that he was born to be an actor and that he would have expressed it something that he was too intelligent and too well schooled by Old Tony not to know that the goal of his ambitious dreams was years away. He felt that for him to attain that goal was within the realm of the possible—that was all. In the meantime he was a soda jerk.

He was aware that the good people of Orchard Hill laughed at him; that they refused to take him seriously; that his ambition to be a great actor was the standing joke of the countryside; that he was held to be an irresponsible, impractical, worthless disciple of old Tony Latour's—all of which disturbed him not in the least. He had not pretended to Jimmie Harrigan that the desert did not frighten him. He made no attempt to deny his fears to himself. But there was something within him which drove him on, in spite of his fear. Perhaps Old Tony was right when he said that Pierre Donovan was a great soul.

In the first gray light of the morning he went on.

With the coming of the sun his spirit lifted. Mother Mountain had moved nearer during the night. He sang bits of comic songs. He felt confident that he would find Blackwater Tanks and Bruce.

He went on.

Again doubts and fears beset him. What if Bruce and his companion were not at Blackwater Tanks? What if they had perished of thirst and he should find their dead bodies? Dripping Spring seemed, now, an eternity away. He looked back but could not even be sure of the direction. As the man of the desert had said, there would be no Mother Mountain to guide him on his way back. The Skeleton Peaks too, were nearer and on his right lay the terrible Skeleton Sink. What if the wind should obliterate his trail? He carefully estimated the amount of water in his canteen and went on.

At last the long slope of Mother Mountain lay before him and he knew he must be near the Tanks.

(Copyright 1930 by H. B. Wright and Co.)

Gold glitters! But to Bruce to-morrow the gleam of water is far more important.

though practical service trials were carried on with installations at Bellefonte, Pa., and Detroit.

PLANTS THRIVE ON WATER TREATED WITH CHLORINE

(By Associated Press)

UARBANA, Ill., July 2.—Plants stand the chlorine disinfectant in their drinking water as well as humans.

Tests proving this are reported to the American Association for the Advancement of Science by F. F. Weinard of the University of Illinois and Paul R. Krone of Michigan State College. Florists recently asked for this information.

The plants stand up to 10 parts of chlorine per million of water without damage.

VISUAL RADIO DEVICES TO HOLD FLIERS TO ROUTE

WASHINGTON, July 2.—Fliers of the Los Angeles-Kansas City line of the midcontinent airway to have a new aid to navigation by September 1.

The radio range stations, which transmit invisible beams are picked up as guides by a device on the instrument board of a plane, are to be established at eight points by the aeronautics branch of the department of commerce.

Metallic reeds which vibrate and appear to the pilot on his course as two white ribbons of equal length are the visual guides.

The airway section, nearly 1,400 miles long, is to be the first to be equipped with the visual stations

George M. Garrett Weds Miss Tinkle

In a setting characterized by simplicity, Miss Lura Lee Tinkle became the bride of George M. Garrett in the home of Dr. and Mrs. Fred Tinkle at Winters Thursday morning at 8 o'clock.

Only a few of the most intimate friends of the couple and the bride's family witnessed the pretty ring ceremony performed by the Rev. T. E. Bowman, pastor of the First Methodist Church here.

The spacious rooms of the Tinkle home were given a pretty floral adornment and the vows were spoken beneath the arch between the living and dining rooms.

The bride wore a white sports model with deep bertha trimmed in rose and blue. Her hat and other accessories were also white.

Mrs. Garrett is the only daughter of Dr. and Mrs. Tinkle and has spent her whole life in Winters where she has a host of friends. She graduated in May from the Winters high school.

Mr Garrett is a member of a prominent family of Paris, Texas. Following his graduation from A. & M. College in 1923 he became connected with the state highway department. He came here at the beginning of highway work

in this county and was made resident engineer for the department supervising all road construction in the vicinity of Ballinger.

Immediately following the ceremony the couple left for a brief trip to El Paso. They will return to Ballinger next week where they will make home.

Ballingerite Marries Abilene Girl
Marriage of Miss Altie Roberts of Abilene, and M. B. Webb, Jr., of Ballinger, was solemnized at 10 o'clock Tuesday morning in the home of the bride's mother Mrs. J. H. Roberts, 1110 North 21st Street. The double ring ceremony was read by Dr. J. Richard Spann, pastor of the St. Paul Methodist Church.

Attendants in the wedding were Miss Thelma Roberts, sister of the bride, and J. T. Preston of Ballinger, who served as best man. The bride was dressed in a skipper blue and white sports suit, while the maid of honor wore a tan ensemble with green accessories.

The couple left immediately after the ceremony for New Mexico where they will visit Carlsbad Caverns and other points of interest. They will return to Ballinger, where Mr. Webb is an electrician, and will reside at 205 South Fifth Street.

The bride has received her schooling in Abilene, attending Abilene high school for four years. Since her graduation in 1928 she

has done work in Simmons University. The bridegroom is the son of Mr and Mrs. M. B. Webb of Ballinger and following his graduation from the Ballinger high school in 1928 attended Simmons University for three years.—Abilene News.

Poor complexions and old looking skins lack protection. Preserve your skin with the new wonderful Face Powder MELLO-GLO used by so many beautiful women. Its special tint and finish are so youthful. MELLO-GLO stays on longer, prevents large pores, and spreads so smoothly. Purest powder made and does not irritate your skin. J. Y. Pearce Drug Co.

WEDDINGS

Davis-Critz
Clayton Davis and Miss Jimmie Critz were married at the Eighth Street Presbyterian manse on Saturday afternoon of last week. Rev. J. E. Kepr performed the ceremony.

Both contracting parties have resided near Ballinger for many years and are well known in this section where many friends offer well wishes.

Businesses Which Help Build City

J. L. Hardin & Co.
J. L. Hardin was born in Runnels county a short distance from Ballinger and has resided here ever since. He claims to be a Ballinger product and upon that grounds solicits a share of citizens' cleaning and pressing business.

He entered the tailoring business in Ballinger in 1918, operating a shop in partnership with R. F. Lane. Later Mr. Hardin formed a partnership with Floyd Carr, this firm remaining intact until 1925 when the J. L. Hardin & Company was founded, located on South Eighth Street, and is still operated at the same location.

The establishment is one of the most modern to be found in this section of the country. It is exclusively a dry cleaning plant with all equipment necessary to handle all classes of work. A pleating machine and a hot head silk finishing press to take care of the most delicate of feminine apparel are included in the equipment.

After engaging in the cleaning, pressing and altering business for several years Mr. Hardin installed a modern hat cleaning and blocking department, which has proved very successful. Devoting time exclusively to cleaning and pressing, without "side-lines," is one of the talking points for this firm.

Insurance is carried on every article that enters the shop and in case of damage the customer does not lose. A pick-up and delivery system is operated to any point in the city limits and speedy service is supplied to those who are in a hurry.

No merchandise is stocked but suits made to measure are featured with perfect fits guaranteed. These suits range in price from \$16.50 to \$90.

Mr. Hardin is always willing to do his share of outside activities and takes a pride in his home town and country.

This ad is one of a series, contributed by the Farmers & Merchants State Bank in behalf of businesses which help build Ballinger. 14-37d

Kansans Propose Practical Farmer For Federal Board

(By Associated Press)
TOPEKA, Kas., July 2.—Dr. O. Wolf, of Ottawa, Kas., whom eight farm organizations of his state formally petitioned President Hoover to appoint to the federal farm board, is no theoretical agriculturist.
In the vicinity of Ottawa he owns three tracts of land: 243 acres, 160 acres and 219 acres in extent, all of which are farmed under his personal supervision.
Yet his nearly 30 years of farming have not prevented him from playing an active part in public life.
For 20 years he has been a member of the Kansas board of agriculture. He served two terms in the state senate, from 1913 to 1915, and from 1921 to 1923.
He has served as board member of a number of institutions associated with agriculture.
He is president of the Kansas State Agricultural Council, an organization seeking to correlate the work of all agricultural bodies in Kansas, and vice-president of the Council of States, fostering the Great Lakes-St. Lawrence waterway project.
The organizations seeking his appointment to the federal farm board emphasized his activity in cooperative marketing work and in "developing sentiment for support of the agricultural marketing act and the federal farm board."
Dr. Wolf was born in Ohio, but came to Kansas with his parents when he was 19 years old and has lived there since.
He is a doctor of veterinary surgery, and the "O. O." stands for "Ortho Olden."

In a normal year enough cast iron pipe is made in Birmingham, Ala., to lay a line 10,000 miles long.
A ship recently docked at New Orleans with 4270 tons of sunflower seed oil, used in making food products and soap, from the Ukraine.
Farm operators' earnings per mule in South Carolina were \$405 as compared with \$143 in 1914.

MOVIES

Ruth Chatterton's Director Places Plot First When Mapping New Production

Even a great emotional actress like Ruth Chatterton must take second place when John Cromwell stages a film and screen director, turns to making a motion picture. Cromwell scrutinizes the story first, and after that is established to his satisfaction, he then turns to the cast and the setting.

When John van Druten's story, "Unfaithful," written especially for Ruth Chatterton, was handed to Cromwell, the director put every thought of the star out of his mind and concentrated on the plot.

"Of course, we must have accomplished actors and actresses," says Cromwell, "but anyone who is a real artist develops to the heights of his talent under the influence of a strong play. The play is still 'the thing.'"

"Unfaithful," which, as a moving picture starring Ruth Chatterton, will show at the Palace Theatre for two days, starting Sunday afternoon, is the first play Van Druten, recently enticed to Hollywood by Jesse Lasky, has written directly for the screen. Just as "Unfaithful" was being released to the public, Van Druten received word that his latest stage play, "After All," was to be produced in London, and that his new novel, "A Woman on Her Way," had been accepted for publication by Alfred A. Knopf. His plays include "Diversion," "Chance Acquaintance" and "Return of the Soldier."

The cast of "Unfaithful," in addition to Miss Chatterton, includes Paul Lukas, Paul Cavanagh, Juliette Compton and Donald Cook.

Laughs Chase Pounds Away Said Doctor—Lloyd Films Aid

How would you like to laugh off a few pounds?

"Can't be done, you say, yet Dr. Woods Hutchinson, internationally famous physician, and author of many popular works on medicine and human health, recommends a good hearty laugh as one of the best corrective exercises in medical lexicon.

If the Hutchinson theory is true, those in need of weight cor-

HAROLD LLOYD in "Welcome Danger"

rection probably can laugh off a few pounds or gain a few, as the need may be, by witnessing Harold Lloyd's "Welcome Danger," which opens a two-day engagement at the Palace Theatre tomorrow. This comedy, according to advance reviews, is guaranteed to add a few pounds or destroy a couple, if weight can be influenced by laughs as Dr. Hutchinson contends.

Some might call prolonged, uproarious laughter rather ill-

mannered, but not Dr. Hutchinson, who is an outstanding authority on health and its preservation.

"Far from killing the tickled victim, such laughter probably will prolong his life, sweeten his disposition, improve his weight, if he is lean, and remove it if he is fat," according to the Hutchinson theory.

"Laughter, particularly good rollicking laughter, is more than a physical expression of pleasure and joy," Dr. Hutchinson points out. "Such physical disturbance in the first place, titillates the diaphragm, which is very good for it. Then it airs out the lungs. Also it shakes up the liver, sends oxygen-cleaned blood racing thru the body, pumps that clean blood thru all the organs, and incidentally, aids digestion and thought," says Dr. Hutchinson.

"We don't know why that extraordinary vibration of the diaphragm we call laughter should occur. We don't understand that rapid violent movement," he adds, "we have discovered that it is extremely beneficial."

"Raffles," with Ronald Colman as star, closes a run at the Palace tonight.

My home is for sale or rent. See me at home immediately. Mrs. W. L. Brown 1-8td

FATAL NAME

(By Associated Press)
ITHACA, N. Y., July 2.—Sure death for clothes moths in any stage, even the eggs is found at Cornell university in paradichlorobenzene.

This chemical is a coarse, white crystalline substance derived from benzene. In air it turns into a vapor more than five times as heavy as the atmosphere. It has an ether-like smell.

Paradichlorobenzene must be used in air-tight containers. A heaping teaspoonful in an ordinary sized trunk, perfectly sealed, exterminates all stages of moths in about one week. In a report to the American Association for the Advancement of Science, Glenn W. Herrick professor of entomology, and Dr. Grace H. Griswald state:

"The experimental evidence is rather clear that the fumes of paradichlorobenzene are toxic to the eggs, the larva and the pupae of clothes moths. It is also evident that infested clothing stored in tight boxes, trunks, closets and even in paper bags of the right type may be surely protected by the use of paradichlorobenzene."

There are 17,700 hotels in the United States exclusive of boarding houses and tourist auto camps.

Renew Your Health by Purification

Any physician will tell you that "Perfect Purification of the System is Nature's Foundation of Perfect Health." Why not rid yourself of chronic ailments that are undermining your vitality? Purify your entire system by taking a thorough course of Calotabs—once or twice a week for several weeks—and see how Nature rewards you with health.

Calotabs purify the blood by activating the liver, kidneys, stomach and bowels. Trial package, 10 cts. Family package, 35 cts. All dealers. (Adv.)

Scout Session at Eight Tonight

Scoutmaster J. G. Tuckey Thursday issued an official call to all scouts in Ballinger to be at the City Hall Auditorium Thursday night at 8 o'clock for the Court of Honor. This invitation was also included to the general public with the council members joining in urging that business men and women be present for the session.

A number of visitors from San Angelo will attend the meeting including John Y. Rust, a great scout man who has done much in West Texas for the promoting of scouting. Bryce W. Draper, scout executive of the Concho area will also be present and members of the press from that city. A large crowd is expected to witness the short ceremony at which time fifteen awards will be made and the boys examined as to proficiency.

Sam Malone, Jr., will be examined as an Eagle scout at the session tonight. He is the second here to reach that place in scouting and it is considered a great honor to have the rank of Eagle scout and few ever attain it. Officials here stated Thursday that only about 75 Eagle scouts are to be found in the entire area.

Ballinger was recently transferred from the Chisolm Trail Area to the Concho Area and tonight will be the first visit here from leaders and directors of this new area.

The session will start promptly at 8 o'clock and will be over in time for those who desire to attend the band concert. A large

number of the scouts are members of the band and will be needed in the concert when it starts.

GENEALOGIST SEEKS PARCHEMENT BURIED WITH RABBI'S BODY

(By Associated Press)
WASHINGTON, July 2.—Exhuming the body of an eighteenth century rabbi in a cemetery in Czechoslovakia will be the next step in the ancestor hunt in which Viola Root Cameron, international genealogist, is almost continually engaged.

Mrs. Cameron, blonde, small, quiet-mannered, hopes to find with the body a parchment which will supply some missing branches on the family tree of a wealthy New York client. She will go to Europe this summer personally to oversee the exhumation.

Such parchment, she says, were buried with the rabbi in the eighteenth century. The one she seeks was written between 1750 and 1800. If procured it will open a whole new field in tracing ancestry she believes.

ST. PAUL STATION CLAIMS FASTEST PROGRAM ON AIR

(By Associated Press)
ST. PAUL, Minn., July 2.—The fastest 15 minutes of music on the air is claimed for the quarter-hour of piano and vocal harmonizations over KSTP every Sunday evening at 8 o'clock (CST).

Two pairs of flying hands and four male voices alternate in presenting choruses of popular songs, speeding from each into the next.

The program moves so rapidly that 14 numbers are unreel in the 15 minutes, still leaving time for brief announcements.

Buy your printing at home.

HORIZON GUIDE HELPS PILOT FLY "BLIND" ON EVEN KEEL

(By Associated Press)
OAKLAND, Calif., July 2.—The "tyro-horizon," installed in the cockpits of Boeing airplanes flying the transcontinental and the coastal mail, has proved its value when the natural horizon is obscured, or in blind flying.

The instrument's face is circular, with blue on the upper half for the sky and a bar across the face representing the true horizon. Fastened to the outer case of the device is the outline of a small airplane representing the ship in which it is installed.

In flight, the model is kept in proper relation to the bar representing the horizon.

EVERGLADES' SUGAR CROP TOTALS 50,000,000 POUNDS

(By Associated Press)
CLEWISTON, Fla., July 2.—More than 50 million pounds of raw sugar was produced in the Florida Everglades this year.

The grinding plant of the Southern Sugar Company here has finished its season's operations with a total of 51,953,000 pounds.

There were 2,202,372 gallons of molasses extracted from the cane ground here.

Sugar cane harvesting machines were used on this project for the first time this year.

A West Texas league, probably class D, is being talked in Panhandle region.
