## Guarding Tomorrow's Freedom

How to maintain a lasting peace . . . how to preserve full employment . . . how to ward off recession . . . how to keep our high standard of living. Those are problems which continually face the Government of our country.

Tomorrow they may blaze into issues that must be solved by the factions and interests that make up our democracy. Each of these factions and interests will demand to be heard - and they will

The press of America will report and comment on what each and every party to an issue has to say. The public will know what is going on.

It is only thus that the best interests of America

can be served over and above the interests of any one faction or any limited-interest group.

This vital function can be performed only by a press that is free to write and free to publish the story of national issues, unfettered by dictation from any source.

Today's freedoms can be secured and tomorrow's freedoms guarded only by a press that owes allegiance to no ogre of tyranny bent upon shaping our destiny to suit its own ends.

If the press of America is, in a real sense, to remain the guardian of our future, we must preserve the freedom it possesses today.
