# we mean business!

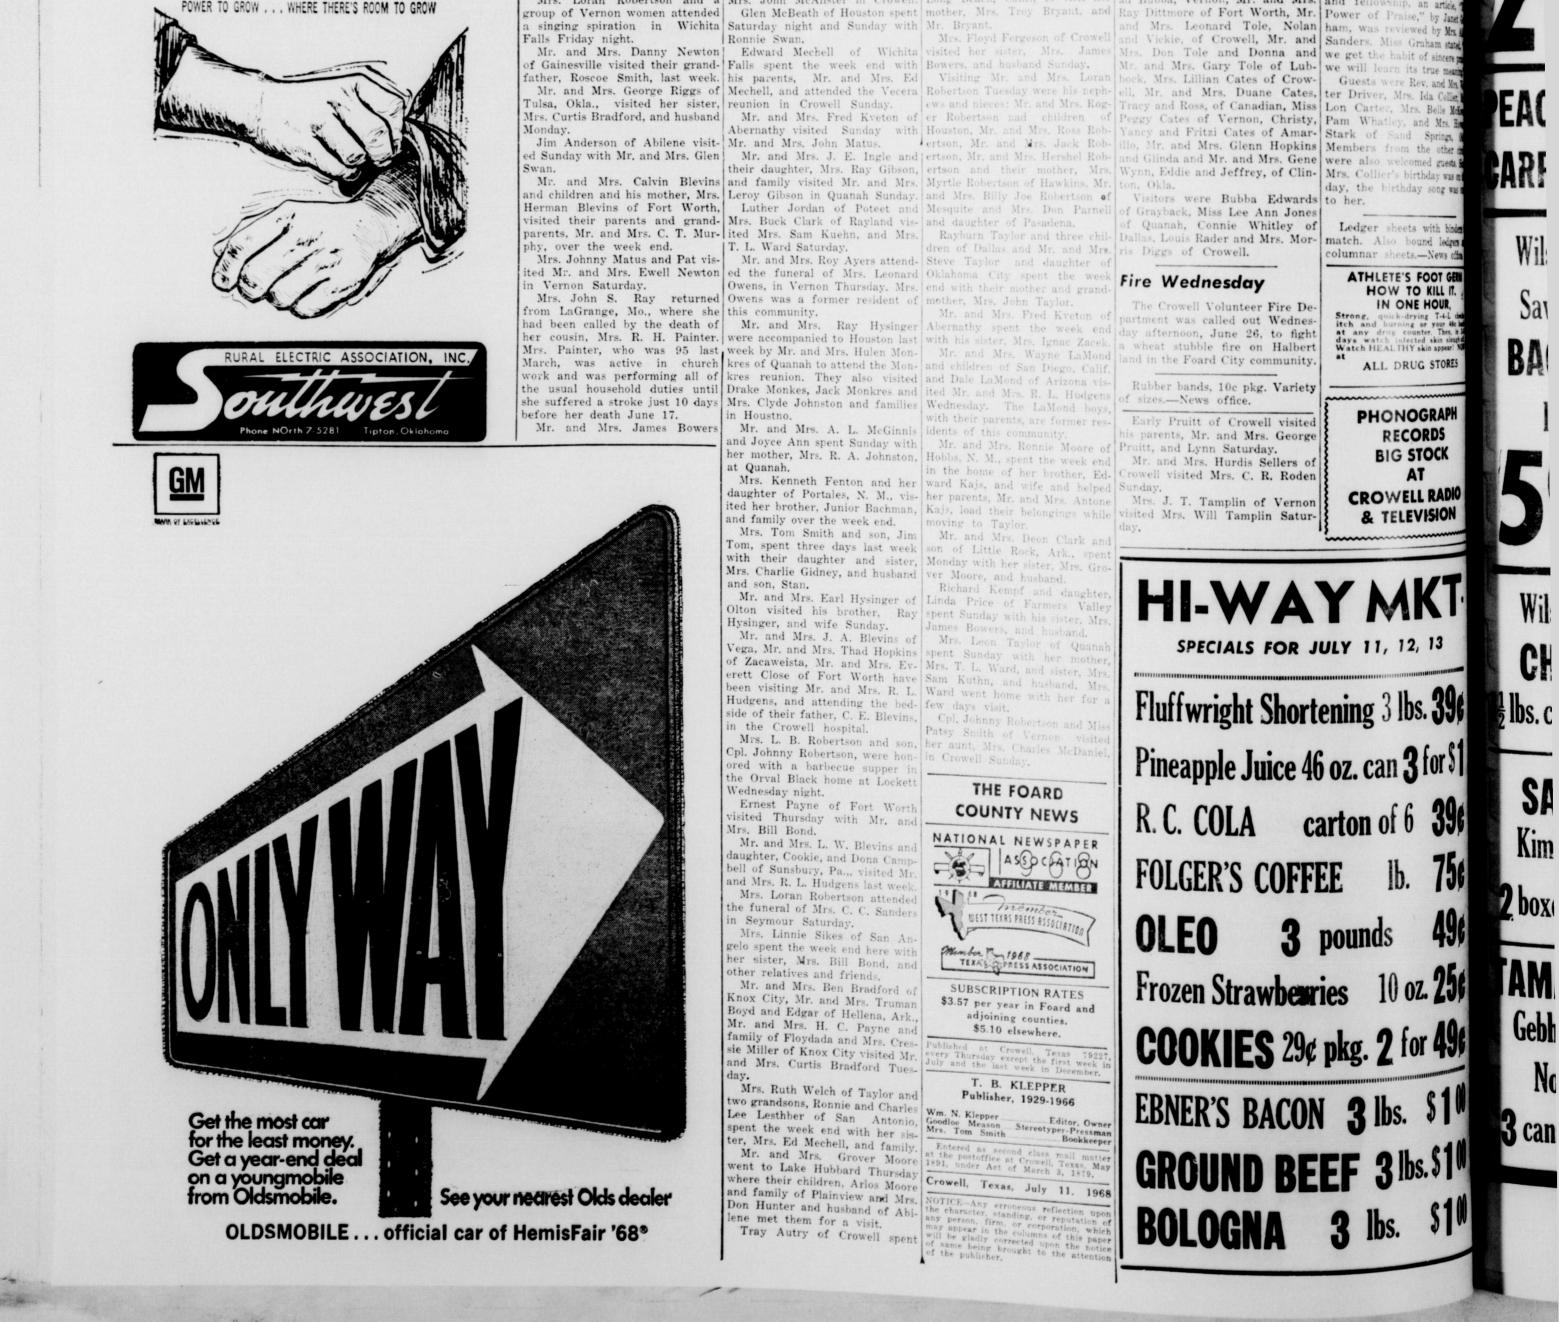

Lots of it! Because business grows where electric power goes. For many reasons.

For every \$1.00 we invest in equipment and materials, our consumers spend at least \$4.00 for wiring, appliances and labor-saving equipment.

Because electric power is available, business and industry can locate in this area. New jobs and payrolls result. More business.

But, we're just getting started. The future is in motion in the Southwest. We're rolling up our sleeves to the job ahead. Planning and building, to assure a dependable supply of low-cost electric power. We really mean business!
