Dependable Treflan takes care of the major weed and grass problems in guar. Broadcast Treflan and your guar's protected through its growing season. Because guar is sensitive to cultivation, look into Treflan this year. It controls 28 weeds and grasses all season. And fewer weeds mean higher yields. Guar acreage is expected to double this year. The average mother, we've been told, walks more than 8 miles every day. Why not give her feet a break this Mother's Day: make sure she's got a phone within answering distance. An extension (in the kitchen or bedroom or laundry room) costs just a few cents a day. There's no faster relief for aching feet.

# TO THE PEOPLE OF THE 80TH LEGISLATIVE DISTRICT:

I have always been appreciative of your support of my candidacy for the Legislature, but this year I have special reason to be so, in view of the length and nature of the attack that has been made upon me and my official record.

But my disposition is to leave unpleasant recollections to the past and look to the future. Winning the Democratic nomination is only part of the job this year. Republican State and National leaders have selected me as a prime target in their effort to discredit the Democratic Party record of long control in State affairs.

My hope is that all who voted in the Democratic primary last Saturday, and hundreds of Democrats who didn't go to the polls Saturday will join in rolling up the biggest margin ever given to the party ticket in November.

Thank you for support, and let's see that a big turnout of Democratic votes are registered in the 80th Legislative District this Fall.
