The period from Nov. 20-26 has been officially proclaimed by President Nixon as Farm-City Week in the U. S. Charles K. Baker, extension economist, says we all have a stake in the observance. Nowhere else in the world, he points out, do so many depend upon so few for their food and fiber needs. The 5 per cent of our population engaged in pro-duction agriculture gives the other 95 per cent benefits unsurpassed anywhere. And food, Baker, adds. is still the number one bargain in this country. Only 16.5 per cent of our income went for food in 1969 compared with 24 per cent 20 years ago.
