## "TWO BITS WORTH"

BY JOHNNY VALENTINE

David Wilkerson, author of the current best-seller, "The Cross and the Switchblade," told of a lesson his grandfather had taught him about prayer. His grandfather said, "David, the day you learn to be publicly specific in your prayers, that is the day you will discover power."

"I want you to read a man's prayer that was public, specific and powerful. This prayer was uttered by Dr. Levi M. Powers at the inauguration exercises of the Municipal Council of Gloucester, Mass., on January 3. The local newspaper said of the prayer, 'Some of those present sat as if stunned. Some were plainly shocked. But there was a noticeable tendency to applaud at the close.'"

Read this prayer, and I think you will understand their reaction. Dr. Powers prayed:

"Almighty Father, we begin today a new year of civic life. We know that no matter how much You may want to bless this city, You cannot do it unless the citizens are willing to be blessed."

We pray, therefore, first of all for the voters of this city. There are some too lazy to vote but not too lazy to grumble. Bless them.

We pray for the taxpayers who want good streets, good schools, good fire and police protection and good health officers but who wish other people to pay the cost.

We pray for those businessmen whose votes are determined by the expectation of special favors for themselves. Bless them if You can.

We pray for those who believe that all laws should be enforced except the laws they do not like.

We pray for the comfortable who do not care about anything so long as they are left at ease.

We pray for political managers who swap votes and sell out their friends and let bad candidates go unopposed.

We pray for ministers who say what is pleasant to hear rather than what is true.

We pray for all connected with newspapers who openly advocate civic righteousness and secretly promote crooked politics. We wish, O God, that all these people might be blessed, but perhaps we are asking too much. It may be that the only thing you can do is to let them go to hell where they belong. You know best.

But, O God, before There are those who can be blessed, those who may be a blessing to themselves and to the world. Here today are hundreds of young men who soon will be voters. Bless them with a vision of the world that ought to be and will be when we are wise to our own good. May each one think of his home not merely as the house in which he lives but as a city of which he is a part. May he see how much finer and better life will be when each one works for all and thinks for all and all for each. Finally, we are here this morning, O God, to induct five men to office. It will be their duty to think and plan not for any one class but for all of us, not for the best citizens, not for those who pay the taxes merely, but for those who earn the money to pay the taxes. Help them, O God, to plan and act honestly, bravely and efficiently for the good of all. That prayer was spoken in 1916, but it fits our day quite well, doesn't it?

## Smallpox Immun Deleted By Schools

The Tahoka I.S.D. Board of Education, in its January meeting that was held Thursday evening, January 13, deleted the smallpox requirement from those immunizations required of students entering Tahoka Schools. The action followed that of the State Board of Health in deleting the smallpox immunization from those required by the State of Texas.

Senate Bill 27, of the 61st Legislature, set forth the following immunization requirements for Texas School children:

1. Diphtheria, 2. Tetanus, 3. Polio, 4. Measles, 5. Rubella 6. Smallpox.

The above requirements were subsequently adopted as local requirements by the Board of Education. Prior to this immunization requirements for the Tahoka Schools consisted only of the requirement of smallpox immunization. The others were encouraged. Senate Bill 971, of the 62nd Legislature, amended the law to enable the State Board of Health to modify or delete any of the six required immunizations listed above. On November 8, 1971, the smallpox requirement was deleted by the State Board of Health.

A series of local clinics for the immunizations other than smallpox were held on November 5, 1971, December 3, 1971, and January 7, 1972. Clinics have been directed by Mrs. Jean Harvick, School Nurse, and Larry Wilson, North Elementary Principal. Help in the planning and operation of the clinics has come from the Department of Public Health Unit in Lubbock and lo-

cal volunteer workers. Vaccines have been provided by the State Department of Public Health.

Rubella vaccine has been given 421 pupils while measles vaccine has been given to 234, Diphtheria - Tetanus to 549, and oral polio vaccine to 571.

In other action the Board accepted the resignation of Mrs. Suzanne Stearnes, Special Education teacher at North Elementary School, who resigned due to family health reasons.

Various reports were received by the Board, among which was the current enrollment report showing 1,109 students enrolled as of January 13.

Board members in attendance were Joe Brooks, President; Ruben McElroy, Vice President; James Brookshire, Secretary; Dan Curry, Maurice Huffaker, Othell Meeks, and Kenneth Turner. Mrs. Peggy Elliott and Superintendent Harold Reynolds also attended.

## Harvest 80 To 85 Per Cent Complete

The South Plains cotton harvest was eighty to eighty-five per cent complete on Friday, January 14th, according to W. K. Palmer, in charge of the U.S.D.A. Cotton Classing Office in Lubbock.

Cotton harvest operations continued over the area during the week but began to decline slightly on Friday as the harvest neared completion.

The U.S.D.A. Classing offices at Lubbock Brownfield, Lamesa and Levelland classed 135,000 samples during the week ending Friday, January 14th, bringing the season's total to 869,000. At this date last year the 1970 harvest was virtually complete and samples from 1,619,000 bales had been classed.

Grades of the cotton classed at the Lubbock office were about the same as those of the previous week.

Low Middling Light Spotted was the predominant grade at Lubbock last week with 40 per cent of all cotton classed. Strict Low Middling Light Spotted made up 15 per cent, Low Middling 8 per cent and all Spotted and Tinged grades 28 per cent.

Staples were predominantly 29 to 31. Twenty-eight per cent had a staple length of 29, 53 per cent stapled 30 and 11 per cent was 31.

Only three per cent of the cotton "miked" in the Lubbock office was in the premium range of 3.5 to 4.9, 5 per cent "miked" 3.3 and 3.4, 26 per cent 3.0 through 3.2, 44 per cent was 2.7

This is "3.76 in '76 Week" in Texas. What does "3.76 in '76" mean? It means a billion dollar increase in agricultural income by 1976.

A statewide program to increase Texas agricultural income by more than a billion dollars by 1976 was announced by Dr. John E. Hutchison, director, Texas Agricultural Extension Service, in January 1970.

This goal calls for \$3.76 billion in total cash receipts by the end of the 1976 crop year, not including government payments. It was determined from projections by Extension specialists and individuals in the agricultural industry. A committee of agricultural economists with the Extension Service studied past production records and made projections for 1976 based on current trends and expected improvements in technology and marketing.

Projections on an individual county basis were made by Program Building Committees, composed of business men and producers. The expectations were then organized along county, Extension district and economic area lines to give the state's producers specific projection goals. Annual goals also were determined for the various agricultural commodity groups to allow a yearly measure of the program's success.

Texas presently accounts for about five percent of the total national agricultural cash receipts. To achieve the goal of "3.76 in '76", the state must claim almost 10 percent of the projected national increase in the coming years. Extension specialists and county agricultural agents are conducting meetings with Texas producers to help them with new advancements in technology and marketing in their respective areas.

## White Reminds Farmers of Revised Qualification

Texas Agriculture Commissioner John C. White has reminded Texas farmers and ranchers of revised driver qualifications which should give significant relief from the stringent regulations that were ineffect in 1971.

New exemptions were made for farmers and ranchers by the U.S. Department of Transportation after many complaints were filed against restrictive farm driver qualification regulations last year.

The new regulations which become effective January 1 include:

1. Farm vehicle drivers operating trucks weighing 10,000 pounds or less are totally

exempt from the driver qualification rules.

2. Farm vehicle drivers operating straight trucks weighing in excess of 10,000 pounds within 150 miles of their farms are totally exempt from the rules.

3. Farm vehicle drivers 18 years or older operating a tractor-trailer unit within 150 miles of their farms are exempt, except they must be physically qualified but need not be physically examined and certified until January 1, 1973.

4. Drivers employed by custom operators are granted total exemption while transporting custom harvesting machinery to or from a farm

and while transporting the custom-harvested crops to storage or market.

5. Beekeepers transporting bees during seasonal movements are exempt.

The original regulations requiring drivers to be 21 years of age, submit to road tests, written and physical examinations, background checks and other regulations imposed undue burdens on farmers whose families helped in growing and harvesting crops, Commissioner White said.

## Texas Lions Camp In Kerrville

In these days of massive governmental expenditures and skyrocketing welfare costs, it is refreshing to note that the Lions of Texas are continuing to increase their assistance to handicapped children - without cost to them or their parents.

Since 1953, the Texas Lions Camp for Crippled Children in Kerrville has provided two weeks of summer fun - free - for more than 13,000 blind, deaf, mute and crippled youngsters. And last summer, the camp was enlarged to serve 150 children by sponsoring a three-week summer camp for diabetic children, using leased facilities at Friendswood.

Nobody ever asked to come to this world - let alone to enter it with a physical handicap. But these uninvited tragedies of birth or childhood are made somewhat bearable by the compassion of Texas Lions who make possible the unfettered joys of the outdoors and the confidence-building companionship of other handicapped

children. Right now, there are 900 summer vacancies at the Kerrville facility and 110 at the diabetic camp. If you have, or know of, a handicapped youngster between the ages of seven and 16, you are invited to contact the Tahoka Lions Club. Or, you can write the camp directly for more information.

## Mothers March January 27

An American tradition will continue on January 27, 1972 as March of Dimes volunteers ring neighborhood doorbells on behalf of the Mothers' March against birth defects. Farrell Murph, chairman of the annual drive, urges wholehearted support of this appeal to improve the quality of life at birth. "Until we can protect some quarter of a million infants every year from lifelong handicaps, everyone must help," Murph explains. "In recent years, an increasing number of men have offered their services too."

Mr. Murph cites the rubella vaccine, Rh serum and rapid advances in treatment at birth as exciting progress in the quest for a healthy birthright for all children.

This year the Rainbow Girls have consented to collect for

the Mothers' March. Please accept them with a check.

The March will start at 6 p.m. and we hope to be finished by 8 p.m. Thousands of defective children yet unborn will thank you for your support.

## Wood's Nephew Research Director

Dr. H. C. Cox, a U. S. Department of Agriculture scientist since 1953, has been named the Director of the Entomology Research Division of USDA's Agricultural Research Service.

# SOIL CONSERVATION NEWS

BY RICHARD CHRISTIE

The ecological environment in which we live is very important. Therefore, what is done on a piece of land is important to everyone. It not only affects the owner, operator, neighbors; it in some way effects the whole world God created. There is not any land being created so what we have on earth is all that we have to sustain life from now to eternity.

In an apt "sudio intellectual" (Johnny - come-lately) ecologist. I am an alive breathing every day professional concerned about what is being done with the resources. The Good Lord has loaned us to use while on this earth. We as Americans are only as wealthy and as well-off and secure as the natural resources of our land, soil and water from which all things are made.

Many of these "Eco-nuts" that try to scare people into action are probably concerned but not properly trained and prepared to intelligently evaluate the situation. Most of their alarm is emotional and not soundly based on scientific knowledge. All that has changed is the quantity with which we live and our ability to detect such things as mercury in fish, hormones in

meat, phosphates in water and other things that people predict the end of the world by.

We have seen a complete reversal in Agriculture from the time that the consumers taste were only allowed what the producer was able to produce into a day when the producer is at the mercy of the people who service and process his goods, which is mainly the consumer. This may have more impact on Agriculture than the Industrial Revolution did and you must admit the tractor made a very great change. In this time, when we are changing let us be sure we know the facts, understand them well and present them to all expertise.

Let the city people know that only two per cent of the Texans are directly related to farms and ranches, but that 40 per cent of the people in Texas make a living directly from agricultural related industry. Make them also aware that a 1 per cent stimulation to the local economy of rural Texas will return a 16 per cent stimulation in area economy. And that is the best return I can find and all bankers would surely agree. In a day of Social Revolution don't let Agriculture take a back seat or we all will loose.

To us, "reserve" means the supply of electricity we have left after you, industry, business and public authorities have used all the electricity you want. We've never had a blackout in the area we serve by reason of not having enough left. We've always made sure that there would be plenty for your use ... an adequate reserve.

Monday the week started off good with Mrs. Hammonds and ladies playing the piano and leading us in singing. We still need your help - won't you come next Monday between 2:30 and 3 o'clock and help us sing?

We have a new patient. She is the mother of our Director of Nurses, Toybell Uery. We know you'll help us welcome, Mrs. T. M. Barton.

Mrs. Vester Stone came to the home Thursday. She stated her daughter and son-in-law, Mr. and Mrs. Colyer had both been sick. Mr. Colyer was hospitalized Tuesday, after Mr. Stones funeral, with pneumonia. The report is that he is home now and feeling better. Mrs. Stone will go to New Mexico to stay with them

Mrs. Tom Hale Sr. and Mrs. Tom Hale Jr. came to visit us Saturday with one of their good cakes. We welcome their visits as we learned to love them dearly when they were here spending so much time with Bonnie.

All of the patients families are so faithful to come. These visits are so appreciated as the people must not be allowed to feel cut off from the homes and families.

We have a new dining room table. Now everyone can eat in the dining room at the same time. We like to take a minute here to express our appreciation to the staff of cooks. They cook good, nutritious food and strive to make everyone happy at each meal time.

**Census Bureau Survey Farms**

Shortly after the first January 1972, the Bureau of the Census will be mailing "type of farm" survey report forms to a selected group of farmers.

There will be nine different survey forms used. One each for cash grain, tobacco, cotton; potatoes, sugar and other specialized field crops, vegetables, fruit, livestock, dairy and poultry.

Each form is designed to collect information pertinent to that particular type of enterprise. Each form is signed by sections so that the answer to the lead question is "no" the farmer skip to the next section.

The trends shown in the Census of Agriculture indicate that there is an increased degree of specialization. Completion of the "type farm" survey report form will help obtain a truer more complete picture of specialization and may set a pattern for future census agriculture.

## LOCALS

Mr. and Mrs. Allen Jolly and Mr. and Mrs. Dave Hubbard visited in the Thomas Jolly home, in Snyder, last Sunday.

The coming season's cotton yields in Lynn County can be influenced by soil management and weed control practices during the winter months. Timely land preparation is the first step for a successful weed control program.

Uncontrolled winter weeds are moisture and plant food robbers, both vital to top production. In addition to regular land preparation, there are major weed control methods that can be carried out with machinery or through the use of chemicals.

The mechanical methods include bedding, bed shaping, and bed knifing.

Cotton producers have a wide choice of materials available for chemical weed control. Two are soil incorporated herbicides, Planavin and Treflan. Many growers look with considerable favor on these materials. They can be applied beginning in late November or in December.

## Church News

Visitors attending services last Sunday at the First Baptist Church were Mr. and Mrs. Paul Manning of Abilene, Mrs. Winnie Wooten of Corpus Christi, A. C. Hardin of Carbon, Jana and Tadd Jourden of Sundown, Karen Craig and Inola Thomas, both of Tahoka.

The herbicides may be incorporated into the soil by broadcast disking with tandem disks or with a roto-tiller. These two herbicides keep winter weeds, under control if conditions are normal until planting time.

Under high moisture conditions herbicide treatment just before planting is often necessary for the control of early Johnsongrass. DSMA alone or in combination with material such as Karmex is excellent.

These precautions should be observed if you are incorporating herbicides this fall. If lower amounts of water are used with herbicide applications, calibrations are very important. Application equipment should be checked daily for nozzle wear and accuracy of pressure gauges. Excellent tools for applying Planvin and Treflan on a band basis are the roto-tiller incorporator used in combination with a bed thus doing two things with a bed shaper, thus

doing two jobs at the same time. I have available a new publication on weed control cotton plus fact sheets on subjects dealing with conditions which should provide growers with valuable information.
