Banking History Told By Speaker

Banking started with the "changers" 4,000 years ago in the Tiber River valley in Italy. The first bank in England was established in 1554 and the first in the U.S. was established in 1790. In 1863 the first national bank was established in the U.S. and the Federal Reserve System was established during World War I.

Not until 1863 was the first national bank established in the U.S. when a controlled of the currency was named, and since then private banking institutions have almost vanished, and all banks have come under state and federal regulation. The Federal Reserve System was established during World War I, and the Federal Deposits Insurance Corporation was instituted in 1935. Today, deposits of up to \$20,000 for individual accounts and up to \$80,000 for a family.

Qualified Voters Urged To Polls

Lynn County School and city elections are upcoming this Saturday, April 1. There are contests for trustee in all four Lynn County school districts with several people having already voted absentee. Absentee voting ended Tuesday, March 28.

In Tahoka district, incumbents R.E. McElroy and Dan Curry, on the ballot for re-election, are being opposed by Robert Warren and John Curry. Two places are to be filled. Seven candidates are seeking two places on the Wilson board. They are Poy Lynn Kallich and Alvin Kitten, present board members, plus Pedro Arellano, Donald Klaus Arlis Ehlers, Monroe Talkmitt and Thomas Autry. At New Home, there are four candidates for two places. Dick Turner and Orville Ray Phifer have filed for re-election and also on the ballot are the names of Cates Zant and Donald Hancock. Voting will be at both Lakeview and New Home school.

Five men have filed at O'Donnell for two places on the board there. They are Kenneth Eaker, Benny Clark, Elton Childress, David Franklin, and Harold Mires.

Also, two members are to be elected to the county school board. Filed for re-election with no opposition are Graham

Q. Hensley of Commissioner's Precinct No. 2 and Harlan D. Dean of Precinct 4.

Members of the City Council of the four Lynn County towns will also be named in the annual elections, also set for Saturday, April 1.

Tahoka has five candidates for three places on the City Council. Names of Austin E. (Bob) Haney, Johnny Valentine and J.D. Atwell are filed for re-election, and also filed are the names of E.T. Cloe and John Ed Redwine. Atwell is currently filling out the unexpired term of Alton Cain, who resigned a few months ago.

Wilson is holding two elections in one on April 1. Two council members are to be elected from a field of four candidates. Carl Grider is seeking re-election and other candidates are Lupe Arellano, Pat Campbell, and Alfred Clary. J.W. Morton, present member, is not seeking re-election.

City of Wilson is also presenting a city sales tax proposal to voters. Wilson is one of the few remaining area towns without a city sales tax. Council members state rising costs are putting pressure on city finances, and the small one cent sales tax would greatly help the city meet its obligations and possibly prevent a raise in property taxes. There is no contest

at O'Donnell, where Harold Barrett is filed for re-election as mayor, and Councilmen Oscar Veach and Herman Lawton have also filed for re-election. Three councilmen are filed at New Home unopposed. They are Freddie Kiehl, Gene McKee, and Clifton Clem.

Linda Huffaker, CHD Agent, Says.....

The tradition of Easter eggs came to the United States from Europe.

In Ireland, the Lenten Fast is traditionally broken at dawn on Easter Day with a meal of eggs.

In Italy, it's popular to pay calls to other homes on Easter Sunday. Everyone who enters the house is offered one blessed Easter egg. A host would be offended if this symbol of the Resurrection were refused.

In the 17th century, it was customary for the people of the British Isles to write messages on eggs at Easter and or relatives. For generations people in the Ukraine have covered eggs with intricate designs resembling stained glass windows. It may take several days of tinting to cover a single egg with these designs.

The agent explained that the White House Easter egg roll was started on the Capital grounds in 1810. When children were denied use of these grounds in 1878, the egg roll moved to the White House lawn and has become a tradition there.

Eggs are a highly nutritious food. Not only are hard-cooked eggs a part of the Easter tradition, but they provide an excellent way to serve eggs. In preparing your hard-cooked eggs for Easter decorating and eating, obtain best results by following a few suggestions. These will be especially helpful if you've had trouble in the past.

To prevent cracked shells when using eggs directly from the refrigerator, the agent suggested warming them a few minutes in warm water before placing in boiling water.

Next, lower the eggs into the boiling water carefully. Reduce the heat and hold the eggs at a simmering temperature (185 degrees F.) For 18 minutes. Higher cooking temperatures or longer cooking time causes the white to lose its tender texture and become rubbery.

Remember to remove the eggs from the simmering water immediately and place

under cold running water (60 degrees F. or less) until cool. This helps prevent the dark green color around the yolk.

Crackle the shell and peel from the large end. To crackle a shell, roll the egg between two hands or crack the shell thoroughly all over the egg in some other way. It's often a good idea to place the egg under running water to peel it.

Of course, you won't want to peel the eggs until after they've been decorated with food color. Let the children find the eggs and then refrigerate until time to eat them.

Brock will do his graduate work at Texas Tech. He is one of 550 students awarded a three-year fellowship which may be used during a five-year period. The winner is the son of Mr. and Mrs. Charles Brock, 3406 45th Street. He is a graduate of Tahoka High School.

More than 5,600 students competed for the fellowships which carry a stipend of \$3,000 per year for full-time study.

On March 12, Brock received individual honors for bringing distinction to Texas Tech at the annual University Recognition Service. In February he was one of four engineering seniors recognized for "outstanding achievement" by the Engineering Students Council. He has been on the dean's list for academic achievement each semester since 1968.

He was Texas Tech's representative Monday (March 20) in a competition among five Texas universities held to select a winning paper written by an engineering student for presentation at the Southwestern Institution for Electrical and Electronic Engineers (IEEE) meeting in Dallas in April.

In addition to his student work Brock is an accomplished organist and has

played the cornet in the Texas Tech band for more than three years. What time he has for sport is usually spent playing tennis.

Brock has served as president of the IEEE student chapter at Texas Tech. He is a charter member of the Texas Tech Astronomy Club and served one semester on the Engineering Students Council. He is a past president of the College and Careers Class at St. Lukes Church. In addition he holds numerous memberships in professional and honor societies.

Brock was twice selected for an Undergraduate Research Participation program sponsored by the NSF at Texas Tech. He was named the highest ranking student in the College of Engineering in 1970 and 1971.

Texans have just a few days more -- until April 5 -- to register to vote in the May 6 primary elections.

Major state candidates, including Gov. Preston Smith, viewed with alarm registration totals so far. They noted that less than 3.8 million had registered as of last week-end, although there are nearly 7.7 million qualified voters in the state.

Present registrations are trailing the corresponding period in 1968 by 294,000 and the 1970 figure by more than 370,000.

In 1968, observed gubernatorial candidate Frances Farenthold, 64 per cent of qualified voters were registered before the primaries. This year, only 48 per cent of the potentially eligible are registered. Former U. S. Sen. Ralph Yarborough pointed out that 63.4 per cent of those

qualified registered in 1970, and the 1972 dropoff is reflected in many "working class" neighborhoods.

Nearly one million more should register by April 5 if previous patterns are followed, Smith said.

Under the state's new voter registration system, which candidates Farenthold and Yarborough lauded as one of the nation's best, citizens have until 30 days before an election to register and become eligible to vote.

The U. S. Supreme Court threw some confusion over the registration system with a ruling that 12 months' state and six months' local residency requirements for voter eligibility (like those of Texas) are unconstitutional.

The High Court said 30 days residency is sufficient for any state. Secretary of State Bob Bullock took the case under study. Special legislative attention may be necessary. TPA POLLS NORTH AND EAST TEXAS -- Editors and publishers were polled at the annual meeting of the North and East Texas Press Association in Palestine last week.

First question was -- "Who will carry your county in the primary?" In the Democratic Governor's race, the newsmen voted: Barnes, 25; Briscoe, 20; Smith, 8 and Farenthold, 3; Republican gubernatorial candidates rated were: Fay, 12; Grover and Reagan, 9 each. In the Lieutenant Governor's race it was: Hall, 27; Connally, 14, and Hobby 12.

The editors selected Sanders 28 to 19 over Yarborough in the U. S. Senate primary. Asked whom they would vote for personally, the tally read: Briscoe, 19; Barnes, 14; Smith, 8 and Farenthold, 5.

They selected Hall, 26 over Hobby, 10 and Connally 7. In

the U. S. Senate primary they voted for Sanders 18 to 7 over Yarborough. In the 1972 General Election poll they voted for Tower 21 to 5 over Sanders.

SPEAKER'S BATTLE LOOMS House Speaker Gus Mutscher, appealing a bribery consent conviction in Sharpstown stock scandals, announced he will step aside as speaker.

The long-expected move set the stage for a head-on battle for the key presiding officer's post when Governor Smith calls a special legislative session.

Reps. Rayford Price of Palestine and L. DeWitt Hale of Corpus Christi both claim majority support to take over the gavel during the special session. Hale has agreed to serve only as interim speaker and pledges he will not seek the job in the 1973 regular session. Price is considered the leading candidate for speaker in 1973, but he wants to take over at the first opportunity to enhance his long-term chances.

Most other speakership hopefuls line up behind the Hale interim bid. Rep. R. B. McAlister of Lubbock, radio-television executive, announced he also will seek the speaker's position in 1973.

INSURANCE RATES AGAIN. Insurance Board Chairman Larry Teaver lambasted two Board colleagues for proposing a \$27 million homeowners increase which he termed "unnecessary, unjustifiable and an insult to the intelligence of the people of Texas."

Board members Ned Price and Durwood Manford denied any new rates have been finally adopted and said they likely won't be before June 1.

Teaver, who advocates a \$14 million decrease in fire and other building coverage, called another meeting for March 29 to review Board actions and to recommend an "economic trend factor" be kept out of rates pending a study of the price freeze and inflation.

DEMOS LEAVE OFF DST. Democrats ignored a legislative resolution directing a May 6 statewide (non-binding) vote on daylight saving time. Republicans put the issues on their ballots.

Authors of the resolution, Reps. Hilary Doran of Del Rio and John Poerner of Hondo, blasted Democratic Chairman Roy Orr of DeSoto who accepted responsibility for the omission. They also petitioned the State Democratic Executive Committee to reconsider and overrule Orr.

COURTS SPEAK -- The State Supreme Court April 26 will hear a lawsuit concerning invasion of privacy and whether a telephone company owes customers protection from a wire tap by an employee.

Court of Criminal Appeals granted a new trial for a Smith County man convicted of raping his sister-in-law.

The State Supreme Court declined to issue orders under which an Austin investor sought to require a deposition from a San Angelo Savings and Loan Association president which may touch on stock scandals.

A \$55,500 claim by a Houston couple against the city as the result of their son's drowning in a garbage dump was refused by the Supreme Court. HOSPITAL BUDGET COMPLICATED -- Texas Department of Mental Health and Mental Retardation will seek \$141.8 from the legislature for its 1973 fiscal year operations.

Major requests will include a new children's psychiatric unit at Austin, alcoholism and drug abuse programs at Big Spring maximum security buildings at Rusk and a critically needed 100-bed treatment facility for drug abuse patients at San Antonio.

Other major allocations are sought for the Rio Grande State Center for MH-MR, construction of an El Paso State Center for Human Development, community-based MH-MR services, funds to meet Medicare-Medicaid certification requirements, a new drug dependent youth program at Vernon Center South and

new intensive treatment centers in Houston and Dallas. SPECIAL ELECTION SET -- A special election has been set for June 13 in Jefferson County to fill the unexpired term of the late Rep. Will Lee Smith of Beaumont.

Smith, dean of the House of Representatives, died March 17 of a heart attack. He was unopposed for a 13th term in the Democratic primary.

APPOINTMENTS -- Four were named by Governor Smith to the new Texas Council on Marine-Related Affairs. They are Dr. John C. Calhoun Jr. of College Station, John J. Pepe of Houston, James J. Flanagan Jr. of Port Arthur and Joe B. Harris of Austin -- all appointed for six-year terms.

Smith also announced re-appointments of the following to the Board of Trustees, Texas County and District Retirement System as well as appointment of Dallas County Judge W. L. Sterrett: County Commissioner A. J. Ploch of San Antonio, Tarrant County Criminal Court Judge J. C. Duval of Fort Worth and Lamar County Judge Lester Crutchfield of Paris.

Lynn Smith's Funeral Held

Services were held at 3 p.m. Friday in Calvary Baptist Church in Brownfield for Lynn Ernest Smith, 67, of Brownfield who died about 11 15 a.m. Wednesday in Methodist Hospital in Lubbock after a lengthy illness.

Officiating was the Rev. Clarence Branch, pastor, with burial in Terry County Memorial Cemetery.

A native of Tahoka, Smith was the first male born in Lynn County. He moved to Brownfield in 1948 and was in the custom-combining business for 20 years until his recent retirement.

Survivors include his wife; two sons, Maurice of Big Spring and Calvin of Brownfield; a brother, Herbert Smith of Tahoka; four sisters, Mrs. Eunice Livingstone of Grand Prairie, Miss Lola Smith of New Orleans, La., Mrs. Hattie Armstrong of Fort Stockton and Mrs. Leah James of Tahoka; and seven grandchildren.

Cattle Quarantine May Be Expanded

Cattle scabies quarantine on 34 Texas Panhandle counties may possibly be extended to nine more counties, according to Dr. Bill Clymer, Extension area entomologist at Amarillo.

Dr. Clymer has received word from the Texas Animal Health Commission that as of June 1, the quarantine may be extended to another tier of counties and east of the current

control area. Those that may be added to the list include Cochran, Hockley, Lubbock, Crosby, Dickens, King, Knox, Baylor and Wilbarger counties.

Clymer reports that official dipping will be required of all cattle in movement except those animals that (1) are moving directly to slaughter, (2) are moving to slaughter through a livestock market (3) are moving to a livestock

market for sale and dipping prior to release (4) are released from a livestock market to a dip point with an official permit (5) are moving to an official dip point (6) have been dipped within the past seven days (7) are from a non-control area moving through the control area with no stopovers (8) are being moved by the same owner from one place to another within the quarantined area (9) have

been dipped within seven days from scabies-infested states with permit or with a permit to be dipped upon arrival (10) are from a non-control area being moved into the control area for grazing.

"These new restrictions are being implemented in an effort to eradicate the scabies mite and prevent its spread to other areas," the entomologist concludes.

... On Advisory Board

Jack Miller Appointed To SPAG Criminal Justice Board

Jack Miller, Chief of Police of the Tahoka Police Department has been appointed to the South Plains Association of Governments Criminal Justice Advisory Committee.

The committee is charged with the responsibility of formulating law enforcement plans for this region, recommending which grants are to be made, in fact it is the most important committee which the South Plains Association of Governments has at this time.

They have to do with what cities and counties get grants for equipment such as teletypes, radios, riot control supplies and all other aspects of law enforcement in this 15 county region.

Bill Griffin,
County Agent,
Says.....

Quality planting seed is a must for farmers in Lynn County. Quality seed will insure a more vigorous plant and a more uniform stand. Certified seed are important in the production of quality cotton. Certified seed normally will produce higher yields of more uniform quality of lint.

Chemical treatment of planting seed is good insurance reduced crop yields from seed and soilborne diseases organisms. Indemonstrations in Lynn County an over-cost of a fungicide has improved stands and some increase in yield.

PIONEER SEEDS

Sign of Good Breeding

Pioneer brand grain sorghum varieties have bred-in yield potential to help farmers get the most from their good management even in the face of adverse weather, insects, or plant disease. Also, the genetic inheritance of every Pioneer hybrid is unique. Each variety is bred to bring out the special traits necessary for maximum performance in the area where it is to be grown.

Your Pioneer dealer has many varieties bred to help farmers on the South Plains turn in top yields. Some of these varieties are:

Pioneer Brand 846: excellent drought resistance — consistent high yields — MDM and smut resistant — 134-day maturity

Pioneer Brand 820: good yielder under stress, outstanding with plenty of water and fertility — MDM and smut resistant — 144-day maturity

Pioneer Brand 866: makes the most of limited water — threshes well — high yield potential — 126-day maturity

Pioneer Brand 8417: new yellow endosperm variety — full, open heads — good standability — easy thresher — MDM, anthracnose, smut resistant — 135-day maturity

Days to maturity is an averaged figure, which is affected by weather and other variables.

GOOD YEAR OR BAD YEAR, YOU'RE BETTER OFF WITH PIONEER.

COTTON TALKS

FROM PLAINS COTTON GROWERS, INC.

Computers in 1970 told Walter Kedor, writer for the American Chemical Society, that synthetic fibers would take 75 percent of the total increase in textile product consumption for the following decade. Cotton consumption, according to Mr. Fedor's computer, was to increase only 10 percent by 1980!

But Ray Joe Riley, President of Plains Cotton Growers, Inc., says this just "Ain't necessarily so," and that the projection should be followed by a question mark, not an exclamation point.

U. S. consumers, numbering 235 million by 1980, are expected to spend about \$225 billion for textile apparel, home furnishings and industrial products, compared to \$130 billion spent on those products in 1970. And Riley believes there is reason to expect that cotton can and will capture a sizable part of this 70 percent increase, noting there are potent factors affecting fiber consumption which do not lend themselves to computerized projections.

In 1971 there was a big increase in demand for cotton denims, corduroys and cords, and cotton consumption in the U. S. increased some 600,000 bales. Also there is a definite trend toward higher cotton content in blended fabrics. "And these trends were just beginning in early 1970 when all the dire predictions were being made about cotton being on its way out," Riley notes.

A comparison of advertisements in textile publications readily shows that the trend toward more cotton and less synthetics in blended fabrics is not just wishful thinking. A number of companies which two or three years ago were promoting fabrics with four parts polyester to one part cotton are now boosting three parts cotton, one part polyester. Others, while still manufacturing high synthetic content blends or even 100 percent synthetics, are stressing in their ads the similarity of the fabric to cotton cloth -- the natural look, and comfort.

"There are those who think this trend is just another passing 'fad' that will pass in the night," Riley says, "but I think they are overlooking the fact that the move back to nature and away from the world of artificial values is being made by the younger generation, and that one-half of the U. S. population will soon be in the under 30 age group."

Apparel, home furnishings and industrial uses account for 86 percent of the textile fiber consumed. With automobiles the largest industrial consumer, almost all fiber consumption is subject to the influence of fashion and consumer preference. Therefore according to Riley, a purely mathematical projection of raw figures is highly subject to error in predicting the future of either natural or synthetic fibers.

Pursuing his argument for faith in the future of natural fibers in general and cotton in particular, Riley quotes from a paper done by Dr. Robert Johnson, professor of Textile Engineering at Texas Tech and director of Tech's Chemical Processing Laboratory. Earlier this year Dr. Johnson wrote:

"Indications are becoming clearer that the labor saving and appearance retention attributes of durable press textiles no longer command the same respect they did in 1965. Certainly, people have become accustomed to these attributes so they no longer create excitement. Furthermore, the influence of the New Generation with its affinity for nature and the natural, for pure, joyous things, in its return to the fields and earth things can not be ignored. There is a dislike for synthetic, plastic, artificial unnatural things, and the impeccable facade look. Thus some of the very conditions which caused the astounding growth of synthetic fibers and the decline of natural fibers are weakening, and the tactile comfort advantages of natural fibers are once again in demand. Thus the natural inherent, and unmodified properties of cotton and wool are exactly those of in-

terest to the New Generation and the larger group around its periphery."

It follows that the resurgence of demand for natural fibers is more than just a passing fancy dictated by sales-oriented designers. It is a trend soundly based on sociological and psychological change.

And, Riley, concludes, "It may be with us for a long time to come."

Growing up

Look at your lanky, teen-age son! It's hard to believe that he once wore these shoes. It seems only yesterday that he was a baby, yet he himself is the best testimonial that the years have passed. Now he stands almost as tall as you. He is a fascinating maze of contradictions—an eager, lovable youngster one minute, a scowling, angry adolescent the next.

It takes patience to understand a teen-ager—patience, and a lot of love. Though he strives to be adult, he is still a boy. Though he clings to childhood, he is almost "grown-up." You may not always be aware of it, but he still looks to you for many things. And he sees in you an example that he will, almost unconsciously, follow in many ways.

Are you setting a good example? How about church, for instance? If you haven't been going lately, start again next Sunday for your son's sake, as well as your own. And don't forget to take him with you!
