A charter for the local Boy Scout troop for the coming year was presented at the Rotary Club Luncheon last Thursday afternoon following a brief presentation by the new Quannah Park District executive, Gerald Lamesa, a recent graduate. Dwan Lusk, president, accepted the charter in a brief response. Ralph Huffaker of the area executive board was in charge of the program and revealed the Rotary Club has sponsored a Boy Scout troop here for 35 years. Rudy Johnston. J. D. Atwell is the institutional representative.

Dale Thuren a guest from Sherrard, Ill., and formerly of Tahoka made a brief talk in which he expressed surprise at Tahoka's progress since he left here, in spite of the decline in number of small businesses. Harold Roberts arranged the day's program.

# NURSING HOME NEWS

This has been a quiet week here at the Colonial Nursing Home with visitors coming and going. Several of our people are in the Hospital. Mrs. Woods is still in the hospital. Mr. George Jones was taken to the hospital Friday. We expected him back Saturday, but he had not returned Monday night. Also Mr. Allen was taken to the hospital Monday for a X-ray. We hope they all get to come home soon. Mrs. Harson is still in the hospital at Slaton and the reports are not too good on her. We hope the next news will be better.

but we just don't have many flowers in our beds to enjoy. Ataska Messer took her mother, Mrs. Corbin out for dinner Monday. She sure enjoyed it. Two more of our people will have birthdays this month. Mrs. Harter will have hers on June 16 and Oliver Green on the 24th of June. Mrs. Jack Webb, Gala Hohn and Debbie Hohn and the G. A. 's of the First Baptist Church of O'Donnell came to sing for and gave each resident a flower arrangement and scripture card holder.

Mr. Roy Moreman is learning to get about in his new wheel chair. Thanks to the Dixie Home-Demonstration Club for the lovely lawn chairs. That makes four. The West Point Home Demonstration Club gave us two a week or so ago. Perhaps some club would like to buy some domestic and curtains for our lobby. It would cut out the glare and make it better to watch our T.V. and movies.

We had our usual singing Monday. How we do enjoy and look forward to these events.

We want to thank the Melvin Burk family for the magazines. We do enjoy these before they get too old.

Several adults and children from O'Donnell Baptist Church came and brought a message in song and a poem. Our John Anderson dismissed the group with prayer.

Gabriel Cruz left Monday for Fort Carson Colo. to be near his son who has moved there. We will all miss him. He was such a pleasant gentleman.

With the rain, our grass is really growing. It is nice to have some green to look at. Our roses have been blooming.

Here for our Sunday service with the children singing was Alice Gillespie, Melissa Webb, Terri Franklin, Karen Williams, Don Forbes, Travis Mires, and Donna Forbes. Also Margie Clark of Lamesa who read us a poem. Other visitors were Mrs. Desie Gattman, Ruby Patterson, Mennie Gandy, Mrs. Tom Cloe and Brenda and Debbie Cloe of Midland.

If we missed you, please know that you are welcome and visit us often. We enjoy having guest stop by for a visit and we will have a cup of coffee together, so we expect to see you at Colonial Nursing Home.

**COTTON TALKS**  
 FROM PLAINS COTTON GROWERS, INC.

The roundup of figures on the 1971 Texas cotton crop, just released by the Texas Crop and Livestock Reporting Service, show 1,279,150 bales (480 pounds net weight) produced in the 25 weather-plagued High Plains counties represented by Plains Cotton Growers, Inc. Production was from 2,322,400 harvested acres for an average yield of only 264.4 pounds per acre, the lowest since PCG began keeping records in 1958. Average per-acre production on the Plains for the 13-year period since 1958 has been 453.6 pounds.

The TCLRS acreage figures, compiled from records of USDA's Agricultural Stabilization and Conservation Service, reveal that 2,499,700 acres were planted to cotton on the Plains in 1971, highest since 1965. In 1965 the Plains planted 2,170,400 acres and produced 2,300,000 bales for an all-time high per-acre yield of 519 pounds.

The 177,300 acres planted but not harvested on the Plains in 1971 represent an abandonment on slightly more than 7 percent, which is near normal but well above the 4.5 percent abandoned in 1970.

Lubbock county again produced the top volume of cotton on the Plains, with 155,900 bales, and was followed by Dawson's 116,000. In per-acre yields the area was led by Midland, Martin and Howard, where respective yields were 372,338 and 333 pounds per acre.

The almost 2.5 million acres planted in the 25 counties was about 137.5 percent of the area's final 1971 allotment of 1,818,195 acres.

The chart below shows planted and harvested acres, percentage abandonment, yields and total production in net weight bales.

In Lynn County last year, 199,900 acres were planted; 189,900 acres were harvested; 5 percent abandoned; 228 yield per harvested acre; 90,100 net weight bales.

Mr. and Mrs. V. P. Carter left Monday for Hawaii, where they will attend summer school at the University of Hawaii. Both are teachers in the Tahoka Public School system.

### FOOD FOR CAMP

Hot scrambled eggs will entice even the sleepiest camper to greet the day with a hearty breakfast. To prevent egos from breaking en route to the campsite, break them yourself at home, pour into a plastic container and store in the ice chest. When morning comes, shake the container, transfer beaten eggs to a hot skillet and scramble.

A varied assortment of canned meats stock most market counters. Look for canned roast beef, beef steaks, corned beef, ham, meat balls, chicken, turkey or chicken fricassee. Also try tuna fish, crab, shrimp, salmon, chili and spaghetti. A few cooking tricks can add variety to canned meals. Spoon chili con carne over toasted cornbread squares. Chopped ham loaves can be sliced and served cold with salads or sandwiches, or can be sliced and broiled or fried. For a special treat, top chopped ham with brown sugar, molasses or honey and stud the meat with whole cloves.

If you have a yen for corn at the sea shore, use the sea to "shore" up the flavor. Remove the silk, but not the husks, and place corn in a weighted burlap bag. Soak in salt water for about an hour. A cool stream will add a tasty lift, too! Then cook corn as usual.

Dry milk, an economical camping trip pal requires little storage space and no refrigeration until reconstituted. Prepare only the amount needed for the meal with ice water. Then the milk will be cold enough to drink immediately.

Stores offer many kinds of puddings, breads (date or brown bread) and even cakes in cans that make excellent take-alongs. Also select cheese in jars or cans that keep al-

half to two years. The system should schedule the deferments so the pasture would be at different periods of the year. All pastures should be deferred every month of the year by the time the plan has been carried through three times," Sheppard explained.

"The success of any grazing management is based upon livestock being in balance with feed supply. With adequate amount of forage supply, the rancher can plan and carry out practices that will make his grasses increase his production," Sheppard stated.

"Removing of all livestock is very important. Only a few head of livestock in a big pasture can pick out most of the 'ice cream' grasses. These are the grasses and forbs that need rest the most. If the most desirable grasses make up only five percent of the forage supply, then five percent of the herd can keep these grasses grazed down and allow the less desirable grasses to grow. If the 'ice cream' grasses are protected they will crowd out the less desirable," Sheppard explained.

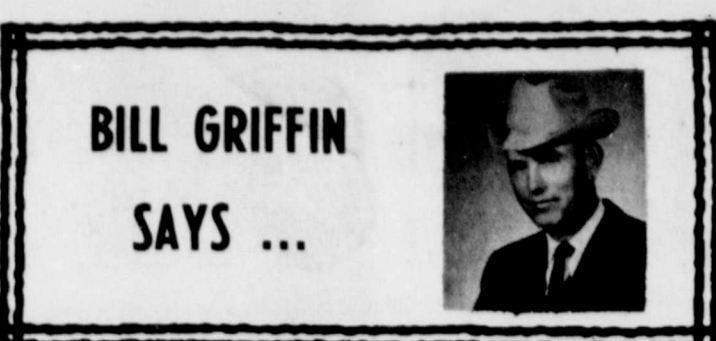

**LETTERS TO THE EDITOR**

Dear Mr. Editor,  
I have served my hitch in the Service; luckily I saw no action, but I was ready never the less. You know, now days people think freedom is a birth right, not something that men fought and died for. I think the time has come for us to stand up and fight for law and order. From the information I can get on the recent trial of Angela Davis, I think it is a disgrace to this country that she went free. I hear she is also a card carrying communist. I think we have turned over all of our freedom to the crooks and killers in this country because we sat back on our fanny and say nothing. I don't know how many states have ruled out Capital punishment, but I think it is going to be the down fall of the nation. You can go out and kill a dozen people; the trial may lay out a couple of years; cost a county or state \$100,000 or so; the guilty will only get 15-20 years, be out in 5; now that's not bad.

I think where the trouble lies is in the politicians and the news media. Most politicians sit on top of the fence afraid to move; except to grab a little money that might float by. The news media have their nose in places where it shouldn't be such as televising riots, Mell, and secret documents. I believe a large percentage would betray this country for a good news story.

Back to the subject of law and order; it has got to where you can't run for high office without being threatened or killed. I think if we had some hardnosed politicians we could change some laws and bring the hanging tree back on the chopping block; with close up television coverage to watch their heads roll; it would make a man think twice. I may sound a little bad but it wouldn't take many to slow things down.

Thank You,  
Worried  
Bobby Patterson

**BILL GRIFFIN SAYS ...**

Hot, summer weather is on the way and mosquitoes are becoming active. This could be bad news to horse owners who have not vaccinated their animals for VEE (Venezuelan equine encephalomyelitis), the dreaded sleeping sickness spread by mosquitoes which killed so many horses last year.

"It's urgent that all horses, mules and donkeys that were not vaccinated last year be vaccinated as soon as possible," according to Dr. James Armstrong veterinarian with the Texas Agricultural Extension Service.

Animals that were vaccinated during last year's massive vaccination program need not be vaccinated this year since immunity from the VEE vaccine appears to last at least two years. However, if there is any doubt about whether or not the animals was vaccinated last year, by all means vaccinate again.

The Texas A & M University specialist hastens to add that there is one exception to the re-vaccination rule. "Ferals that were vaccinated in 1971 when they were less than six months old should be re-vaccinated."

In high risk areas such as Texas, the U. S. Department of Agriculture recommends vaccinating pregnant mares and foals under two weeks of age during the mosquito season. Studies are presently under way to determine whether there is any danger to mares or unborn foals if vaccinated during pregnancy.

Also, contrary to some earlier reports, tests in several states have shown that the vaccine does not cause brain or spinal damage in horses.

If you have animals that require VEE vaccination, contact an accredited veterinarian as soon as possible and have him administer the vaccine. This year there is a charge for both the vaccine and

the veterinarian's services. Horse owners are also recommended to vaccinate their animals against western and eastern strains of the sleeping sickness. This should be an annual vaccination. All vaccinations can be given during the veterinarian's single visit.

Texas is still under federal quarantine for VEE. Thus horses must have been vaccinated for VEE at least 14 days before being allowed to move across the state line. A vaccination certificate must accompany the animal.

Armstrong suggests that horse owners check their animals regularly for any signs of illness that might be an indication of VEE. At the onset of the disease, the animal loses its appetite, is depressed and has a fever. If any of these signs appear, a veterinarian should be contacted at once so that an accurate diagnosis can be made.

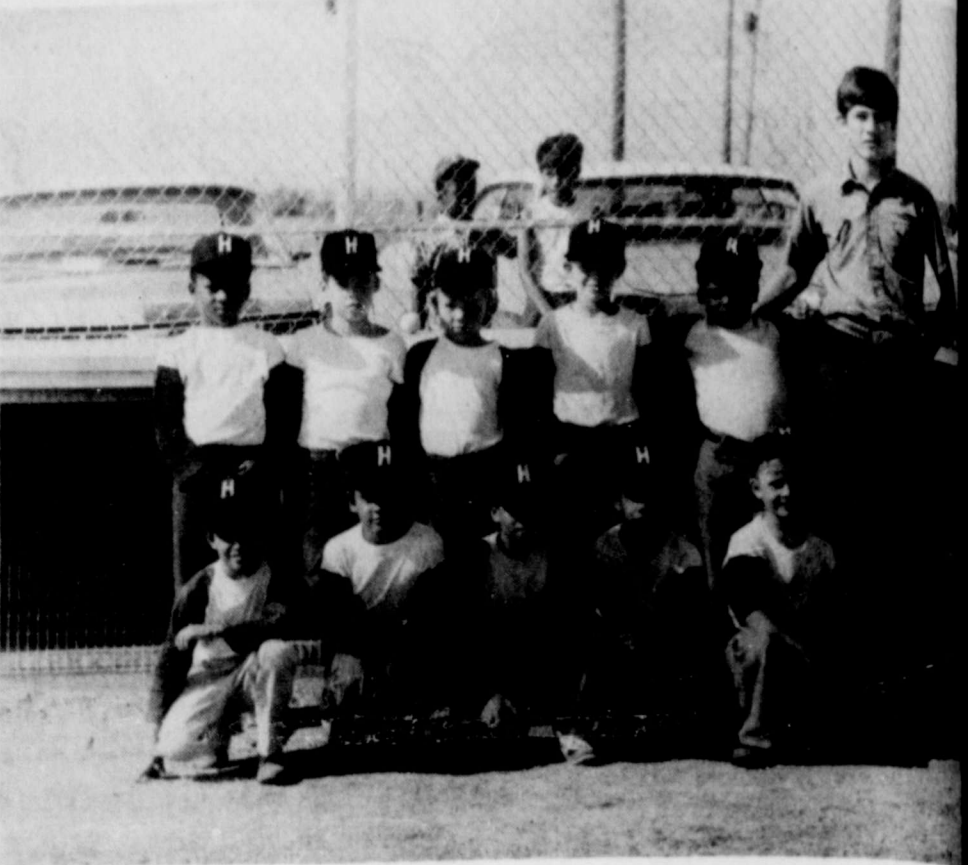

The veterinarian also recommends that horse owners spray their animals, especially those in stables or in confinement, for mosquitoes and other biting insects.

**DEFERRED GRAZING OF RANGELAND**  
"Some form of planned deferred grazing system is a very important part of good ranch management," A. V. Sheppard, District Conservationist, stated.

"Range grasses will respond when allowed to grow, increase in plant vigor and mature a seed crop when not grazed by livestock. As the grasses grow, they build plant food by the sunlight shining on the surface of the leaves. The plant food is a very im-

portant part of our plant and animal life. As the forage plants grow, the root system grows accordingly. The stronger the root system of our range grasses, the better the grasses will produce a good forage production for our livestock," Sheppard stressed.

"The success of deferred grazing is a planned system whereby all pastures received a scheduled rest. The plan should be developed to rest each pasture at least three to four months each one and one

**CHRIST APPEARS TO EARLY AMERICAN PEOPLE** -- The above scene depicts the appearance of Jesus Christ to His "other sheep" here in ancient America. The Book of Mormon tells how Christ came to the Americas as a resurrected being and organized his church with twelve disciples to lead it. This great scene of Christ appearing to his "other sheep", especially painted for the Mormon Pavilion at the New York World's Fair, will be a part of the tour display presented Sunday evening.

The Church of Jesus Christ of Latter-day Saints will present a special display on "Mormonism" for the public on Sunday, June 18th at 7:30 p.m. The L. D. S. Chapel is located at 404 E. Lenny in Brownfield.

The girls, ranging in age from 8 to 18 can participate in two programs this summer. Camp sessions started May 26 and run through August 10.

## Lynn County Oil And Gas Sales

The School Board of Equalization will be in session at the New Home High School from 9 a.m. to 12 noon, Tuesday June 20, for the purpose of determining, fixing and equalizing the value of any and all taxable property in the New Home School District. E. R. Blakney, secretary. 21-tfc

Sale of Lynn County oil and gas production accounted for \$1,125,898 of the county's economic output for 1971, according to a study by Texas Mid-Continent Oil & Gas Assn. In producing 315,793 barrels of crude oil and 94 million cu. ft. of natural gas, the county ranked 166th in Texas. Value of its crude oil was \$1,111,591; natural gas value was \$14,307.

The county is among 190 Texas counties with oil and gas production value topping \$100,000, although 211 counties produce oil and gas.

"Lynn County oil and gas wells made a significant contribution to Texas' share of the nation's energy needs last year, but growing demand is sapping reserves in Texas faster than they can be replaced," Robert A. Buschman, Association president, said. "As fewer new fields are discovered, due to less drilling, the continuing strong economy and tax base of many Texas counties may now depend on updating Texas oil conservation laws to encourage wider use of new recovery technology," he said.

The Association study showed that Lynn County farmers, ranchers, and other royalty owners received \$140,737 as their share of the production.

The county's wells generated \$51,133 in crude oil production taxes for state government and \$1,073 in state taxes on natural gas. Oil and gas producers spent \$442,014 in drilling six wells in the county last year, all of which was lost on dry holes.

Texas Employment Commission figures showed 14 oil and gas industry employees in the county last year, with an annual payroll of \$111,264.

slender. How the courts look upon such outbursts tells a great deal about the law of defamation of character.

Take this case:

During an argument at a golf course, one player called another "a lousy crook." The latter filed suit for slander, charging that the epithet had branded him as a common criminal.

But the court disagreed. At least in this situation, said the court, the words were no more than generalized bluster.

Oliver Wendell Holmes once expressed the law's attitude as follows:

"A word is not a crystal, transparent and unchanged; it is the skin of a living thought, and may vary greatly in color and content according to the circumstances and the time in which it is used."

Accordingly, another court found it was indeed defamatory for a jeweller to say of a rival jeweller that he was "a crook ... mixed up in some crooked deals."

This time the comment, made during a business conference, was clearly meant to be taken literally.

Even in a non-business setting, this kind of language may be defamatory. At a club meeting, one of the members denounced the club president as "a cheat and a fraud." In short order, the president filed suit for slander.

In a court hearing he pointed out that the remark had been made not merely as a general insult but as a specific comment on his performance in office. The court decided that, since the office was one of trust and honor, the words were weighty enough to support a suit.
