AROUND TOWN

On last Tuesday morning Mrs. W. J. Jordan received word that her sister, Maggie Vane of Stamford had passed away in a hospital there after several weeks illness. She had lived in a Nursing Home for many months before her death.

She is survived by four daughters and three sons. Mrs. Jordan was not able to attend the funeral services and is the last remaining one of her brothers and sisters.

wood were her five sisters. They are Gillie Lewis, Lela Hill, Arle Proffitt, and Eugena Searcy all of Munday, Texas and Stella Parriemore of Cedar Hill. From here they went to Roby to visit with other relatives there.

Mrs. E. B. Gaither attended a wedding shower in Lubbock, Thursday night, honoring her granddaughter, Robble Lyn Miller, who will become the bride of Terry Fortner at the close of this school term. She is a senior in high school and Terry is attending Texas Tech.

First grade teacher, Mrs. Griffing is out of school this week and I am teaching her room.

Ten members of the 88 Club met in the home of Mrs. Thelma Dewbre on Friday night.

Mr. and Mrs. Edd Akin left Tuesday a.m. for a visit with her sister in Weatherford. From there they will go to Garland for a few days visit with daughter Dana's family.

On Sunday afternoon I drove to Levelland and visited with my son's family, the Randall Waldrips. They recently moved from Lamesa after a two year stay, where he worked for the theatres there.

Thursday night the Past Noble Grand Club met with Louise Wyatt as hostess. Only one member was absent and an application for membership was read. She will be initiated next meeting night when the club meets in the home of Ruth Reece, May 15th. This will bring total membership to nine.

Mrs. Joe (Mary) Beckham who lives between Tahoka and O'Donnell, on Route 5 was able to leave Methodist Hospital on Thursday. She had been a patient several weeks.

New: Heavy-Duty Chevy C10.

F44 package boosts GVWR for C10 pickup to 6200 pounds.

Now you can offer your pickup customers a heavier duty C10. Available F44 Heavy-Duty Chassis Equipment package gives them extra carrying capacity (6200 lbs. GVWR) at modest extra cost. And still gives them the easy ride and low step height of the heaviest half-ton pickup Chevy's ever built!

Available as Fleetside or Stepside pickup models.

This new heavy-duty C10 is offered in four popular body styles: Fleetside and Stepside pickups with either the 6 1/2- or 8-ft. box. It's almost like having four new models to sell.

Heavy-duty equipment included.

F44 package includes Massive Girder Beam independent front suspension with 3250-lb. capacity; heavy-duty front coil springs rated at 1625 lbs. each and rear multi-leaf springs rated at 2000 lbs. apiece; and heavy-duty front disc/rear drum brakes (J55) with vacuum power assist.

Uses regular or no-lead fuel.

The 350 V8 with 4-barrel carburetor is included, and the big displacement 454-4 V8 also is available. Both engines are designed to operate efficiently on regular or no-lead fuel.

Includes larger tire size.

Tires included with the 6200-lb. GVW rating are L78-15C (bias-belted ply construction). LR78-15C tires (radial ply construction) also are available. Radial tire benefits include long tread life, low rolling resistance, added traction and high impact strength. White-stripe tires are offered in both types.

Ideal for farm, construction.

The high GVWR, the riding comfort of a half-ton and its use of regular or no-lead fuel make Chevy's C10 with available F44 package the perfect pickup for anyone who uses a truck for transportation as well as hauling. Like on the farm. In construction work. Or you name it.

FACTS FOR YOU

from Texas Farm Bureau

CHURCHES AND FARM LABOR:

Delegates to a three day Texas Conference of Churches convention in Austin approved the following two resolutions with regard to the unionization of farm labor:

COLLECTIVE BARGAINING AND FARM WORKERS:

In view of the equal dignity of men before God the second annual assembly of representatives of the Texas Conference of Churches in session March 3-5, 1975, in Austin reasserts the right of those who are deprived of full rights to freely join together in order to bargain collectively if they so choose. Further, we seek in every possible way to inform member judiciaries and their constituents of the par-

ticular needs and the plight of the farm workers and of the agricultural industry in terms of Christian concern for human justice. Further, we affirm our advocacy of legislation both state and national that is supportive of human dignity and the physical and social needs of the farm worker and the migrant laborer. Consequently, we urge member judiciaries of the Texas Conference of Churches and their constituents to encourage abstention from the purchasing of lettuce, grapes, and Gallo wine and or take other effective means including support of Bill 285 until the farm workers are allowed to hold free elections and gain self determination.

CONCERNING NON VIOLENCE AND THE UNITED FARM WORKERS:

Whereas the members of the Texas Conference of Churches confess belief in the Jesus of Nazareth who teaches that man must do good to those who harm him, as well as to those who do good to him, Luke 6:33, and whereas the United Farm Workers have exemplified boldness of faith and humility of purpose in meeting the persecution inflicted upon them, thus enacting this admonition of Jesus, be it resolved that the Sixth Annual Assembly of Representatives of the Texas Conference of Churches in session, March 3-5, 1975, in Austin commends the United Farm Workers for their philosophy and ministry of non violence in an arena of violence while laboring toward justice for both employer and employee and be it further resolved that we be open to the guidance of the Holy Spirit in urging toward all Americans a spirit of repentance for our conscious and our unconscious acceptance of the indignities placed upon our brother and sister farm workers and in maintaining commitment to prayerfully and pragmatically search for ethical solutions to the farm workers crisis.

CORRECTION

On the 3rd line of an article entitled, Foreign Aid at the bottom of page 82 FACTS FOR YOU, dated April 4, 1975, please change the word Florida to read Virginia.

FOREIGN PRICE SUPPORTS:

Great Britain's price support program for agriculture is about half way integrated with the Common Markets program. This is indeed a complex and difficult transition to make. The BRITISH FARMER AND STOCKMAN for March 1975, a publication of the British National Farmers Union, reported the following guaranteed prices: wheat 1975-76, \$3.73 a bushel, compared to \$3.09 a bushel last year; barley 1975-76, \$2.70 a bushel, compared to \$2.24 a bushel last year. FIRE ANT CONTROL PROGRAM:

The United States Department of Agriculture announced that it will suspend the fire ant control program on June 30, 1975. The Department contends that continuing restrictions placed on the pesticide used to kill ants have finally made the program completely unworkable. The pesticide restrictions of the Environmental Protection Agency make the program costly, give only temporary relief from fire ants and would force the Department to distribute persistent pesticides into the environment indefinitely. It has turned the U.S.D.A. effort into a control program of living with the fire ant, rather than working toward an eradication program. Current regulations by EPA

permit only one treatment per year, which the Department says will not control the ants. USDA says that under present restrictions, fire ants will continue to spread and reinfest areas cleared of ants in the past. The Department intends to continue to work with EPA to find a solution to the problem. The Department predicted that if fire ants aren't eradicated, they will spread to at least one-third of the United States.

STATE WATER QUALITY MANAGEMENT PROGRAM:

The Texas Water Quality Board has announced a hearing for May 15, 1975, 10:00 a.m., Stephen F. Austin Office Building, 17th Street and Congress Avenue, Austin, Texas, for the purpose of considering evidence relating to the state water quality management program. The purpose of the Federal Pollution Control Act amendments of 1972.

The Texas Water Quality Board invites all interested parties to present evidence at the hearing. The Board also requests that those intending to present evidence notify the board and file a copy of the written statement at least ten days prior to the hearing. Statements should be mailed to Mr. Frosty Gray, Texas Water Quality Board, P. O. Box 13246, Capitol Station, Austin, Texas 78711.

LIVESTOCK AND MEAT FOREIGN TRADE:

Printed on pages 89 and 90 are the latest USDA Foreign Agriculture figures with regard to livestock, meat, and meat products trade with foreign countries. Total beef and veal imported in 1974 was 1,217.9 million lbs., compared to 1216.6 million lbs. in 1969. Beef and veal imported in 1974 is only 81.37 percent of imports in 1973. In fact, all imports were down considerably except hides and skins.

The table on page 89, also reveals that U. S. exports are down in practically all areas. It is noted that by products did show some gain in 1974.

WOOL PAYMENT RATE 1974:

USDA announced on April 7, 1974 that the incentive payment on wool sold in 1974 will be 21.8 percent of the market value. This means that any producer who sold wool, if qualified, can receive 21.8 percent of the market price received in government payments. The payments are based on the difference between the national average price of 59.1 cents a pound received by producers during 1974 and the incentive level of 72 cents a pound.

The Department estimates that the wool payments for 1974 marketings will be \$16 million, compared to \$68 million in 1972. There were no wool payments made in 1973.

The payment rate for unshorn lamb sold or slaughtered is 52 cents per cwt.

There is a deduction of 1 1/2 cents a pound from the 1974 shorn wool payments and 7 1/2 cents a cwt. on live weight for 1974 lamb payments to finance advertising sales promotion, and related market development activities.

The average price received by growers for mohair sold during 1974, as computed by U. S. Department of Agriculture, was \$1.37 a pound. This price computed by the Department is 56.8 cents per pound above the announced support level of 80.2 cents per pound. In that the computed market price is above the incentive level, there will be no mohair payments for mohair sold during 1974.

FOREIGN FEED SUBSIDY PROGRAMS:

A weekly newspaper for agri-business, entitled, FEEDSTUFFS of March 31, 1975, released the following article under the heading of Japanese Begins Feed Cost Subsidy Program.

Washington -- The Japanese government in an attempt to counter price rises and meet changing world and domestic conditions, has announced new measures for rice and feeds, including a subsidy program to minimize the effect of higher prices on feed imports.

The Japanese also proposed a gradual rice area expansion and a doubling of government rice stocks by 1979, with a two fold goal of adjusting to the slowing rate of decline in rice consumption and protecting against future world food shortages.

Beginning this year, the Japanese government will for the first time provide money for subsidy payments to livestock producers, matched by payments from three private subsidy funds. In the past, livestock feeders reformed the private funds, with which are managed by the National Federation of Agricultural Cooperative Associations, the Japan Feed Manufacturers Assn. and a group of agricultural cooperatives not included in the national federation, among them the National Federation of Dairy Cooperative Associations.

The purpose of these private funds was to stabilize feeds prices at fixed levels. However, soaring commodity prices in 1973 and 1974 rapidly exhausted reserves, as well as a \$70 million government loan made to them in 1973.

Formula feed manufacturers pay a fee of \$1 per ton into a special reserve fund originally intended to repay the 1973 government loan. However, the government has instead authorized use of this special reserve to offset a \$27-per-ton increase in formula feed prices in late 1974 to pay feeders \$3.67 per ton, in addition to the \$4.33 per ton they were already receiving from the regular reserves. Repayment of the government loan was, in turn, postponed.

IMPORT TRADE ADJUSTMENT:

U. S. Labor Department has certified 1,100 New York State workers eligible for trade assistance because their jobs were wiped out by increased imports of electronic components, as determined by the government. The interpretation was made by the International Trade Commission under the provision of the Trade Expansion Act of 1962, as amended.

Benefits afforded to these workers will be cash allowances, testing, training, job placement and other benefits. The workers are eligible to receive up to 65 percent of the national average weekly wage. Benefits may be raised to 70 percent of the average wage after April 3, 1975.

BILL GRIFFIN SAYS.....

Young people with a desire to learn more about their world have the opportunity to participate in a fast growing organization -- 4-H.

The 4-H program offers a variety of activities for youth between the ages of 9 and 19. Young people can get involved in project groups, special interest groups or service groups that appeal to their interests.

While 4-H meetings cover a variety of subjects and activities and are held periodically, project groups work on one specific subject and last only as long as the project endures.

Project subjects may include gardening, auto repair, raising and caring for an animal, safety and clothing. These project groups are usually directed by a volunteer leader.

Special interest groups are a vital part of the 4-H program and may deal with such subjects as drugs, dating, etiquette and ecology. These group studies help youth learn more about the world in which they live and help them to better adapt to the changing environments.

Service groups work to help improve the community and may engage in fund raising projects for the needy and disadvantaged or work on neighborhood beautification or with underprivileged youth.

The 4-H and youth program is a good way to get involved in today's world.

The sun is so pretty and several of the patients go out for a good sunning walk. The rose bushes are really putting out new shoots, we are expecting some pretty roses later on.

Many of the patients who were sick with colds all seem to be feeling better except Oliver Ford and we hope he soon feels better. Our door decorations were brought by Mrs. Virginia Griffin's first grade class, beautiful bluebonnets.

Mrs. Russell returned back from her visit with her family. She is reporting all seems to be going ok. Her grand daughter, Relli who visited here last summer is planning on seeing us as soon as school is out.

TEXAS TALK

By Fred Myers

Two major classes of sorghum are grown in the United States. Sweet Sorghum or Sorgo accounts for about 20% of the crop and is grown for forage, silage and sorghum (often called cane) syrup. The vast majority of the crop is grain sorghum. Although grain sorghum is grown predominantly for the grain, it also acts as a dual purpose plant with stalks commonly used as forage or silage. Experts don't always agree on world sorghum production but they generally acknowledge that a least 125 million acres are now used for planting sorghum crops. Use of sorghum as a food grain in China, Africa and India ranks sorghum with corn as a contender for the third most important food grain in the world (behind wheat and rice). All estimates are not yet in for this year's acreage in grain sorghum, but indications are, although local areas may show some increase, the national crop could be reduced as much as 5 percent.

OUTSTANDING IN WEST TEXAS AND NEW MEXICO!

This excellent sorghum hybrid is famous for its versatility and adaptability. It yields along with the full-season varieties on the Plains although it is classed as medium-maturity. Its hybrid vigor and exceptional drought tolerance help Pioneer brand 846 turn in consistent high yields, even under stress. It is tolerant to rust, smut and MDM. Talk to your dealer about 846!

Performance of 846 or the crop produced therefrom may be adversely affected by factors beyond control including environmental conditions, insects and diseases. The limitation of warranty and other attached to each bag of Pioneer brand seed is a part of the terms and conditions of the sale.

GENEALOGY CAN BE FUN
 To begin a family genealogy, start with yourself. Name Father Mother Date of Birth Place of Birth Father and Mother's Date and Place of Birth Date and Place of Marriage List all the members of your family; starting with brothers, sisters and work backwards, parents, grandparents, great grandparents

As you compile this information informally, start now with good recording habits. Write full name of each person. If birth certificates are available, check for correct dates of birth and unusual spellings of names. To record dates, use this following order: Day, month, year, (23 March 1841). In writing place names, list town or city, county and then state and finally country if other than the U.S.A.

These precise forms for recording genealogical information are used consistently by professional genealogists.

If you are interested in your family tree, today is the time to begin your search. Many records are already extinct and relatives pass away, causing the trails to grow faint or non-existent.

Mrs. Dayton Kelley, writing in the Genealogical publication, Records of East

Lynn County News

Texas comments:
 "One of the greatest tragedies that can befall a people is the destruction of its records. And an even greater tragedy perhaps lies in the fact that so few realize just how irreplaceable is the loss."

Mrs. Kelley continues to describe losses by fire, flood, improper storage and needless to say improper supervision or protection by the office staff. It is not uncommon for records to mysteriously depart for places unknown. In this writer's research, records in one courthouse have disappeared, only the indexes are left and unfortunately the names were not listed in complete form and so a much needed piece of information has vanished. The index shows a recording dated June 20, 1846, indicating the family probably arrived in Texas just prior to Statehood but not enough to extend the research back in time.

The official Texas State Genealogical Society Bulletin called STRIPES, carries the story of an even sadder loss of records. It told of a family unhappy over the mother's joining a particular church and spending her remaining years working on the family genealogy. Time passed and a correspondent needing information wrote to a daughter asking about the family records. The daughter replied, 'oh that old junk, I burned it when Mama died! This writer has searched for two years for the Berry family Bible. Legal records and the 1860 census lists the ancestor as John Berry. No middle initial or other identifiable clue, his wives given name - Mary - no middle initial listed on legal documents. No place of burial has been

verified. Approximately five John Berrys were listed in early Texas Bounty Land Warrants. Which one is the right ancestor?

CUT YOUR TAXES!

WE'RE INTRODUCING A NEW INDIVIDUAL RETIREMENT ACCOUNT [IRA] THAT COULD MAKE A BIG DIFFERENCE IN YOUR INCOME TAX RETURNS WHILE YOU'RE WORKING, AND IN YOUR INCOME WHEN YOU RETIRE.

Individuals not participating in other pension funds can put 15% of their annual income [up to \$1,500 a year] in IRA's. You may participate in both IRA and Social Security.

The amounts deposited in IRA's are deductible from taxable income within the above limits. You do pay taxes as you begin to withdraw money when the plan matures, but at that time, your yearly income will probably be considerably lower than it is now. And so will your taxes.

IF HUSBAND & WIFE ARE BOTH EMPLOYED [EITHER FULL OR PART-TIME] EACH MAY HAVE AN INDIVIDUAL RETIREMENT ACCOUNT. SELF-EMPLOYED INDIVIDUALS ARE ALSO ELIGIBLE [FARMERS & RANCHERS INCLUDED].

BELOW IS AN EXAMPLE WHICH SHOWS THE ADVANTAGES OF SUCH A PLAN OVER A 30-YEAR SPAN. IT IS ASSUMED THAT THE MONEY INVESTED EARNS 7 3/4% COMPOUNDED DAILY.

YEAR	TOTAL IRA CONTRIBUTIONS \$1500/YEAR	TOTAL INVESTMENT VALUE
1	1,500	1,621
5	7,500	9,520
10	15,000	23,545

Gimmicks are out -- the simple, natural look is in for women's fashions this spring. Well see a clean, soft, feminine look in clothing, accessories and hair styles.

Hair will be soft and curly, not frizzy -- or simple and straight, showing off clean, shiny hair. Long hair will frequently be pulled back in a simple chignon for a smooth, dressier appearance. Off - the - face looks

will be the newest. Bangs, when worn will be long and sleek.

Loose, feminine dress styles will look great with the waist nipped in by a belt. And belts may be the single most important accessory for summer - wide crushed styles, obi types and narrow leather ones.

Shoes will be worn flatter and simpler. Espadrilles sandals and slippers will have low heels or wedges. Very little trim and decoration will be seen.

Jewelry will be in extremes -- either kept to a minimum, or arms full of bangles. Natural stones, beads and shells will be good choices.

Scarves and more scarves will complete the picture. Wear them over shoulders with a sundress or around the neck for color. Wrapping the head bandana fash-
