Training workshops for youth and adult 4-H leaders, in March, at the Texas 4-H Center are taking on a new flare. Workshops being planned deal with such new areas as "Aerospace," "Camp Counseling," and "Finding Summer Jobs."

A wide variety of 4-H leader training opportunities are being provided to meet leader interests. Experts in the various fields will provide the training.

Workshops on the three subjects noted above as well as on "4-H Record Books" and "Knitting" will be held at the Texas 4-H Center March 26-27. Any leaders interested in attending should submit their applications to the State 4-H Office at Texas A & M University by March 21.

The workshop on "Finding Summer Jobs" will be conducted by Dr. Richard Floyd, economist in business development with the Extension Service. It is designed for older youth and will deal with techniques of finding suitable summer employment.

Robert Vaughn, NASA engineer and 4-H leader, will conduct the "Aerospace" workshop for those interested in projects involving model rockets. All phases of model rocketry will be discussed and each participant will build and fly a model rocket.

Leaders interested in the techniques of knitting and

methods of teaching knitting to youth groups have a ready-made choice in the "Knitting" workshop. Instruction will be given by Mrs. Auston Kerley, a hobby instructor and elementary school principal.

George McArthur, Extension 4-H and youth specialist, will direct the "4-H Record Books" workshop, which will include a beginning and an advanced section. Changes for 1977 will be discussed along with proper selection of report form entries, condensing material and judging record books.

For teen leaders involved in camping programs during the summer, the workshop on "Camp Counseling" is a must. Conducted by Carolyn Gilbert, Extension 4-H and youth specialist, this workshop will deal with the philosophy of 4-H camping and the role of the counselor. For those interested in attending, travel scholarships are available for the driver of the car. The scholarship is issued at the completion of the workshop.

Lynn County Agents invite both youth and adult 4-H leaders interested in any of these workshops to submit their applications now. Applications along with additional information on the workshops is available at the county Extension office.

Congratulations, Beverly Bryson!

Tahoka has come a long way.

I think of certain ignorant, bigoted men who threatened a young black who wanted an education; who climbed the fence to damage our automobiles; who threatened my husband who was only obeying the law.

How could they have lived in Tahoka?

Maybe they have moved-hopefully to Russia.

LaNeyl Bray

Dear Editor,

My residence in the city of Tahoka has been two years and of my twenty-one years on earth have I never seen such cruel and inhumane actions as that achieved by the poisoning of animals.

As of Thursday, February 17, we have lost four dogs. Where is our city dog catcher? It ceases to amaze me that our "fine" (?) city can afford new city official vehicles, etc., etc., but however, the dog catcher truck is broken down...or could it be that the taxpayers' money does not cover the hiring of an individual to be in charge of the stray dog population. The laziness of such party has resulted in the death of many owned dogs and few deaths of the pestilent strays that plague Tahoka.

The slight error of letting our dogs out of the pen for ten minutes resulted in their unmerciful death.

Not only am I angry and hurt at this loss, but I am also contemplating on what type of people (person) could and would participate in such barbarity as has been displayed to me!

Aside from the torture I saw my dogs go through, I wonder if this guilty party ever thought of the danger the children in our community are being faced with just going out of their homes to play. This poison killed my dogs in less than twenty minutes; how long would it take to kill a child; an adult? A life may well be taken at the expense of this so-called "solution."

I hope that my point has been well made and you and I as interested citizens, as protection for ourselves, our family, and our animals, will band together and end this cold-blooded, savage injustice.

Mrs. Pug Paris

David F. Reddell, Engineering Operations Manager of Southwestern Bell Telephone Company, was elected president of the Dallas Branch, Texas Society for the Prevention of Blindness, at the Society's Annual Meeting recently in Dallas.

Reddell grew up in Tahoka and is the son of Mr. and Mrs. Bill Reddell. He announced at the recent meeting that the Dallas Branch had raised close to \$50,000 in its recent campaign fund drive—almost three times the amount ever raised in the past. In addition, the North Texas Division—located in Dallas—which consists of Dallas, Fort Worth, and seventy-two surrounding counties—went well over its goal of \$100,000 for 1976, Reddell stated.

Farm Bureau Leaders Attend Recent Conference In Austin

Farm Bureau leaders of Lynn County Farm Bureau were among more than 100 local Farm Bureau county presidents and legislative and membership committee chairmen attending a Texas Farm Bureau

legislative conference and membership kickoff February 15 and 16 in Austin.

Speeches by Governor Dolph Briscoe and other high state government officials as well as leaders in the 65th Legislature were among highlights of the legislative conference which got underway at noon on February 15 and concluded at noon the next day.

The final session on the 16th served as the organization's 1977 membership kickoff. February 21-25 has been proclaimed as "Farm Bureau Week" in Texas and many county Farm Bureaus will be conducting membership drives during that period.

TFB President Carrol Chaloupka presented TFB's legislative program at the February 15th dinner attended by state officials and most legislators. Main items in the program included recommendations on taxing agricultural land, local school financing, state inheritance taxes, underground water taxes and regulations, farm-to-market roads, and funding agricultural research and education.

Governor Briscoe also spoke at the legislative dinner and discussed the goal of making Texas the number one agricultural state in the nation.

Other conference speakers included Lieutenant-Governor William Hobby, House Speaker Bill Clayton, Attorney-General John Hill, Comptroller Bob Bullock, Senator Max Sherman of Amarillo, Representatives Bill Sullivant of Gainesville and Tom Massey of San Angelo, TFB Executive Director Warren Newberry of Waco, and TFB State Affairs Director Pat Smith of Austin.

TEXAS PELLET PRODUCTS, located east of New Home, is a new industry which produces cotton-burr pellets for livestock feed.

New Industry In Area Produces Pellets For Livestock Feed

Texas Pellet Products, a new industry in the area owned by six cooperative cotton gins located at New Home, Wilson, Union, and Slide, is located east of New Home on Farm-To-Market Road 211.

Larry Lawson, manager of the business, says that burrs from the 47,000 bales of cotton ginned at the locations will produce 18,000 tons of cotton-burr pellets.

At the plant, cotton burrs are dumped into a large pit where they are transferred by air into cyclone separators where dirt and trash are extracted. The burrs drop into an auger and are transferred to large grinds, hammer mills, where they are ground into smaller particles. Then the powder substance goes through another cyclone separator for further cleaning and dropped onto a conveyor belt that moves pelleting substance to the pellet mill. Water and steam are added at the pellet mill stage of production and cotton burr pellets are produced at about 200 degrees Fahrenheit.

From the mill, the pellets are then dropped into a cooling pit where they are cooled and moved by air into

an overhead storage bin or into a storage warehouse and stored in bulk form.

The pellets are sold to commercial feedlots, livestock feed manufacturers, and local or area livestock feeders.

Some 100 tons of the pellets are being shipped per week to Fort Morgan and Sterling City, Colorado, such pellets going into commercial feedlot rations and the rations of a livestock feed manufacturer.

Wilson ISD Board Meets

At the February 14th meeting of the Board of Education of Wilson Independent School District, contracts were renewed for the '77-78 school year for Bobby Lee, vocational agriculture teacher; Charles Seagler, athletic director and head football coach; Mike Chance, band director; Bill West, assistant football coach and head girls' basketball coach; and Earl Cummings, tax assessor-collector.

In other business, the trustees entered into a service contract with Lubbock Office Suppliers for the '77-78 year and contracted with Robert Abbe, C.P.A. to conduct the 1976-77 audit.

The board voted to establish a Career Education Program for the next school year and voted to participate in a non-funded assistance program.

The Veterans Administration's construction appropriation for fiscal year 1977 is \$497.7 million.

The Veterans Administration construction plans for fiscal year 1977 include a \$10 million computer center at Hines, Illinois.

Plains Cotton Growers, Inc., Lubbock, will present its recommendations for a cotton program to succeed the 1973 Act to the House Committee on Agriculture February 24 and to the corresponding committee of the Senate February 28. The current farm program expires with the 1977 crop.

PCG testimony has been written and copies mailed to the hearing clerks of each committee. PCG President W.B. Criswell of Idalou and Donald Johnson, Executive Vice President, will be in Washington to give oral presentations and answer questions from committee members.

House hearings are not based on specific legislation, since no bill was introduced in the House until February 17. Representative Tom Harkin, Iowa Democrat, introduced a measure on that date calling for elimination of the target price concept that is a part of present law, Commodity Credit Corporation (CCC) loans at 95 percent of the cost of production, and a limitation of \$100,000 on individual producer loan eligibility.

Two bills have been introduced in the Senate. The first is co-sponsored by Georgia Democrat and Committee Chairman Herman Talmadge and Senator Bob Dole of Kansas, ranking Republican on the committee. The other is by Oklahoma Democratic Senator Henry Bellmon.

The Talmadge-Dole bill would extend the loan and target price concept through the 1982 crop. But the method by which the loan would be determined under this bill is a major departure from present law. Currently, the loan is set at 90 percent of the three-year average price of U.S. cotton in world markets, while the new bill would set loan levels at not less than 75 percent of cost of production. The target price would be set at a level reflecting 100 percent of production costs.

This system would set the 1978 cotton target price at about 51 cents per pound (compared to an expected 48 or 49 cent target in 1977) and the loan would be not less than 38.3 cents per pound (compared to an announced preliminary loan for 1977 of 42.58 cents).

Bellmon's bill would extend present farm legislation for four years, retaining basic provisions of current law, with one major exception. It would allow producers to place commodities under CCC loans for periods up to five years. And the Secretary of Agriculture would be required to pay 50 percent of storage costs for commodities under loan.

In calling Senate committee hearings, Talmadge announced that his bill would be used as a starting point for discussions, but that none of its provisions would be considered sacred.

The PCG legislative policy, adopted January 18 by the producer organization's 52-man Board of Directors, asks for a market-oriented cotton program much like the program in effect since 1973. This would be a program founded on a CCC loan rate calculated as a percentage of average market prices, a reasonable target price, continued provision for disaster payments, unrestricted planting and unrestricted access to world markets.

The written PCG testimony states that "For cotton, because of the intense competition we face with foreign-grown cotton and substitute fibers, we are fearful that

trying the minimum loan and target price directly to production costs would be a step backward toward surplus production, government production controls, government costs at which taxpayers would rebel, and some of the other ills we have experienced in the past."

The statement goes on to say "Since market prices, averaged over a period of years, of necessity must reflect production costs, we think our common objective of adequate price protection can be achieved by basing the loan on average market prices."

PCG members and other interested parties can obtain a copy of PCG's oral testimony and the producer organization's complete legislative policy statement from PCG's Lubbock office.

Changes In Social Security Are Noted By Local Representative

Beginning in January 1977, a person who goes to the hospital under Medicare will be responsible for the first \$124 of his hospital bill.

When questioned about the new \$124 deductible, Richard McKeel, a claims representative for Social Security, noted that the law requires an annual review of hospital costs under Medicare and an adjustment of the portion of the bill for which a Medicare beneficiary is responsible, if these costs have risen substantially. The law provides a formula for determining the amount of any adjustment in the deductible amount.

Mr. McKeel said the increase in the deductible results from continuing increases in hospital costs. He pointed out that hospital costs have been increasing over twice as fast as the overall cost-of-living and said that these inflationary increases in hospital costs are largely responsible for the 19 percent increase in the inpatient hospital deductible.

The hospital deductible amount, Mr. McKeel explained, is intended to make the Medicare beneficiary responsible for expenses approximately equal to the average cost of one day of hospital care. At the present time, the average hospital stay under Medicare costs about \$1,600.

Mr. McKeel said that when the hospital deductible amount changes, the law requires comparable changes in the dollar amounts that a Medicare beneficiary pays toward a hospital stay of more than 60 days, or a post-hospital extended care stay of more than 20 days.

When a Medicare beneficiary has a hospital stay of more than 60 days, he will pay \$31 a day for the 61st through the 90th day, up from the present \$26 per day. Should a beneficiary wish to draw on his "lifetime reserve" days, the extra 60 hospital days a beneficiary can use when he needs more than 90 days of hospital care in a benefit period, he will pay \$62 for each reserve day used. If he has a post-hospital

stay of over 20 days in a skilled nursing facility, he will be \$15.50 per day toward the cost of the day through the 100th day.

About 24.7 million persons were covered by hospital insurance under Medicare in 1976 and the number will increase to 27 million persons in 1977. The cost of Medicare hospital insurance is expected to increase from \$13.6 billion in 1976 to \$16.1 billion in 1977.

Persons having questions about Social Security need to file a claim, call the office in Lubbock, station to station 762-7381, or see Mr. McKeel at the courthouse every 4th Wednesday from 9:00 until 11:30 in Tahoka.

Sancap.® The cotton herbicide made for sand, loamy sands and sandy loams. Made for the soil conditions that make growing cotton in West Texas different from most any other place in the world.

Sancap controls your toughest weed problems. Carelessweed and Russian thistle.

And Sancap does the job without injuring your cotton. Just follow the label. There's no guesswork about rates—no worry about applying too much or too little.

So build your weed control program around Sancap this year. Then watch your cotton come through clean and healthy. Because now you've got a herbicide that really fits your conditions.
