Briscoe Tells Tahokans Government Should Be Kept From Big Spenders

The Spectator...
By Mary Brecheen

My diary says that a year ago tomorrow, April 27, Tahoka received three inches of rain in just an hour. Like Dunlap's old Suffolk ewe had triplets last day. He says that's a sign it will rain. And the scriptures say that it rains on the just and the unjust. Here's hope.

+++
A book of many pages could not contain all the promises, pledges, and prognostications made by various candidates for political offices who visited Tahoka during the past four to six months, but one stark fact has come through loud and clear from each, and strangely enough, that statement has come home to roost for most of

they all have said, and how true it is. "We need someone who understands our problems."

The need for such a one has been so obvious this year, almost above all other times. The risk of sounding like an alarmist and a prophet of doom, I submit that we are at the ring-off place, and the very livelihood and style of many of us may well be in jeopardy. We looked the other way a long time and have rested on the theory, "out of sight, out of

time is upon us that we must remove from our issue its non-realities, and we must weigh our candidate, not for his ability to criticize his opponent, but for his ability to understand the business of the problems at home as they relate to problems on the state, national and world level, for his ability to articulate among the makers—that's what it boils down to.

E. L. Short, during his eight years as a member of the Texas House of Representatives, served in West Texas counties faithfully. He knew hand our problems because they were his problems also.

Now he is asking to take on an even more some task—that of representing thirteen counties in the Senate. His background is rich with experiences that will cause him to know our needs our problems—in the fields of education, taxes, farm prices, water shortage—an endless list.

He has said many times, "The experience I've gained does not belong to me—it belongs to the people, and I want to put it to work for them." The time is right for us to do our part to turn the hand the man E. L. Short can be our vehicle if we but say the word.

MRS. DOLPH BRISCOE, right, visits during the Tahoka morning coffee, with Mrs. Truett Smith, F. B. Hegi, and retired District Judge Truett Smith.

Governor Dolph Briscoe made a 45-minute stop in Tahoka on Tuesday of this week, accompanied by Mrs. Briscoe, and was greeted by more than 100 people at the First National Bank Community Room at a coffee hosted by Clint Walker, county coordinator of the Briscoe campaign. Mayor Mel Leslie welcomed the Governor's party, which included a special assistant, B. L. Parker, who is a native of Tahoka. Briscoe spoke briefly following Mayor Leslie's welcome.

He said that his opponent, John Hill, "is the first candidate for Governor in modern history to put billion-dollar price-tags on his promises."
"Money is no object with him—so long as it is the taxpayers' money. If it takes \$1.3 billion of the taxpayers' money to gain the support of the political arm of the Texas State Teachers Association, he promises \$1.3 billion. Had it taken \$2 billion, undoubtedly he would have promised \$2 billion."

(see other picture, page 3)

"One-half of our total state budget now is being spent on education," said Briscoe. "During my administration, we have put \$2.3 billion in new state funds into public education—and teachers' salaries have gone up 53 percent during these past five years."

(see Briscoe, page 3)

CLINT WALKER, left, Lynn County coordinator for the Governor Briscoe Campaign, hosted a coffee-reception for the Governor's party, and the group was welcomed to Tahoka by Mayor Mel Leslie, center. Briscoe, right, spoke briefly to more than 100 people at the gathering.

REPRESENTATIVE JOE HUBENAK, second from left, who is a candidate for Texas Commissioner of Agriculture, was in Tahoka Tuesday morning, and was greeted at a coffee arranged by Mrs. J. A. Pebsworth, Jr., left. Shown with them are Mrs. E. L. Short and Mayor Mel Leslie.

Ag Commissioner Candidate Speaks Out For Texas Farmers

Joe Hubenak brought his campaign for the Texas Agriculture Commissioner's office to Tahoka Tuesday, and visited with some thirty-five people at a coffee in Tahoka Cafeteria, arranged by Mrs. J. A. Pebsworth, Jr.

Hammering at the need for a better marketing system for farm products, Hubenak claimed a long history of experience in agriculture, including 40 years in farming, and the last 10 years as chairman of the House Agriculture Committee. He serves from his post as state representative from Rosenberg.

"The key is the marketing system," he said. "When you eat in any restaurant, Idaho potatoes are on the menu, and when you fly into any Florida airport, they have their citrus fruits and

Some facts about Cal Farley's Boys Ranch, on the site of Old Tascosa, northwest of Amarillo, were revealed at Tahoka Rotary Club last Thursday by Louis Hendricks, public relations director, who has been with the ranch for eighteen years. Started in 1939 by the late Cal Farley, a former wrestling champion, baseball player, and successful Amarillo businessman, as a home for boys who were in trouble with the law, or who were neglected or homeless, it has grown to be one of the nation's outstanding projects of its kind. Most of its boy graduates have turned out to be very useful and successful citizens, the speaker said. The institution is supported by profits from the ranch, but principally from citizens interested in reclaiming young fellows who otherwise don't have much chance. Today, the ranch receives an average of 1,120 requests for entry of boys to the facility, but many of these have to be turned away. Hendricks brought along a film, shown by Binie White, which depicted life on the ranch and the superb facilities for training the boys. A number of local men contribute to the ranch monthly or annually. Monte Dodson was in charge of the program, and introduced the speaker, who invited all people of this area to visit the ranch any time they are in that area.

Briscoe

(cont. from page 1)

"But Mr. Hill says that is not enough—because it is not enough to gain him the political support he needs.

He thinks the taxpayers of this state should come up with even more. He probably is the first candidate in history to put billion-dollar price-tags on promises—and then claim that inflation will take care of the costs.

"If inflation were to increase during the next four years enough to finance all his billion-dollar political promises, we would all need the kind of pay increases he is promising a few, just in order to pay our taxes," he said.

"But I don't think Texans are ready to turn our state government over to the big spenders and face a state income tax as a result."

The Governor was to campaign in El Paso and Odessa after leaving Tahoka.

Why Should Dolph Briscoe Be Governor for 10 Years?

There is no good reason!

The Texas Governor has ever asked for 10 years, has been elected for 10 years. Dolph Briscoe's record does not merit 10 years in office.

Briscoe has spent more than \$2 million in this campaign — including \$900,000 his supporters borrowed from banks — to get 10 years in office.

Property taxes have increased by 1 BILLION DOLLARS since Briscoe was elected; so far, he has done nothing to reduce property tax relief.

State costs have more than doubled under Briscoe. He has a far increase in benefits for those people who really need them. The reason is waste. The worst example is his own Office of Migrant Affairs, which spends \$8,000 a month to help find a new job.

State taxes have skyrocketed while Briscoe has been in office without a single sign of concern by the Governor.

Select a New Governor

Writing John Hill, the Kilgore News Herald said: "I thought Southwestern Bell all the way to the Supreme Court was an unfair rate increase. He appears to have beat the record Hughes empire over millions in inheritance taxes. And he's up Duval County."

Writing John Hill, Fort Worth Star-Telegram said: "He terms as state attorney general, Hill has shown himself to be energetic, articulate and assertive. He can make firm decisions and work persuasively to see them carried out. As Governor, he would be an active, accessible chief executive selecting a strong leadership image."

Writing John Hill, the Dallas Times-Herald said: "John Hill has been an outstanding attorney general. He has made impressive progress in making the office what he has always said it should be—the people's law office."

Harry Ledbetter's Money Management Program

As a fiscal conservative, I have developed a comprehensive program to effectively manage the \$2 Billion dollars on deposit in the State Treasury. Here are aspects of it:

Rate of Return: The State Treasurer should not play politics with our tax money. I pledge to put the taxpayer's money to work earning the highest interest available.

Cash Flow Forecasting: Using modern management techniques, we can accurately determine how much money the state needs in liquid funds. The state's obligations must be paid on a timely basis at minimum administrative cost.

People all over Texas are responding enthusiastically to my campaign. I appreciate your support. I know that the public trust must be earned, and it is a responsibility I accept. I ask for your vote on May 6th. If you share my concerns, encourage your friends and neighbors to vote for Harry Ledbetter for State Treasurer in the Democratic primary election May 6th.

I ONCE KNEW A 67 YEAR OLD FARMER WHO OWNED A BIG HOUSE...

During the recent months of unrest by farmers and ranchers, a common observation by city dwellers has been "those farmers are not broke...look at those big houses they live in." Sure, some farmers do have nice homes...and many farmers' wives work as clerks, secretaries and school teachers to help pay for those houses.

Have you ever looked at the new homes in town? Do those who live in town have a God-given right to a nice home while farmers are supposed to live in one with four rooms and a path?

And check the age of occupants. Scores of new homes in town are owned by couples married 5 years or less. While many farmers have worked a lifetime to purchase a similar home.

One thing about a farmer...when he makes money he spends it...sometimes on a house, drapes, carpet or furniture...or other goods and services. And that helps all of us.

Agriculture is basic in Texas. America needs a strong Agriculture.

Jim Baum To Accept Collect Calls

Jim Baum, one of the top candidates in the May 6th Congressional election, has announced yet another move to communicate further with voters. He announced this week that he will accept collect calls from anyone in the District all day Thursday, May 4th.

The Baum campaign has been geared toward middle-income families and farmers. "I know the majority of us are fed up with big government and bigger taxes," Baum said. "The only way we're going to get things turned around in Washington is to elect a man who knows the problems of middle-income families."

Baum and his wife, Margaret, have four children. The Big Spring man estimates he has walked more than a thousand miles since launching his door-to-door effort. Now he says, "I don't want to leave any stone unturned. If there's one person out there who wants to talk to me about my political philosophy, my phone number is area code 915/263-1313."

We need E.L. Short's understanding in the State Senate

He knows how vital water is to all of us. He shares our concern about inflation and the rising costs of energy. He'll work for the best education for our children. And he understands agriculture and the oil and gas industry, the basis of our economy.

We need E.L. Short's experience in the State Senate.

He has eight years of experience representing much of the 28th Senatorial District in the Texas House of Representatives. He's ready to go to work for us now using that experience to help solve our problems.

The okra seed contains 25 percent protein and 15 percent oil.

Home-grow okra and make flour from the seed. Commercially, it's often used as an additive to wheat flour which also adds protein to the product.

According to legend, okra was cultivated in Egypt for hundreds of years and then taken by the Moslems from the East in the 7th century.

Apparently, it reached India and then French colonists probably discovered it and brought it to Louisiana in the early 1700's. It was growing as far north as Philadelphia in 1748.

From about 1800 onward, numerous garden writers make mention of it, and good cooks marveled at its versatility.

Add versatility and nutrition to any menu with the following recipes:

Okra Soup
2 pounds beef, without fat or bone
2 cups okra, chopped fine
1/4 pound butter
4 quarts cold water
1 onion, sliced and chopped
Salt and pepper

Cut the beef into small pieces and season well with pepper and salt. Fry it in a soup kettle with onion and butter until very brown.

Then, add cold water and let simmer for an hour and a half. Add okra and let simmer for three or four hours longer.

Winter Okra Soup
1 can New Orleans okra
1 can tomatoes
2 onions, chopped fine
2 tablespoons butter
1 dozen oysters
3 tablespoons rice
Red pepper pod, without seeds

Chop onions and fry them in butter. Wash rice well, then stew onions, tomatoes and pepper together in about three quarts water and one pint oyster water, for about three hours, stirring frequently.

Ten minutes before serving, add okra and let soup come to a boil. Then, drop in the oysters, boil up once, and serve.

Chicken Gumbo
1 chicken, 3 or 4 pounds
1 quart sliced tomatoes
1 onion
1/2 red pepper pod, without seeds
2 pints okra, or about 50 pods
1 large ham slice
1 bay leaf
1 sprig thyme or parsley
1 tablespoon each lard and butter
Salt and cayenne to taste

Clean and cut up chicken. Cut ham into small squares or dice. Chop onion and parsley or thyme. Skin tomatoes and chop fine, saving the juice.

Wash and stem okra and slice into thin layers or one-half inch each. Put lard and butter into soup kettle. When hot, add chicken and ham. Cover closely and let simmer for about 10 minutes. Then, add chopped onions, parsley or thyme and tomatoes, stirring frequently to prevent scorching.

Next, add okra. When well browned, add tomato juice. Stir frequently to prevent okra from scorching.

Many Creole cooks fry the okra pods separately, seasoning with pepper, cayenne, and salt, and then add them to the chicken to prevent scorching. Equally good results may be obtained with less trouble by simply adding the okra to the frying chicken and watching constantly to prevent scorching.

The least taste of a "scorch" spoils the flavor of the gumbo.

When well fried and browned, add about three quarts of boiling water and set back on the stove to simmer for about an hour longer.

Serve hot with boiled rice. Round steak may be substituted for the chicken.

Your prescription is a good buy, so says the Department of Commerce. In fact, the department says that increases for prescription drugs have been moderate and below averages for other commodities. The average net cost of successfully developing a new drug product is approximately \$12 million, but only 15% of the 1,100 U.S. drug manufacturers are conducting research and developing new chemicals for medicinal purposes. Those research and development efforts will reach \$1.4 billion this year. The focus for development is upon cancer chemotherapy, antiviral compounds, agents to dissolve blood clots, antihypertensive agents, angina and heart rhythm controls, bacterial vaccines, hepatitis and chicken pox vaccines, bronchial dilating agents. For the work they do, your medications are among the least costly, yet most effective, items in today's inflationary era.

Busy Rhodes is ready to work on your problems: Inflation, High Taxes, Government Interference. They're his problems, too, and he wants to help.

throw this away.
 about your future...
 If you don't care

A personal message from Dusty Rhodes:

Dear friend,
 Thank you for reading this material. I hope it has told you what you want to know about my experience, my abilities and my position on issues which confront us today. I know my concerns and yours are the same, because this is our home and what happens to the 17th Congressional District happens to both of us.

You know, a Congressman has serious responsibilities to the nation, the state, the community and the individual he represents. Too often, unfortunately, a representative in Washington, hundreds of miles from his home district, is so caught up in the pressures and activities of Washington that he loses touch with the people who put him in office.

That's why I make this pledge to you: As your Congressman, I intend to keep my lines of communication with you open and free at all times.

How you feel, what you think, the problems you face now and in the future are very important to me. I don't know any other way I could call

myself your representative unless both of us always felt that we stood side by side at all times.

I want you to know that I shall always welcome your calls and your visits, whether I am here or in Washington.

Very soon, now, you'll be voting for the person you want to represent you in Congress. I hope I will be that person.

No matter whom you select...encourage him, support him, stand by him, let him know how you feel and why.

A seat in Congress is not a single seat. It holds two people — the man you have chosen and you.

I ask for your vote to allow me to share it with you.

Sincerely,

Dusty Rhodes

A.L. Dusty Rhodes

DUSTY RHODES TO RHODES IN CONGRESS

They're his problems, too, and he wants to help you do something about them now, before they get even worse than they are.

Inflation — the single most important national issue!
 Every day, inflation eats away your paycheck. In barely a dozen years, the buying power of your dollars has crashed 50%. So you pay twice as much for everything you buy now, or you have to get along with half as much, especially if you're living on a fixed income, as so many of our older citizens are doing.

One of the biggest causes of inflation is reckless government spending. Last year, the government spent 50 billion dollars more than its income. In 1978, the federal debt will be over 61 billion dollars. The interest alone on our gross national debt comes to about 60 billion dollars a year. And it grows every year, threatening your security and mortgaging the future of your children.

Astronomical figures? You bet they are. And you're paying them! How can they be reduced and the fires of inflation brought under control?

By putting brakes on government spending. By reducing the fat government payrolls. By doing away with government jobs for people who do nothing to earn their salaries. *By holding Congress accountable for the money — your money — it spends so carelessly.* Dusty Rhodes has the experience, ability and determination to do something about it.

High taxes must be reduced!
 Lower taxes free your money for other things. It encourages businessmen to expand — *creating more jobs and cutting unemployment.* It creates

greater confidence in our country and our economy.

And there's only one way to cut taxes. *Reduce government spending.* Use tax money more wisely. Avoid duplication of purchases in different government departments. Remove free-loaders from the welfare rolls — people who can work but won't.

There are many other ways government spending and taxes can be reduced. Dusty Rhodes is determined to find them and use them, as your next Congressman.

Government interference in your personal life and business must be stopped!
 There must be an end to the attitude of government bureaucrats who think that they can run your life better than you can.

There must be a reduction of government supervision which strangles small businessmen with red tape — which drives costs of business up and results in higher prices for the products and services you buy.

We've got to return to the principle of free enterprise, which helped our country develop the highest standard of living in history.

The government must stop competing with private industry in areas which are better run by private business — and stay away from a form of creeping socialism that can only destroy private initiative and the backbone of the American people.

It will take men with courage, ability and experience to help stem the tide — men like Dusty Rhodes.

Less than a week before Dusty Rhodes, here showing his appreciation to a shy young supporter.

A machine shop worker agrees with Dusty Rhodes that it's time for the government to stop interfering in everyone's lives.

Young Steve Collins, brother of the late Dusty Rhodes, has high praise and gratitude for Rhodes' efforts in helping him.

In the wake of the Watergate scandal, Rhodes talks about the need for reform in government.

Dusty Rhodes is ready to work on your problems: Inflation, High Taxes, Government Interference.

Put an end to government mismanagement and immorality!
 They cost you money and endanger your highest principles of right and wrong.

Just take one classic case of mismanagement of government programs, for example — Social Security. For years, short-sighted government policy has used up Social Security funds recklessly, for purposes other than providing security in retirement. To avoid bankrupting Social Security, taxes have been skyrocketing. Yet there is no guarantee that mismanagement of current and future funds will not continue, bringing Social Security once again to the brink of bankruptcy, ruining your future security and the security of your children.

Let's talk about immorality in government for a moment. How can the scandals of Watergate, Koreagate and bribery of government officials among some of our legislators do anything but destroy the moral standards which we are trying to teach our children?

When will pornography be recognized by government officials for what it is — illegal and degrading — and not be tolerated any longer? Congress needs men of strong moral fiber, men like Dusty Rhodes.

Congressman Dusty Rhodes.

A man who can make the difference.

Dusty Rhodes offers you an unmatched record of service, experience and achievement.

His roots go deep into the beliefs of the people in this part of the country.

Dusty Rhodes was born on a farm near Hugo, Oklahoma, in 1932. When you ask him what he remembers best about his boyhood in a small country town, he'll tell you, "The open skies and the wonderful, friendly people."

After a four-year tour in the Navy during the Korean War, Dusty attended universities in San Diego and Hawaii. In 1956, he enrolled in Abilene Christian University and has been a resident of this part of the country ever since.

While in college, Dusty married Nancy Fanson. Upon graduation from ACU, he attended the University of Texas in Austin, where he received his law degree in 1960. The Rhodes family then returned to Abilene to make their permanent home.

Dusty, Nancy and their four children — Ed, 19, Christ, 18, Annette, 16, and Sherrie, 14 — own a lot to this land and its people. Now they want to return through service the love and friendship and opportunity they have received.

Congress must be held accountable for the laws it writes.

Our congressional district — our state and our country face immediate problems. These are problems that worry everyone of us and somehow these problems turn into laws.

The men and women who are in Congress write our tax laws. They write the laws that govern Social Security. They establish all the agencies that require one report after the other from our businessmen.

Dusty Rhodes can make the difference for you in Congress.

He offers you more experience, knowledge, ability and pure fighting heart than any other candidate.

He is guided by the principles that guided the frontier people who built this land — love of family, trust in God, freedom of the individual, honesty, personal courage — your principles.

He knows the specific problems that face you in this Congressional District, whether you're in farming, ranching, the energy industry, a white collar or blue collar worker, older citizen, or a young person voting for the first time — and he wants to work for you.

Now meet Nancy Rhodes

Nancy Rhodes believes that every woman has a personal, valuable contribution she can make to the way we live.

She and Dusty share the belief that women should receive equal pay for equal work and have the opportunity for good jobs. As a member of Junior League, a national service organization, Nancy has conducted job and opportunity seminars for women. Nancy also works in other Junior League projects, and says, "I enjoy working with an organization whose main purpose is filling community needs."

family life to also respect our elders. Dusty Rhodes does.

His father is 72 years old, and in him Dusty sees and understands the problems of our senior citizens. Men and women who struggle to exist on a small, fixed income while roaring inflation makes the dollars they saved for retirement worth 43 cents today. Your older friends, and his, worry about Congress' poor management of Social Security, which for so many people is their only source of income. And they worry, too, about the high costs of medical care.

Dusty Rhodes believes that an individual has the right to work — and not be forced into unwanted retirement. He wants to reduce property and income taxes on senior citizens so they can have more spendable income.

Because of his concern, Dusty Rhodes frequently works on economic planning with groups of older people.

An understanding of and an involvement with the problems of our elderly population — another asset of the man who should be your next Congressman, Dusty Rhodes.

Experience in civic and family affairs / The civic and cultural growth of this area is a major concern of Dusty Rhodes.

He serves on the board of the West Texas Rehabilitation Center, the Abilene Zoological Society, the Abilene Philharmonic — and has helped with the Taylor County Muscular Dystrophy Society and the Abilene Boys Ranch.

As a Bible school teacher at the Highland Church of Christ, where he serves as a deacon, Dusty has worked with junior high, senior high and young adult classes. He and Nancy serve as marriage and family counselors, too.

And with all his activities, Dusty Rhodes finds time to spend with his family, because he believes that a strong family life is essential to a strong America. Besides, as he says, "I just like being with Nancy and the kids, every chance I get."

Experience with agriculture and ranching / Dusty Rhodes has never lost his love for things

our problems don't go away. Some of our representatives don't care. They're not responsive to what we want and what we need.

We need a Congressman who will listen to us. A man who will help us. A man who will represent the views of the people of this district. We need a Congressman who will be accountable to us for what goes on in Congress. Dusty Rhodes.

Experience in law / Dusty Rhodes is the senior partner in the law firm of Rhodes, Doshier, Chalk and Heatherly, which he established in 1965.

But even more important to you is Dusty's ability as a fighter even when the cards are stacked against him. He strongly believes in the rights of every man and woman and is determined to defend those rights with everything he has.

Experience in business / Dusty Rhodes serves on the board of directors of Citizens National Bank, Connally Oil Company, Hale Farm Supply in Haskell and Gibson Products Co., of Dunawayville. A Successful Businessman.

Dusty knows that small businesses, restaurants, clothing stores, gas stations, print shops, whatever — are vital to our economy. He knows that the small businessman is being taken to the cleaners — that too many people go out of business and too many people lose their jobs. He wants to help.

Dusty wants to expand investment tax credit, promote capital investment and expand work training programs.

Sound business experience — can you think of anything more badly needed in face of the thoughtless spending and mismanagement of activities happening in Congress today? We need Dusty Rhodes putting this experience to work for us in Washington.

Experience with handling crime / Many people have asked Dusty Rhodes, "As a lawyer, why do you defend criminals?" Dusty says: "I don't defend criminals. I defend a right — the most precious right guaranteed every man and woman under our Constitution — the right to be heard, the right to have your day in court. When that right is denied, the next step, which is more dangerous and more tragic by far, becomes possible — the denial of the rights of all. History

has proved this all too often. Remember Hitler's Germany — and today's Soviet Union."

Dusty believes we need to revise our criminal justice system, and our criminal code. He also favors mandatory retirement for federal judges who are ineffective because of age or health.

Dusty does not believe in being easy with convicted criminals. He has actively worked with Sheriff and Police Departments to help them effectively protect our citizens. He has been a frequent lecturer at law enforcement meetings.

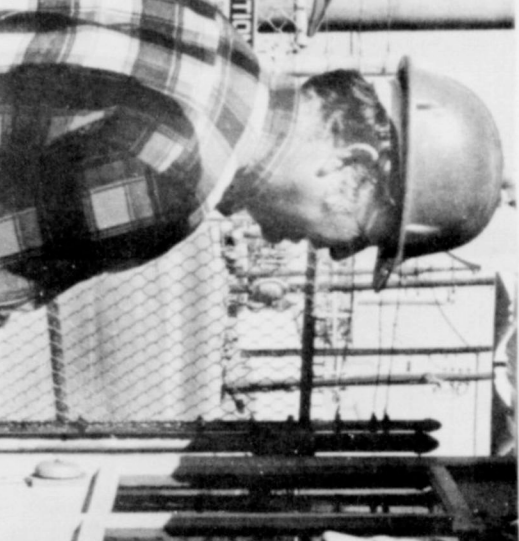

Dusty Rhodes is a man who understands law enforcement and our criminal justice system... this is why we need Dusty Rhodes defending the 17th District in Congress.

Experience with energy / Dusty Rhodes is involved and has interests in oil and gas properties in our district. He knows the problems that face this industry, which is important to our district because it employs thousands of people.

He is apprehensive about our country's dependence upon foreign oil and is strongly opposed to the efforts of legislators in northern states to restrict and control production in Texas.

He believes in three solutions to our energy crisis — deregulation of natural gas, more efficient, conservative use of energy, and development of all energy sources, including coal, solar and nuclear.

Experience with energy and an understanding of its problems — Congress needs it and Dusty Rhodes has it.

Dusty Rhodes talks to workers in the field. He favors deregulation to encourage greater production and less dependence upon foreign oil.
