Tahoka Schools To Dismiss At 1:30 On Friday

Superintendent Jim Coulston has announced that students in Tahoka schools will be dismissed and buses will run at 1:30 p.m. Friday,

Coulston said teachers are testing grades 1 through 8 this week, in preparation for the reading program next year, and they need another 3-hour session with the consultant before school is out for the summer.

Packaging Guidelines

When a person is shipping dense or heavy materials, such as books, stronger boxes are required. For ten pounds of books, the Postal Service recommends a box with a 175-pound burst test.

-- The Postal Service suggests that wrapping paper not be used on cartons. If a wrapper is torn or lost in transit, the mailing address can disappear. Further, the paper adds nothing to the package's strength.

-- The use of masking and cellophane tapes for closing or sealing is prohibited. In transit, they tend to peel off. and they have little strength. String is not recommended. If twine loosens, it can readily catch on processing machinery.

Instead, parcel post customers are urged to use the pressure-sensitive reinforced tapes. They are almost unbreakable. When marking a package "Do Not Bend," it is required that the container have stiffeners which will

protect it from being bent. In using a second-hand box, it is important to mark out addresses that may have been printed on it, along with extraneous numbers that could be confused with the ZIP Codes.

-- A final suggestion: Enclose a return address card in the package so that it can be returned if the mailing label is damaged or

Former Opponents To Support Rhodes For Congress, In The Run-Off Election

Former Democratic congressional candidate Crews McCulloch of Weatherford officially threw his support behind the campaign efforts of A. L. (Dusty) Rhodes of Abilene. The announcement took place last Friday during news conferences held in Weatherford and in Abilene.

In making the announcement. McCulloch stated "I am of the opinion that Dusty Rhodes is far and away the better qualified of the two run-off opponents. He has studied, and is far better informed on the issues than Mr. Stenholm. Dusty has never changed any of his positions even though there

were times it may have been politically expedient to do so, and I personally believe that he has the ability to get something done in bureaucratically controlled Congress. Dusty has convinced me that when he gets to Washington, he will be responsive to the needs of the 17th Congressional District. Before I could, in good conscience, endorse a candidate in this very important run-off election, I had to be sure that he will keep an open door. I have that assurance from Dusty.'

McCulloch went on to urge all of his supporters to rally around the Rhodes

campaign, and to add their efforts in that behalf in the form of votes and volunteer

Also adding his support to the Rhodes campaign is Evan Evans, the campaign manager for former congressional candidate Jim Baum. That announcement came Monday morning of this week, in Abilene.

Evans stated three reasons why he will be actively working to help Rhodes win the Democratic congressional nomination. "First, having been on the inside of a congressional race for the last nine months, I got a chance to know all the candidates, and I feel that Dusty and his people have run the cleanest campaign. This is something I feel very strongly about. I think things should be honest and above board, and I believe that Dusty is one that has provided this factor, in addition to Jim Baum, in this

Secondly, Dusty has the widest background of any candidate remaining in this race. He has not only a good and successful legal background, but he appreciates retail sales, he appreciates the problems of the small businessman, he has farming interests, he has a

personally, I have gotten to know Dusty, and even in the short time I have known him. I feel he's my friend. I believe that if this kind of thing could happen to me, a man who represented one of Dusty's former opponents, and I come away with that kind of feeling. I think it can happen to everyone in the district. I think we need our next congressman as our friend...not just our representative, but our friend... somebody with whom we can closely relate, and someone within whom we can have some faith. My faith is deeply in Dusty Rhodes.'

AUSTIN - Texas incomes are zipping along ahead of the rest of the nation in all major categories of business this year.

A Commerce Department report for the first quarter said the overrall increase in Texas is 4.9 per cent, compared with a 3.6 percent national average.

And the national increase. according to the Bureau of Economic Analysis, was the biggest quarterly gain since the present economic expanion began.

During the period. consumer prices increased about one percent. Incomes surpassed price hikes in all states except West Virginia which had a major coal

Biggest Texas gain was in the area of farm income. which went up 41.1 percent during the first quarter. The national average farm income jump was 28 percent.

A nationwide \$700 million federal payment to wheat farmers during December and higher cash receipts from crops accounted for the farm income in-

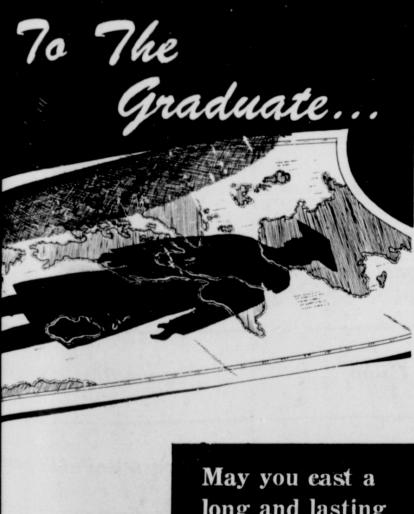

Mining (including oil and gas) income bounced upward 6.8 percent in Texas, though the national figure was less than one percent. Manufacturing personal income rose 5.2 percent in Texas, compared with three

percent nationally. Ten other states-North Dakota, Montana, South Dakota, Nebraska, Idaho, Iowa, Kansas, Michigan, Kentucky and Mississippi had bigger increases.

The unwarranted attack on my position concerning the Equal Rights Amendment should be resolved by the above vote.

In 1975 I worked hard to rescind. This amendment was approved 3-1 in my legislative district. I voted my district's wishes to the United States Constitution. The E.R.A. was just one of approximately 30,000 votes I cast.

I have the experience, have never represented a special interest, and I am the qualified person in the run-off.

I ask your vote and support Saturday, June 3.

proposed changes would be in the best interests of consumers. Current rules would be revised to require meat and other food products packaged under federal supervision to contain the exact amount stated on the label at the time of retail sale, he said.

Lunn County News

"These packages now must contain full weight only when they leave the packing plant," Brown explained. "The weight of water and other juices that is lost during transportation, often amounting to three or four ounces, is charged off to the consumer.'

The Texas Department of Agriculture for years enforced much stricter state statutes which do not allow such wide variations in package weight, Brown said. However, this was disallowed last summer when the U.S. Supreme Court ruled that the more lenient federal regulations take precedence over state laws.

Brown noted that the under emergency permits to cotton last season that cotton is the only crop that can be grown on the land this year.

The insecticides Bolstar, Ambush, Pounce, and Pydrin, previously unregistered, were granted emergency registration last year because of severe bollworm infestations in certain areas of the state.

Brown said. Because of uncompleted research on the longevity of these insecticides, no other crops except cotton may be planted in these fields.

Lynn Sheriff, Deputy's Salaries Are Below National Average, Study Shows

Results of a study released this week by the National Sheriffs' Association in Washington, D.C. reveal that county law administrators nationally are often confronted with a lack of adequate funding for the delivery of law enforcement

The report shows the

median annual 1976 salary for the sheriff, nationally, is \$13,800 and that 25 percent of the sheriffs earned \$17,576 or more. In Lynn County, the sheriff's annual salary is \$9,570.

The 1976 median starting salary for deputies throughout the nation was \$8,778 and for jailers, it was \$8,425. Lynn County's chief deputy earns \$8,811 annually, and the jailer earns \$8,535.

These and other facts emerged as the result of a year and a half study concerning the capabilities and needs of county law enforcement in the United States

Ferris E. Lucas, executive

director of the National Sheriffs' Association, said "the effort culminates the collection and analysis of information from some 1,900 sheriffs and 28 county police departments throughout the nation." Lynn County Sheriff Norvell Redwine furnished information, by way of a questionnaire, for the study

The report shows that sheriffs nationally have served an average of 7 years as sheriff and on an average have over 16 years' law enforcement experience, indicative of the devoted, longtime-career individual common in county law enforcement administration, Lucas said.

Rhodes, Harvick Are Wed In Gainesville Ceremony

Cristy Rhodes of Gainesville and Kent Harvick, formerly of Tahoka and now of Gainesville, were united in marriage April 14th at the Grand Avenue Baptist Church there, officiated by Rev. Leroy Martin, pastor.

Parents of the couple are Mr. and Mrs. Benny J. Rhodes, and Mr. and Mrs. Joe E. Harvick, both of Gainesville.

The ceremony was performed before an altar lighted by candelabra holding pink candles. Greenery banked the scene, and baskets of spring flowers decorated the area.

The bride was given in marriage by her father and she wore a French organza gown in champagne and white, with Victorian neckline, short sleeves, and bouffant skirt embellished ith lace and seed pearls. A . lace-trimmed flounce bordered the hemline. She also wore a lace garden hat with tiers of English silk illusion and carried a bouquet of

daisies and gypsophilia. Sherry Martin was maid of honor and wore a pink flocked dotted swiss dress with off-the-shoulder ruffles. She also wore a pink picture

SALVATION ARMY HAS KICK-OFF COFFEE ON MAY 17TH IN TAHOKA

The kick-off coffee meeting of Tahoka's Salvation Army fund drive was at Tahoka Cafeteria at 10 o'clock on Wednesday, May 17th.

Campaign chairman Mrs. Grace Huffaker said sixtyfive workers are ready to solicit gifts.

"We know that the people of the Tahoka area will contribute to this emergency fund program as they have so generously in the past,' Mrs. Huffaker said.

Funds will be used for local emergency aid to families in need and to stranded travelers during the fiscal year. Other Salvation Army services include sending boys to summer camp, caring for pre-delinquent girls and unwed mothers, helping families of prisoners and alcoholics, and providing relief in natural disasters.

Captains in the fund drive are Mildred Abbe, Ann Adams, Christine Askew, Katherine Barham, Dean Bartley, Fran Brookshire, Polly Cords, Margie Craig, Jeanell Edwards, Mac Edwards, Wilma Edwards, Billie Embree, Mildred Eubanks.

Southwestern Asks For Rate Increase

Southwestern Public Service Company announced this week that it has filed for a general retail rate increase in the cities and counties served by the company in Texas.

The request was made with the cities and the Public Utility Commission of Texas on May 12, and the company is requesting that the increase become effective 35 days after the filing date.

It is expected that the proposed new rates will result in an increase of approximately 10 percent for residential, commercial, industrial, and school customers. This would result in an increase of about 8.8 percent in the company's total revenues from Texas, or about \$22 million annually. Rates to wholesale customers and for retail service to municipal customers would not be affected.

The last base rate increase

in Southwestern's rates for residential, commercial, and industrial service was granted in 1974 and amounted to about 10 percent.

Increased costs of building new power plants, as well as the increased costs of labor. materials, money and taxes were cited by the company as the major reasons for the proposed increase.

In 1972, SPS made the commitment to switch from gas to coal as the primary fuel for their generating plants. This decision was made due to a long-range forecast which indicated increases in the cost of gas and diminishing availability. The present cost of new gas is about 70 percent higher than the cost of coal. Government regulations have restricted the use of

gas as a boiler fuel. Southwestern's first coal plant, a \$100 million, 356.7 megawatt facility located in the north part of the

company's system, went on the line in 1976. The total cost of this plant was almost

SECTION 2, PAGE 3

three times more than a gas-fired plant of the same size. The second 356.7 megawatt coal unit is scheduled to go on the line in June of this year. This new unit will also help stabilize fuel costs.

HOW'S YOUR SENSE OF SCIENCE?

Ingenious American scientists are making great strides in finding new ways to better our old way of life.

For one thing, we can send up satellites that make television specials visible worldwide, and telephone calls around the world easier, faster, and cheaper, too.

Scientists have developed energy-saving heat pumps that extract warmth from cold air and cool warm air, to keep homes comfortable year-round, without using up too much precious fossil fuel.

scientists have pioneered the development of several pollution-control devices and processes. In fact, the J. P. Stevens Company has spent more than \$20 million for environmental controls over the past 12 years.

I wish to take this opportunity to thank you for your vote and support during the May 6th Primary.

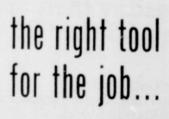

I continue to ask for your support in the June 3rd run-off election.

Your vote will be appreciated.

Thanks.

The Administration in Washington is moving ahead with its plan to make "meaningful, all-county, all-producer" crop insurance available to farmers.

According to Agriculture Secretary Bob Bergland the plan is to combine the insurance now offered by the disaster program, Federal Crop Insurance Corporation, emergency Farmers Home and Small Business Administration loans and some indemnity payment programs.

Bergland has delivered for the consideration of Congress a draft of the Farm Production Protection Act of 1978 and urged its enactment by July 1, which he says would give Commodity Credit Corporation time to get the new program in operation for the 1980 crop year. Low yield and prevented planting disaster provisions of the Agriculture Act of 1977, unless extended, will expire at the end of 1979.

Officials of Plains Cotton Growers, Inc., Lubbock, point out that the disaster program, conceived by PCG and initiated with the 1973 farm law, has been a great boon to farmers on the High Plains where weather is such a significant production factor. But Secretary Bergland has repeatedly called the disaster program 'a disaster in itself."

"By no means will we abandon our efforts to secure an extension of the disaster program beyond 1979," states PCG Executive Vice President Donald Johnson, "but we will also exert whatever influence we can to get an all-risk insurance plan that will serve the needs of producers in this area.'

The Administration's bill would offer farmers a choice of three different protection levels on all crops now covered by the disaster program plus a dozen others, including the Plainsgrown crops of soybeans, sunflowers and sugar beets.

Minimum coverage, according to a Bergland statement, would be 50 percent of production costs. At that level the producer and the government would each pay half the premium. Farmers choosing 70 percent protection would pay most of the cost of the additional 20 percent, and to get coverage on 90 percent of production costs the producer would pay the total premium on the final 20 percent of coverage.

The proposed bill would authorize CCC to offer prevented planting protection. But in his letter of transmittal to House Speaker Thomas O'Neill, Bergland referred to this type coverage as "specialty" insurance and said such coverage initially would be on an experimental basis.

"I'm sure our Board of Directors will object to this kind of thinking," notes Johnson, "because prevented planting protection is badly needed on the Plains and 'all-risk' insurance would be a misnomer from the start if such protection is not made available to all producers.'

Sherry Etheredge Says. . .

Rewards--not bribes--are powerful motivation in teaching children to repeat socially approved behavior. and parents can use rewards without fear of making children conceited.

Rewards can be praise. encouragement, a reasonable material possession or special privilege given to a child for accomplishment.

Of all these, praise has stronger motivational value than the others as children grow older.

in bribery, on the other hand, a child is promised a material object or special privilege if he will behave the way a parent, teacher, or other person in authority wants him to behave. So bribes are used to cause an act or influence it. but rewards are given in return for an approved act.

Rewards and bribery are two totally different kinds of recognition, but many parents make the mistake of thinking that a reward is a form of bribery. As a result, many hesitate to reward their children, and that nips whatever motivation children have.

This slows learning because when their efforts go without notice or appreciation, children have little

Dear Friends.

I want to thank you for supporting me in the Democratic Primary. My wife, Nancy, and I really appreciate the help and encouragement so many have given us during the Campaign. We ask your continued help and friendship in the weeks and months to come.

I would appreciate your vote on June 3 — either personally or by absentee ballot.

Thanks again for your help.
