CARE FOR YOUR CAR...FOR YOUR COUNTRY

A-WEEK CLUB at Your Mile-

Home Demonstration

The boys at camp are going to get plenty of food Christmas. Both the Army and Navy training camps have already planned their Christmas dinner menus and have included generous quantities of foods for the feast. But just the same a box of food from home is something special and will get a warm welcome because it is from home. So home economists of the U.S. Department of Agriculture offer these tips to help you make a happy choice in the food you ship to that boy in uniform for Christmas, or later.

Success of any good gift depends on both the food and the packing. You wouldn't want your boy with a big appetite for Mother's cooking to wait in vain for food that leaked or spilled, was moldy, oro crushed or broken, or fell out out of its wrappings enroute. That happens nany food gifts in spite of the best possible care in handling.

"35 won't hurt your car if you're careful at OO miles an hour...

"Pyorrhea" May

"Couple of my customers could even get a new car by U.S. regulations. But they're careful with the car they've got—doing under 35, same as others in wartime. That's the spirit!

"And this 35-mile 'tops' can make your car last longer yet, if you don't hunt up grief at 00 miles an hour! That's no wisecrack-00 miles an hour. It's when you car is standing and your engine is starting cold, needing lubrication the worst of ever. So I don't just change your oil. I change you to an OIL-PLATED engine with my Conoco Nth oil that attaches OIL-PLATING inside your engine, sort of by 'magnetism'-keeping OIL-PLATING from all draining down to the crankcase overnight, and all day, etc.

"Sooner than you're in the car, OIL-PLATING is up where you need itinstead of taking time getting there. You've had lots of people's word besides mine, that the worst danger of wear comes in starting cold. But what's plainer to get around that, than OIL-PLATING your engine with Conoco Nth oil? I'm extra

> in wartime." Your Mileage Merchant

glad I've got it for you now

HOW TO HELP PROTECT EYES AND GET MORE FROM YOUR LIGHTING!

1. SET A GOOD EXAMPLE FOR THE CHILDREN! Our eyes get worse as we get older . . . not better. Whether you're reading a bedtime story or a report from the office, make sure your lamp has the right size bulb. You can't go to work tomorrow fresh for any important job . . . unless you protect your eyes tonight!

Z. KEEP BULBS AND SHADES CLEAN! Scientists say you can get from 25 to 30% more light from a reading lamp just by keeping shades, bulbs and reflectors free from dust! Wipe bulbs with a damp cloth. If shades are dark inside, clean them or replace with white-lined shades that reflect light instead of absorbing it
