Land Measuring Ordered Stopped

About 10,000 acres of land in Mills county had not been measured when County Agent W. P. Weaver received a telegram ordering all measuring stopped. No reason was assigned for the order, and no intimation has been given as to when the measuring will be started again, if at all. Several crews of surveyors have been affected by the order.

RETURNING TO WORK

It may be too early to say that Mr. Lewis has met defeat in his steel strike, but that his drive against the mass industries has suffered its first serious check seems self-evident. Given at last the protection to which they were entitled from the beginning, the non striking workers in the Mahoning valley have flocked back to their mills in such numbers that operation is reported at close to normal. More impressive still is the showing at Johnstown, while at Cleveland and Chicago all that appears necessary to a like demonstration is the pressure of a sufficient force of police or troops to hold the pickets in line. The spectacle is that of a great army of peaceful wage earners, representing a preponderant majority of those affected by the strike, asserting their right to work against a ruthless, organized minority.—New York Herald-Tribune.

FAMILY REUNION HELD AT J. D. BRYAN RESIDENCE

On July 22nd, at Goldthwaite, Texas, the family circle of Mr. and Mrs. J. D. Bryan was complete when their ten children returned to the old home for a happy reunion. As usual W. J. Bryan was the last to arrive, the penalty for this was a pole ride, but being that W. J. is the largest of the six boys they did not have much luck getting him on the pole.

THIRTEEN GRANDCHILDREN AND SEVEN GREAT-GRANDCHILDREN PRESENT.

All of the children brought mother and dad presents and well filled baskets of food, so at noon there was a wonderful dinner served to 56 people in picnic style. The afternoon was spent in talking of bygone days, jokes, laughter and string music, it seemed that about half of those present could play a musical instrument, there being nine fiddlers including one left-handed fiddler, Leonard Ray of Coleman, a nephew of Mrs. Bryan who swung a wicked bow and kept the crowd in high spirits while he was playing. In fact the fiddle was kept hot for the entire afternoon with the nine fiddlers present there being two of the ladies present who also played the fiddle. All had a happy day with their loved ones.

WHEN TIME CAME TO SAY GOOD-BYE ALL EXPRESSED THEMSELVES AS HAVING HAD A GLORIOUS TIME AND HOPED TO ALL MEET THERE AGAIN FOR ANOTHER HAPPY REUNION IN THE FUTURE.

Those present were C. T. Bryan, Sulphur Springs; Mrs. A. W. Wright, Mr. and Mrs. Arthur Wright and daughter, Lubbock; Mr. and Mrs. L. F. Barnett, Cameron Rice, Vernard Samples, Waco; Lary Rice and his bride to be, Miss Madlyn Gossett, Atesville; Mrs. Henry Taylor, son and daughter, Comanche; Mr. and Mrs. J. J. The youngest of the ten still living is now 36 years old past.

Mrs. Bryan and her sisters, Mrs. Vira Morris of Beaumont, are the only survivors of their father's children—all living to a ripe old age before passing on to the great beyond. This is the second reunion to be held of this family in the past two years, the other reunion being held March 29, 1935, at which time all ten of the children were present, first time in 30 years. In conclusion we all wish for more years of happiness and health.

STRICKLAND-HOUSE REUNION WELL ATTENDED

Two hundred descendants of George Augustus and Martha Ann House Strickland gathered at Pecan Grove, Coryell county for their family reunion, on the invitation of John W. Roberts of Goldthwaite, a member of the family.

Before noon, most of the relatives got acquainted and registered, many of them meeting for the first time, and some, no doubt, meeting for the last time.

Then, well filled baskets were brought out, and although there were some 200 hungry mouths, the feast that was spread was only touched.

IN THE AFTERNOON, OLDER MEMBERS OF THE FAMILY GATHERED AT THE CHURCH AND SANG SPIRITUALS FROM CHRISTIAN HARMONY AND OLD SACRED HARP SONG BOOKS.

Family records were given and recorded as well as possible, but from memory, for the most part. Towns represented besides Gatesville, were Jonesboro, Riesel, Goldthwaite, Hamilton, Gustine, Turnersville, Nocona, Los Angeles, California, Gainesville, Florida, McGregor, Oglesby, Junction, Overton, Waco, Copperas Cove, Killeen and Picoake.

AT THE BUSINESS MEETING AFTER THE SINGING, WILLIS M. JONES, OF GATESVILLE, WAS NAMED CHAIRMAN, AND MRS. LENA GRAVES OF PICOAKE WAS NAMED SECRETARY.

The third Sunday in July is the date of the 1938 meeting, and the place designated was Neff Park.

SAM G. REID OF OGLESBY LED THE SINGING.

A committee on arrangements was also named.

There was a list of over 200 names of "in-laws and out-laws," as Mr. Roberts termed them, too long for The Eagle to print but we will say that the Jones's were far in the majority and they came from as far west as California and south as far as Florida and some were in New York but unable to attend. It was a great day indeed.

ELECTION DAY MONDAY INSTEAD OF SATURDAY

When Texans vote Aug. 23 on six proposed constitutional amendments, they will depart from a precedent of long standing. They will vote on Monday whereas such elections usually are held on Saturday. There has been considerable speculation as to the reason, and Rep.

Lon E. Alsop names this one.

One amendment would eliminate double liability for bank stockholders and, according to Alsop, representatives of bankers wanted it submitted Monday. He said there probably would be fewer rural voters at such a time. This amendment was the first the Legislature decided to submit. After Aug. 23 was agreed upon, elections on the other amendments were set for the same date, as customary. Alsop is sponsor of two amendments authorizing assistance for needy blind and dependent children.

Senator Frank Rawlings of Fort Worth was author of the band stock liability proposal.

REMARKABLE SOUTHERN INDUSTRIAL GAINS

According to the Blue Book of Southern Progress the value of the South's manufactured output is now more than \$9,500,000,000 a year. In 1935, the latest year for which census figures have been announced the South's 33,968 manufacturing plants produced goods worth \$8,635,000,000. They paid out \$5,400,000,000 for materials, fuel and power, and \$1,221,000,000 in wages. Last year, the annual review of Southern industrial progress sets forth, more than \$322,000,000 was invested in new plants. When the Manufacturers Record began, in 1882, to emphasize the industrial opportunities of the South, agriculture was the region's chief dependence. In 1880 the value of the South's farm production was \$756,903,000, while its manufacturing output was worth only \$329,752,000.

Though agriculture is still quite commonly believed to be the South's biggest industry, the value of the region's farm production is considerably less than half of that of its manufactured goods. The crop value in 1936 was \$3,969,000,000, which was 40 per cent of the country's total, while the region's manufacturing is approaching \$10,000,000,000 a year. Skeptics who believed the South would never be anything but an agricultural area are proved to have been wrong.

Current indications are that the South is due to enjoy much additional manufacturing development in the near future, particularly along lines that will benefit the farmers—processing of the products of Southern fields and forests.

RANCHMEN WORK TO ERADICATE MESQUITE TREES IN PASTURES

The infestation of pasture land by mesquite trees has become a problem of importance to many ranchers in Brown county. As a result E. E. Kirkpatrick has fenced against grazing three demonstration plots of four acres each on his ranch ten miles south of Brownwood on the Brady highway giving different types of treatment to each plot. One plot was contour ridged and all mesquite trees treated with kerosene in April. To date approximately 80 per cent of the trees have died and others are dying. Another plot was contour ridged only, and the remaining plot was not treated in any way.

Strength is extra-important when going through the middle of life. Then the body is very best nourishment to fortify it against the attacks that are taking place. A COMMON SENSE PROPOSAL

For a good many years an effort has been made to ram down the throats of the people of Texas an amendment to the federal constitution which would give Congress the power to "regulate the labor of all persons under 18 years of age."

Now that the die-hards have finally realized that this amendment will never be accepted by the people of the cotton states, a sensible substitute is to be submitted in its stead.

The old amendment would give Congress full control over all labor of all persons under 18. It made no exceptions, and it was reasonably believed that by it a 17-year-old boy could be forbidden to pick cotton or milk cows on his father's farm.

The new amendment replaces the indefinite word "labor." By it Congress will be given authority to regulate "the employment for hire of persons under 16 years of age."

This is quite different. If it is submitted to the states, we believe it will meet with far less objection. However we still believe that this regulation should remain with the states and not be turned over to Congress at all.

END OF THE COURT BILL

President Roosevelt appears to have met with crushing defeat on his proposal to enlarge the supreme court. The issue has stirred more ire than any other legislative proposal since another Democratic president—Woodrow Wilson—sought to secure the entry of the United States into the League of Nations.

Now that the Senate has definitely shelved it, an opportunity is offered for overheated minds to cool down. Viewed objectively, there has never been sufficient cause for the excitement that has prevailed. Much has been said about President Roosevelt "packing" the Supreme Court. As a matter of fact the Court is already packed with appointees of conservative Republican presidents, and the enlargement asked would merely tend to equalize its opinions.

To the lay mind the whole controversy smacks too much of a legal battle replete with technicalities. After all, the people form the court of last resort. They will no more tolerate a court extravagantly liberal in its constructions than they will one rigidly conservative. This is amply demonstrated by a study of the decisions rendered by the present Supreme Court since the first New Deal legislation was submitted to it. The court has grown appreciably more progressive in keeping with the spirit of the times. Whether this progressive tendency should be accelerated still further is the crux of the question.

The Senate says it shall not be. For the present, that will be the final word.

ARDMORE'S GOLDEN JUBILEE

Up in Ardmore, Oklahoma, this week they are celebrating that up-and-coming city's fiftieth anniversary with a great Golden Jubilee. In commemoration of the event, the Daily Ardmoreite last week issued a fine 48-page Golden Jubilee edition which would do credit to a much larger city.

The paper is full of interesting stories of pioneer days in Southern Oklahoma, of the striking of oil and of the recent growth of the city to its commanding position in that section of the state. But most interesting of all is a frank account by the Ardmoreite editor and owner, John F. Easley, of his association with the paper for the past 40 years.

To those who know that prince of newspaper men, whose dominating characteristics are good humor and an unruffled and always pleasing temperament, the recounting of the trials and sacrifices which he underwent comes with something of a shock. It is an accurate index to the bigness of the man and the fineness of character that these grueling experiences have left no trace upon him besides the snowy whiteness of his hair.

Today the Ardmoreite is printed in its own specially constructed plant. It has one of the finest presses in Oklahoma, and its other equipment is equally modern. In connection there is a modern radio broadcasting station. Its editorial and advertising staffs are of metropolitan caliber, and Albert and Ernst Riesen, the paper's secretary and treasurer, have grown up with the business and are carrying out the Easley principles with great success.

Just one thing is missing in this fine newspaper—missing alike from the pages of the Golden Jubilee edition and from the editorial offices of the paper as this writer once knew them. That is the motherly face and figure of Mrs. John F. Easley who only a little more than a year ago passed to her reward. Mrs. Easley was a true newspaper "man," and who can doubt that she too is now watching with a happy smile Ardmore's Golden Jubilee.

Laughing Around the World

More Versa Than Vice, Probably

By IRVIN S. COBB

IN A certain Southern city the lady who is at the head of the public library has a fondness for larding her speech with quotations from foreign languages, including the dead ones. Especially is she addicted to Latin phrases. Locally there is a suspicion that she sometimes gets a trifle mixed. But the lady herself goes serenely along, pumping strange words into her everyday conversation.

One afternoon a patron dropped in to get a book.

"You weren't here the last time I called," said the visitor. "Your assistant said you were taking a little rest. Did you enjoy your vacation?"

"Very much," said the learned one. "I just took a little jaunt up to New York via train and came home *vica versa*."

"How did you say you came home?" asked the astonished citizen.

"*Vice versa*," repeated the lady blandly. "By steamer, don't you know?"

GOVERNOR ALLRED STANDS PAT

Texas taxpayers should appreciate the firm position taken by Governor Allred who, as a member of the state tax board, has secured the reduction of the state school tax rate from 20c to 7c, a saving to the taxpayers of Mills county of the tidy sum of \$5,850.

The governor has done this in spite of the state board of education's schoolboyish attempts to stampee him into approving and continuing the old 20c rate.

There used to be a current expression, "going hog wild on education." We don't know just how wild the educational leaders have been, but there can be no contradiction of their hoggishness. The schools have been given the lion's share of the gasoline tax, the cigarette tax, the marble machine tax, and so on until the board sincerely believed that the schools must come first, and let the other funds look out for themselves.

Thus we have the anomaly of the schools receiving the highest per capita apportionment in history and yet finding a huge unspent reserve on hand. Confederate veterans and their widows are having to wait for their paltry pensions or discount them. Recipients of vouchers on the general fund must likewise wait for months for their money. But the schools, like badly spoiled boys, have hugged their surplus to their breasts and imperiously cried for more.

The Eagle cannot believe that the rank and file of school men and women are in sympathy with this selfish attitude of their leaders. It will help to retain the schools in the good graces of the ever-paying taxpayers if they will come out and admit that what the schools are now receiving is enough.

TEXAS RANKS HIGH IN MANUFACTURING

The Texas Planning survey of Texas plants closes that: New manufacturing is coming into Texas at the rate of more than a million dollars a month. Texas factories are producing 93 per cent more in 1937 than in 1933 and more than in 1929.

Texas factories add 600 annually to the Texas raw material into Texas-made products. Texas is the largest producing state south of Mason-Dixon line.

Texas factories employ 600,000 people. Texas ranks second in the manufacturing of the Mississippi.

Japan may soon be a competitor of Texas in the production and export of according to statistics by the Texas Planning.

In 1935 Japan imported 50,790 metric tons of sulphur; in 1936 50,790 metric tons.

San Saba

Contracts are to be let soon for improvements on Highway 81. A new bridge is to be constructed at Cherokee, and over a mile of road north of the bridge is to be worked.

Raymond Jackson and J. Burke made a big catch on the week-end when they landed a 58 1-2 pound yellow cat. The fish was caught near the Colorado bridge on Highway 81. This makes the second real large fish caught within a week.

Mrs. Bob Mayfield entertained The Noisy Nine at the home of her parents, Mr. and Mrs. Oim Walker, last Thursday when the following spent the day in fun and frolic:

Mmes. Lloyd Moseley of Rochelle, Ed Low Cook of Van, Geo. Hopkins of Cotulla, Neff Manier of Arp, Carlos Ashley of Llano, Harkey G. Thornton and Frances Crain of San Saba.

A most enjoyable day was spent and the affair is an annual affair.—Star.

Last Tuesday Jim Watkins and party brought in a 48 pound yellow cat from the Colorado, the next day W. H. Hinyard and Steve Ballew showed a 54 pound cat from the San Saba, Sunday Raymond Jackson and his party brought in a 58 pound yellow cat, while Monday morning Jim Watkins and Morris Lindsey had gone them one better with a 65 pound yellow cat, the latter two both coming from the Colorado river.

Thurman Bird is now operating the East Texas Marathon Station on the southwest corner of the square. Mr. Bird is well known to the people of San Saba county and has moved his family to San Saba to make their home.

Mrs. R. H. Mayfield and son daughter to Hutto are spending a part of their vacation with her parents, Mr. and Mrs. J. M. Walker at San Saba. Mr. Mayfield is superintendent of the schools at Hutto.—News.

Lampasas

Mr. and Mrs. Earnest Leonard returned Sunday from a vacation trip and visit in Goldthwaite with her parents, Mr and Mrs. J. F. Doggett, and with relatives and friends in Coleman and Sweetwater.

It was a great day Tuesday, July 21, 1937, for the old settlers of Lampasas and Burnet counties, together with some from other points who had made Lampasas their home in the past. This was the occasion of the old settlers reunion and also a reunion for many others who might not be termed old settlers, but who were included to make a great day for everybody who wanted to come. It would be hard to estimate the number present during the day, but several guessed the crowd at around 600 and that is conservation. There was plenty of dinner for everybody.

The Townsen reunion will be held Saturday afternoon, Saturday night and Sunday, July 24 and 25, according to a member of the family. This is an annual affair and includes all the relatives of the Townsen family. It will be held, as usual, on the Presbyterian tabernacle grounds at Adamsville.

Large crowds come every year to this affair which is composed of descendants and in-laws of one of the oldest families in Lampasas county.—Record.

Brownwood

The longest distance irrigation venture ever made in Texas may be repeated this year, as a result of signing of contract this week providing for purchase of water from Lake Brownwood by South Texas Rice growers.

E. J. Crofoot, president of the Gulf Coast Water Company, Bay City, signed the contract with Brown County Water Improvement District No. 1 for purchase of water, if needed this season, from Lake Brownwood. The contract gives Crofoot an option to buy the water from the local lake if and when it is needed this season.

Damage to crops in Brown county by grasshoppers is being superseded by boll weevils and jack rabbits, according to County Agent C. W. Lehmburg.

With notification already received from each of the 19 counties in Extension Service district 7 that they will have representative groups present, attendance at the annual district 4-H Club Boys Encampment to be held at Lake Brownwood, State Park July 26-28 is expected to well exceed 300.

Released from Central Texas Hospital Tuesday after receiving treatment for injuries received when a truck loaded with cattle struck the car in which he was riding near Goldthwaite, W. C. Thomison has been removed to his home in the Trigger Mountain community.

Thomison's condition is considered greatly improved.—Banner.

In compliance with a concurrent resolution, adopted at the special session of the Legislature which recently adjourned, the Texas Planning Board has launched a study into the types of exhibits Texas should have at the World's Fair in New York and at the Golden Gate Exposition at San Francisco in 1939.

The Texas Planning Board estimates the 1937 Texas orange crop will exceed 2,000,000 boxes. The 1936 crop filled 747,000 boxes.

TEXAS DOVE HUNTERS GET GOVERNMENT HELP

The federal government has come to the rescue of most of Texas dove hunters by changing its regulations to conform with state laws in a majority of instances. A previous order would have seriously limited hunting in many sections, under the new order, however, one section—the northern portion of the old south zone, embracing about 20 counties—will have no open season. The new regulations promulgated by the bureau of biological survey of the U. S. department of agriculture, because the Texas legislature failed to conform state seasons with those it had previously announced, provide:

A bag limit of not more than 15 mourning or white wing doves or an aggregate of 15 of both species in one day, and, not more than one day's bag limit in possession at any time. An open season Sept. 1, to Oct. 31 in Yoakum, Terry, Stonewall, King, Cottle, and Childress counties and in all other counties north and west of these. For the remainder of the state an open season Sept. 15 to Nov. 15.

The state game, fish and oyster commission pointed out that under both federal and state laws, mourning dove shooting would be permitted in the Panhandle section Sept. 15 to Oct. 31. In the remainder of the north zone, mourning and white wing dove shooting will be permitted from Sept. 15 to Oct. 31.

The newly-created coastal zone will see shooting from Oct. 1 to Nov. 1, except that portion of the zone south of the Texas-Mexican railroad from Corpus Christi to Laredo where the season will be open Sept. 15 to Oct. 31.

A Cooler Kitchen This Summer With ROPER Located and Controlled Heat Top Burners

Make This Test

Partially fill a two quart stew pan with water, and place the pan over a Roper two-way "Multi-Flame" burner. Turn the burner to simmer. Then place two handkerchiefs around the pan. You'll find that because the heat is properly located and controlled, the handkerchiefs will not be scorched at all in bringing the water to a boil. That means less heat loss—a cooler kitchen for you.

**ROPER - America's Finest Gas Range
Gives Cooler Cooking Because . . .**

A new Roper will keep your kitchen cooler because of the located and controlled heat feature. Heat from the burners is used to cook—not to heat the kitchen. With "waterless" cooking, made possible by this located and controlled heat "Multi-Flame" burner, there is less rising steam. That super insulated oven also helps to keep heat in the oven—out of the kitchen. You'll thrill to many other fine Roper features. See these delightful new ranges soon.

MY PARD

We have a little humming bird in our yard
He seems so familiar you'd think he is my pard.
He hums among the daisies
He hums around the rose
He hums among the honeysuckle
Then away he goes.
In a little while he comes right back to me
And settles on a twig in a nearby tree.
Then he dives into the sprinkler,
Where I'm sprinkling the yard.
Yes, sir! I'm firmly believing
That this humming bird's my pard.
