Rev. L. L. Hayes Holds Record Of Preaching Gospel For Seventy Years

BY RALPH E. MASSEY

"I am 95 and a half and have never needed a walking cane yet," boasts the Rev. Lovely Lorenzo Hayes, present pastor of the Trigger Mountain church.

He started saddlebag preaching 70 years ago at the Old Medina church in Bexar county south of San Antonio.

"Saddlebag preaching was done when the horse was the only means of transportation," he explained. "I used to put clean socks and shirts in one end of my saddlebag and a Bible in the other. Then I would rack out."

The Rev. Mr. Hayes was born in Alabama, Dec. 19, 1861, the year the Civil war began. He started preaching in Bexar county with his first pastorate at the Old Medina church.

"They want me to come down this year for their centennial, but I don't suppose I will go," he added.

No telling how many people I have baptized in that old Medina river, he mused.

But the Trigger Mountain preacher does know how many people he has baptized during his lifetime—approximately 1250.

The veteran "saddlebagger" has two proverbs to fit the modern times.

"The first one," he says, "is that a child's mind is corrupted by the trashy vulgar presentation of life as it is seen on television."

The old man paused, looked at the Bible on his desk and then down toward the farm-to-market road, before giving his second proverb.

"Also, sky scrapers and steel bridges can't save our civilization," he continued, "if it's ever saved, it will be through the influence of the Christian religion."

Rev. Hayes said that he remembered the first sewing machine in the county. "When the neighbors came to see it, they just couldn't believe their eyes when they saw those rapid stitches," he recalls. He also remembers that his mother didn't have a cook stove until he was old enough to plow. "She cook-

ed on the open fire. The problem then was not how to cook but what to cook," he said slowly.

Mr. Hayes moved to his present home, seven miles north of Goldthwaite, in December, 1897. He now teaches a Sunday School class every Sunday and holds regular services every fifth Sunday at Trigger Mountain.

"They don't especially want me to preach, but they want the gospel that I preach," he explained.

The Rev. Mr. Hayes has preached for the past 60 years in Mills county. He has preached at Mullin, Star, Zephyr, Ridde, Newburg, and Goldthwaite.

He also taught school for 12 years, and he has had several articles published in the Baptist Standard.

Services Sunday At Trigger Mountain

Rev. L. L. Hayes will conduct the regular Fifth Sunday Services at the Trigger Mountain Church Sunday morning, June 30, at 11 o'clock. Everyone has a most cordial invitation to attend the services.

Mrs. Vic E. Koleber is a patient in Scott & White Hospital at Temple where she underwent surgery Wednesday morning.

Mrs. E. M. Burgess and Mrs. Wayne Cornelius and children, Margaret, Wayne Jr., and Betsy all of Fort Worth were guests of their sister and parents, Mr. and Mrs. Grover Dalton last week. Mrs. Burgess stated that her son, Dr. R. M. Burgess Jr., who had finished his internship at a Waco hospital will now be associated with his father, Dr. R. M. Burgess, in Fort Worth.

Rev. and Mrs. Glenn Dunn and their daughter, Rena Beth, who have just recently returned to the States from the Philippine Islands are now at home in Austin.

Mrs. Daisy Sellers is visiting her daughter, Miss Veseva Sellers in Houston.

SOLILOQUY

The following letter was received by this office from John C. White, Commissioner of Agriculture of the State of Texas:

"I want to commend you and your staff for putting out the excellent special soil conservation edition of May 23.

"The story of conservation was wonderfully told in the news stories, features and pictures.

"If I can ever assist you in any way, please let me know."

While on the subject of our special soil conservation issue we might add that we received many favorable comments from many of our subscribers and from all indications it was pretty well received.

This was our second special issue put out on the subject and we are starting to make plans now for a bigger and better Soil Conservation issue in the spring of 1958.

Public Debt Not Like Private Debt

Most of us know that the federal debt is about \$275 billion. But few have any concept of what that means—it's just a figure, almost beyond human comprehension.

Senator Byrd, writing in National Review, gives a vivid picture of the debt. That \$275 billion, he says, "is equivalent of the assessed value of all the land, buildings, mines, machinery, factories, livestock—everything of tangible value in the United States."

Then he goes on to say something that must be far better understood than it is now if this country, as we know it, is to survive: "Public debt is not like private debt. If private debt is not paid off, it can be ended by bankruptcy proceedings, and maybe not many people are hurt. If public debt is not paid off—paid off with taxes—the result is disastrous inflation or repudiation. Either would destroy our form of government."

Senator Byrd believes the budget can be cut by more than \$6 billion without harm to an essential federal function. If we cannot do that now, with the economy running at peak speed, when can we?

Charlie Odell Hopper, six year old son of Mr. and Mrs. Odell Hopper, is a relative newcomer in the community but he is getting pretty well acquainted and is looking forward to entering school this fall.

The Hopper family moved here from Smithville, Oklahoma a while back and took over ownership and operation of the Nu-Courts and Station on North Fisher street. Charles says he likes it here just fine and they are enjoying their new home.

While visiting with him one day shortly after they came here I asked him, (As I usually do boys and girls) whether his daddy was giving him any trouble. He said: "Not much—except when it comes to 'POP'." Later he told me the story in a little more detail. He explained the fact that he doesn't care much for ice cream and candies, "but," he continued, "I sure do like that soda pop, and they never will let me have all I want."

That's a rough spot for Charles to be in too—with his parents to be running a store where there is plenty of pop on ice at all time.

Goldthwaite came in for a portion of publicity a few days ago when Lucile Fairman, postmaster, attended the first annual regional meeting held in Dallas for Postmasters of Texas and Louisiana.

During the meeting honorable mention was made about the operation of the local post office. Also the post office lobby came in for praise because of the floral decorations.

Mrs. Fairman served on the eight member banquet committee. There were four from Texas and four from Louisiana. She and one other member of the committee had charge of seating officials of the association for the banquet.

The four day meeting gave those attending an opportunity to tour regional offices along with their regular routine sessions. The next meeting will be held in New Orleans next spring.

Inside WASHINGTON MARCH OF EVENTS

No Invitation to Zhukov To Visit U. S. Possible Move Would Be Inexpedient As Well as Unwise

Special to Central Press Association

WASHINGTON—You can completely discount recent reports that President Eisenhower is thinking about inviting Soviet Marshal Georgi Zhukov to visit the United States.

White House insiders say there isn't a chance this will be done although Mr. Eisenhower would be willing to see his old friend again under different circumstances. No invitation will be made for two reasons:

1—The American people would never accept an official visit by a Soviet leader.

2—Nothing could be accomplished by such a visit to Zhukov.

The violent reaction in Congress and other circles to the proposal to invite Yugoslav Marshal Tito to this country would be a warning to what an invitation to Zhukov would mean. The Tito visit, incidentally, is still under consideration. The State department's oft-repeated belief would help improve U.S.-Yugoslav relations.

NO MORE POLLS?—Congressmen—whom they represent—public opinion—has been increasingly annoyed at public opinion polls conducted on behalf of the federal government. The latest came when State department officials let it be known that 10 Americans "favored foreign aid."

Rep. Glen R. Lipscomb (R), California, noticed this statement became intrigued—his own mail was running just the other way. Checking up, he found that funds for this and other agencies hidden in a secret million-dollar appropriation for "emergencies."

Under mounting pressure from Congress, the State department announced it would run no more polls in the future. The Post Office department ran into the same type of protest a poll it sponsored showed that most Americans wanted more for postage.

MENACE OF MISSILES—Gen. Nathan F. Twining, chairman of the Joint Chiefs of Staff, gave a Senate committee one day a graphic picture of the reasons for United States bases overseas. He said the real advantage is one of geography—in effect, we ring the Soviet Union—in fact, the entire Communist bloc.

"We can approach our targets from many directions and draw over different routes," General Twining said. The military officer said that the Soviets, on the other hand, are comparatively limited in the directions they can fly aircraft to attack.

Twining said that until the Soviets get planes of unlimited range or unless they were to depend on one-way missions, their bombers threaten us primarily from the northward approach.

However, Twining warned: "As the Soviets get missiles of long range of being launched from submarines, we will face a threat that will come from any direction."

BENSON'S FUTURE—Agriculture Secretary Ezra Taft Benson and his friends strongly deny that he plans to resign this year. Farm organization sources say they are getting "permanently" on his way out.

Benson's associates say that he realizes he has a tough battle facing him in Congress on the farm program issue but is determined to stick it out and has President Eisenhower's full support. Benson himself maintains that criticism never bothers him personally. He once quipped, "I thrive on it."

However, the National Farmers union says that Benson is a controversial figure, with enemies in Congress. He may be "unloaded" late this summer or autumn.

The farm organization, which has "predicted" Benson's departure from the Cabinet several times in the past, now says that the culture secretary has lost the President's backing. He is getting fed up with Benson.

NEWS from YOUR

COUNTY AGRICULTURAL AGENT TEXAS A. & M. COLLEGE EXTENSION SERVICE

By George Reese

This is being written as a tribute to the many 4-H leaders in Mills County. It has been said that somewhere between the sternness of a parent and the comradeship of a pal is that mysterious creature we call a 4-H Leader. 4-H Leaders are found everywhere, at judging contests, junior fairs, livestock shows and aiding with the preparation of the demonstrations. The good 4-H beef calf feeding program that Mills County is noted for and the 4-H poultry programs could not be such an outstanding success without these many leaders who have devoted much time and effort with the many 4-H boys and girls of Mills County. We wonder sometimes just where some of the former Mills County 4-H club boys and girls are and just what they are doing.

W. V. Horton Jr. and his wife the former Modene Reynolds were in town around the first of June. They are in Mississippi where Junie is feeding for a registered Hereford breeder, he says that he likes his job very much. They are not too far from Allen Poe and his wife, the former Floy Woodard. Allen is making a name for himself and the Hereford breeder that he is working for, as one of the top cattle feeders and fitters in the nation. They live at Canton, Mississippi.

Merle Woodard another former Mills County 4-H club member and calf feeder, married Aldean Lee who was reared at Moline, they are managing a registered herd of Herefords at Pine Bluff, Arkansas.

Buck Horton and family also live in Mississippi where Buck is feeding registered Hereford cattle.

Johnnie Head and children of Stuttgart, Arkansas are here visiting with her parents, Mr. and Mrs. Charlie Warren.

Mr. and Mrs. E. L. Fisher and family visited last weekend with Mr. and Mrs. W. D. Hopkins in Abilene.

Mr. and Mrs. Alvin Hays of Killeen were visitors here last weekend with Mr. and Mrs. Charlie Hays.

for a gas company in New Mexico, you will remember that Bobby showed the grand champion steer at Houston in 1950.

Billy Mac Newton has been farming in Hamilton County after graduating from high school at Star. He is a large turkey producer in that county.

After graduating from Texas A and M, Sammy Owens has finished his Army duty and has returned to Texas A and M to work on his Masters Degree.

Marion Reynolds has purchased a farm near Pittsburg, Texas, he is married and living on his farm, where he is raising cattle.

Dana Saylor has graduated from Oklahoma A and M in Animal Husbandry. He is working on his Masters Degree at the University of Kentucky and he is also feeding the show herd of cattle that the University owns.

John Howard Owens is still in the Air Force and is stationed at San Antonio.

Van Wilson McCasland is working at Consolidated in Fort Worth, where he has a good job. Van Wilson showed the grand champion Turkey at Houston in 1953.

Davis Owens is living at Grand Prairie where he works at the Temco plant. Davis fed and exhibited several good steers while a 4-H member.

Robert Dudley Jordan has finished one year of college at Tarleton in Stephenville.

Wayne Poe is home for the summer, he has been attending

Abilene Christian College at Abilene, Texas.

July 21 to 27 is Farm Safety Week. Medical science has decreased the national death rate, but accidental deaths and injuries continue of the increase. Accidental deaths and injuries on the farms and ranches place farming as the third most hazardous occupation in our country today. Farmers spend much time on improved practices, yet we all admit that people are the most important crop on any farm. Safety isn't just another "word to the wise"; it is a way of life. Safety practice must become habit forming in order to be effective and Farm Safety Week is a good time to start such habits.

State Capitol NEWS
By VERN SANFORD
Texas Press Association

AUSTIN, Tex.—It's vacation time in Texas. During the next three months millions of people will stream to every corner of the state in search of relaxation.

But a lot of home folks will stay home. They make a living catering to the tourists. Vacationing is big business in Texas. And it promises to get bigger.

Last year nearly 8½ million out-of-staters visited Texas—only 12 per cent on business. They spent \$35,000,000 for food,

lodging, gasoline and entertainment.

Next year voters will decide whether to try to hustle in even more visitors and money through nationwide advertising. A proposed constitutional amendment to remove the ban on spending state funds for advertising was passed by the last Legislature. It will come to a vote at the November, 1958, general election.

Meanwhile, several state agencies and a host of municipal and private organizations give out information on how to have fun in Texas.

State Highway Department has just issued a brand new map telling how to find your way over the state's 100,000 miles of roads. It includes 20 full-color pictures and a warm welcome to the "land of hospitality." Available free from the department.

State Park Board, housekeeper for 49 state parks, plans many new camping, swimming and picnicking facilities. It got a "generous appropriation" from the Legislature, said the Board.

Texas Game and Fish Commission has help and advice for the one in every four Texans who hunts or fishes. Its numerous publications give guidance ranging from where the fish are biting to what to do for snake bite.

YEAR'S WATER SUPPLY—Without another drop of rain, Texas' 35 major reservoirs now have enough water stored to last a year.

Heavy spring rains poured 6 million acre feet of water into the reservoirs filling them to 92 per cent capacity, reports the State Board of Water Engineers.

Storage is about twice that of a year ago.

FLOOD SURVEY SOUGHT—But the unprecedented rains brought problems. State Water Board wants money to make an emergency survey of what the floods did with a view to learning how to prevent future destruction.

Both the Board and Gov. Price Daniel requested an appropriation for this from the last Legislature. But it didn't go through, so now the Board has asked donations from the state's five water districts and river authorities.

It wants several thousand dollars from each totaling \$17,000.

NEW STANDARDS set up by the State Board of Education direct that:

1. Graduates complete 16 units of study, rather than present 15, including two years of laboratory science.
2. Physical education cannot be counted in compiling the units.
3. Not more than one class period of the day may be used for competitive athletics.

New rules take effect the 1958-59 school year, but are to be applied to ninth graders next fall.

SHORT SNORTS—No one person has a right to all the water in the river, ruled the Third Court of Civil Appeals. Its decision favored the Great American Development Co. which sued a Comal County landowner, Clayton N. Smith, after his irrigation pump dried up Rebecca Creek. . . Gov. Price Daniel has asked the Army Corps of Engineers to remove silt and sand blocking the mouth of the Brazos where it enters the Gulf. Recent floods have shown the need for an adequate discharge channel, he said. . . State Supreme Court upheld an order of the Industrial Accident Board preventing two Waco attorneys from practicing before it. While the Board does not have authority to disbar attorneys, ruled the court, it does have a right to require ethical practices from those appearing before it. . . At the end of the first five months of '57 Texas farm products were commanding the highest prices since February, 1955. Prices of hogs, beef, lambs, chickens, eggs, and wool were up substantially over the previous months. Overall increase was 1½ per cent. . . Number of polio cases in Texas has hit a 10-year low, reports the State Health Department. Up to mid-June the state had had 142 paralytic cases, 82 non-paralytic. Five months total for 1957 was 172 cases, compared to 375 in 1954.

EASY OUTDOOR COOKERY

A quick, easy way to prepare the main dish for a picnic or outdoor meal is to cook on skewers, "Shick-Kabobs" are delicious and different.

There are many possibilities. You may have all vegetables or all meat on the skewer, or alternate the meat cubes with a combination of vegetables such as tomato wedges, chunks of carrot, mushrooms, pieces of green pepper, onion, etc.

A basic "shish-kabob" is made with boneless meat, cut in 1 1/2 or 2-inch cubes. Beef, lamb, ham or pork may be used.

With lamb or veal, use the shoulder or leg; with beef, use the round chuck or rump. Allow 1/2 to 3/4 pound per person.

Prepare the meat by simply brushing with lemon juice and olive oil, or marinate from 2 hours to 2 days in the following mixture: 1 part of lemon juice to 3 parts olive oil seasoned with crushed garlic, salt and pepper, and if you wish, add some thyme, oregano, bay leaf or cummin.

Now string the cubes on your skewers. If you like the meat rare, push the cubes closely together. For all-around crispness, separate the shunks on the skewer.

Broil over coals. It will take from 10 to 16 minutes, depending on how well done you want the food.

Serve immediately.

Civil Defense Gets 37-Millionth Chevrolet

The nation's civil defense program was spotlighted as Chevrolet Motor Division marked production of its 37-millionth vehicle. The milestone unit, a four-wheel drive Chevrolet truck, was turned over to the Federal Civil Defense Administration recently at the company's Willow Run, Mich., truck assembly plant. E. N. Cole, left, Chevrolet general manager, and Val Peterson, FCDA national administrator, examine gear from a rescue kit near the 37-millionth vehicle.

With lamb or veal, use the shoulder or leg; with beef, use the round chuck or rump. Allow 1/2 to 3/4 pound per person.

Prepare the meat by simply brushing with lemon juice and olive oil, or marinate from 2 hours to 2 days in the following mixture: 1 part of lemon juice to 3 parts olive oil seasoned with crushed garlic, salt and pepper, and if you wish, add some thyme, oregano, bay leaf or cummin.

Now string the cubes on your skewers. If you like the meat rare, push the cubes closely together. For all-around crispness, separate the shunks on the skewer.

Broil over coals. It will take from 10 to 16 minutes, depending on how well done you want the food.

Serve immediately.

Give your children
real security...

We don't mean the nicest house in the best neighborhood... the newest, sleekest car... the right schools, the right camps.

We're talking about the kind of security they can't do without... the kind that comes from inside.

Faith. In God, in life, in themselves.

For life is no game for spiritual sissies. Only Faith... the armor of the spirit... will give them the stamina to meet it courageously, no matter what it brings.

You can show your children where to find faith... how to build it day by day, if you make praying a family affair.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

BY HUBERT L. BERRY

Number of District cooperators received fish this week from the fish hatchery at Burleson. These fish were ordered by local Soil Conservation Districts according to the size and number of ponds to be stocked. The Fish and Wildlife Service delivers the correct species and number of fish for each body of water.

Bluegill, or sunfish, are best for all ponds; and if the pond is large enough, some channel cat will be supplied. Bluegill or bluegill are especially good for the bass channel cat.

They grow fast during summer and early fall if they have plenty of food. The major food is newly hatched fingerling bluegill in a bass-and bluegill pond.

Some pondowners stop their fertilization program to keep the bluegills from spawning so much. This is a bad mistake. Bass cannot grow unless they are well fed. A heavier poundage of bass will help prevent an over population of bluegills—by eating more during the following fall, winter and spring. This important "thinning" of the bluegill population begins in October, following their spawning season. It ends in early summer when the bluegills spawn again. Failure to maintain pond fertility throughout the spring, summer, and fall results in low production of bass.

Cooperators who received fish this week are Lowell Burks; Oscar Burns; Hollis Blackwell; S. C. Ballard; H. R. Collier; Ray Duncan; John Elliott; C. A. Gro-matsky; A. D. Griffin; R. V. Geeslin; H. C. Geeslin; S. L. Harwell; C. W. Holden; Arthur Hunt; McKinley Humphreys; Carl Letbetter; Henry Morris; S. M. McCasland; J. H. Priddy; N. B. Quirk; A. L. Reese; Duard Reynolds; Lee Walton; George Wallace; Walter Weatherby; and Arthur Wilcox.

News Of The Ebony Community

By CLEMENTINE WILMETH BRILEY

Mr. and Mrs. Clayton Egger and Mrs. Effie Egger called on us this afternoon (Sunday). And were we delighted! It is so seldom we see anyone. Helen (Mrs. Clayton Egger, who has always lived in town till she came out here to live on the Egger ranch about two years ago, says she doesn't even miss town out here. The mail passes right by her house, and there is always passing through the day and through the night. But here we are about two miles farther down the road just left out of the world about us. No mail delivery. No passing. And now that the creek crossing is out we have to go away around to get the mail and to get out to town. What we need is for our County, or our State, or the Federal Government, or somebody to care enough about us to put a bridge across this creek, and another one between the Thompsons and the Malones to connect these dead end roads and permit free circulation and mail delivery for all of us who live down near the river.

Friday was town day. We went by for Mrs. Edna Dwyer. Found her down in the orchard with Mrs. Effie Egger and Mrs. Stanley Reeves. They had played like they were little girls and had spent the night with Edna. We came back by the Jim Wilmeth home. Found there Mr. and Mrs. Paul McClung and Larry and Willie of Wichita Falls. They were returning from vacationing in the Ozarks. Their daughter, Martha was one of the three nieces who accompanied their aunt, Marie Wilmeth, on a tour to Washington D. C., Philadelphia, and New York. They were to return this weekend. Mrs. McClung—the former Lucille Wilmeth—read us two letters from Martha. One from Washington D. C. and one from Philadelphia.

She was disappointed in Philadelphia. She said it was old and dirty looking. But she got to see places of interest, Independence Hall, Old Christ Church where Paul Revere and Benjamin Franklin were buried, the Liberty Bell and many other things. And there she saw our distinguished cousin, James Lillard Wilmeth. He and his wife took them all out to dinner. He is now 87. She said after she heard him talk she decided he was some important person. For seven years he was Chief Clerk of the Treasury Department at Washington D. C. It was during that time that his little old Ford got its picture on our ten dollar bill. In 1917 he was appointed Director of the Bureau of Engraving and Printing by Secretary Wm. G. McAdoo. In this capacity he served the U. S. more than any other man in history. He revised methods of making ink, engraving plates, and shipping. In World War I he was sent to Europe, by the President of the United States and the Secretary of the Treasury, as custodian in charge of \$1,500,000 in gold for the relief of American citizens stranded on account of war moratorium. He was in Europe several months. While here, he searched the libraries studying up on the Wilmeth family. Several years ago he completed his book on the Wilmeth family and presented each of us with a copy.

At Washington D. C. Martha had the time of her life. First they saw the Library of Congress. A man who had worked there 18 years showed them around. "And for some unknown reason," Martha said, "everybody treated us like we were royalty." They went to The Archives. Saw The Declaration of Independence, the Constitution and the Bill of Rights. "As we started toward the National Art Gallery—the most beautiful, ornate building I have ever seen"—Martha said, "a policeman held up traffic just to escort us across one of those D. C. uncrossable streets." On Monday, June 10, Martha would be 17, and she had something in the back of her mind. She had the advantage of knowing Bob Holton, who had gone to school with her Mother and Daddy at ACC, and was now secretary to Sam Rayburn. She said to Bob, "I want to meet Sam Rayburn for my birthday present." Bob said, "Be there at 11:15 Monday before the House convenes." She said, "When we got there, Mr. Rayburn was in conference with the ambassador of Japan. But soon we were invited in. I had only expected to shake hands with him, but he asked us to sit down and talk awhile. He explained all the things in his office. Then he took us out on the floor. Visitors are allowed only in the gallery. And right there on the floor of the House of Representatives, in front of a few Congressmen and about 100 visitors, he gave me a big birthday kiss. Then he had all three of us sit in the Speaker's chair. He showed us some more parts of the building not open to tourists. We saw the Rayburn tree—a white oak—which he had planted.

Mr. and Mrs. Ansel Morgan and family returned home last weekend after a vacation spent in Corpus Christi visiting relatives.

Mr. and Mrs. Jack Sherrod and daughter of Houston, Mrs. Mae Gill and Mrs. Dixie Sewell of Brownwood were guests of Mrs. Edgar McNutt several days last week.

Hillside Mission

BY LIDA BYRNE
We are told that ones heart can actually be broken, because of discouragement and grief. The Bible says: "Be of good courage and he shall strengthen your heart, all ye that hope in the Lord." Psalms 31:24.

There will be a cemetery working at Duren Saturday July 6. Everyone interested in the upkeep of the cemetery is invited to attend.
There will be a singing at the Duren Church house Thursday night, June 27. This will be the last singing until September.

The Big Job is under way

Santa Fe is now loading thousands of cars of grain and grain products on its lines

Santa Fe has been serving agriculture since 1874, when we sponsored the migration of the Mennonite farmers who established the Kansas wheat belt, and brought with them from Europe the ancestors of the better varieties of wheat grown in America today.

During harvest time, Santa Fe has a big job to do. At the country stations and terminal elevators along the line, as agriculture's "hired man," Santa Fe loads over 121,000 boxcars of grain a year—the total production of over 9,000,000 fertile acres. We also load over 34,000 cars of grain products on our line annually.

An important part of this job is done in advance by our own agriculture department, by collecting data on planted acreage, weather, crop damage and other factors that affect yield.

These statistics provide useful information for farmers, elevator operators and others interested in grain movements, and assist us in spotting grain-tight boxcars at strategic points at harvest time.

Our agriculture department works with the Federal and State agriculture departments, land grant colleges, and county agents in fighting destructive insects and plant diseases.

We are also privileged to award university scholarships annually to many farm youths in our territory.

We of the Santa Fe are proud of the part we have in serving the farmers of the West and Southwest in their essential task of feeding the Nation.

MRS. ORA BLACK
The showers of last week and the cooler weather was fine on our truck patches. We are all enjoying our fresh vegetables with a surplus left for canning.

Mrs. Howard Striegler of Lometa visited Saturday with Mrs. Cora Brown.

July 11th is the date for the community social at Scallorn. A pot luck supper will be served after which games of "42" and Canasta will be enjoyed.

Snakes are here in full force. Every where people are killing them. Mrs. Fred Herring found a rattler in one of their closets. So far we haven't found any in our house this year, but while gathering vegetables we have

found and killed two large perheads, a rattler in the garden yard and let another get away. Of course we get out without looking for one that got away.

The difference was a highly successful exploration program in the Permian Basin—highlighted by the Hendricks field discovery in Pecos County—which jumped Humble's West Texas production from a 200,000 barrel trickle in 1926 to a 7,000,000 total in 1928. West Texas has been a major source of Humble crude ever since.

Forty years ago this month, in Houston, Humble Oil & Refining Company came into corporate existence—the pooled properties and experience of a group of pioneer Texas oilmen who believed in themselves, each other and the future.

Although June is the company's official anniversary, the story of Humble begins months earlier. Without a charter or a single signature, the company began its operations on March 1, 1917, under a gentleman's agreement among the principals. For three months and three weeks, until the charter was received on June 21, oral promises and individual integrity preserved a merger that involved \$8 million in properties and a net daily production of some 8800 barrels of oil.

As an integrated company Humble started out with most of the necessary facilities. . . but nothing fancy.

There was one "washpot" refinery at Humble, Texas, which processed 300 gallons of gasoline a day from oil out of a single well. The marketing division, a model T truck, picked up each day's product at the refinery and hauled it into Houston for sale to "filling stations." There was a pipe line—three miles of gathering line in the Goose Creek field.

Until March of the following year the company had no geologists. This was not unusual. Petroleum geologists were a new and rare breed then. But there was a land department, established a few months after the company was founded.

In 1943, Humble achieved a position it has held ever since—America's largest domestic producer of crude oil. After the war, production dipped briefly, but by 1948 it had surpassed the wartime daily record and stood at 368,000 barrels. Last year for the first time this figure was exceeded, as 1956 production hit 371,000 barrels.

Since World War II, Humble has moved into first place in gasoline sales in Texas, a position it has held since 1951.

Although the bulk of Humble's producing operations are in Texas, exploration and producing activities have been expanded broadly in the past several years. Humble's first offshore well was brought in off Grand Isle, Louisiana in 1948. Production in Mississippi dates from 1944 and in 1943 Humble completed the first producing oil well in Florida.

Another first was Humble's Navajo Reservation No. 1 completed in 1955 as the first commercial producer in Arizona. The company has had production in California since 1949 and is doing exploration work in Washington and Oregon. The most recent and farflung operation is a well soon to be drilled in Gold Bay, Alaska.

Altogether it has been a busy four decades for Humble, forty years of growth and service.

Taxes Unpaid On July 1, To Go On Delinquent Roll

Next Monday July 1, is an important date for taxpayers to remember—it's the day when all unpaid county and state taxes for the year 1956 will be placed on the delinquent tax roll, it has been announced by C. F. Stubblefield, Mills county tax assessor-collector.

In making the announcement Mr. Stubblefield is reminding all taxpayers who have not paid their 1956 taxes to do so by the end of this week and thereby avoid having their placed on the delinquent roll, and avoiding the added penalty.

After taxes are placed on the delinquent roll the penalty is increased a considerable amount and there is also a special redemption fee charged to have same removed from the delinquent tax roll.

Too Many Fish Bad For Ponds Experts Warn

AUSTIN, (Spec) -- Most owners of farm and ranch ponds do themselves more harm than good in overstocking their places with fish, is the warning of the hatchery superintendent of the Texas Game and Fish Commission. A dozen of these men, meeting in Austin to work out plans for handling an overflow of requests for fish, say they will do everything possible to restock as many places as they can this year.

"Cooperation on the part of the property owners, however, can make the job a great deal more successful," one of the superintendents said. "Nearly everyone wants a heavier planting than is justified in their impoundments."

"We have learned through years of experience that ponds can be overstocked and as a result the fish do not grow as rapidly as they should. Then the owner comes back for more fish to put into an already overcrowded pond."

The hatchery men pointed out that some owners will mis-

represent the size of their tanks or ponds to get many more fish than are needed. This year, with so many impoundments refilled by the continuous rains, it will be impossible to meet all demands unless requests are within reason, the hatchery men say.

"When making application for fish the owner should attempt to give us accurate information as to area," the superintendents said. "If they tell us the tank covers 40 acres and it only covers 10 acres, they have done themselves and everyone else harm."

Savings Bonds Sales For May

W. P. Duren, Chairman of the Mills County Savings Bonds Committee, reports that Savings Bonds sales in this county were \$12,022 during the month of May. Sales during the first five months of 1957 were \$70,024 or 51.8% of our year's goal.

Sales in Texas were \$13,840,433 during May which was an increase of \$260,000 over the month of April. The State of Texas has now reached 37.6% of its 1957 goal.

"I feel that if every citizen of Mills County will buy an ex-

tra bond during the remainder of 1957 our county will reach its goal. There is no safer investment than U. S. Savings Bonds since both the principal and interest are fully guaranteed by our government. Savings Bonds now earn 3 1/4% interest compounded semi-annually when held to maturity, and they now mature in eight years and eleven months," Chairman Duren concluded.

BILLY M. COLLIER ATTENDS SCHOOL

Billy M. Collier, County Agent of Kaufman County, is attending a three weeks course at A & M College of Colorado, located at Fort Collins. Twenty three agents from Texas will be

among those attending this course. Mrs. Collier accompanied her husband to Colorado.

Billy is the son of Mr. and Mrs. Tom Collier of this city.

AUSTIN, Tex.—Water legislation promises to be a lively topic at the special session of the legislature in October.

Gov. Price Daniel has announced he will urge creation of a state-wide water agency empowered to negotiate with federal authorities in financing reservoirs.

That is likely to prove controversial in itself. Then there is likelihood of considerable discussion over the State Board of Water Engineers and its recent troubles. Fuses get lit that way.

Former State Sen. Joe Carter resigned as the Board's general counsel. Board dissent erupted into public view at a meeting called by Chairman R. M. Dixon to demand Carter's resignation. Members Otha Dent, in support of Carter, avoided attending the meeting and no action was taken.

Dixon accused Carter of being "disloyal" and worked against his confirmation in the Senate. But Dent indicated Carter wasn't the main reason for Board dissent and his leaving doesn't mean Board harmony.

Carter remained non-committal.

INSURANCE BOARD CHANGES—New Insurance Board Chairman Penn Jackson took over duties earlier than planned last week after a snarl development in the new reorganization law.

Atty. Gen. Will Wilson ruled that the Board cannot legally function without employing a newly-authorized commissioner. But there is no money to pay him until Sept. 1.

Gov. Daniel decided to accept resignations of the outgoing Board members immediately. Jackson took office. Hold-over appointee Joe Gibbs remained. Third member, Dave Irons, will join shortly. Together they will try to untangle the knot and launch a new era in insurance regulation.

The announcement.

The honoree, attractively attired in a sky blue eyelet embroidery dress, was presented with a corsage of pink carnations.

Following the announcement party the guests all met at the home of Mrs. Wiley for a surprise miscellaneous shower.

ONE-THIRD COMING BACK—U. S. Trust victims can expect to get back a little more than 33 cents on the dollar.

State Liquidator J. D. Wheeler says there will be \$2,449,221 for distribution to creditors after suits by claimants are settled. Approved claims total \$7,292,385.

Litigation by group of claimants seeking priority is still pending on appeal.

Meanwhile, Gov. Daniel has asked federal authorities to use diplomatic channels to return Ben Jack Cage to Texas for trial. Cage faces theft and embezzlement charges, involving a half million dollars, in connection with the collapsed ICT Insurance Co. He is reportedly in Brazil where he has extradition immunity.

OIL CUT-BACK LASHED—Texas' biggest slash ever in oil allowable ruffled up the dander of independent oil men.

July allowable was scissored 390, 449 barrels a day by the Railroad Commission in an effort to cope with increased imports and excessive stocks.

Four associations of independents fired telegrams to Washington. They urged immediate steps in Congress to cut imports. They said the slash puts national security at the mercy of unreliable foreign oil supplies.

No blame was aimed at the Railroad Commissioners. Independents said the officials were "compelled" to order the cut.

FARM PROSPECTS BRIGHTEN—Let-up in rains has sent farmers scurrying back to the fields in hope of making some late crops after all.

Agriculture Commissioner John White granted a third emergency extension of the cotton planting deadline in 44 Central and East Texas counties. July 1 is the new cut-off date.

Intensification of insect control programs was urged in view of the deadline extension.

Livestock and ranges are reported in good to excellent condition as far west as the Pecos. But fly and other pest problems were widespread and serious.

ANTI-BLOOPER PLAN URGED—So may legislative bloopers are turning up that lawmakers are beginning to look for some way to prevent recurrence.

One proposal is for the Legislative Council to screen all bills coming before committees, especially conference committees where final writing is done.

It took an attorney general's opinion to decide that pension could be paid this summer to Texas' only surviving Confederate veteran, Walter Williams. Legislative action wasn't clear.

Insurance reorganization was snarled again when it was discovered that the new law required employment of a Commissioner but his salary doesn't start until Sept. 1.

Typographical errors resulted in incorrect appropriations in several instances.

Granddaddy of the bunch was a botch in the school fund di-

version bill. Unclear is whether it transfers \$8,000,000 or \$12,000,000.

There were numerous smaller errors too.

DANIEL LISTS HOLDINGS—Even though he first said he did not need to file a code of ethics statement, Gov. Daniel has listed his outside investments under the new ethics law.

His holdings: two mutual life insurance policies, a fraternal life insurance policy, an accidental death insurance policy, and a one-third ownership in the Trinity Publishing Co., Inc., of Liberty.

POLITICS ASTIR AGAIN—Push is underway by two rival Democratic forces for control of Texas party machinery next year.

Employment of J. J. (Jake) Pickle to head up a grassroots drive for the State Democratic Executive Committee was announced last week. Pickle was a key worker in Gov. Daniel's campaign and is well known as a political organizer.

Liberal rivals, the Democrats of Texas, gave notice of combat weeks ago. They are busy with precinct-by-precinct organizing.

SHORT SNORTS—Charles K. Devall, Kilgore publisher, rejected president of Texas Good Roads Assn., urged "intensive public attention and interest" in Texas' highway plans. He viewed it as necessary to a sound highway program "essential to the long-term growth of the Texas economy" . . .

In a personal visit to the nation's capital, Governor Daniel asked curtailment of excessive oil imports. He decried a controversial section of a natural gas bill that would invoke restrictions against state and local price regulation. He plugged for more money for Texas river surveys. And he called on the State Department to push efforts to return Ben Jack Cage to Texas for trial . . .

State Sen. Otis Lock of Lufkin has announced plans to retire from the legislature at the end of his current term. He will become assistant to the president of Southland Paper Mills in Lufkin.
