AUSTIN, TEX.—House members astonished many observers by giving, for the first time in recent memory, a favorable vote to a general sales tax.

A 2 per cent retail sales tax by Rep. Charles N. Wilson of Trinity was approved 75-to-65, on second reading and 76-to-62 on final passage. It is now in the hands of the Senate.

Food, feed, farm machinery, seed, fertilizer, medicine and medical needs are exempt from the bill. Its tax yield is variously estimated at from \$127,000,000 to \$140,000,000 a year.

Before the bill was given preliminary passage, Wilson staved off efforts of sales tax opponents to put on amendments to make the bill also include a corporation income tax, graduated income tax and graduated oil revenue tax.

Governor Daniel announced his opposition to the Wilson bill before it came up on the House floor. After the House vote, the governor refused to say whether he would veto the measure if it should be finally passed by both Houses.

New Teacher Pay Approach—A teacher pay raise plan designed to offer more incentive for heads of families and career teachers has been proposed by Rep. Jack Woods of Waco.

Wood's bill would provide a lower raise in the basic minimum than is recommended by the Texas State Teachers Association, but it would offer higher increments (increases for experience) than TSTA asks.

Wood's bill would provide an across-the-board raise of only \$234 a year compared to TSTA's \$810. But under the Woods bill, a teacher with 10 years' experience would make \$4,950 a year compared to \$4,554 under the TSTA schedule. Wood's bill would also make special provisions for teachers, either men or women, responsible for the support of a household.

Back Cancer Research

I AM fascinated by figures. One of my favorite forms of relaxation is to tackle mathematical problems.

Since my operation for cancer two years ago, I have become very conscious of cancer statistics because I am one. Let's consider what would happen to six persons who get cancer today. Numbers 1 and 2 will be saved. Number 3 will die, but might have been saved had proper treatment been received in time. Numbers 4, 5 and 6 will die of cancer because research has not yet come up with methods of controlling their cancers.

Number 3 should be the first target of all because something can be done now about him. Saving number 3 would mean the saving of an additional 85,000 lives a year, bringing the total of those saved from cancer each year up to 255,000.

Numbers 4, 5, and 6 should be our second target. And here, too, we can do something today. The American Cancer Society has more requests for funds for worthwhile research projects than it can support.

Thus, research is being held back. I am not one to take away anyone's pleasures, but this fact interests me: In 1959, the public voluntarily gave \$32,000,000 to cancer control, while it voluntarily spent 300 times as much, or \$9,600,000,000 on alcoholic beverages.

The Free World's first super-sonic bomber, the B-58 Hustler, soon will begin flying periodic training missions over towns and cities within a 40-mile corridor from Amarillo, Texas, to Matagorda Island, it was announced this week from Offutt AFB in Nebraska.

The flights will be flown by crews of the Strategic Air Command's 43rd Bomb Wing at Carswell AFB, Texas.

Goldthwaite is located along the route which has been coordinated with the Federal Aviation Agency (FAA).

The B-58 missions will provide operational training under all-weather conditions and may be made at any time during the day or night.

The Convair-built bomber will surpass the speed of sound, possibly causing sonic booms at altitudes between 35,000 and 50,000 feet.

Sonic booms are merely thunder-like sounds that are heard when a shock wave is generated by an aircraft flying at supersonic speeds, according to the AFB announcement.

In special tests where aircraft have dived from 35,000 feet to 25,000 feet at supersonic speeds, scientists have measured pressures no greater than five pounds per square foot on the ground.

SENATOR CRUMP ON TV PROGRAM

VIC'S . . .

SOLILOQUY

TEXANS HAVE \$38 MILLION STAKE IN ONE PENNY — A \$38 million decision for or against Texas motorists will be made in Congress between now and midnight, June 30.

This promise can be carried out without slowing down the big federal highway construction program. All Congress has to do is insist that some \$800 million a year in various automotive taxes—paid by the same taxpayer who pays gasoline taxes—be spent on highways rather than for general governmental purposes.

But Congress is under pressure from the Administration to continue the "temporary" gasoline tax so other highway-user taxes can be spent elsewhere in the federal budget.

Texans have seen their gasoline taxes increase 63 per cent in the past decade. It's time to call a halt to this undue imposition on one of the necessities of modern life—transportation.

STOP DOWNGRADING OUR SCHOOLS—Supporters of federal intervention in public school education are downgrading the achievements of American teachers, school boards, and communities in building the finest education system the world has ever known.

That is the view of the Chamber of Commerce of the United States. It supports it by pointing out that there are more classrooms, more teachers, a lower pupil-teacher ratio, lower pupil-classroom ratio, and a higher level of education in this country than ever before in history.

Statistically, the story goes like this: In the last 10 years the number of public school pupils increased 48 per cent, while the number of classrooms jumped 60 per cent and the number of teachers 51 per cent. Teacher's salaries rose 72 per cent, to an average of \$5,389 a year. Money spent per pupil boomed from \$224 a year to \$390.

On top of that, American communities approved the highest volume of school bond issues in history during 1960.

All this has been done without federal intervention, federal dictation—or the federal control that would inevitably follow federal subsidy of local schools.

CLARISSA, MINN., INDEPENDENT: "We believe the education of our children should remain in our hands and not be placed in some far-off bureau in Washington, where standardization is the watch-word and dictation of what, and how to teach would be the inevitable result."

CUERO, TEXAS, RECORD: "It must be hoped that, somehow, the small independent farmer, and business man, will be able to find a place in this country—a place where he can work and prosper and retain that independence and individuality that forms a priceless safeguard against regimentation, sameness and loss of individualism."

President Julius A. Stratton of the Massachusetts Institute of Technology observes: "The world into which we were born is gone; we have little or no idea of the world into which our children may grow to maturity. It is this rate of change, even more than the change itself, that I see as the dominant fact of our time."

Evaporation of water, coupled with moving air, causes a cooling effect we can feel. For maximum cooling efficiency, an evaporative air cooler must have all cooling pads equally saturated. Several questions directed to McBee's office concern NK-37, a seeded variety of Bermuda grass developed in Arizona. Experiment Station tests and numerous field trials supervised by county agricultural agents reveal generally good results during the first growing season. First year yields may surpass yields of Coastal, but it is usually a different story during the second growing season, the pasture specialist says. NK-37 showed a high degree of susceptibility to leaf spot disease, and attacks often were severe by mid-summer. Poor yield prospects resulted in the abandonment of some experimental plots.

To sum it up, Midland Bermuda grass appears best for the Texas Panhandle, and Coastal gets the nod for the rest of the State, McBee concluded.

Mrs. Joe A. Palmer Is Elected President Of Library Board

The Library Board met in Judge Egger's office Tuesday, with five members present. New officers for the coming year were elected as follows:
President, Mrs. Joe A. Palmer;

MRS. JOE A. PALMER

treasurer, Mrs. Gerald Head; secretary, Mrs. J. A. Hester; reporter, Mrs. D. A. Trent.

Mrs. Bradford, librarian, reported that the material for the summer reading program had been received and was on display. The material will be displayed in the Goldthwaite Schools and Mrs. Delapp will take posters to the other schools in the county.

The two third grades of the Goldthwaite School visited the library and checked out books. All children of the county are asked to visit the library and acquaint themselves with the summer reading program.

The State Library sent 65 new books in another exhibit collection. They are children's books and may be checked out after May 1.

During the month of April 562 books were checked out, 366 juvenile and 196 adult.

The following new books have been added to the library during April:

"Memories," by Ethel Barrymore; "Christmas With Ed Sullivan," Ed Sullivan; "Buck Schweltz Texas," Schweltz; "Bright Skies," Loring; "With Banners," Loring; "With This Ring," Loring; "My Dearest Love," Loring; "The Listener," Caldwell; "Arizona Clan," Zane Grey; "Fugitive Trail," Zane Grey; "Majesty's Rancho," Zane Grey; "Man of the Forest," Zane Grey; "Hoyle's Games," Hoyle; "A Texan At Bay," Paul Crume; Five Nancy Drew series books; One Dana Girls' series; One Hardy Boys' series.

Kenny Leonhard gave two used Golden Books. "The Nightingale," Turville; "Come With Me Home," Carrol; "Good-bye To A River," Graves; "The Good Years," Lord, and "The Touch of The Master's Hand," Allen.

The May meeting will be the last meeting of the board until September.

nematode damage, root rots or crown gall.

Lack of iron is most common in apple, apricot, arborvitae, ash, catalpa, cedar, cherry laurel, Chinese tallow, citrus, grasses, magnolia, oleander, peaches, pecan, pyracantha, rose, strawberry and many other shrubs and flowers. Most soils on which iron chlorosis occurs are well supplied with iron, but it is in a form unavailable for plant use.

Iron chlorosis is controlled by adding iron sulfate (coppers) or iron chelates to the soil. These chemicals can also be applied as a foliage spray in late evening when the plants are actively growing. In general, spraying will give quicker results but will not last as long as proper soil application. Applications of large amounts of well rotted compost at regular intervals are also recommended.

For further information, ask your county extension agent for a copy of the publication, L-435, "Iron Chlorosis."

Campers often would like to reseal the can of condensed milk used as coffee cream. To do so, cut off label, dab with milk, and slap over the openings. When dry, the can is tightly sealed.

You can prevent this by placing a small piece of steel wool in the funnel.

easier to handle, yet it will slip in and out of the cover easily.

Keeps Canteen Cooler
To insulate your canteen and keep the water much cooler, careful wrap the canteen with one thickness of tire tape. The tape makes the can cool.

A Cold Weather Trick
Dawn hunters can, on a cold day get their legs mighty wet walking through dewy grass. Not only are wet legs uncomfortable, but they're apt to give you a cold.

Next time, before venturing out, slip into a pair of old overalls, the legs of which have sometime previously been coated with house paint or varnish.

Handy Refresher
On a hike, or sitting all day in a deer blind, you can keep up your energy by dissolving in your mouth now and then a pepper-upper made by mixing a teaspoon of instant coffee with a teaspoon of sugar.

Wrap these in twists of waxed paper or foil before leaving home, and carry a number of them in your hunting coat, or game bag.

Select Fire Stones With Care
Don't ring a fire, or build a fireplace, with limestone, or other porous rock. Porous stones are liable to explode when overheated.

Let Rabbits Cool
Never shoot a rabbit or squirrel and stuff the warm carcass immediately into your bag or game pocket.

Ten to one the critter is alive with fleas.

Protect yourself by hanging the game in a tree. As soon as the body cools, the fleas leave it like rats from a sinking ship.

Hound Dog Philosophy
Don't expect your hound dog to obey your commands as well as a bird dog does.

Hounds are more independent. You hunt with them—they don't hunt with you.

So, don't ruin a good dog by too much punishment. Just be glad your dog is a good one.

To Remove Burrs
Grass burrs and stickers are hard to get off hunting clothes. Remove them easily by wrapping surgical tape around your hand, sticky side out. Stroke clothes with hand, and off come burrs and stickers.

Gun Cleaning Caution
When coming in from a hunt on a cold day, don't sit down at once to clean, oil and put away your gun.

Wait until after supper so the gun will have time to warm up to room temperature. This will prevent moisture from collecting on the cold metal, causing it to rust later.

Whose Bird Is It?
Who has the rightful claim to game shot by more than one hunter?

This question has plagued sportsmen since time began.

There is no single answer. Proper etiquette is observed differently according to the section of the country.

Most widely accepted is that the deer, bird, or other animal

Clementine Wilmeth Briley Writes From Temporary Home In El Paso

By CLEMENTINE WILMETH BRILEY

Here we are just one week from May. And after May "It's Home for us." A letter from Mrs. Edna Dwyer yesterday wanted to know when we would be home. She is very eager to get to her home and do a lot of things that need doing. El Paso Schools will close Saturday, May 27. We plan to leave for home Monday morning, May 29. We expect to spend Monday night in San Angelo and will go on home next day. Some have wanted our address here. This is a late hour to give it, but I'll put it in here. It is 8713 Magnetic Drive, El Paso, Texas.

Thousands saw Floral Beauty last weekend when the 35th annual Flower Show of the Council of El Paso Garden Clubs got under way at the Coliseum. It was transformed into a colorful garden through which spectators strolled to a background of organ music. Mrs. Barton Griffin, Woman of the Week and chairman of the Flower Show, said, "Everything in Texas is bigger, we know. But El Pasoans will be proud to hear that our spring flower show held here last weekend, is the largest amateur exhibit in Texas."

Grace and I went to the flower show Saturday afternoon. I walked up and down the rose exhibit, noticing every name. When I got to the Irises they were gorgeously beautiful. I wanted to see their names, but there wasn't time. I just had to let the names go.

I got my own Irises out so late last fall I was afraid they might not bloom, but in spite of cold and ceaseless blowing winds, most of them have budded and quite a number are bloomed out and they are exquisitely beautiful. My pansies are blooming and my sweet peas. Of all those many geranium cuttings I put out last fall almost everyone of them has lived, and now they're blooming. My back is almost well. Billy seems to be doing fine. He went to see his doctor last week and came back with the verdict. No more school for him this year,

but he likes his homebound teacher very much. When Grace and I got home from the Flower Show last Saturday, a big pot of large, beautiful, bronze chrysanthemums had come for Billy. The card said, "From Opal and Aus." It was from Mr. and Mrs. Austin Caywer of Victoria.

I was very happy to receive this afternoon a long letter from my good friend, Mrs. Stanley Reeves of Ebony. She tells me that she and Mrs. Effie Egger are going to entertain the Auld Lang Syne Party this time. The date is June 10. The place is the Stanley Reeves home. Mrs. Reeves says she and Mrs. Egger will furnish the meat, bread, pickles, coffee, and tea. The rest of us can bring what we care to, but mostly cakes and pies. Mrs. Reeves says she will have a book for us to register in and when she calls the roll she wants each one to answer with the funniest incident or the happiest time they ever experienced in the Ebony community. She wants me to send out the invitations and request an answer, so they can have some idea how many will be there.

Mrs. Reeves grew up at Aubrey, a little place in Denton County. I have heard her say that they were always getting up parties and programs and she just loved to do it. I know we are going to have a good time. But Mrs. Reeves' health is not very good now. I hope she won't overdo herself.

In addition to all this there's a Golden Wedding Anniversary coming up May 24. I wanted it to pass quietly. But my daughter told me today that she is going to have Open House to celebrate for us on Sunday, May 21.

Jerry Kight of Denton spent Thursday night with his parents, Mr. and Mrs. J. D. Kight, while en route to San Antonio to attend the Sigma Delta Chi Convention. He is secretary of North Texas State Chapter of Sigma Delta Chi.

CONTROL CHLOROSIS FOR HEALTHY ORNAMENTALS
Chlorotic plants are found in all sections of Texas, but are more prevalent in areas with alkaline, calcareous soils, as we have in Mills County.

Chlorosis or yellowing of plants results when the green coloring matter fails to develop or is destroyed. Affected plants range from light green to yellow to almost white. The loss of color is most often due to lack of iron in plants. The diseased condition may also be due to viruses, deficiencies of sulphur, manganese or nitrogen, poor drainage or aeration.

Next time, before venturing out, slip into a pair of old overalls, the legs of which have sometime previously been coated with house paint or varnish.

Handy Refresher

On a hike, or sitting all day in a deer blind, you can keep up your energy by dissolving in your mouth now and then a pepper-upper made by mixing a teaspoon of instant coffee with a teaspoon of sugar.

Wrap these in twists of waxed paper or foil before leaving home, and carry a number of them in your hunting coat, or game bag.

Select Fire Stones With Care

Don't ring a fire, or build a fireplace, with limestone, or other porous rock. Porous stones are liable to explode when overheated.

Let Rabbits Cool

Never shoot a rabbit or squirrel and stuff the warm carcass immediately into your bag or game pocket.

Ten to one the critter is alive with fleas.

Protect yourself by hanging the game in a tree. As soon as the body cools, the fleas leave it like rats from a sinking ship.

Hound Dog Philosophy

Don't expect your hound dog to obey your commands as well as a bird dog does.

Hounds are more independent. You hunt with them—they don't hunt with you.

So, don't ruin a good dog by too much punishment. Just be glad your dog is a good one.

To Remove Burrs
Grass burrs and stickers are hard to get off hunting clothes. Remove them easily by wrapping surgical tape around your hand, sticky side out. Stroke clothes with hand, and off come burrs and stickers.

Gun Cleaning Caution

When coming in from a hunt on a cold day, don't sit down at once to clean, oil and put away your gun.

Wait until after supper so the gun will have time to warm up to room temperature. This will prevent moisture from collecting on the cold metal, causing it to rust later.

Whose Bird Is It?

Who has the rightful claim to game shot by more than one hunter?

This question has plagued sportsmen since time began.

There is no single answer. Proper etiquette is observed differently according to the section of the country.

Most widely accepted is that the deer, bird, or other animal

By PEARL CRAWFORD
We received 3 inch of rain Sunday night and Ol Brown reported 3 inch also.

J. M. Pore, and company sheared sheep for J. S. Ivy during last week. William and D. C. Ivy helped with the work.

Mrs. W. P. Oxford and Mrs. F. H. Tiemann visited most all homes around here during last week. They were working on the Cancer fund drive. I hope they had good luck.

All the children and grandchildren of Mr. and Mrs. O. L. Harris spent the weekend with Mrs. Harris, Roy and Ray, and visited Mr. Harris at the hospital.

Don Humphries was at the farm plowing. He has a new tractor and breaking plow.

Mrs. Ol Brown talked to Charlie Mack Mason at Clovis, New Mexico and reports from Mrs. G. L. Mason were she was keeping well and enjoying her visit.

William G. Crawford was on the sick list a few days and absent from class.

Little Miss Gale Tiemann of Kermit has been spending a week's vacation with her grandparents, Mr. and Mrs. F. H. Tiemann and Alvin.

We send congratulations to Mr. and Mrs. A. A. Carter. We wish them many happy celebrations with their loved ones.

As George and I drove by the Mr. and Mrs. Hugh Nowell pasture we noticed a pretty little colt; it was the first we had seen this year.

J. S. Ivy received news that Mrs. J. B. Jones of Roby received eye surgery and was doing nicely.

Recent guests of Mr. and Mrs. J. S. Ivy included: Mr. and Mrs. John Seilheimer, Mrs. Ben Schrank, Mr. A. D. Griffin, Mr. and Mrs. William Ivy and their friend from Houston and Mr. and Mrs. Nelson Griffin.

Allen Oxford of the Air Corps, Florida, phoned his parents, Mr. and Mrs. W. P. Oxford, and announced the arrival of their son, James Allen Oxford. From

all accounts he was doing well and was very sweet and polite.

We were made sad at news of Brother Hays' death. He had been here with us so long. We extend our sympathy to his loved ones.

Mr. and Mrs. C. B. W. White and Mrs. W. W. Ratcliff, A. Evans and A. L. Crank have visited O. L. Harris at hospital.

Mr. and Mrs. Ol Brown visited him most every day. Brown reported Saturday was on the mend. We all wish him a speedy recovery.

Mr. and Mrs. R. F. Daniels visited Mrs. W. A. Elms Sunday afternoon.

Guests of Mr. and Mrs. Brown recently were his mother, Mrs. Brown of Mullin and Mr. and Mrs. Curtis Koenig Sunday guests.

"SOME DAYS YOU CAN'T MAKE A NICKEL"

"A fella just doesn't have a chance. His mother stuffs him into a lot of fancy clothes. His dancing school teacher drags him away from the guys. And now this!"

Agreed. But boys often have to learn the hard way. Taking the world as it comes . . . assuming responsibility, then trying to make things a little better takes the

special kind of strength and courage you find in Faith. Those big problems will seem a lot easier for your youngsters to take care of if they can count on this strength of Faith. Now—and all during their lives. This week visit your Church or Synagogue with all your family. It's never too early to find Faith.

Questions And Answers About Social Security

Question: I have heard that the amount of my social security benefits will depend upon my earnings. Does the Social Security Administration keep any record of what I have been earning?

Answer: Yes. If you work in business or industry, your employer reports your earnings, as well as your name and social security number, every three months. If you are self-employed, your report of earnings for social security credits is made as a part of your Federal income tax return.

Question: It looks as if I should have filed a report of earnings from farm self-employment for the last five years. I did not know at the time that I had to file. Is there any way that I can get social security credit for the years before 1960?

Answer: Even if your tax returns are late, the law gives you a limited amount of extra time in which you can get social security credit for yourself-employment income. (Farm as well as other types of business). This extra time runs out after April 15, 1961, for the year 1957, so it is important that returns for 1957 be filed before that date. Credit cannot be given for 1956 or before, on the basis of a return filed now.

Texas is a great state for hunters seeking lesser scaup and for fishermen angling for channel bass, spotted weakfish and cobia.

If you're an outdoorsman and these names don't ring a familiar bell don't be alarmed. They are not new species introduced to the state. They are species that have been here for a long, long time. You know them well—but by other names.

Actually you know them by their sectional names rather than their common proper names.

The lesser scaup is the blue-bill; the channel bass is the redfish; the spotted weakfish is the speckled trout; and the cobia is the ling.

For many, many years there has been considerable confusion over the common names of fish, birds and animals. With Texas' population growing, that confusion has spread into the Lone Star State because many of the folks now residing here came from other sections of the nation.

All fish, birds and animals have scientific names. But few people can pronounce these Latin names, much less remember them.

In a scientific name, the first name is the genus and the second name is the species. At times there will be a third name which indicates a sub-species.

We won't go into the scientific names applied to our wildlife, but let's consider the proper common names — and sectional names or nicknames — applied to some of our birds and fish.

Let's first consider some of the freshwater fish common to the state. Listed below are the proper common names of fish, followed by the sectional names or nicknames:

Large Mouth Bass — Black bass, bigmouth, bronzeback, southern trout, green trout and linesides.

White Bass — Sand bass, silver bass, striped bass, triper, sandy and barfish.

Bluegill — Blue bream, blue-mouth, sunfish, bream, copper-head bream and dollardee.

White Crappie — This fish has more sectional names than any other fish. Just a few include: bride perch, bachelor, campbellite, papermouth, sac-a-laitte, lampigheter, chinquapin perch and goggle eye.

Saltwater fish common to Texas have their share of nicknames. Here are a few:

Channel Bass — Redfish, red drum, bronzeback and spot-tail.

Spotted Weakfish — Speckled trout, speck, spotted squeteague, saltwater trout and yellow-mouth trout.

Cobia — Ling, lemonfish, sergeant fish, lingcod and buoy-tender.

Now let's try the same thing with some of the waterfowl that winter in our state:

Canada Goose — Honker, Canadian honker, ringneck goose, whitecheek, northern goose and winter goose.

Snow Goose — White brant, wavy and galup goose. It should be pointed out here that the true brant doesn't come to Texas. It is found strictly on the Atlantic and Pacific coasts and then in very limited areas. Any true brant that comes into Texas is a non-conformist.

Pintail — Sprig, spike, duck, spike-tail duck, gooseneck duck and whistling duck.

Mallard — Greenhead, northern mallard, winter mallard and puddler.

Lesser Scaup — Bluebell, raft duck, blackie and blackheads.

Ruddy Duck — This duck has 23 nicknames. Just a few include: masked duck, robber duck, fantail duck, blackcap, blackjack, ruddy and spiketail.

It sounds odd that the ruddy duck should be called "fantail" and "spiketail." But here's why. When the duck is flying, the tail does look like a spike. At rest on the water the duck spreads its tail like a fan.

Some time ago the Outdoor Writers Association of America compiled a list of American sports fish, using one name only to designate each species. Although OWAA released the list several years ago, most writers continue to use the most common name used in their respective areas.

So it looks like we'll have to live in a world where many names will be applied to the same fish, bird or animal—regardless of how confusing it might be.

Just because a fellow calls a fish by a name other than the one you apply to it, don't take the guy for a foreigner or a dunderhead.

It just might so happen that he knows more about the fish than you do, even if he does refer to it by a different name.

STATE CAPITAL (Continued from Page One)

has brought a pitched battle between "wet" and "dry" forces. All Tarrant County House members voted for the bill, but Fort Worth's senator, Doyle Willis, led the opposition. Willis had little active help in the Senate, but after the bill was approved on second reading by voice vote, 14 of the 29 senators present asked to be recorded in the Senate Journal as voting "no." Final approval was by a slim 13-to-11 margin. Bill would allow the brewery to continue to operate even if the area in which it is located should vote dry.

Freight Rate Bill Tumbles—In an about-face, the House turned down on third reading the freight rate bill it had approved on second reading.

Proposal would have allowed uncontested changes in freight rates to go into effect without hearing and approval of the Railroad Commission. It passed by a narrow margin on second reading but was voted down, 71-to-65, on the vote for final passage. In general, railroads favored the bill, and truckers did not.

Racing Measure Still Breathing—Rep. V. E. (Red) Berry's last-ditch effort to get the horse racing issue before the people survived opponents' efforts to kill it. Berry's proposal for a constitutional amendment to legalize horse racing and parimutuel betting lost out earlier in the session. He is now trying for a referendum to let the people express their opinion on racing at the next general election. Rep. Bill Healy of Paducah

moved the proposal be sent back to committee where, it was assumed, it would die. Healy's motion for interment lost, 68-to-58.

Senators Flay Loan Bill—Finding a generally acceptable plan for regulating small loan companies is proving as troublesome as many predicted.

Several senators were sharply critical of the House-passed loan regulation bill when it came up for hearing before the State Affairs Committee.

Proposed measure provides for interest rates ranging from nearly 40 per cent for the smallest loans down to 11 per cent for loans of \$3,000 or more. Banks, building and loan associations and credit unions would not be under the law.

Sen. Hubert Hudson of Brownsville accused the State-wide Committee to Eliminate the Loan Shark Evil headed by Abner McCall, president of Baylor University, of having misled the public. Sen. Charles Herring of Austin predicted that legalizing 40 per cent interest would cause the people to "come down here and scalp us."

Two Changes Nixed—Two proposed changes for the handling of criminal cases were voted down by the House.

One, sponsored by Reps. O. H. Schram of Taylor and James E. Barlow of San Antonio, would have allowed jurors in non-capital criminal cases to go home overnight. More people would be willing to serve on juries, said the authors, if they didn't have to be locked up during the trial. Opponents successfully argued that jurors turned loose overnight might be exposed to influences that would prejudice their decision.

Other proposal, also by Barlow, would allow defendants to by-pass indictment by pleading guilty. It would save offenders' having to sit in jail awaiting indictment when they're planning to plead guilty anyway, said Barlow. Opponents protested tinkering with "due process of law," said it might encourage guilty pleas by persons who have a good defense.

Automatic Redistricting—A proposed constitutional amendment to provide for automatic congressional redistricting passed the House, 106-to-39.

Rep. Howard Green of Fort Worth is sponsor of the measure which would have to be approved by the people before becoming effective.

In this decade, it would not take effect until 1963. If, however, the legislature failed to reapportion congressional representation in the session that year, the job would be taken over by a redistricting board. Making up the board would be the governor, lieutenant governor, speaker of the House, attorney general and land commissioner.

A similar measure was passed in the 1950's for legislative redistricting.

Oil Allowable Dwindles—Texas oil production for May will fall back to the all-time low of eight producing days.

Texas Railroad Commission fixed the production pattern which will cut back the daily allowable to 2,636,562 barrels. This is a drop of 233,794 barrels a day from April when nine producing days were ordered.

Consolidation Payments Okayed—A bill designed to encourage consolidation of school districts received final Senate passage.

It provides that common school districts which consolidate into one will continue to receive, for 10 years, the same amount of state aid they would have received if they had not merged.

Sen. Thomas Creighton of Mineral Wells is sponsor. He said it would promote better schools and, in the long run, economy.

Freight Rate Bill Passed—A bill to simplify rate setting for railroads and truckers was passed on second reading by the House.

Under present law, the Railroad Commission has to pass on every rate change request, no matter how trivial. Under the proposed measure, the rail or truck line would publish the proposed new rate and if no one objected, it would go into effect. If there were objections, the Railroad Commission would call a hearing and decide the matter.

Questions And Answers About Social Security

Question: Five years ago, when I was 41 years old, I had my social security record frozen because of a lung condition and had to stop work. Two years ago, after an operation, I recovered enough so I could go back to work. Now the disease has recurred and I have had to stop working again. Am I eligible for any benefits from social security?

Answer: Yes, the amendments of 1960 permit the payment of monthly benefits to workers under age 50 as well as those 50 or over; however, it will be necessary that you present current medical evidence to re-establish a period of disability for you since you were able to return to work after

your social security record frozen.

A Moment With The Bible

"Woe unto you, scribes and Pharisees, hypocrites! for ye are like unto whited sepulchres, which outwardly appear beautiful, but inwardly are full of dead men's bones, and all uncleanness" (Matthew 23:27).

What kind of person are you? Do you try to make outward appearances of being a Christian? But what are you inside? You know and God knows! If the inside is unclean, come to Christ for His cleansing blood. Stop your pretending. Why not attend services at your local Church of Christ?
