Charles Hardgrave Wins Band Honors

CHARLES HARDGRAVE

Charles Hardgrave, son of Mr. and Mrs. Allen Hardgrave of Goldthwaite, was named to the all-state band at the recent regional band meet in Abilene, and will go to Houston for the state meet January 31.

For the past four years Charles has been named to the all-district and all-regional bands.

He is a senior in Goldthwaite High School and has been a member of the band four years. He has served as president of the band and was elected band beau last year. He is president of the Beta Club and a member of the student council.

When your pharmacist hands you a small bottle of one of the "new" medicines and tells you the cost, it may seem like a high price to pay for a prescription.

But when you consider what these new medicines your doctor prescribes can do—in getting you well quicker, back on the job, earning money again—you realize what good value you're getting.

Due to the constant advances in medical science and the development of more potent drugs, a siege of sickness costs a person less today than ever before in history.

Twenty years ago, for example, hospital patients stayed an average of 14 days, as compared with 9 days average now. An appendicitis operation used to mean a hospital stay of 3 weeks—now it's usually 5 days. Hernia cases were usually hospitalized 21 days—now they're often home in a week. And pneumonia patients, if they survived, had to stay 3 to 6 weeks. Now they're usually home in a week—if they leave it at all!

Any way you look at it—in terms of saving days of hospital time, the fewer visits needed from your doctor, or your return to income-producing work much sooner—the money you spend for prompt and proper medical care can well turn out to be one of the really big bargains of your life.—Reprinted from a copyrighted advertisement published by Parke, Davis & Company, Detroit 32, Michigan.

STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

Austin, Texas — Serving as Governor of Texas should be a snap for John Connally.

Any man who can wage a rigorous, 12 months campaign for Governor, such as he has done, reorganize the state government, plan and participate in all the ceremonies he has been through since his election and inauguration, and assume all the allied responsibilities related thereto . . . should find the task of being governor a cinch.

It seemed like half of Texas was in Austin to see the first mass turnover in state government since Jimmy Allred took over from "Ma" Ferguson in 1935.

Man of the hour was, of course, John Connally! Bus loads of people, both from his old hometown of Floresville and his latest hometown of Fort Worth, came to Austin for the festivities that surrounded his inauguration as governor.

Most of them were here by inauguration eve when nearly 5,000 people packed Austin's

Municipal Auditorium for the Democrat's "Victory Dinner," rated as the biggest seated dinner in the state's history. It was sponsored by the State Democratic Executive Committee. At \$25 a plate, it netted the party \$100,000 and put it on its feet, well-heeled.

Inauguration Day led off with an interdenominational prayer breakfast and the dignity of the day carried over to the high-noon swearing-in ceremony in front of the State Capitol.

Some 5,000 people clustered on the capitol lawn as Governor Connally and Lieutenant Governor Preston Smith solemnly took their oaths of office from Chief Justice Robert W. Calvert of the State Supreme Court.

Both Connally and Smith expressed a sincerity of purpose and a real desire to work with the 58th Legislature in pushing progress for the state . . . while holding down spending.

Throughout Inauguration Day, Texas' two top men kept popping up in unexpected places—arriving early for ceremonies and dropping in at events related to the inauguration. They shook every extended hand and signed as many autographs as time allowed.

At seven in the evening they took their places, alongside their wives, in a Capitol rotunda receiving line and shook thousands more hands with unrelenting enthusiasm.

When Governor Connally presented his plan for progress to a joint meeting of Senate and House members, on the following day, he was met with applause that many legislators felt never had been equaled.

Majority of the legislators said that they felt they could support him "most of the way." All praised his "tremendous grasp of state government," and said if there were differences between the governor and the legislature, such differences could be worked out.

Many were pleased to see Connally urge the strengthening of family sanctity laws. He recommended: An end to common-law marriages; a 90-day waiting period for divorces, prohibiting remarriages until six

months after a divorce; and requiring both parents to appear in court when a divorce involves children.

His views on up-grading higher education were approved almost unanimously. But there was quite a bit of disapproval of his proposal to combine the Game and Fish Commission and the State Parks Board. Opposition was based largely on the idea that the Game and Fish Commission would suffer.

Mills County Jail Has A Unique History

By FLORA G. BOWLES
The jail as it stands today was the first county building erected in Mills County.

Prior to the organization of the county in 1887 the area had neither government nor peace officers. For 15 years a war of violence and bloodshed was waged between rival groups.

The organization of Mills County was completed on September 12, 1887. The Commissioners' Court thought the erection of a jail was more important than the establishment of a county seat town for the new county. In one month, October 12, 1887, the Commissioners' Court ordered, through the columns of the Mountaineer (first county newspaper), Judge J. B. Head (first county judge) to open bids for the building of the jail.

The jail was constructed of sandstone and limestone with steel and iron work for the cells, sinks, pipes, locks, and other fixtures at a cost of \$8,850.00. The jail was completed in April 1888, one year, six months, and nine days before the voters of the new county voted for Goldthwaite to be the County Seat after an exciting campaign waged by Mullin, Pegtown, and Goldthwaite.

Many old buildings of Texas are receiving a State Historical Building Medallion. Why not our Jail be awarded one?

Mr. and Mrs. Hobson Miller, Jr., and children of Carlsbad, New Mexico, Miss Patsi Miller of Austin, and Paul Cox of Amarillo were guests of Mr. and Mrs. Hobson Miller Sunday.

FHA Accepting Applications For Loans On Recreation Enterprises

Farmers Home Administration is now accepting applications from family farmers for the development of recreation enterprises on their farms. Marlis C. Barker, county supervisor of the agency for Brown County, said today.

Loans are also available to nonprofit associations of farmers and others living in rural communities to cover the cost of shifting land to different uses, including recreation.

Associations may use Farmers Home Administration loans to develop a large recreation area, such as a park or lake shore, golf course or to convert land now being cropped into a grazing or forested area; and to establish a wildlife refuge, among other enterprises.

Mr. Barker said that his agency will use its regular lending programs to finance the new recreation loans. The maximum of intermediate credit farmers can obtain to cover operating costs of a recreation project is \$35,000. Under the real estate loan program they can borrow a maximum of \$90,000 to develop land and buildings for recreation.

However, it is expected that the average loan nationally for on-farm recreation activities will be considerably less than these top amounts.

Intermediate-term loans run a maximum of 7 years, real estate loans, a maximum of 40 years. In both cases the interest rate is 5 per cent.

To qualify for a recreation loan, a farmer must have the background needed to be successful in the proposed farm and recreation enterprise. After the loan is made, he must con-

tinue to receive a substantial part of his income from farming.

Recreation loans are aimed at helping family farmers supplement their incomes, Mr. Barker said. His office will assist borrowers in working out a plan for operating the recreation projects to make the best use of all their farm resources.

Nonprofit associations or rural residents may borrow up to \$1 million to finance changes in present land use. The maximum interest rate is 5 per cent. These loans may be made for up to 40 years.

Examples of associations that might be eligible for one of these loans, said Mr. Barker, are nonprofit corporations, soil conservation or grazing districts, local recreation associations; small towns and other public agencies in rural areas.

To qualify for a recreation loan, individual farmers and associations must supply proof they are unable to obtain needed credit elsewhere on reasonable terms. They must also pledge security for the loans.

In some areas many farmers are already adding to their farm earnings by part-time, seasonal and other activities that serve the need of vacationers, hunters, fishermen, folks participating in water sports, and others. Recreation is a growing farm and rural business, the equivalent of a good size factory payroll in a lot of counties.

Recreation loans of the Farmers Home Administration are now available to supply capital for farm and community recreation enterprises that in many cases would have been postponed or set aside entirely due to a lack of financing, Mr. Barker said.

Further information on recreation loans of the Farmers Home Administration may be obtained at the county office of the agency located at 201 North Fisk, Brownwood, Texas.

Signup Set For 1963 Feed Grain, Spring Wheat Diversion Program

The signup period for 1963-crop corn, grain sorghum, barley, and wheat in spring wheat areas will be from February 1 through March 22, 1963, E. L. Burkett, Chairman, Agricultural Stabilization and Conservation County Committee, has announced. The signup period for wheat in winter wheat areas ended December 14.

The voluntary diversion programs for feed grains and wheat are generally the same as in previous years, the Chairman explained. Of a few provisions which are slightly different, the principal one is the price support payment which will be available to farmers participating in the program in addition to the regular price support loans and purchase agreements.

Mr. Burkett gave these highlights of the 1963 feed grain program: For small farms — with total feed grain base acreages of 25 acres or less — on which the producer diverts the entire feed grain base acreage (1959-60 average acreage, as adjusted) the payment rate will be 50 per cent of the county support rate on the normal production of the diverted acres. The county support rate reflects the recently increased national average support prices of \$1.25 per bushel for corn, \$2 per hundredweight for grain sorghum, and 96 cents per bushel for barley. (These farmers will receive no price support payment, since they will have no 1963 feed grain acreage.)

For other feed grain farms, the payment on the first 20 per cent reduction from the base acreage will be at 20% of the county support rate on the normal production of the diverted acres. On any acreage diversion above the minimum requirement, payment will be at 50 per cent of the county support rate. The maximum diversion is 40 per cent of the base acreage or 25 acres, whichever is larger. In addition, participating farm-

ers (except those on small farms who divert all their feed grain base acreage) will receive price support payments on the normal production of their 1963 feed grain acreage, without regard to whether they feed their grain, market it, or place it under price support. The payments will be figured on the farm's normal yield regardless of the actual yield on the farm in 1963. These payments will be 18 cents per bushel for corn, 14 cents per bushel for barley, and 29 cents per hundredweight (16 cents per bushel) for grain sorghum.

Crops from participating farms also become eligible for price support loans or purchase agreements at the county loan rate (reflecting national averages of \$1.07 per bushel for corn, 82 cents per bushel for barley, and \$1.71 per hundredweight for grain sorghum). Price support on 1963-crop corn, grain sorghum, and barley will be available only to producers taking part in the feed grain program.

Under the 1963 wheat stabilization program, the Chairman said, farmers may divert from 20 to 50 per cent of their wheat acreage, with special diversion provisions for small farms. The diversion payment will be at 50 per cent of the county loan rate (reflecting the \$1.82 per bushel national average) on the normal production (1959-60 average yields) of the diverted wheat acreage. In the case of small farms, the minimum diversion is 20 per cent of the larger of (a) the allotment, or (b) the average 1959-61 wheat acreage (but not to exceed 15 acres); the maximum diversion is 10 acres, provided this is not larger than the allotment or 3-year base acreage, whichever applies.

The price support payment to participating wheat farmers will be 18 cents per bushel on the normal production of the 1963 wheat acreage, and their crops will qualify for the reg-

News Of The Ebony Community

By CLEMENTINE WILMETH BRILEY

Here we are back at 8713 Magnetic in El Paso again. Arrived here Thursday afternoon, January 3. This is the afternoon of January 12. Out doors we have some powdery snow and a gray sky. The weather man says the thermometer stands at 20.

Back home on New Year's Eve night almost all of the Ebony folks were gathered at the schoolhouse for a New Year's Eve party. They had also gathered together to organize themselves into a club to work together for the improvement of the community. Some had already been working without organization, and they had succeeded in having lights installed in the schoolhouse. This was a lively affair. Out in the yard in a wash kettle over a bright wood fire, Perry Day was stirring his delightful stew. While in the house on tables along the wall, the ladies were putting out all kinds of delicious cakes and pies. Out in the yard some were shooting anvils which they say was an old time sport. They sounded like airplanes breaking the sound barrier.

After refreshments Clayton Egger, acting as temporary chairman, called the house to order. First came the name. They voted to name the organization "The Ebony Community Club." Cecil Egger was elected president. Perry Day elected vice president. Johnny Humphries second vice president. Mrs. Clayton Egger secretary and treasurer. Mrs. Perry Day Committee Woman. Mrs. Johnny Humphries elected for some office, but I can't recall it. Please forgive me if I have some of these others wrong too. I'm so far away I can't ask any one for a correction. Any way I know these people intend to work for the upbuilding of the community.

ular price support loans and purchase agreements (reflecting the \$1.82 per bushel national average).

For both feed grain and wheat producers who sign up under the 1963 programs, eligibility for diversion payments and price support in 1963 is contingent upon the farmer's diverting an acreage equal to the total intentions shown on his agreement.

Advance payments will again be available at the time of signup. Final payments under the diversion program and price support payments will be made after compliance has been determined.

Mr. Burkett urged farmers to get in touch with the ASCS County Office for further details about the 1963 feed grain and wheat programs.

I had come by to see the lights of ahead of me, for the look like itself at Taylor Duncan's came the bright light other car from behind. It drove up to our were Grace and Bill and Johnny. They had take us back to El Paso. I spent most of the Day packing.
