Gaddis Geeslin returned last week from New Orleans, La., where he is a student at Art & Craft Institute. He is the guest of his parents, Mr. and Mrs. Edward Geeslin—Brady Standard.

A collection was taken at each of the churches for the purpose of helping needy people who are passing through our town—that is the worthy ones. We are asking the people of Goldthwaite not to give any money to transients who come to your door with an appeal. If you have anything to give to the help of people who are in a stranded condition, we urge that you place it in the community fund that is being planned for this purpose.

Mrs. I. G. Collier received a message Tuesday stating her sister, Mrs. F. K. Popplewell, died at Lubbock Tuesday. Mr. and Mrs. Popplewell formerly lived at Center City and he taught school there in the early days.

N. E. Stockton of San Antonio joined the efficient employees at the Trent State Bank on January 1. His family will move here in the near future.

The world's leading acoustical experts made the test.

The U. S. Auto Club certified the results:

**The 1965 Ford  
rides quieter  
than a Rolls-Royce!**

**...and now  
let's talk about some  
other Ford surprises...**

Test-drive a Ford—and you're in for some surprises. Leading acoustical consultants conducted tests in which 1965 Fords (Galaxie 500 Sedan, XL and LTD Hardtops) with 289-cu. in. V-8 engines rode quieter than a Rolls-Royce. These tests were certified by the U. S. Auto Club.

When you feel a 1965 Ford in action—with the strongest Ford body ever... a revolutionary new frame that "tunes out" vibration... new ultrasoft coil spring suspension—you're bound to be impressed. But the ride is only one of Ford's surprises...

■ New swept-back instrument panel adds five inches extra knee room. ■ Transmission tunnel is lower for extra foot room. ■ Trunk has more space than ever—holds four 2-suiters standing upright.

■ Handy new "reversible" ignition key—works either side up.

■ Hot, but hushed, 289-cu. in. V-8 is standard equipment in LTD and LTD models. ■ Smooth, thrifty all-new Bix Six in 350 models—the most powerful standard Six offered by any car in Ford's class. ■ V-8 options to 425 hp.

■ All Ford automatic transmissions have three speeds, not two as some competing cars. Result: you pass faster, shift smoothly, save on gas. ■ Fully synchronized manual transmissions—you can even shift down to first without clashing gears. ■ New Ford LTD 4-door hardtops have 10 courtesy lights, 5 ash trays. Upholstery treated to keep its beauty with Scotchgard® stain repellent. Luxuries you'd expect only in the highest priced cars.

Surprised? You will be... when you visit your Ford Dealer and test-drive the Quiet One. Do it soon!

**TAX MAN SAM SEZ:**

An estimated 1,700 high school and colleges are teaching some 235,000 Texas students how to prepare their tax returns this year.

Each year Texas teachers do an outstanding job in helping students learn how to prepare an income tax return. Many of the students are helping the parents.

Thousands of students find that they have a refund due on taxes withheld on their summer jobs. Maybe they'll all do a better job of preparing tax returns in the future.

**PRESCRIPTION PHARMACISTS**

**YOU CAN ENJOY GOOD HEALTH IN OLD AGE**

Retain your good health right through your later years. It may be necessary to give the body some extra care, but this is simply routine. More attention to diet and rest can be helpful — and moderate exercise is essential.

But most important is regular attention by your Doctor. He will guide you in the use of necessary medicines, which should be taken only at his direction. He will prescribe only the best medicines, such as those of Parke, Davis & Company.

We invite you to bring your prescriptions here promptly, as we are prepared to serve your every pharmaceutical need. This extra care can do much toward making old age your most healthful and pleasant years.

### Aliens Must Report Address During January

J. W. Holland of the United States Immigration and Naturalization Service stated that the period within which aliens must report their addresses is almost at hand.

The month of January has been set for the addresses reporting period. All aliens in the United States, with few exceptions, must report their addresses to the Government during that period.

Mr. Holland said that forms with which to make the report will be available to all Post Offices and offices of the Immigration and Naturalization Service during the month of January.

He urges all aliens to comply with the reporting requirements, as willful failure to do so may lead to serious consequences.

# 1965 March of Dimes Is Launched To Score Birth Defects Knockout

A "one-two" punch will be aimed at the problem of birth defects this January during the annual March of Dimes campaign across the nation.

"The objective of the drive is twofold," explained Dr. Daniel Bergsma, director of the medical department of The National Foundation-March of Dimes. "More than 250,000 seriously defective children are born each year in this country—one every other minute. Given the facts, the American public will recognize the problem of birth defects for what it is—a national emergency that requires immediate action. We invite the public to help us meet this emergency."

"The second goal is money. With public contributions to the January March of Dimes, we expect to establish the additional March of Dimes-supported birth defects centers desperately needed for the fast diagnosis, evaluation and improved treatment of these defects which cripple or disfigure a child before it's born. Funds are also needed to enable scientists to continue their search for the causes and possible ways to prevent birth defects."

To support medical and scientific workers in the front lines of the battle against birth defects, The National Foundation-March of Dimes has a behind-the-lines army two million strong. These are volunteers from the more than 3,000 March of Dimes county chapters throughout the 50 states—men, women and teenagers, too, who dedicate their efforts to the success of the January campaign and the year-round programs of The National Foundation.

### Visit 15 Million Homes

To acquaint families with the aims of The National Foundation-March of Dimes, these volunteers will join the Mothers' March at the end of the month during which some 15 million homes are visited. Other volunteers will address about 30 million informative mailers. March of Dimes volunteers also organize fund-raising events to support the work of local chapters and the national organization.

These volunteers devote a great deal of energy to the important task of informing parents of defective children about the March of Dimes birth defects centers and in encouraging families to seek medical help for the afflicted child, whether from the centers or from private physicians.

About one in 10 American families experiences the heart-break caused by the birth of a seriously defective child. By no means are all of these children receiving medical attention which might make such a difference in their lives.

### Some Give Up Hope

"Too often families are overwhelmed by helplessness and despair," Dr. Bergsma said. "They frequently give up hope without exploring all possibilities for their child. But with the continued progress of medicine in this field, conditions which were once beyond treatment can often be helped by newly-developed methods. Also, the individual's condition may change and make help a possibility."

Her parents' persistence paid off for 4-year-old Mickey Heinicke, the 1965 National March of Dimes child. Mickey was born with a spinal deformity that paralyzed her from the waist down. At one time it seemed unlikely that she could ever walk.

Yet today the spunky youngster goes darting around with pint-sized crutches and braces. Not perfect—but certainly an improvement over crawling. The increased mobility means an expanded world to little Mickey and her family.

In research within the past few years, scientists supported by March of Dimes funds produced new or improved tests to detect inborn errors of metabolism, so that prompt treatment can prevent permanent

damage to the infant's body or mind.

"The progress made thus far is significant and promising," Dr. Bergsma noted, "but we have taken just the first step on a long road. When the American people recognize the magnitude of the problem, they will demand and support an efficient and effective attack against the many birth defects that cripple or disfigure 700 infants each day. With their generous help, we can build up our chapter center programs and birth defects centers throughout the country and we will continue to support individual scientists in the quest for knowledge in this critical area."

## S. S. And Self-Employment Taxes For Farm Workers

Special Federal Social Security tax rules apply to farm owners, share-croppers, farm workers, and farm crew leaders, Virgil W. Newman, Administrative Officer of Internal Revenue for the Brownwood office, reminded today.

Employers of agricultural workers may be required to file Form 943 and pay Social Security taxes on wages paid to certain employees.

"Farmer's Tax Guide" which furnishes more detailed information on this subject is available upon request from the Internal Revenue Service.

### Landing Net Tip

Do you have trouble with your landing net drying out between catches so that it floats when you try to slip it under fish?

Stop this in a jiffy by dipping the net in melted paraffin before you go out. Then it will sink like a rock.

## Personals

Mr. and Mrs. C. C. Ball and son, Jerry, of Kingsville spent the Christmas holidays with Mrs. Ball's mother, Mrs. Annie Brim and other relatives here.

Mrs. Loretta Jones, Ronnie and Linda, and Mrs. Ernest Ince spent Christmas Day in New Braunfels with Mr. and Mrs. Royce Brown and children.

Mr. and Mrs. Jim Bob Steen and children of Marfa spent the Christmas holidays with Mr. and Mrs. Bob Steen.

### Snell Hook Holder

A good way to keep snelled hooks in your tackle box or pocket is to coil snell neatly and wrap snell and hook in masking tape.

This way rigs will not deteriorate, won't get damaged and won't catch and tangle in clothes of other gear.

## Bach Club Meets Tuesday

By AMY PAGE

The Bach Club met Tuesday afternoon in the Fellowship Hall of the First Methodist Church, with Elizabeth Arnold in charge. Sally Saylor read the minutes after the group sang some songs. Each one played a piano selection.

Mitzi King read the story about Mozart. Mrs. Head talked about the organ and Mrs. Ledbetter gave a talk about the opera "Carmen."

Mike Walther and his sister, Cynthia of Waco spent the holidays with their grandfather, Arthur Bryant.

## HEARING TEST For Goldthwaite

Electronic hearing test held in Goldthwaite, Texas, that has a hearing of any kind is welcome for the test. Pictures are showing how the ear works, and why a person loses his hearing, also the nerve system of the ear that is connected to the brain, to tell us what we have heard. Each person is tested with the latest electronic machinery which can pinpoint in what part of the ear they are having trouble and what can be done about it. Each person can have a simple operation on the ear that lets thousands of people hear again. How the new device is helping thousands of people with the NERVE DEAFNESS to hear. How 2 year old children being fitted with aids learn to hear and talk. How wax in the ear causes the hearing. How congestion affects the hearing.

...should have a hearing at least once a year if you have any hearing loss. People who wear hearing aids should have a test. People who have been told that nothing can be done for them should have a test each year, as new ways are being discovered to help these people.

...test in Goldthwaite will be at the Mauney Courts, January 11th from 4 PM to 5 PM.

...roadway who is an Audiologist will conduct the test at the courtesy of the Hearing Center at 120 West Temple. Miss the test you may call the Temple office on Thursday or Friday between 10 AM and 5 PM and for test.

## County Agent Reese Is Presented Screwworm Eradication Certificate

A certificate of appreciation has been presented to George Reese, Mills County agricultural agent, for his active support of the screwworm eradication program. The presentation was made by L. B. Burnham, chairman of the county screwworm eradication committee.

Burnham commended Mr. Reese for devoting many long hours to the popular eradication project. He noted that the agent has been the key man in the county concerned with screwworm eradication activities, serving as an important link between program officials and local farmers and ranchers.

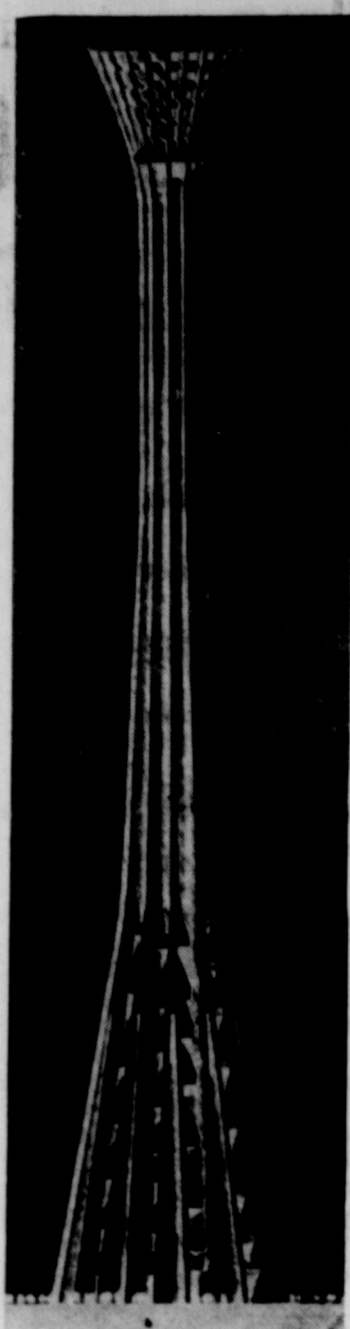

Along with keeping stockmen informed on all aspects of the program and cooperating with eradication workers in carrying out control activities within the county, the agent also served as advisor to the committee which coordinated local participation in the successful drive to raise more than \$3 million from the

livestock industry to get the campaign started nearly three years ago.

"The screwworm eradication program could not have attained its present high level of success if it had not had the wholehearted cooperation and assistance of the local county agricultural agent," Burnham said.

Dolph Briscoe Jr. of Uvalde, president of the Southwest Animal Health Research Foundation which spearheaded the Southwest-wide fund drive, recently presented a plaque to all the county agricultural agents in Texas at the State Conference of the Texas Agricultural Extension Service at Texas A&M University.

"Never before in the history of the livestock industry have the producers of this state been so indebted to such a small group," Briscoe said, in pointing out the contributions county agents have made toward success of the eradication program.

**WORLD'S TALLEST**—This is the preliminary proposed design of the tower structure which will be located in the center of the 1968 "Fair of the Americas" to be held in San Antonio. It will be the tallest concrete structure in the world, with a minimum height of 650 to 700 feet stretching almost 70 stories in the air. It will be constructed with a capital investment of \$4.5 million and have observation decks and restaurants at the top and intermediate levels. The illuminated tower will be visible for 100 miles when seen from the air at night. HemisFair architects are now working on the exact design and specifications which will bring to reality the future permanent Texas landmark.
