YEARS AGO when the physician fought to bring a patient through ar siege of pneumonia there was little he could do but help conserve the patient's strength, make him comfortable . . . and hope for the best.

In fact, the doctor sadly signed death certificates for 33 out of every 100 pneumonia patients he treated. For those who survived, recovery was slow and expenses were high. The cost of an average case was about \$1,000, including three or four weeks' time lost away from work.

Happily, this grim picture has changed. Under the onslaught of sulfa drugs . . . and now the antibiotics . . . pneumonia has steadily lost ground. Now, uncomplicated cases clear up in four to five days. And instead of losing 33 out of every 100 cases, the doctor saves all but a

Just as striking as the cut in deaths and disability is the cut in the cost of curing pneumonia. More and more patients can now be cared for at home. As a result, the average case of pneumonia may cost no more than \$100 . . . including loss of income, the doctor's visits and the "expensive" new medicines!

Today, more than ever before, an investment in prompt and proper medical care may well represent one of the biggest bargains of your life. -Reprinted from a copyrighted advertisement published by Parke, Davis & Company, Detroit 32, Michigan.
