HEALTH NOTICE

Due to the fact that the city sewer lines do not extend to all homes within the city limits, some residents still find it necessary to continue the use of septic tanks.

There are occasions when these septic tanks with their drainage systems have been known to overflow and allow drainage to appear and stay on the surface of the ground. This results in a definite health hazard to residents of that particular area and the entire city.

If this should exist with your drainage system it would be of the best interest to you and your neighbors to correct the situation.

The City Health Office will be glad to assist you in working out a solution to solve the problem.

Also, there are still a few places where livestock is kept within the city limits.

Residents are reminded to make a special effort to keep these surroundings as clean as possible for the health and safety of the community.
