Sewer Project Plans Begin

The Goldthwaite City Council reopened the file on the longawaited sewer line extension for the citizens of Goldthwaite at its regular meeting last week.

Preliminary planning has been initiated by the engineering firm of Rady and Associates of Ft. Worth. The proposed project is necessary because of the need to abate pollution and to provide an odor-free, clean environment in the interest of the public,

according to the engineers. The project was submitted to the voters of Goldthwaite several years ago and has been awaiting approval for matching funds grants from the federal governent. The total estimated cost of the improvements is \$479,000. Of this amount approximately \$315,000 possibly can be obtained

from grants. The Council voiced its approval of the proposed project and with a complete vote of confidence for its quick construction. In other council matters pay increases were granted for all

Is Lone Star doing everything it can to hold down costs?

We're operating more efficiently than ever before. But our costs are go-

ing up none the less ... just like yours. For instance, the interest rates on money we have to borrow for constructing new gas supply systems have increased dramatically. These rates have recently been at all time highs.

Within the last 18 months, we have invested nearly \$100 million: to build a large diameter, 400-mile

pipeline from West Texas to the Dallas-Ft. Worth area for other facilities along this pipeline,

to attach major new reserves and to pay for well drilling by producers. all for the purpose of assuring continuing natural gas supplies to our

customers. These investments don't even include the cost of all the gas we must buy to fill the line. In 1969, natural gas

cost us about 19 cents per thousand cubic feet. Recently we paid more than 85 cents

for major new supplies. And the price is still rising. Costs like these are the price Lone

Star must pay for your continuing natural gas supplies. It's important that you understand our need for adequate rates so we can continue to deliver clean gas energy to your home for winters to come.

We're doing everything possible to hold down controllable costs. But even with gradual rate increases, natural gas from Lone Star will still be your most economical and efficient nonpolluting fuel.
