Legislative News

The third week of the Legislature has come to an end, with a great deal of work done in the House and in the Senate. A bill has passed in the Senate and one has passed in the House having for their purpose the reorganiza-Knowledge worth having come tion of the penitentiary system. slow. The other kind usually It is contended that either bill, if passed, will put the penitentiary The mistakes of the past system upon a business basis.

About seventy men of the House went into a secret caucus When a man assumes a public and came out with a bill which they offered in lion of the committee bill, and they careied it in the house in a whoop; the supporters of which are called insurgents. The main provision in the penitentiary bills is to put the management of same under a general superintendent who will put all of his time in the management of the penitentiary, and whose duty it is to make the system pay its way.

A blue sky bill has been debated very throughly but no bill of the sort has been finally passed. The blue sky bill has for its purpose the contrel and supervision of all concerns that organize and sell stocks, bonds, and townsites, to the public, and it is thought that many "gold brick" and wild cat" concerns will be put out of business by this law.

August 5th Senator McGregor of Austin invited the legislature to attend the barbecue at his beautiful home, four miles from Austin where he gave a feast of the best barbecued meats to three hundred guests, and at which many toasts were given and entertaining speeches were made. The governor was presentand incidentally called the legislature to task for its seeming "out of harmony" with his plan, but this was taken very lightly and every body enjoyed the feast.

SYNOPSIS

Brotherson to reseat himself, but be-Anderson and wife see a re-looking man come out of the hotel, look around furtively, hands in the snow and pass on. Clermont hotel, look around furtively wash his hands in the snow and pass on. Commotion attracts them to the Clermont. Where it is found that the beautiful Miss Edith Challoner has fallen dead. Anderson describes the man he saw wash his hands in the snow. The hotel manager declares him to be Orlando Brotherson. Physicians find that Miss Challoner was stabbed and not shot, which seems to clear Brotherson of suspicion. Gryce, an ared detective, and Sweetwater, his assistant, take up the case. They believe Miss Challoner stabbed herself. A paper cutter found near the scene of trasedy is believed to be the weapon used. Mr. Challoner tells of a batch of letters found in his daughter's desk, signed "O. B." All are love letters except one which shows that the writer was displeased. This letter was signed by Orlando Brotherson. Anderson goes with Sweetwater to identify Brotherson, who is to address a meeting of anarchists. The place is raided by the police and Brotherson escapes without being identified. Brotherson is found living in a tenement under the name of Dunn. He is an inventor. Brotherson tells the coroner of his acquaintance with Miss Challoner.

CHAPTER X .- Continued.

"I do; it made a great impression on me. I shall hope for our further acquaintance, she said. 'We have one very strong interest in common. And if eyer a human face spoke eloquently, it was hers at that moment. I thought it sprang from personal interest, and it gave me courage to pursue the intention which had taken the place of every other feeling and ambition by which I had hitherto been moved. If she could ignore the socia gulf between us, I felt free to take the leap. Cowardice had never been a fault of mine. I realized that I must first let ber see the manner of man I was and what life meant to me and must mean to her if the union I contemplated should become an actual fact. I wrote letters to her, but I did not give her my address or even request a reply. I was not ready for any word from her. I am not like other men and I could wait And I her? did, for weeks, then suddenly appeared at her hotel."

"This was when?" put in Dr. Heath. anxious to bridge the pause which must have been very painful to the listening father.

"The week after Thanksgiving did not see her the first day, and only casually the second. But she knew was in the building, and when I came upon her one evening at the very desk in the mezzanine which we all have could not forbear expressing myself in a way she could not misunderstand The result was of a kind to drive a man like myself to an extremity of self-denunciation and rage. She rose require me to recall the exact spot." up as if insulted, and flung me one sentence and one sentence only before she hailed the elevator and left my presence. A cur could not have been dismissed with less ceremony

"That is not like my daughter What was the sentence you allude to? Let me hear the very words." Mr Challoner had come forward and now stood awaiting his reply, a dignified but pathetic figure, which all must wiew with respect.

unfortunate coincidence. I met Miss Challoner's eve for one instant from 'I hate the memory of them, but the top of the little staircase running since you demand it, I will repeat them just as they fell from her lips," was Mr. Brotherson's bitter retort "She said, 'You of all men should recognize the unseemliness of these proposals. Had your letters given me any hint of the feelings you have just expressed, you would never have had this opportunity of approaching me.' That was all; but her indignation was scathing. Ladies who have supped exclusively off silver, show a fine scorn for the common ware of the cottager."

The assertive boldness-some would call it bravado-with which he thus finished the story of his relations with the dead heiress, seemed to be more than Mr. Challoner could stand. With a look of extreme pain and perplexity he vanished from the doorway, and it fell to Dr. Heath to inquire:

"Is this letter-a letter of threat you will remember-the only communication which passed between you and Miss Challoner after this unfortunate passage of arms at the Clermont?"

"Yes, I had no wish to address her again. I had exhausted in this one outburst whatever humiliation I felt." "And she? Did she give no sign, make you no answer?"

"None whatever." Then, as if he found it impossible to hide this hurt to his pride, "she did not even seem frequently wrote letters in the mezto consider me worthy the honor of an added remark. Such arrogance is. no doubt, commendable in a Challon-

to join her. But I got no further. When I saw her on her feet, with her This time his bitterness did face turned my way, I remembered pass unrebuked by the coroner: "Rethe scorn with which she had remember the gray hairs of the only Challoner who can hear you, and respect his grief."

Mr. Brotherson bowed. 'I have finished," said he. "I shall down the steps and so out of the build have nothing more to say on the sub- ing by the main entrance. She saw lect." And he drew himself up in expectation of the dismissai he evidently thought pending.

But the coroner was not done with strike the blow which terminated her him by any means. He had a theory In regard to this lamentable suicide life. Why should I? No woman sac-which he hoped to establish by this rifices has life out of mere regret for "No. I'm not proud of the chain

"Yes, you are right there. But what if there is? We were no more sucwas willing to concede something to cessful in solving that case than we the secret demand made upon him by have been in solving this. Yet you Sweetwater, who was bundling up his look and act like a hound which has struck a hot scent."

The young man smoothed his fea tures with an embarrassed laugh.

"I shall never learn," said he, "not to give tongue till the hunt is fairly started. If you will excuse me, we'll first make sure of the similarity I have mentioned. Then I'll explain myself. I have some notes here, made at the time it was decided to drop the Hicks street case as a wholly inexplicable one. Shall I read them?"

"Fire away, my boy, though I hardly the affair in Hicks street has upon from a gun. Mr. Gryce, have you opened directly opposite the the Clermont one. A poor washerwoman and the wealthy Miss Challoner! True, they were not unlike in

"The connection will come later' smiled the young detective, with that strange softening of his features which made one at times forget his extreme plainness.

And he read:

"'On the afternoon of December 4. 1910, the strong and persistent scream ing of a young child in one of the rooms of a rear tenement in Hicks street, Brooklyn, drew the attention of some of the inmates and led them. after several ineffectual efforts to gain an entrance, to the breaking in of a door which had been fastened on and no such comparison could have had taken this street in on my way the inside by an old-fashioned door-

" 'The tenant, whom all knew for an honest, hard-working woman, had not infrequently fastened her door in this manner, in order to safeguard her child who was abnormally active and had a way of rattling the door open when it was not thus secured. she had never refused to open before, and the child's cries were pitiful.

"This was no longer a matter of wonder, when, the door having been wrenched from its hinges, they all rushed in. Across a tub of steaming open window, they saw the body of seemingly dead: the frightened child tugging at her skirts. She was of a robust make, fleshy and fair, and had always been considered a model of health and energy, but at the sight of her helpless figure, thus stricken while at work, the one cry was 'A stroke!' till she had been lifted off and laid upon the floor. Then some discoloration in the water at the bottom of the tub led to a closer examination of her body, and the discovery of a bullet-hole in her breast directly

'As she had been standing with face towards the window, all crowded come from. As they were on the fourth story it could not have come from the court upon which the room looked. It could only have come from fore them some twenty feet away. A confronting them stood open, and this was the one directly opposite.

'Nobody was to be seen there or in the room beyond, but during the excitement, one man ran off to call the police and another to hunt up the janitor and ask who occupied this room.

"'His reply threw them all into confusion. The tenant of that room was the best, the quietest and most respectable man in either building.

ASHINGTON.-If you want to know your exact horsepower and the amount of energy you can generate under any given condition, call on Professor Langworthy at the chemistry bureau, department of agriculture, and he can give you the answer. He can register your horsepower as easily as the engine manufacturer rates his engines.

To Professor Langworthy the human body is but a machine. He is the chief of division of nutritive inof food values. Like any other engine, the human body has a maxinum capacity of so many foot pounds of energy, and to generate this, a certhy makes it his business to find what food is adapted for the best results from the majority.

an endless series of laboratory instruqueer tubes and pipes where everything under the sun is concected and oked up, to see how many calories. low much nitrogen and how much energy it will give the human body when

In the laboratory is a respiration calorimeter, a chamber in which Uncle Sam's scientists put subjects to measure the energy which the subject gives off while he is engaged in different tasks and while fed different diets of food.

The calorimeter is a valuable irstrument in many ways. It enables the government to recommend certain diets as being of the greatest use to men and women in different occupations, and it enables them to recommend a combination of foods that are cheap, but at the same time sustain-

The apparatus itself is six and a half feet square and of the same height. There is a window in the side to permit light for reading or studying, a couch, to permit the subject to lie down; a pipe through which air enters, and another through which it is expelled. The expelled air is caught and its components anavestigations, and solves the problems lyyzed, for part of the food you eat is expelled with every breath.

The heat given off by the subject's body is weighed and measured and then carried off through a brass pipe tain amount of fuel in the form of that has a current of cold water runfood is necessary. Doctor Langwor- ning through it. The heat-absorbing power of the pipe is enhanced by a series of copper diska that are soldered to it. The method is merely He described his unique depart- the reverse of that practiced in bringment in his workshop, surrounded by ing heat into a room by the hot-water method. In one, the cold water ments, ovens, graduated scales and carries it away; in the other the hot water brings it in. The exact amount of heat expelled from the subject's body is measured by the flow of cold water, one calorie of heat being necessary to raise one kilogram of water one degree centigrade.

(Too late for last week.) "LUCKY 13'S"

The Lucky 13's met last Wednesday with Lettie Rees, an interesting contest was enjoyed, refreshments were served and after the business meeting, the Club adjourn ed to meet the next Wednesday with the Misses Jackson.

The Progressive House party given in honor of the "Lucky 13's" beginning Thursday' evening and continuing over Saturday night was quite a success, it was one of the most enjoyable affairs of the season.

The Progressive House party started with a very enjoyable "Kid party" at the home of Miss "Bob" Severtson. The guests were dressed in costumes represting their childhood days, Kid games were played until a late hour when refreshments were served consisting of lemonade, Stick candy and animal cookies. All came away de-

lighted with their evenings fan.

Friday eve they met at the home of the Misses Jackson, where boarded the big ship for a trip around the World, each one registered with their left hand, his name, where they should desire to live, and although the big ship did not carry them to that desired place it transported to Mobeetie Monday morning. them to an ideal land beyond the seas. The first stop was at a little Tuesday. . home in Holland where after being royally entertained by a little Hollander, who served them to the Hollander's favorite sandwitches, they viewed some of the scenery. The Captain cried 'all aboard for Mexico," and every one was ready, Mex. ico was reached in due time, how ever few Mexicians were seen, having taken possession of a home there, each did their his part in helping devour a large pot of chili, though realizing their danger, as yet the war was in progress, they did not tarry long there, but sailed toward Japan. A stop with the Gypsies, where after traveling down a long flight of stairs an aged fortune teller revealed to each his future life, it was especially exciting. arrived at the little Japanese home family. and all about the room hung Japetions in heaps. When in Japan, do cousins, G. W. Walker and family. as Japan does, something seem to utter, so each one took a seat on a cushion, when suddenly came two little Japs bringing chop-sticks and rice for their guests. Mrs. Burkes, Aileen Wren and George Lard received the prize for having won the race eating rice. Lella McDonald sang a beautiful solo, after which the Guests sailed for America, har ing arrived here, some real interesting games were played and after dainty refreshments were served all departed declaring one of the best time imaginable. So if you ever should take a notion to go sailing

the trip with the "Lucky 13's. The "line up" for the picture show then the Slumber party at the McAfee home Saturday night was a most enjoyable event, there were thirteen present, no one ex perienced much sleep, but the sleep lost was well worth the "knowledge"

STUBBORN OROZCO FEARED BY HUERTA

GENERAL DOESN'T LIKE ORDERS TO PROCEED AGAINST REBEL FORCES IN CHIHUAHUA.

MIGHT RESULT IN REVOLT

Villa, Threatening an Attack on Juarez. Now Declared to Have Force of 2,400 Men.

El Paso, Tex .- The Huerta government has been advised of friction between Gen. Mercedo, military governor of Chihuahua, and Gen. Pascual Orozo Jr., commanding a force of 2,-000 irregulars. A revolt by Orozco and his followers is said to be feared both in Chihuahua and the City of Mexico, Orozco objecting to the military governor's orders to conduct a campaign against the rebels. Orozco has a large following in his home state among those not already under arms against the Huerta government

Francisco Villa, who is still threatening an attack on Juarez, has received 1,200 reinforcements from the rebels in Sonora. Mexican secret service men say this force, which has seen service in the Sonora campaign, brings Villa's fighting strength up to 2,400.

Clerks in the stores of the City of Mexico and men in all walks of life have been urged by President Huerta to devote a part of their time to military training, according to private advices received here from the City of Mexico.

The president is declared to have urged this training on the men "in order to make themselves proficient in the use of fire arms that they may assist in repelling a foreign invasion."

President Huerta's intention is said to be to put an army of 20,000 in the field against the rebels under Carranza in Chihuahua and Sonora.

INSURGENCY IN LEGISLATURE.

Sixty Members of House Join in Move to Expedite Prison Legislation.

Austin, Tex.-Out of the murk and chaos which envelop the state house

some things stand out conspicuously. First, there is the practical certainty that unless this legislature at the present special session shall act speedily and with wisdom the prison system will return to the hiring out practice.

Second, the probability that the legislature will take no such action.

Third, the certainty that the tax rate will be increased, only the extent of such increase now being in ques-

Fourth, the practical certainty that Gov. Colquitt will modify the tax rate to some extent by trimming the appropriations which the legislatre shall

Fifth, that in the situation thus cre ated Gov. Colquitt may be a candidate to succeed himself as a conservator of taxation in the interest of the masses and as a regulator of the liq-

Chaotic is the adjective which properly describes the status of prison legislation. With the session already half spent there is no advancement of the subject, although it witnessed the birth of an insurgent movement which may hasten results through an indirect process.

At a caucus of sixty members of the house it was resolved to urge the house committee on prison affairs to report upon the several bills previousy referred to that body.

Poultry Prizes Aggregate \$2,500.

Dallas, Tex .- Prizes to be awarded in the poultry division of the State Fair of Texas this fall aggregate \$2. 500 in value. President J. J. Eckford is authority for the statement that this is the richest offering for an exhibit of chickens, ducks, pigeons and pet stock in America. Owing to the large number of entries already made and the interest shown by fanciers. the management has decided to install additional coops and has made ar rangements accordingly. The coops have been ordered and are expected to arrive by the middle of August.

4,000 Men Threaten Strike.

Flat River, Mo .- Four thousand men employed in the lead mines of this county, the largest lead mining district in the world, voted on the question of a strike and representatives from Bonne Terre, Leadwood, Desloge and Elvins and figures given out indicate that the vote to strike was almost unanimous. The men are dissatisfied because the operators have refused them an increase of 50 cents a day each and have refused to recognize the union Twenty thousand persons are dependent upon the men who threaten to walk out.

Report on Texas Work Made. Dallas, Tex.-Reporting for the fissal year ending June 30, 1913. United States Engineer Major Thomas H. Jackson shows the expenditure of \$835,262.37 through the Dallas head quarters for the eleven projects ad ministered from this city. Out of the total there was expended in Trinity river project undertakings the sum of \$389,005.79. What recommendations were made for the new year, beginning July 1, 1914, were not revealed to the public.

THREE BURNED AT DALLAS

Arthur D. Anderson Barely Saves His Two Children from Flames.

Dallas, Tex.-Arthur D. Anderson and two of his children, a son aged years and a daughter aged 2, were painfully burned when their home was destroyed by fire. Mrs. Anderson was at a neighboring drug store and Mr. Anderson was across the street when flames starting in the roof rapidly enveloped their five-room cottage. Mr. Anderson ran to rescue his four children, who were asleep in the house. He got the two older ones out safely, but had to go through the flames to reach the others. With his clothing and theirs in a blaze he came through a window with them in his arms.

They were all painfully burned and were taken to a sanitarium. The bodies of the children were blistered more or less all over. Mr. Anderson's back, shoulders and arms were blisttered. It was said at the sanitarium that all three were badly but not seriously injured.

WACO STORM: WIRE KILLS BOY

Sam Woodall Dies When Parasol Became Charged With Electricity.

Waco, Tex.-Sam Woodall, aged 10, was instantly killed Saturday when an umbrella he was carrying came in contact with an electric light wire and 2,300 volts pasesd through his body. His face and limbs were discolored and part of his clothing was burned off. The child had started down town to take the umbrella to his mother, Mrs. Nellie T. Woodall, when he was killed.

A two and a half inch rain fell, the downpour continuing for 45 minutes without interruption.

The rain was accompanied by a high wind. Within 15 minutes after the rain began falling streets in the business district of Waco were transformed into small rivers. Electric lights and telephones in all parts of the city were put out of commission. and it was necessary for the fire department to pump water out of the bassment of a building at Sixth and Austin streets. The water at that place was eight feet deep.

FAVOR VOTES FOR WOMEN.

Congress at College Station Goes on Record by Unanimous Vote.

College Station, Tex.-The Texas Farmers' congress adjourned its sixteenth annual session Wednesday. For three solid hours the band of nearly 1,000 delegates was bombarded with speech after speech. The 1,000 delegates under the withering fire of a half dozn titanic vocabularies during the day melted to 500, but the 500 stayed at their posts. They remained long enough to greet with applause the announcement of the congress executive committee giving the names of the officers the committee had elected for the ensuing year, to approve a proposed amendment of the constitution permitting the executive ommittee at the end of twelve months o pick officers for the congress from outside the executive committee's ranks, and long enough, yes, it's quite rue, long enough to declare unanimously that the Texas Farmers' concress is in favor of votes for women.

The leaders of the Texas Farmers' congress elected by the executive committee from among the committee's members are H. E. Singleton of Mc-Kinney, president; T. P. Robinson of Bartlettt, vice president, and T. W. arkin of Beaumont, secretary-treas-

President Singleton, who succeeded President E. W. Knox of San Antonio, s president of the Texas Corn Growers' association. Vice President Robnson, succeeding John S. Kerr of Sherman, is also president of the Texas Beekeepers' association. Secetary-Treasurer Larkin, absent from he 1913 congress on account of illless, was re-elected.

Reversing its action of 1912, when the congress determined to accept free railroad transportation for delegates, he executive committee voted to discontinue the use of the railroad pass.

Will "Borrow" Governor.

Kansas City, Mo.-Missouri would ike to borrow the governor of Kansas for a few days for its road campaign, said Gov. Major of Missouri to Gov. Hodges of Kansas. "The Kansas governor will be glad to come if you have a pair of overalls that will fit and if you will let him work," replied Gov. Hodges. "We'll have the overalls," Gov. Major replied, "and you will have to work some if you lo as much as the Missouri governor ntends to do." "That challenge is ccepted," returned Gov. Hodges.

Vegro Executed for Killing His Wife.

Dallas, Tex.-Floyd Stanton, a negro, was hanged in the Dallas county ail Friday for the murder of his wife, Naomi Stanton, which occurred in Dallas last December. Stanton was convicted within a short time after the shooting and the court of criminal ppeals affirmed the verdict of death. The pardon board recommended commutation of the sentence, but Gov. Colquitt declined to interfere, and Stanton paid the penalty of his crime, which be confessed on the gallows

Property owners of Bullard will vote on a \$30,000 road bond issue Aug. 28.

Uncle Sam has just established twi new postoffices in Webb county. They are Dolores and Joyce.

The \$250,000 road bond issue vote! on by property owners of Montgom ery county carried unanimously.

Receipts for the Dallas postoffice

for July were \$73,218.18. For July 1912, the receipts were \$67,231.80, the increase \$5.886.38, or about 9 per cent A directory company has just com pleted a census of Corsicana for a

new directory and finds that this city has within its corporate limits a tota population of 14,455. From statistics recently compiled there are 1,309 dwellings in Sulphur

Springs and 1,345 families, aggregat-

ing a total population of 6,720 living

within the corporate limits of the city.

The complete returns from the Williamson county prohibition election gives the following vote: For prohibition 2,473, against prohibition 2,820 Anti majority 383.

The report made by the railroad commission on freight revenue, passenger train revenue, other revenue, total operating revenue, operating expenses and income from operation of the Texas railroads for eleven months ending May 31, 1913, compared with same period last year, shows an increase in every sitem. The total operating revenue was \$107,457,497, increase \$13,127,209 or 13.92 per cent. Operating erpenses \$82,547,738, increase \$8,409,186 or 11.14 per cent. Income from operation \$24,909,758; increase \$4,718,023 or 23.37 per cent. Freight revenue \$74,097,056, increase \$9,649,343 or 14.97 per cent. Passenger train reevnue \$31,325,512, increase \$3,278,111.60 or 11.69 per cent. Other revenue \$2,034,927, increase \$199,754 or 10.88 per cent.

President C. E. Schaff of the Missouri, Kansas & Texas railway was asked what effect the recent action of the attorney general in instituting suit against his companies for penalties exceeding \$105,000,000 for alleged violation of the anti trust and general office statutes of Texas would have on his plans for developing the Missouri, Kansas & Texas Railway of Texas and its allied lines. He said that all work of improvement and extension would necessarily have to be suspended, as the officials and directors could not afford to take the responsibility of expending additional money for improving and extending railroad property in Texas in the face of the hostile attitude of the state administration manifested by this liti gation.

The state railroad commission of California has ordered reductions in the expres rates of Wells-Fargo & Company amounting to a cut of \$750, 000 from present annual revenues Every rate of the company in this state is abolished by the order, which is effective Oct. 1. The express company is ordered to operate six months on the commission rates, which are on the average, 15 per cent below those heretofore exacted, and then submit a statement of its earnings if it feels the rates not justified. At present the commission finds the company makes a net yearly profit of \$842,097 on a property valuation estimated at \$613,233, or 136 per cent on its investment.

Five men were fatally burned and 18 others dangerously hurt in a dust explosion at Jackson Hill No. 2 mine, near Hymera, Ind. It is believed the dust was fired by a windy shot. The mine property was heavily damaged.

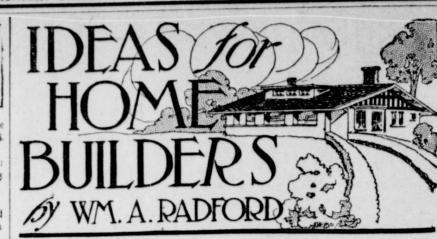

The mines of the Bridgeport Coal company are now operating full time after running only two-thirds of July The decrease in business last month is said to be due to light traffic on the roads that use this company's out put for fuel.

Prohibition election returns for the entire county of Midland are 184 for prohibition and 99 against prohibition Reports are all in. Midland gave 75 majority for the pros.

The late watermelon crop in the vicinity of Ballinger is fine and the market will continue to be supplied until frost. Farmers at this place shipped several carloads of the late melons to Las Vegas, N. M., a few days ago and the price received was \$1.25 per hundred pounds.

The peach crop at Mount Pleasant has been harvested and it brought about \$20,000 this season. The late

freeze cut the crop to about one-third. Building permits for Dalias in July were 170 in number and had a total valuation of \$806,250. In the number were permits for \$419,175 for 16 brick buildings, \$360,600 for 108 frame, \$25, 675 for 40 alterations and repairs and \$800 for six outbuildings. For July 1912, there were 178 permits and the total valuation was \$347,700. The increase was \$458,550, or 132 per cent

On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority all these subjects. Address all inquiries to William A. Radford, No. 178 West Jackson boulevard, Chicago, Ill., and only enclose two-cent stamp for reply.

An eight-room, full two-story house, with a splendid cellar and a good attic, is what every large family needs. There are a great many different styles of eight-roomed houses. Eight rooms seem to be about the size required by business men in the smaller towns and country places.

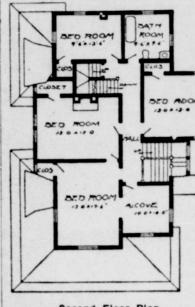

A great many farmers are now building new houses. Farmers have been prosperous of late, and they are using considerable money in building. A farmer likes to have a house look well, and to have conveniences for doing the work; that is, live, up-todate farmers do. There are plenty of the other kind, but they are not building houses like this.

This house is about as large as necessary on the average farm. It is about as large as a furnace will heat economically, being 35 feet in width by 49 in length, exclusive of porches. The stairway to the attic is closed so that no heat is wasted in that direction. A hot-air furnace is the best means of heating up a house of this rize. Anything larger should have hot water or steam. There is a great advantage in hot air, from the fact that it furnishes ventilation: most houses in the country are shy on ventilation.

Members of farmers' families in some rural districts are more subject to lung diseases and pulmonary troubles than the inhabitants of towns cially well with a good farm that is or cities. Physicians in country places say harsh things about some farmers. claiming that the prevalence of consumption in rural districts is due to living in houses without proper ventilation and heating; also that the extra burden thrown upon females by want of conveniences for doing housework is a contributing factor. They name farmers who are very careful of their horses and cattle, but very

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this subject of building, for the readers of this animals. The first consideration animals. The first consideration should be bestowed on the house, and the barns should be a close second. Water supply, heat, ventilation, drainage, plumbing, laundry arrangements, bathroom facilities, disposal of sewage and garbage, and ventilation of the cellar, are very important topics for consideration. They make for health; but, when neglected, they often lead to disease.

> The verandas on this house are especially attractive when it is built in the country. They give an air of

Second Floor Plan.

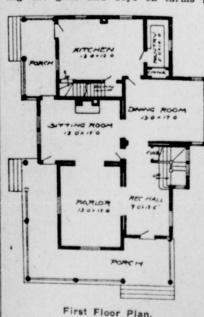

ease and refinement which goes espeproperly managed. The front veranda for hammocks and easy chairs, with a porch parlor for callers in the summertime, is just right. The side porch, having a door from the kitchen and another from the sitting room, makes a splendid work room for hot weather, while the sitting room projection makes sufficient division between porches.

The back stair in this house reaches

neglectful of wife and daughters. from the cellar to the attic, one flight They are even bold enough to say over another all the way up-an ar that the first care with such men rangement that is convenient and

kitchen, and to sleep in bedrooms that tank, when properly constructed, is are not heated. The result is that just as good as a city sewer, and it is they spend the night in close rooms no more trouble. What is known as with the windows shut in order to the septic system of sewage disposal was tried out theoretically, scientifical-Some of these physicians claim that ly, and practically in England years there would be no difficulty in keep ago. It consists of two tanks—the first as nearly air-tight as possible. The liquid from this is siphoned into the second tank automatically when it fills up to a certain point. Two kinds of bacteria are known to work in the two tanks. The kind in the first tank require but little air; the kind in the second tank do better work when no light but plenty of air is admitted. These bacteria destroy the solids in the sewage. A peculiar feature about this system is the fact that the solids, even greases, are reduced to a harmless deposit in the form of scum on the top of the water, with a precipitate in the bottom; and the amount of scum and precipitate does not increase but re mains the same month after month. It is not definitely known what becomes of the additional amount added each year. It disappears as if by magic.

The septic tank system is not necessarily expensive. Two round holes in the ground six feet in diameter each, and six feet deep, are sufficient to take care of the sewage from a large house. These underground tanks may be made of cement, these accusations. Most of us are and should be connected with a siacquainted with farmers who are very phon at least three inches in diamquick to invest in the best machin- eter. This siphon is a simple affair, ery, and plenty of it, for the purpose and may consist of a U-shaped pipe, of relieving their own end of the the outlet of which should be three work, but who are very niggardly in or four inches lower than the inlet veniences. It is all right, of course, ond tank is clear, colorless, and alto pay a great deal of attention to most pure water.

I as they were before the first white men pushed r: "Not less than eight inches, their way across the plains to the further ocean. d nine would be better." You can the wild things of that early wilderness still find

Acustomed to think of Montana as a state of cattle ranges, big wheat crops, and the home of copper, we know nothing of this part of it-this land of delight. Yet we, in common with some of land that is full of weeds 40,000,000 of other Americans, are its owners. Congress, in one of its moments of wisdom two years ago, set it aside as a national possession to be, as Chief Two Guns said, "a playground for thing in the spring. This disking all the people, rich and poor, white and Indian,

> It is now Glacier National park, and there are some 1,400 square miles within its borders. You may roam through it for a month and never tread the same ground twice.

> It was by pony travel that a party of eastern tenderfeet, fresh from occupations in which exercise is at a discount and locomotion is mostly by street car, explored the park a few weeks ago. They emerged from a two weeks' exile, after some tribulation, hard as nails and healthy as savages. This dairy is a brief record of their experiences:

Two Medicine, Mont., Thursday

It is eight miles from the park gateway at Midvale to the first chalet at Two Medicine. But these are Montana miles, and as Old Philadelphia said, if they would only sell you land on the Montana measurement and let you resell it on the eastern scale it would be a mighty satisfactory transaction. The trail led over several small streams, and on through forests of pine and scrub oak. But always it led upward, a little nearer the snow-capped mountains inclosing the green ahead. The pace dropped to an easy walk, the horses' feet fell noiselessly upon the thick pine needles, and scarcely a sound disturbed the forest peace. Late afternoon came all too soon. A sudden turn in the trail brought into view a pretty log chalet beside a deep blue lake, the mountains coming down to its very edge. Smoke curled from the cook house chimney, suggesting good things to eat. The ponies broke into a

trot, and for the moment saddle soreness was forgotten. This was Two Medicine, the end of the first stage of our journey.

PLACID LAKE MEDERMOTT

Cutbank Camp, Friday. Leaving Two Medicine, we rode away in a golden morning. A light hoar frost sprinkled the grass. The sun was rolling a curtain of white mist upward from the violet sides of Rising Wolf

Upward the trail wound, the horses picking their way over fallen trees, now dipping into yeasty hollows, now climbing a slippery bank. One rode at an angle of 45 degrees forward and backward, alternately. The trees grew thinner and scrubbler-"Nature's stunted step-children," the official tenderfoot poet called them-and the trail steeper until we emerged aloft, almost at, the timber line. Presently we were riding in a flurry of snowflakes that hid mountain and valley. A cloud rift letting through a gleam of sunlight revealed our snow falling as rain in the valley

Noon came and luncheon. It was hardly more than four hours since breakfast, yet hungry eyes watched the preparations until at length was heard a call which for music grateful to the ear will never be equaled in the Metropolitan Opera

That call consists of four syllables-grace notes they might be called if this were any subject for mere frivolity. It runs like this:

"Co-ome an' git it!" It is the park summons to meals. The rush

follows

We "got it." and proceeded on our way newheartened, though the weather had still a new variation for us. The last section of the eighteen miles from Two Medicine was traversed through a heavy drizzle, and the going was heavy.

Lake St. Mary's, Saturday We had started from Cutbank in better trim than on the day before, and were riding more at east. Around the bend in the trail ahead swept a band of painted Indians, drums beating and eagle feathers streaming in the breeze. few paces from our leading file they reined in their ponies, formed line, and made guttural sounds of uncertain import. George Star, Blackfoot interpreter, trotted to the front

"Chief Two Guns," announced Mr. Starr, indicating a stalwart Indian in beaded buckskin and a chief's war bonnet. "Chief Jim White Calf," indicating another handsome Indian, "both sons of old man White Calf, dead now-great chief. They come to welcome you to park. Big Moon, medicine man." Mr. Big Moon nodded pleasantly. "For three days he makes medicine to have fine weather while you're in park."

The Narrows, Upper St. Mary's Lake,

Leaving the horses to be picked up later, we journeyed today by motor launch up St. Mary's lake to this point, where still a new phase of this western scenery presents itself. The lake narrows as you ascend, and the mountains come closer, becoming as it were on more intimate terms with humanity. Very near seemed their brown sides, banded with gray and black, and snow-covered summits, in the clear air. A tiny glacier in a narrow gulch led so close that you would expect to throw a stone upon its surface with ease. The guide said it was a full three miles away.

Lake McDermott, Wednesday. We have seen many beautiful sights, but the unanimous verdict on reaching camp tonight was that the day's ride had been the most beautiful ride of all; at which Tom Dawson, the veteran chief guide, only smiled. He is used to these tenderfoot raptures. "Why," he said, "you haven't seen anything to speak of yet. This is only the beginning."

Beautiful Lake Sherbourne was passed at a canter, for the tenderfeet by this time have become hardened to the saddle, and each rider's pany is his best friend. Toward evening we came upon a new and strange sight. By the remnants of a grass-grown stage road we reached a group of log houses, larger and more pretentious than most. The guide explained:

"This is Altyn, a dead town. It was built up by a copper mining prospect, but the prospect was only a pocket, and the pocket soon gave out. Then everybody went away. It has been deserted ten years.'

We left Altyn behind and in a few minutes were in quite a different spot. The Lake Mc. Dermott chalets are grouped about a waterfall, around which the mountains stand sentinel. Their summits as we saw them first were flushed with pink in the evening light, and inspired new adjectives of admiration, all too weak.

Lake McDermott, Friday. Yesterday we rode to Iceberg lake and saw our park in still another guise. We passed through a forest of giant Christmas trees with snow thick upon their branches and the whole world green beneath, then skirted the steepest mountains encountered in all our travel hitherto, climbed the famous Golden Stairs, and at last reached a valley where on three sides huge cliffs looked down upon a sapphire lake set in a sea of white. On one side a glacier centuries old moves an inch or so a year down the steep rocks, its waters feding the lake, whose surface is dotted with huge cakes of ice. The hottest day in August is cool at Iceberg lake, and finds the glacial fragments floating there as though it were early spring.

Today we traveled to still another beauty spot, Cracker lake, haunt of the big horn sheep, whose tracks here and there were seen upon the snow's smooth surface. Tomorrow we move onward to Lake McDonald and homeward.

Lake McDonald, Monday. Here on the park's western border, and by the side of the largest-many say the most beautiful of all its many lakes-we have spent our last day. Our exploration is at an end, for here the outside world makes itself felt again. Hobnailed boots and khaki, short skirt and sweater here meet the habiliments of civilization upon a com-

We said good-bye to our trusty ponies yesterday and today we tramped it to the Royal Gorge and waterfall, which are McDonald's chief beau-

Most of the folk who have been to the park are going back there. Our own west also has its

MIGHT LEARN FROM GERMAN)

Features of City Building in That Country America Would Do Well to Copy.

The writer recently heard an eloquent extemporaneous address by Mrs. Willoughby Rodman on features of European city building that was one of the most powerful pleas for the adoption of sane methods in street building and maintenance ever delivered in this city. In spite of this and the fact that Mrs. Rodman has talked on the some subjects to our city officials, not one of the latter has had the courage of even the common sense to advocate changes which cannot but appeal strongly to every hearer.

Still more does the pathos of the matter appeal to the writer, for in this department has many times appeared every recommendation, urged by Mrs. Rodman, based on her actual observation of the best solution of the several problems as seen in the noted cities of Europe. Several times have we stated the following: When a street in a German city is to be improved, a sewer (and nothing else) is placed beneath the surface of the street. Laterals are run to the curb or property line on every lot, whether a house stands on said lot or not. The street is then never torn up. All other public-utility services are placed under the sidewalks and are reached by a minimum amount of labor by digging from private property or the parkway. How much more sensible than our absolutely "fool way" of putting down a costly pavement this week and allowing any and every utility corporation to dig it up next week-Los Angeles Times.

PLANNING AN IDEAL SUBURB

Chicago Architect Announces Intention to Depart From Usual Geometrical Arrangement.

In his plan for the development of an ideal residence district within or near Chicago, Wilhelm Burnhardt, the Chicago architect, who won first prize in the City club's contests, discards geometrical arrangement. Flowing lines and irregular boulevards characterize his plan; trees and shrubs are to be used freely. It is an attempt to get away from the stiff and prosaic effect of straight lifes and has a precedent familiar to many Chicagoans in the suburb of Riverside, where winding streets were laid out at the founding of the town with happy effects.

Lovers of the picturesque lament the inartistic results of the gridiron plan which has been followed in most towns of the United States. Much of the charm of old world cities lies in their irregular streets, and in this country Boston is an example of similar effects. The curving street naturally finds its greatest use in a hilly country; on flat land the common impulse is to build all thoroughfares in straight lines. Utility, of course, seeks the shortest distance between any two points, and for this reason Mr. Burnhard believes his ideal residence district will not be marred by business traffic. Whether Chicagoans will take kindly to the plan is to be seen, but the City club and Mr. Burnhard are to be congratulated on its artistic features. As our civilization matures the truly artistic will be sought more and more by communities and individuals.-Chicago Record-

To Attract the Home Seeker.

Every city vies with its fellows to prove most attractive to desirable home-seekers. This class of residents is progressive or wealthy, or both. The growth and influence of all cities depends upon their success in adding such people to their population. Do you think bare, unsightly, unplanted streets will attract them? Certainly not. We are essentially a Mecca for tourists. The burning question is: Where will they leave the most money? It is said that tourists annually leave in Italy a sum of money greater than the interest upon the national debt. The great mass of visitors to Paris each year go there be cause it leads the world in civic art and beauty. Do our American cities enjoy such a reputation, or in any wise approach it? Will they ever do so? The whole exterior appearance of Paris closely approaches the ideal. When shall we make a beginning looking to similar results?

Garbage Cans on Lampposts.

Some 300 lampposts and telephone poles in the downtown district of Portland, Ore., have been utilized as standards for rubbish receptacles. All that is necessary to empty one of the cans is to unfasten a catch, which allows two semi-cylindrical sections to swing outward.

A conical cover is set around the post, about six inches above the mouth of the can, to prevent rain from entering. Fruit, papers, paper bags and like rubbish must be thrown into these receptacles, and persons littering the street with such things are liable to arrest.-Popular Mechanics.

Duluth to Plant Trees. Duluth will plant this year 4,000 trees in streets and parks.
