

The Miami Chief.

Vol. 17

MIAMI, Roberts County, TEXAS, Thursday, September 2, 1915.

No. 6

Over The Plains

The Canadian bridge contract was not let according to contract last week on account of a little hitch in selling the bonds. However they will receive their money today and will open the bids and let the contract at once.

Judge Humphries of Amarillo district court exchanged benches last week with Judge Willis of Canadian. Judge Willis being disqualified in some cases by reason of having been employed as council prior to his appointment.

The tax rate of Hemphill county this year will be \$1.98. This is the total county, school and state.

Mr. and Mrs. Flake Key of Hollis, Okla. are the proud possessors of quadruplets, all girls and several weeks old. This is the first instance on record where quadruplets were all girls. The father, Mother, and four children have been presented with two touring cars and near \$1,000 in money.

The Muncy murder case will be tried a Plainview this week. This case has attracted quite a bit of attention. Mrs. Muncy is charged with the murder of her husband. 208 special veniremen have been summoned for the jury.

The Hemphill county Grand Jury recently turned in 32 bills of indictment, 7 felonies and 25 misdemeanors.

The Shamrock public school has recently been designated as a high school of first class by the State Department of Education.

Shamrock is advertising for bids for a water works system which will be installed this fall.

A little child of Mr. and Mrs. Adkins of Higgins was bitten by a mad dog last week. The child was taken to Austin for Pasteur treatment.

It is reported that fourteen German families have purchased 4,000 acres of land in Lamb county. They recently lived in Canada, but owing to the Anti-German feeling there they left.

The corner stone of the new two story brick school building at White Deer will be laid there Saturday. A program will also be rendered.

Panhandle has recently organized a Panhandle State Fair or-

Baptist Association

The Canadian Baptist Association held its annual session here at the Presbyterian church last week.

Many visiting ministers of note were in attendance, among them being Dr. Ray of Ft. Worth Theological Seminary, Dr. Morgan of Goodnight college, Dr. Haily, pres. of Wayland Baptist College at Plainview, Rev. Robt. Pride of Higgins and Pastor Chas. A. Loveless, of Canadian.

There were also in attendance several prominent laymen, Dr. B.G. Lowery of Amarillo and Mr. Uzell of Canadian.

The association will meet next year at Ochiltree.

AUXILIARY

Annual meeting of the Women's Auxiliary was held in the parsonage Saturday, with a large attendance of visiting and home ladies present. The meeting proved very interesting and profitable to all. The reports read show the work to be growing wonderfully, as shown by number of new members and contributions being double that of last year.

The following officers were elected for the coming year.

Pres. Mrs. Anderson, of Canadian.

Vice pres. Mrs. Ellis Wells of Miami.

Sec. Mrs. Reynolds, Canadian.

Y.W.A. "Sanders"

Personal Service, Mrs. Pride of Canadian.

Sunbeam, Mrs. Grigsby of Ochiltree.

Program elsewhere

Contest Closes

The Piano contest put on by Locke Bros., J. A. Newman & Co. and B. Z. Williams closed Saturday night of last week. Saturday night the votes were counted which showed Miss Jannie Cooper 32,000 in the lead however the count was remade Monday which gave Miss Catherine Daughette first and Miss Cooper second. Mrs. T. L. Graham and Mrs. T. M. Cunningham were also close in the contest.

Organization for Carson county. The organization will see to having a fine exhibit at Amarillo this fall.

McLean is making another move for putting down another test well for oil or gas.

The Clarendon college almost bought the last issue of the News in advertising its educational features. They have a very fine school at Clarendon and are letting the world know it.

FOR SALE

Good baled Sudan hay, also barley and speltz. Call or write. W. C. Christopher.

Wheat Seeding

We know that early preparation of land for wheat is advisable. Ground that has been well plowed or listed in July or early August, and properly cared for after that time will show a better yield than land prepared later. August plowing is better than what is done in September. Ground prepared after Sept. 1 must be worked shallow, and it will likely not make as good a yield as that plowed earlier. The land prepared late should be well packed with a sub surface packer. If no packer can be obtained, two or more times over the land after plowing will do much good. This will firm the ground and wheat ground must have a firm seed bed.

SEEDING TIME

The time for seeding wheat must vary according to season and location. For northwest Texas, late sowing has proven better, time being from Oct. 1 to Nov. 1 depending on season. Up to Dec. 1 often produces good result.

GOOD SEED

Too much cannot be said in favor of good seed. For northwest Texas 30 pounds of seed per acre is sufficient if sowed in well prepared ground and 25 pounds is usually enough. We must give the wheat a chance to stool, which it cannot do if sown too thickly. Much wheat this fall will likely be mixed and of an inferior quality. Turkey Red and Kharkof will be found as good varieties as may be obtained for our conditions.

TREATMENT FOR SMUT
It is a good plan to treat all seed wheat for smut, whether the seed appears to be free from it or not. The "Formalin Treatment" as set out in the following is the most reliable.

Secure a 40 per cent solution of formalin at the drug store. 1 pound of this formalin mixed with 40 gal of water is sufficient to treat from 2,000 to 2,500 lbs. of wheat. The seed may be treated by dipping or sprinkling. Today, the seed may be put in a gunny sack and submerged in the solution, the liquid being in a tank or barrel. The sack of wheat should be allowed to stay covered in the water at least ten minutes, after which it is taken up allowing the liquid to drain back into the tank for a short time. The seed should then be emptied onto a clean place and covered up with sacks for two hours then dried before sowing.

To sprinkle prepare a clean place on a canvas or floor, sprinkle the place before the seed is emptied on it. Now spread the wheat upon this place and sprinkle all over with the solution, turning it with a shovel so as to dampen it all. After this pile the wheat up and proceed as if dipped. Do not leave the seed wet too long as the germinating qualities may be injured.

Place the dried wheat into sacks that the seed has been dipped in and also sprinkle the drill with the solution before planting. Do not let the treated wheat come in contact with wheat infested with smut. Do not treat wheat until near the time you sow it.

SOWING

Sow with a reliable grain drill and cover with a press wheel attachment if possible. The press wheel firms the ground above and immediately around the seed, and insures a better stand. If the press wheel cannot be had, a roller will do a great deal of good if used immediately af-

District Court

The Honorable District Court of Roberts county will meet on Monday of next week, September 5th. Following is a list of Jurymen for the term.

Following is a list of new cases filed since the last term of District Court.

Thos. R. Gray vs Alletha Jane Gray, divorce.
Thos. F. Moody vs Thos. Cook et al, Trespass to try title.
Dorothy Berghern Tandy vs Wm. E. Tandy, divorce.
Bank of Miami vs J. H. Flemings, suit on note.
Ex Parte vs Geo. M. Black, a minor, application for removal of disabilities.
C. Coffee vs R. D. Lowery, trespass to try title.

Have just received a fine line of wall paper samples. The very latest patterns and shades. Can also furnish a first-class man to put the paper on. Prices right.

Red Minor

After the drill, the roller must be followed at once with a common harrow. The seed should be sowed deep enough to come in contact with the moist soil, but this should not be over 2 to 4 in. Wheat can be sowed deeper in a sandy soil than in a tight soil.

WHEAT ACREAGE

It is far better to sow a small acreage and do the work rightly than to sow twice as many acres on ground that has been half prepared. We cannot afford to "Hog In" our wheat.

Uncle Zeke

Ambition To Help Wife

Uncle Zeke came to the post office rather early Friday morning, got his Star, a letter from President Wilson, a card from Congressman Ruby and a catalogue advertising the latest sanitary preparation for cuspidors and removing candidate cards from windows and show cases within ten days after the poles close. Thus he piked out for home without stopping to tell Will Anderson it was a hot day or asking Uncle Bill Burks if it was going to rain.

Mrs. Ribbons had just returned from feeding the chickens, setting a hen and plugging up a rat hole in the henery when Uncle Zeke came home. She was so surprised that she dropped an iron kettle on her sore corn, threw up her hands and almost swooned. Finally she recovered sufficient to say.

I just knowed eatin cowcumbers for breakfast would make you sick Ezekial and—

Who's sick madam?

Oh! my, I'm not going to scold so dont get alarmed, Mrs. Gorrrell says cowcumbers are not fit for any one no time, I—

Chunk your mouth, madam until I can have a word, I'm not sick, I just came home to—

Tell about an accident, broke in his wife, Who was it, any one hurt?

You must be off your bunion my dear, I came home to tell—

I knowed you'd get into a terrible rumpus with some of them candidates.

Darling, if you'll tie your tongue to the stop pipe for 13 seconds, I'll explain why I came home at this unusual hour, and you'll be the happiest woman in Pulaski county.

Oh he has a fortune came. Cut it out darling. Kindly crip your clatter, till I explain I came home to help you, to help the best woman in the world. You are getting old and should have more time to go to church and visit, and not work so hard.

That's awful nice of you, it's so hot and I have so much to do. I knowed you'd think of me. Now before you mow the lawn and go work the garden you can fix the screens, the flies are—

Hev, do what? Have I started a repair shop? Is it advertised in the Star? You must have spanish needles in your spit curls. What would the parson say if caught me smashing my finger nails with a rusty hammer. If I could lighten your garden work and help about the yard you should feel as happy as a jay bird.

But fixin the screen wont be half as hard hoeing in the garden and—

Hoeing the garden he said did you infer that I would risk my life and lower my reputation by hoeing in the garden. Far from it. I will—

You'll not cut weeds either, the sun is too hot, you'd better wait till—

Stop right there, roared Uncle Zeke, remember that you are talking to Ezekiel Ribbons and not to an ordinary day laborer. I think I know enough about science, mechanics and electricity to get rid of the pesky weeds and give the garden truck fresh soil without touching the hoe or resorting to the tiresome old method of pulling weeds. You should know that we are living in an age of progress and invention. I expect within a week to have an electrical contrivance completed, by which you or any other good woman can make fertilizer out of the weeds in our garden by simply pressing a button. By a simple twist of the wrist you can adjust the machine so as to stir the soil, hill the corn and mow the lawn while you are leaning over the back fence gossiping with a neighbor. While I am experimenting with my labor saving device, all the weed cutting and hoeing you do will encourage me. I should have thought of you sooner but—

At this point a candidate rapped on the door, and Uncle Zeke had to come to town to save his country regardless of everything else.

DESIGNED FOR PRACTICAL USE

Refrigerator Properly Placed Is The Most Important Part of the Home.

METHOD SHOWN IS OF VALUE

Built in Between the Kitchen, Pantry, and Rear Porch, Its Advantages Are Apparent—Whole House Has Arrangement That is Highly Attractive.

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only enclose two-cent stamp for reply.

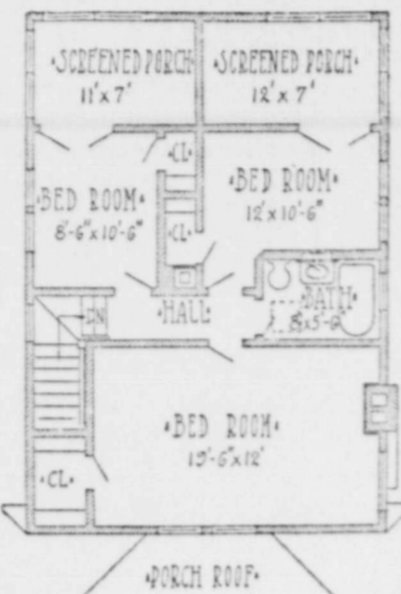

The fireplace, with its cheery, open fire, has often been called the heart of the home, but the refrigerator hidden away in some dark and dismal nook is just as important as the heart, at least. The location of the humble refrigerator and its construction should be as carefully worked out as the design of the fireplace.

Homes are generally all designed in much the same way. The design starts at the front of the house and the rooms are carefully laid out. The kitchen, however, is left to fill up any space that may be left and the result is often inconvenient and unsatisfactory. The business end of a house is one of the most important. Anyone who has worked in a kitchen that has everything arranged so that nothing is handy and that is too small to admit of any changes being made knows what a relief it is to have a well-arranged kitchen.

The house shown here is planned in

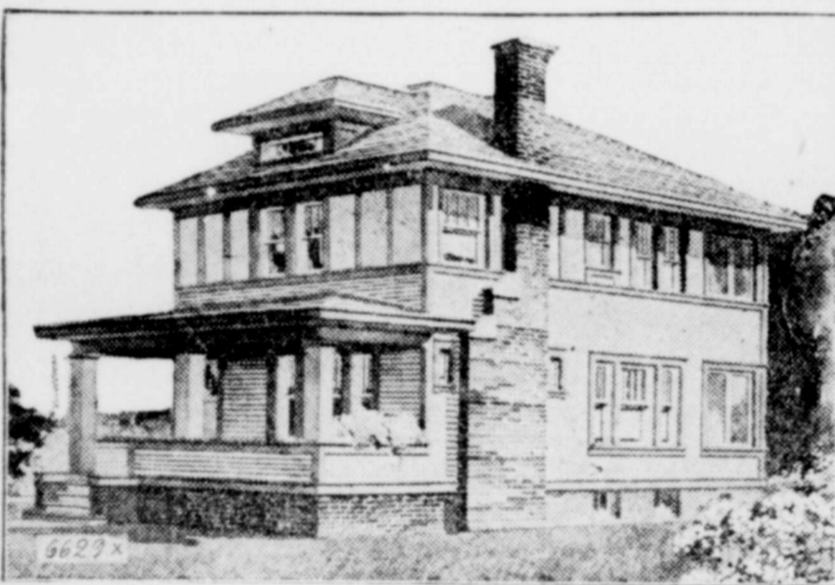

effect in this type of refrigerator is in the eliminating of winter ice bills. The outside icing door is left open in cold weather and the refrigerator is cooled without the use of any ice. Of course the same result can be attained by placing a refrigerator on the back porch, but the material that is stored can easily be taken by some stray prowler.

The rest of the house has not been neglected in this design, however, and presents a mighty attractive arrangement. The porches especially present a pleasant appearance. Across the front of the house is a broad veranda that will be used a lot in the summertime. Equipped with a porch swing and some porch furniture it would present an ideal spot. In back of the dining room is a cozy dining porch which resembles a sun parlor in many ways. Two sides of this little room

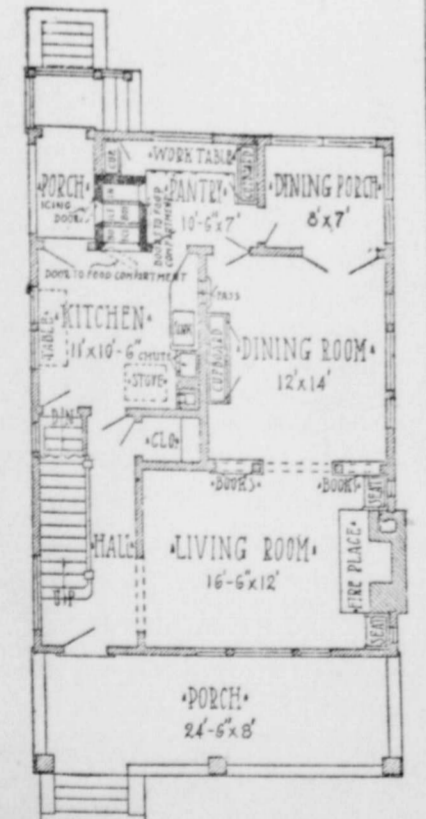

are taken up almost entirely by windows.

In many modern house designs the owners insist on sleeping porches, and this design supplies them. In the back of the house on the second floor are two screened porches so that all the household can sleep outside if they wish. Fresh air is one of the greatest tonics and health protectors that can be found anywhere, and there

just the opposite way from most houses. The kitchen and all its parts have received a great deal of attention, so that all the parts are readily accessible. The refrigerator has been specially planned and is a model of modern construction.

This refrigerator is built in between the kitchen, pantry, and rear porch. There are doors to the food compartment on both the kitchen and the pantry sides. The box is iced from the rear porch. Most ice boxes take up some valuable room, but this one is

filled into the partition so that a very small amount of space is wasted.

It would not be advisable for the builder to attempt to construct this refrigerator himself unless he has had some experience in this class of work. Refrigerator makers all over the country make special models that are finished "in the white" and can be set in place by the builder and then finished to harmonize with the rest of the woodwork.

The outside icing arrangement is one of the greatest improvements in modern refrigerators. The ice is not carried through the house, and thus the kitchen can be more easily kept clean. The greatest saving that is

is lots of it. All you have to do is help yourself.

The exterior of this house is very attractive. The foundation is of brick and also the chimney from the fireplace. From the foundation to the window sills on the second floor the house is finished in clapboards. From here up to the roof the finish is of paneled stucco. The windows are artistically placed and give a distinctive touch to the exterior.

The living room and the dining room on the first floor are connected by a colonnade and a cased opening so that a large unobstructed space is assured. Under the colonnade on each side of the opening is a bookcase. This presents an attractive way of using up space that is often wasted. In the end of the living room is a large brick fireplace. On each side of it is a small window with a seat underneath, making a pleasant, cozy little corner.

The second-floor plan calls for three bedrooms and a bathroom in addition to the two sleeping porches mentioned. Plenty of closet space is provided and the bedrooms are all of a good size. The one in the front part of the house is especially large.

Storage space is provided in the attic for the many things that are kept around the house that are not in use.

The whole design shows a real home that is designed for comfort and practical use.

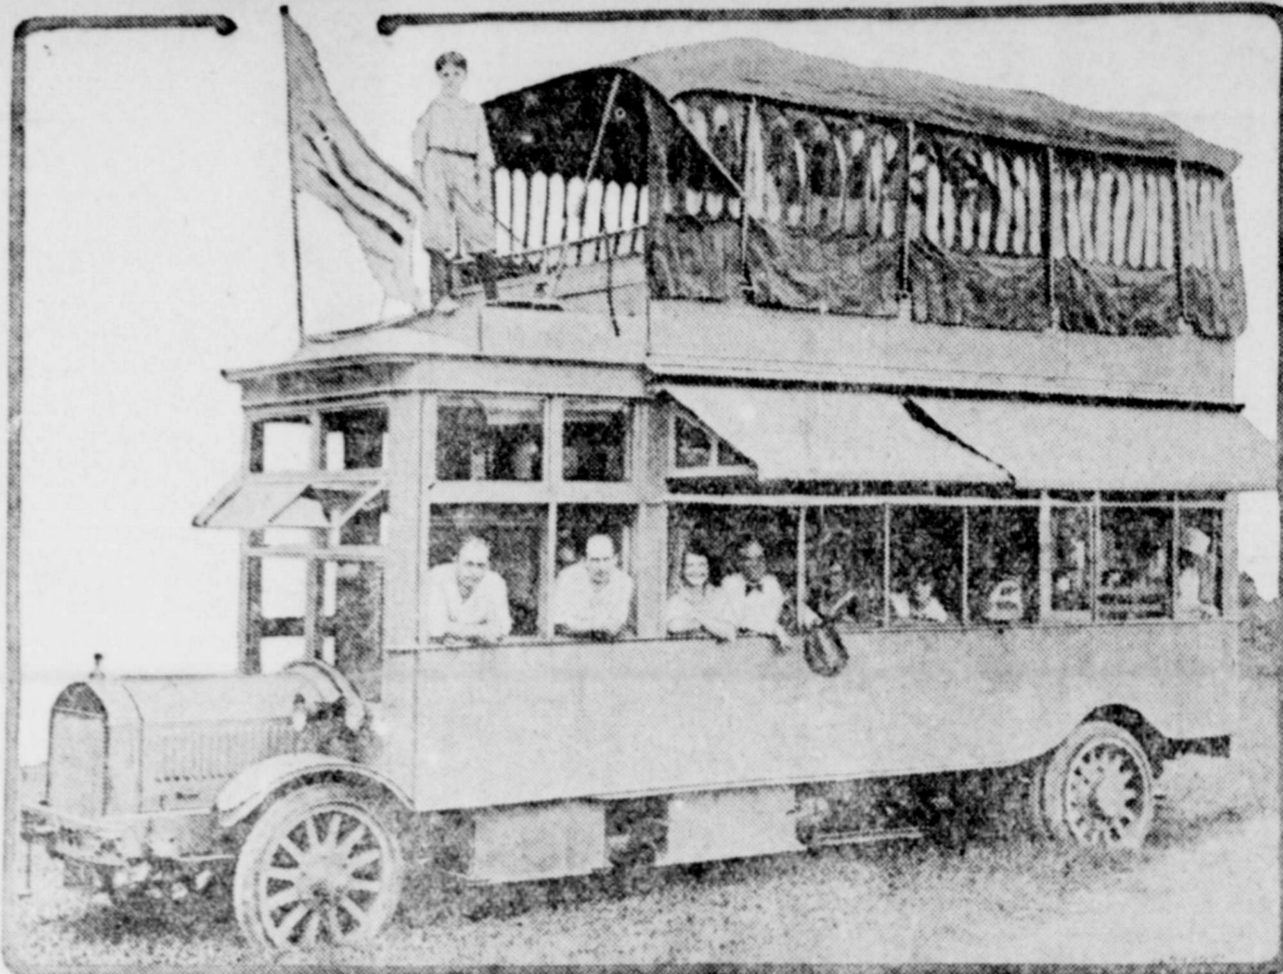

The Time to Act.

A correspondent wrote to the editor of a local paper as follows: "I have a horse that has been afflicted for the last year with periodical fits of dizziness. Please let me know what I should do with him, as he seems to get worse instead of better. I am afraid he will be unfit for work if something is not done soon." In the next issue this answer appeared: "When the horse is looking all right sell him to someone."

In the Malay Archipelago.

Java is the only one of the Dutch East Indies that has been fully opened and developed. Sumatra is being gradually exploited, and the unfriendly tribes brought under control, but Borneo and New Guinea—part of each of which is owned by the Dutch—and minor islands are as yet but little developed. The total area of the Dutch possessions in the Malay Archipelago is 729,992 square miles, while the population is 37,000,000.

LAND YACHT STARTS TO CROSS THE CONTINENT

This house on wheels was designed and built by Roland R. Conklin in order to take his family on a land yacht trip from his country estate in Huntington, Long Island, to the Panama-Pacific exposition in California. Every comfort of the party which is going on the transcontinental trip was taken into consideration, and there is even a roof garden atop the machine. The start on the long trip was made recently, and though the "yacht" was stuck in a Long Island ditch for 24 hours, it is proceeding merrily on its way. The party includes Mr. and Mrs. Conklin, their son and daughter, another girl, two nephews, two governesses, two chauffeurs and a cook.

TEXAS NEWS BRIEFS

The Dumont independent school district No. 1 carried a special school tax by a vote of 24 to 1.

F. H. Smith has installed an ice and refrigerating plant at Blankenship with a daily capacity of two tons.

Organization has been completed and stock subscribed for the building of a 1,000-bale warehouse in Emory. Work will begin at once.

Representatives of the British government bought 22 head of horses at Sherman last week. The sum of \$150 a head was paid for them.

A new oil mill, a new First Presbyterian church, a new brick dormitory for young ladies at Burleson college, the new Beckham hotel and numerous private residences are under construction in Greenville. Besides these, the construction of the concrete precinct roads is employing a large number of men.

Contracts have been let for new brick buildings at Munday and the material is on the ground for beginning work. Business conditions are better there than in the town's history. The city has voted \$10,000 in bonds for street improvements and as soon as the bonds are sold work will begin on the macadamizing of the main street from the Wichita Valley depot to and around the square.

The Galveston city hall assumed portions of a combined dairy and stock farm during the height of the storm last week and visitors to the building were amazed to see on the floors two calm-eyed representatives of the species bovine contentedly chewing away as they gazed innocently at the throngs of people who passed. Several horses also found shelter on the steps of the building.

The last shipment of steel to be used in the two huge agitators now being erected at the Magnolia refinery in Corsicana, has arrived and is being assembled and the work of refining oil will again begin at the big Magnolia plant at an early day. The plant has been closed down so far as refining is concerned since the fire that visited it a few months ago, the work of repairing and enlarging going steadily forward since.

The farmers of the Littlefield community met to discuss the most profitable way to dispose of the enormous crop that they will harvest this year. It was decided to fatten hogs and cattle for the markets, and each farmer agreed to feed a certain number of such stock, same to be purchased and shipped in there, fattened and then shipped to market. Over 500 hogs and many cattle will be required to fill the demand in that new and growing community. Recent rains have assured a very large yield of crops of all kinds.

The Texas Power and Light company has been doing considerable improving at the local plant in Brownwood. A big new Diesel engine is now being installed and will be ready for operation within two weeks. The Diesel engine installed some time ago gave a horsepower capacity of 1,000, and with the addition of the new engine now being installed it is planned the capacity of the plant will be large enough to accommodate the increasing business of the territory for some time. Additional extensions of the gas mains, which have just been completed, cost \$25,000 and give almost the entire city gas.

The big celebration of the opening of the Port of Houston, planned for last week has been postponed to some future date, the necessity for relief and repair work being uppermost and the most pressing consideration.

One thousand rounds of rifle ammunition was shipped from Corpus Christi to Ranger Captain Ransom at Harlingen. The shipment was made under orders from the adjutant general's department at Austin.

Capital Punishment.

There are seven states in the Union in which the maximum penalty for any crime is imprisonment for life—Maine, Rhode Island, Kansas, Michigan, Wisconsin, Minnesota and Washington.

In the form of electrocution capital punishment is executed in Massachusetts, Arkansas, Indiana, Kentucky, Nebraska, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina and Virginia.

Death is by hanging or shooting in the discretion of the condemned person in two states, Nevada and Utah; and the hangman uses the noose in the balance of the subdivisions of the Union, including Alaska, Hawaii, Porto Rico, and the District of Columbia, and, with the balance of the states, the three New England states not already named—Connecticut, New Hampshire and Vermont.

Many a woman without brains is able to fool a male highbrow.

The list of school lands coming on the market Sept. 1, containing approximately 1,000,000 acres has been printed by the land commissioner and copies are now ready for distribution.

Never in the history of the county has there been such growing enthusiasm shown regarding oil and gas prospects, as there is now shown around Dublin. Oil prospectors, experts and geologists are busy and oil rigs are coming into various sections of the country.

The city council of Vernon has awarded the contract for paving four blocks of Main street. A reinforced concrete material will be used and the approximate cost will be \$14,800.

Winnboro is to have another warehouse for storing cotton. This will make three warehouses and will very likely accommodate all cotton that will be stored there. The last one is to be built by the Winnboro Cotton Oil company and is to have a capacity of 1,000 bales or more.

Building Activity

The old Baptist church has been removed and work started this week on the erection of the new one, which will be completed as soon as possible. It will be 60x80 and cost \$6,000.

The remodeling of the Survan Hotel is nearing completion this week. The building is very much improved and looks splendid.

The Fitch Hotel remodeling has been completed and the new improvements add materially to the effects of the interior and makes things much more convenient.

Mrs. Halls new residence is going up very rapidly and will be a very nice place when completed.

The new concrete sidewalk on South Broadway is going in in a hurry.

**The Revival Meeting
Closed**

Rev. Thompson closed a very successful meeting at the Methodist church Sunday night. About twenty were added to the church and much other good was accomplished. He and his singer went to Claude where they conduct a meeting this week.

School Opens Sept. 20

The Miami Public School will open this years session on Monday Sept. 20. This school year promises to be a good one, and a very able set of teachers have been secured. This school this year have added some new features and some new lines that will be carried out

Green Lake Items

Harve Patton and wife went to Miami Wednesday.

W. F. Patton was out to his place Thursday.

H. Hoskins and wife were Miami visitors Thursday.

W. W. Davis and Mr. Jones Seitz were out in this country Thursday.

Mrs. Ivy Purley is in Miami this week.

Polk Osborne was a business visitor to Pampa Friday. Tas Crowson and family have moved on to the Byron Williams place.

The young folks had a nice dance at Thornburgs Friday night, all report a splendid time.

Mr. and Mrs. Wiley are on a two weeks visit to N.M.

**H. J. Newman & Co.
Busy**

H. J. Newman and Company one of our live real estate firms have been very busy lately. Mr Newman reports the following sales closed.

W. L. Mathers farm on south plains to E. M. Gilbert of Kans.

The Joe Hood farm on south plains to H. J. Harnley of Kans.

C. R. Cowan 400 calves to James Dobbs of Kansas.
375 calves of Richie Brown to Mr. Dobbs also.

150 calves of W. J. Tomms to James Dobbs

275 Will Sims calves to L. B. Cross of Miami.

Mr. Newman states that business is looking fine for future sales and that he expects to see many acres of Roberts and adjoining counties land change hands this year. He also now informs us that he has several buyers for small farms that he is unable to supply, and that he is receiving calls for city property in Miami.

School childrens eyes tested without charge. Walter Cook.

C. K. EARLE
At Chisums Garage

A. L. Muncy returned Saturday from a trip to Dallas. Mr. Muncy made quite a few new purchases for his store and has lots of nice things on display.

Mr. and Mrs. F. S. Walker of Amarillo visited at the Pulaski home Sunday. Mr. Walker is traveling auditor for the Santa Fe.

Dr. G. M. Powell was in from the South Plains Saturday with a big broad smile over his bounteous crop this year.

Dave Lard renewed for the Chief this week.

P. P. Corcoran of Mobeetie had us add his name to the Chief mailing list this week and will receive Roberts Counties official paper for a year. Mr. Corcoran has been in the Panhandle a long time, and has a fine ranch near Mobeetie. Mr. Corcoran came to the Panhandle when the prairie chicken would roost on the house tops and the jack rabbits bring up the cows of evening, and yet he says this is the Panhandles greatest crop year he has experienced.

Albert Wilde left Sunday morning for Mundy, Knox county where he went to attend the wedding of his brother's daughter, and also to visit a few days with his brother whom he has not seen for thirty years.

Mr. and Mrs. C. M. Hockett and E. M. McCracken came in Tuesday from Enid Oklahoma where they were called last week on account of the serious illness of Mrs. Arthur Hockett. They report her condition improved to some extent. Mrs. McCracken will remain with her sister a few days.

Hornace Finch came in Monday and will spend the balance of the summer at Miami with his two brothers, Herman and Clarence.

I. W. Whitelaw was stricken with paralysis Monday while visiting his daughter Mrs. M. W. Sullivan in Miami. He has improved some at present writings and will likely be up soon.

H. L. L. Anderson of Trinidad, Col., came in this week to look after land holdings in Wheeler County.

Court Stenographer E. J. Pickens of Canadian spent Sunday in Miami with friends.

Mrs. Iola B. Lyons left for her home at Alva, Oklahoma after a weeks visit with her son in Miami.

Homer Black and Clarence Lyons are carrying sore fingers this week from the effects of a back fire on a gas engine.

Mrs. B. C. Rogers of Hoover visited at the parental Fletcher home yesterday.

John Dodson came in Monday from an extended trip over South-West Texas. Mr. Dodson reports things in a good condition over that part of the country.

Mrs. Reynolds and granddaughter Miss Ollie Baskin came in last week from a visit at Chillicothe. They went to Mobeetie Saturday.

Mrs. Watson of Pampa was a visitor at the parental H. P. Chisum home this week.

Mrs. Hammond and children left this week for Clovis, N. M., where the family will make their home.

Mrs. Bettie Daughette and son Rowland of Somerset, Ky., are here this week visiting at the G. R. Daughette home.

Miss Kate Daughette wishes to publicly thank the people who so ably assisted her in winning the piano in the contest that closed Saturday.

New Arrivals

Well, just stating it mildly, our store was never half so full of new goods as it is now.

FALL GOODS

We want you to sure call and see our new fall goods. They include Invisible Checks, Percals, Riced Worsted, New Serges, Fancy Silks, Outings and Fall Gingham in all the latest shades Blankets, quilts, baby blankets, Robes, etc.

New laces, embroideries, fancy neckwear and just oodles of ribbons. We give you full value for your money.

J. R. WEBSTER

GRAIN DRILLS

We have received a car load of the famous Van-Brunt wheat drills. They are ready for delivery. Come in and see them.

EMPIRE AUTOMOBILES

Are the best \$1000 car on the market. Glad to give you demonstration. \$1095.00 delivered.

ELLIOTT THE BLACK SMITH

Mrs. Clerrod of southern Texas is visiting at Homer Tolberts.

Dan Kivlehen, John Van and Clarence Harris left this morning by auto for the mountains of New Mexico where they will spend a few months hunting.

Emery Black and family left yesterday by auto for a trip to Tarrant county to visit relatives for a month. Frank Nowland has taken Mr. Blacks place at the Lumber yard.

Miss Fleda Osborn of Goldbusk came in this week and will spend the winter at the Henry Anderson home and go to school.

Contractor Minor is putting a nice addition on the Uncle Bob Talley residence, in the way of new rooms and porches.

A. B. McAfee and family returned yesterday from a trip by auto to Southern Texas, Colo., and N. M. Mr. McAfee says they had a splendid trip and saw lots of new country.

Clarence Locke and Clyde Mead came in yesterday from their trip to San Francisco. Earl Mead also went with them, but he returned via K. C. and has not reached home. The boys report a big time.

Mrs. J. W. Kirby of Dallas is visiting this week at the T. M. Cunningham home.

Judge Cunningham made the round trip to Amarillo yesterday in his new automobile.

John Dodson came in Monday from a trip over Southwest Texas. He reports things in good condition over that country.

Mrs. Hammond and children left this week for Clovis, N. M., where the family will make their home.

Mrs. Bob Sowers and daughter of Amarillo are visitors at the Dan Kivlehen home.

Mr. Coble, wife and son Emmett left yesterday for Canyon on a short visit.

W. E. Lutz this week purchased the H. H. Hoskins residence in Miami.

Diamonds

Nice selection of diamond rings this week, bring your catalogues and see if I dont beat their price.

New Sports Sweater for Fall

No outfit is quite complete in these days without a sweater of some sort. And there is a wide and varied choice in sweaters, for they are claiming more attention than ever before in their history.

There are finely woven sweaters of silk, in gay colors, which one sees at the afternoon concert, at the country club, on the beaches and the golf links, and in any other outdoor meetings of fashionables. There are sweaters considerably like them, made of artificial silk, usually in more vivid colorings than the all-silk variety. Then there are the practical wool sweaters, similar to that shown in the picture, and belonging to the same class.

The new models are carefully designed to the end that they may embody just the right style. In the example pictured here, for instance, it will be noticed that the sleeves are well shaped and finished with a cuff

and button. The patch pockets leave a turnover flap, and the new order of things in belts is recognized. The collar may be turned up close about the neck if required.

Because this is a sweater for real comfort in cool days it is rather heavy. Its usefulness begins with fall, and continues to the coming of another summer, for it reinforces the too light wrap in the depths of winter. It is an excellent model to choose for the young girl to wear to school during the autumn months, and nothing could be better designed or arranged for sports wear.

Sweaters of wool stand the rough handling which they are likely to get from young people, and continue to look none the worse for it. Now that they are made in beautiful colors and with so much attention to style, the field of their usefulness is wonderfully increased.

Three New Models for Fall

Of all things, millinery requires careful choosing, and, after it is bought, the hat requires careful placing on the head, if it is to fulfill its destiny. According to an old millinery maxim that destiny is to improve the appearance of the wearer. "You must look better with your hat than without it"—that is the exacting test to which each new model is to be subjected.

The three new models for fall, which appear here, are types that will repay a little study on the part of those who consider things before buying them. They include a small turban, a turban with extension crown which forms a halo brim, and one of the graceful wide-brimmed hats to which fashion is extending welcoming hands.

Quite a number of these wide-brimmed hats are shaped with brims turning upward at the back. This has brought in the underbrim trimming again and it is not confined to wide-brimmed shapes. Short, curling ostrich plumes fit into the trimming of the underbrim in the most graceful way.

The small turban is made of corded

silk, and would be equally effective in panne velvet. The material is covered with corded tucks and serves for the covering of the hat and for its trimming. The edges are finished with silver tinsel braid which has the effect of needlework. It looks like close-set overcast stitches, and needlework decoration is a feature of the new fall millinery.

The turban with extension crown is made of black velvet and white chiffon. A bead work ornament trims the front and is made entirely of white beads.

The soft and graceful brim of the third hat bespeaks for it, and for many others of the same character, first place in the favor of young women. It is made of velvet in black or one of the dark shades of fashionable colors. The trimming is of white fancy ostrich and looks like a bit of fireworks, done in frost. It throws its sprays in front of the eye of the wearer with an abandon unknown to ornaments hitherto. But it is strong in the knowledge that it is less in the way of vision than many a veil.

JULIA BOTTOMLEY.

NATIONAL CAPITAL AFFAIRS

Children Who Insist on Being Real Americans

WASHINGTON.—While the new "Americanization day" idea, for instilling the spirit and ideals of the United States into naturalized citizens, will undoubtedly appeal to many in Washington, a large number of the foreign-born of the city are already devoting much time and thought to becoming real Americans. Particularly is this true of the younger generation, which has no doubt suffered from appellations affixed to them by children born in this country because of their foreign descent.

The foreign-born children are "all Americans," despite their foreign origin. It is doubtful if the much-discussed hyphen will ever be attached to them. An incident which recently happened when a teacher of a kindergarten had her pupils out for a walk may give an understanding of this spirit. A woman approached the party and, pointing to a bright-appearing boy near the teacher, asked his nationality.

"He is Russian," replied the teacher. "No, I am not," quickly retorted the five-year-old; "I am American." "I did not mean you were Russian," explained the teacher. "I meant that your mother and father are Russians." "No, they are not, either. They are Americans, too," came back the answer, quickly.

Another incident may serve to show the diligence with which the foreign born are seeking to become "true Americans." A reporter in search of children who, he had heard, could speak three, four or five languages went to one of the schools.

The teacher in charge called to one of the pupils known to speak a number of languages:

"Annie, can't you say something in your native language?" she asked the child. Annie immediately became bashful and refused to say anything.

"What language do you speak?" the child was asked.

"I speak English," she answered.

"Yes, here at school. But what do you speak at home? What do mother and father speak?"

"Oh, they speak English, too," came back quickly. "They want to be American."

United States' Crusade Against Weight Frauds

AMERICAN consumers of print butter are paying more than \$8,000,000 each year for butter they do not get. This is because the weights of the commodity they actually receive are materially less than those they are supposed to be buying. Consumers of bulk butter that is weighed out over the counter are paying other real millions for imaginary fat that can never be cut with a knife or spread on a slice of bread. And buyers of potatoes, sugar, flour, meat, milk and all other foodstuffs that go to make up the American dietary are contributing additional millions, in the aggregate, for things that they never receive. In the virile language of the street, the American consumer is being flim-flamed and short-weighted; and in a large percentage of cases he—or usually she—is wholly ignorant of the fact.

It is because of the conditions of affairs of which these things are only samples that the division of weights and measures of the bureau of standards has directed many of its activities in recent years toward securing the enactment of better weights and measure laws by the federal government and the several states, and toward bringing about stricter enforcement of existing laws. Recognizing that the education of the consumer is a necessary prerequisite to better conditions the department has prepared a bulletin on household measurements that will be a popular treatise on the subject and which will put information in the hands of the housekeeper that can be made of the greatest usefulness and money value.

Training Good Cooks for Uncle Sam's Soldiers

OF late years—since 1906—the United States army has been no longer a mass of men who simply got food. They are now scientifically fed by men who have studied the subject, and in a practical way by presiding over ovens and stoves in schools. There are six training schools for army cooks, one being in each division of the country—San Francisco, Fort Riley, San Antonio, Philippine islands, Hawaii and in Washington. Soldiers who wish to take a course are allowed to enter for four months' study and at the end of that time the proficient ones are graduated.

The course consists of a thorough training in actual cooking and baking. The men are taught how to select good meat, the chemistry of food values, the testing of foodstuffs, the nutritive elements in vegetables and the chemistry of bread-baking.

In the big, sweet-smelling bakery at the Washington barracks there are to be seen every morning about a dozen husky fellows—for they take their lessons by small details—all engaged in mashing the dough in working machines, poking it into the huge oven or fishing it out at the end of a long wooden pole. As they bake the bread for the entire post, they use each day about two barrels of flour. The bread is delicious and fashioned of the purest ingredients.

The barracks kitchen is used for the preparation of most of the food, but there is also outside a "field kitchen," in which the cooking is virtually done in the open. The place is a simple shed, open all around, except that the sides are protected by wire screening. There are taught lessons in how to prepare an appetizing meal with the thermometer below zero or rising toward the top of the glass tube.

Experiments at the Government's Chicken Farm

THERE'S a sixty-acre poultry farm thirty minutes' ride from Washington, and beyond all doubt the work which is being done there would throw light upon at least one of the many problems which arise constantly to "stump" the chicken fancier, be he amateur or professional.

Whenever a local breeder of feathered stock is puzzled by a question of feeding, breeding or housing; whenever he is uncertain as to what strain of chickens had better be specialized upon to meet his particular need; whenever he would like to know how an expert would go about handling fowls with nothing more than the equipment expected of an ordinary, privately owned farm, it will pay him to look over this particular establishment. He will be more than welcome for you see, the farm in question belongs to Uncle Sam and is part of the Beltsville, Md., bureau of animal industry station.

In fact, the men who are running the big poultry establishment desire above all things to have chicken fanciers and breeders visit them and see the work they are doing.

Collateral with the feeding housing and breeding problems of ordinary poultry production, the Beltsville farm at present is the scene of a good many investigations which, when completed, are unquestionably destined to be of intense interest to the poultry dealer. One of them deals with an attempt to control the color of the yolks of eggs. Another is designed to disclose the ingredients of a ration based on staples easily obtained in any part of the country, which will produce the highest number of eggs possible.

10c Worth of DU PONT Will Clear \$1.00 Worth of Land

BOY HAD USED HIS BRAINS

Certainly Window Was Broken, But Also It Had Been Repaired, and What Then?

An iron hoop bounded through the area railings of a suburban house and played havoc with the kitchen window. The woman waited, anger in her eyes, for the appearance of the hoop's owner. Presently he came. "Please, I've broken your window," he said, "and here's father to mend it."

And sure enough, he was followed by a stolid-looking workman, who at once started to work, while the small boy took his hoop and ran off.

"That'll be four bits, ma'am," announced the glazier when the window was whole once more.

"Four bits!" gasped the woman. "But your little boy broke it—the little fellow with the hoop, you know. You're his father, aren't you?"

The stolid man shook his head.

"Don't know him from Adam," he said. "He came around to my place and told me his mother wanted her window fixed. You're his mother, aren't you?"

And the woman shook her head also.

Important Alaskan Product.

The potato is Alaska's most important crop, and, according to a commercial report, it is a most profitable one. Potatoes have been grown in commercial quantities at the Fairbanks station for several years. The object of growing them there was to demonstrate that good potatoes could be grown in the interior, and the report says that the farmers in the vicinity have taken the hint. Nearly all of them now devote considerable acreage to this vegetable. One farmer estimated his crop as high as fifty tons, which, at 4 cents a pound, or \$20 a ton, the lowest price at which potatoes have been sold in Alaska up to the present time, would bring him \$4,000. Hog raising has also been started at Fairbanks, the hogs being fed on the unmerchantable potatoes.

Interesting. "Have a good time at the seashore?" "Splendid. Every day a different man tried to teach me how to swim."

TOOK MUCH FOR GRANTED

Colored Porter May Have Been in Error as to Just What He Was Wanted to Hear.

Bert Winter, formerly in the law office of Gov. Samuel M. Ralston of Lebanon before Mr. Ralston became governor and now a deputy examiner of the state board of accounts and president of the Boone County Bank Home club at the statehouse, has just returned from a trip to the Panama-Pacific exposition and intermediate points, part of which he traversed as a member of the governor's party.

Out in the wilds of the Rocky mountains Bert said he wished his shoes shined and he called to the porter on the parlor car:

"Come here, George; I want to converse with you."

"I'll hear your conversion," replied the amiable George, as he hurried to the smoking compartment.—Indianapolis News.

Fine for 'Em.

"It's been a great year for the pessimists."

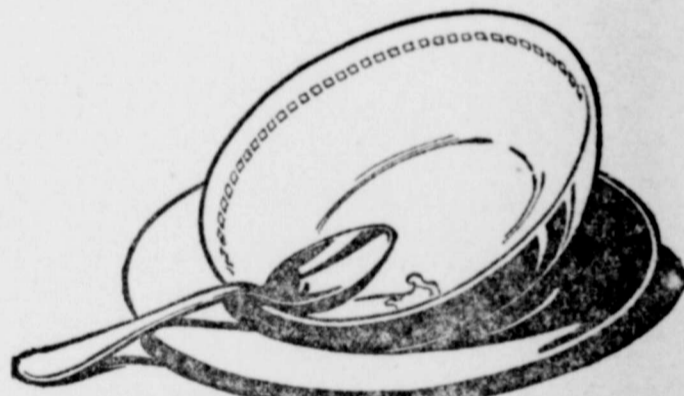

"In what way?"

"We've had rain almost every other day."—Detroit Free Press.

At the Beach.

Jack (jocosely)—Miss Plumpleigh is going to let me teach her to swim.

Tow—Yes; I taught her last year.

The Empty Bowl Tells the Story

The highest compliment you can pay a housewife is to eat heartily of the food that she places before you. It proves the merit of her cooking.

Thousands every morning receive complete satisfaction, and enjoy to the last flake their bowl of

Post Toasties

These daily compliments encouraged the continued bettering of these Superior Corn Flakes. The result was an improved Post Toasties—crisper and better than ever.

Only the inner sweet meats of choicest Indian Corn are used in making Post Toasties. These meaty bits of nourishment are cooked, rolled wafer thin, seasoned "just right" and toasted to an appetizing golden-brown.

The flakes come to you in dust-proof, germ-proof wax wrappers ready to serve direct from the package—crisp, fresh and delicious as when they leave the big ovens.

Post Toasties

—the Superior Corn Flakes

Sold by Grocers everywhere.

WINTER STORMS TO STOP TEUTONS

RUSSIANS RECALL THE FATE OF NAPOLEON WITH SOME SATISFACTION.

SNOW HAS ALREADY FALLEN

Continue to Make Life Miserable For Grand Duke Nicholas' Forces—Lipsk Has Fallen, Grodno Next in Line.

London, Aug. 21.—While the reports from the eastern war theater, embracing the region from Courland to southeastern Galicia, indicate that the Germans and Austrians are still pressing the Russians hard in combat or cautiously following them in retreat, military observers here are hoping that the approaching equinoctial season will limit the further forward movement of the Teutons and force them to be content with the fruits of their past successes as winter season falls upon them.

Both Berlin and Vienna lay emphasis on the statement that Field Marshal Von Hindenburg's forces, along the Dvina river in Courland have renewed their activities which were brought to a sudden halt recently with the success of the Russians in holding a narrow front at the mouth of the Dvina. In southwestern Russia in the Pripet region, the Austrians and Germans are chiefly concerned in driving Grand Duke Nicholas' armies farther into the Pripet marshes, especially with the purpose of repeating the early success of the Germans in the Mazurian Lake region of East Prussia.

To the northwest, in the section lying only a short distance to the east of the Prussian frontier, Berlin reports an advance of Teutons and capture of the town of Lipsk lying to the west of the fortress of Grodno, upon which the aims of the Germans are evidently centered. With the opening of the autumn months the military observers are directing attention to the fact that the Russian equinoctial storms are due to begin about September 21. They assert that they are the danger limit to military operations in the eastern theater. It is recalled by some of those observers that the autumnal equinox marked the turning point in the Russian campaign. The first warning of a light snow fall, preceding the snow but soon after heavy snow fell and with it came disaster to Napoleon.

DOUBT IN OR GET BUMPED

Washington, D. C., Aug. 21.—It was asserted authoritatively tonight that the next step in the Pan-American program for restoration of peace in Mexico was under consideration and would be taken in the near future, regardless of what might be the nature of General Carranza's belated reply to the offer of Secretary Lansing and Latin American diplomats to arrange for a conference of Mexican military and political leaders. No definite reply was given, however of what form this next development would be.

Responses from General Zapata and military advisers reached the state department today, accepting the offer of the Pan-American conference. With the receipt of these replies, Villa advisers in Washington whose leaders have responded favorably, asserted that a peace convention to form a provisional government in Mexico would be assured, even if Carranza would refuse to participate. Administration officials heard of this arrangement with interest, but said no arrangements for such a conference are now in prospect.

General Carranza's local agents declared today they expected the "first step" reply within a few days, at the latest. They think it will come as Carranza has completed the rehabilitation of his government at Mexico City. Eliseo Arredondo Carranza's confidential agent in Washington, issued a statement denying reports of a session in Carranza's forces and sending them to the Villa agent.

Reports to the state department from Mexico late in the day said the Villa forces had begun an attack upon Monterrey, the capital of Nuevo Leon, in possession of Carranza troops under General Trevino. The message said heavy fighting was in progress, but no details. Earlier reports to the Villa agency said Carranza's forces were calling in reinforcements to Monterrey from Tampico and other points.

Factory Workers Return.

Bridgeport, Conn., Aug. 21.—Many hundreds of factory workers who had gone on a strike recently returned to their accustomed tasks today, their differences with the employers over wages and compensation having been settled. In nearly every instance the workers have been entered upon the regular schedule without a reduction in wages. The largest delegation returned was that of upwards of 800 men at the Crown and Batchelor Corporation.

POINTERS FOR DRY SEASON

Water Consumption by Alfalfa Can Be Controlled to Some Extent by Grazing and Clipping.

The total consumption of water by alfalfa can be controlled to a considerable extent by pasturing or frequent clipping without serious injury to the plants, according to the United States department of Agriculture, Bulletin No. 228, "Effect of Frequent Cutting on the Water Requirements of Alfalfa and its Bearing on Pasture." With a limited amount of stored moisture in the ground often the greatest amount of alfalfa can be obtained by allowing the crop to grow when the water requirement is the lowest, in the fall or spring, and by keeping the leaf surface at a minimum during the summer through clipping or pasturing. The efficacy of thus conserving the moisture during the periods of drought has been observed many times.

Whenever the moisture supply falls short of the amount necessary to produce normal crops throughout the season, summer grazing appears to afford a simple and practical means of obtaining a return from alfalfa commensurate with the available moisture, and at the same time reduces the danger of drought injury. When the moisture supply is adequate for continuous crop production throughout the season, close pasturing or clipping would result in a marked reduction in the amount of alfalfa produced, in the opinion expressed in the bulletin.

When grazing is practiced greater production can be secured by intermittent grazing; that is, by employing several fields which are pastured in rotation. Summer pasturing with alfalfa is extensively adopted in Australia, and the combined system of hay and pasturing has found much favor in New South Wales. It is carried out in the rolling-plains country on loam or sandy soils where there is no possibility of subirrigation.

NECESSITY FOR DUST MULCH

Reduction of Loss of Water Through Surface Evaporation Can Be Economically Accomplished.

(By T. E. KEITT, South Carolina Experiment Station.)

The common field crops require from 300 to 500 pounds of water for each pound of dry matter grown, hence the necessity for reducing the loss of water through surface evaporation. This can be most economically accomplished by the maintenance of a dust mulch.

A perfectly dry dust mulch does not have to be very deep to be effective. In practice it is found that the breaking of the first two or three inches of surface soil forms an effective mulch, but sand mulches may be thinner than clay mulches. The mulch should be no deeper than is necessary for the reduction of evaporation to a minimum, for the top soil is generally richer than the lower soil and the thinner a mulch can be made and maintained effectively, the greater the root range of the plants.

The principle involved in the functioning of a dust mulch is that the capillary water is drawn from soil particle to soil particle by surface tension until it reaches the surface of the soil and is evaporated. The plowing and shoving of the surface to the depth already indicated, by means of a scrape or sweep, disturbs the arrangement of the soil particles and the disarranged particles "blanket" the surface and prevent the loss of moisture to any considerable extent.

It is necessary to renew the mulch as soon as possible after each rain because dampening rearranges the particles in such a way that capillarity will be re-established.

DOUBLE WORK BY SPREADER

While Harvest Is in Progress Wagon Is Available for Hauling Crops From the Fields.

Ordinarily the manure spreader is in use at seasons of the year when the field work is not demanding attention. While the harvest is in progress, it will be found idle; hence, it is available for other work.

In districts where field roots, such as mangels, sugar beets, or turnips are grown, the manure spreader may serve as a wagon in transferring the crop from the field to the root cellar or pit.

A simple adjustment will enable the operator to save considerable time, as well as the task of unloading with the aid of a shovel. The cylinder or spreader is first removed from the end of the box, and a suitable end board is set in place, the latter being held by an iron bar or rod.

When the load is taken to the cellar, the end board can be lifted out readily and the roots may be rolled into the trap door merely by putting on the crank which connects with the apron shaft and turning by hand until the entire lot has been discharged. It requires only a few moments to deliver the load.

If the farmer does not have wagons enough to move the crop readily, this difficulty may be overcome by following the suggestion which has been offered.

The General Says:

Know-why and know-how are essential to any success. Every one of us has to acknowledge that the same sort of military preparedness that fits a nation for its defense is the most effective principle in making an industry of any kind serviceable and profitable both to manufacturer and consumer.

This Great Roofing Organization Is Trained Like an Army

Three enormous mills—offered and manned by the best trained force ever enlisted in an industrial army—three huge factories that are run like clockwork. Military exactness in the securing and selection of raw material, and in every step from then on until the finished product is distributed and sold. Constant readiness—being prepared every minute for the work to be done the next—Right there you have your finger on the great, essential reasons for the unflinching satisfaction every user finds in

Certain-teed

ROOFING

This roofing certainly has no superior. It is the best roofing that can possibly be made and it is manufactured in and guaranteed by the largest Roofing and Building Paper Mills in the World. It is guaranteed 5 years; 2-ply, 10 years, and 3-ply, 15 years, and this guarantee means the minimum life of the roofing. Thousands of Certain-teed Roofs all over the country are outliving the period of the guarantee.

When the General first entered the field the cost of roofing was two or three times more than it is today and the quality was not as high as Certain-teed is today. By reason of his enormous output the General has not only been able to bring down the cost and selling price of roofing, but he has also been able to raise the quality to its maximum. Today every fifth roll of roofing sold bears the Certain-teed label.

Certain-teed roofing, shingles, wall boards, felts, building papers, etc., bearing the General's name, are sold by your local lumber or hardware dealer at very reasonable prices. Don't send your money away for these goods. Patronize your home dealer.

TROWER, CHASE & McCOUN

LIVE STOCK COM. CO.
LIVE STOCK EXCHANGE, KANSAS CITY, MO.

Got Himself Dinked.

"Why does the bride hate him?"
"He's one of those practical jokes whom everybody hates. The bride asked him to come over and try some of her biscuits."
"Didn't he go?"
"Yes, and took a hammer and a cold chisel with him."

CUTICURA SHAVING

Is Up-to-Date Shaving for Sensitive Skins. Trial Free.

Prepare razor. Dip brush in hot water and rub it on Cuticura Soap held in palm of hand. Then make lather on face and rub in for a moment with fingers. Make second lathering and shave. Rub bit of Cuticura Ointment over shaven parts (and on scalp if any dandruff or itching) and wash all off with Cuticura Soap and hot water, shampooing same time. One soap for all—shaving, shampooing, bathing and toilet. It's velvet for sensitive skins. No stinging. No germs. No waste of time or money. Free sample each, if you wish. Address postcard, "Cuticura, Dept. XY, Boston." Sold everywhere.—Adv.

Miraculous.

"The printing press is a wonderful invention."
"Indeed it is. In a few seconds it can convert a comparatively worthless piece of paper into a stock certificate that will sell for thousands of dollars."

Insured Against Loss.

No one ever doubts the curative powers of Hanford's Balsam after once using it for external ailments on man or beast. Countless unsolicited testimonials from users of this valuable remedy show what it has done for them, and the manufacturer's guarantee insures your satisfaction or the return of your money. Adv.

The Danger.

"Pa, a man's wife is his better half, isn't she?"
"We are told so, my son."
"Then, if a man marries twice there isn't anything left of him, is there?"

To Drive Out Malaria

And Build Up the System

Takes the Old Standard GROVE'S TASTELESS CHILL TONIC You know what you are taking as the formula is printed on every label showing it is Quinine and Iron in a tasteful form. The Quinine drives out malaria, the Iron builds up the system. 50 cents. Adv.

The frankness with which a seventeen-year-old girl says she's an old maid is only exceeding the frankness with which she denies it ten years later.

Sp up Moisture quickly.

No matter how wet the early season may have been, don't forget that July and August sun and winds will dry up the moisture most rapidly. Moisture fed to weeds in the cornfield could be made fine use of by the corn in those months.

SOME HINTS FOR BUILDERS

Great Care Should Be Taken in Selection of the Most Substantial Roofing Material.

If you were without preparation or plan, rudely placed in a wilderness, your first thought would be of food supply and your next of shelter, for these are the two most vital necessities of mankind. It is therefore natural that the best thought, and study are put upon these two essentials.

More forward steps have been taken in the building industry in the past fifteen years, as regards comfort, service and architectural beauty than in the fifty years previous.

Only in recent years has the handling of cement in building work been understood properly, and progress is still constantly being made with it. Modern hotels and office buildings are being equipped with sheet metal moldings and steel veneered doors. Nearly every important change in building construction is away from the fire hazard of wood.

One of the most significant developments of recent years is the crushed slate surfaced asphalt shingle which is, on new construction and old, rapidly supplanting the wooden article. There are many reasons for this. The slate surfaced shingles add beauty to any building—in fact, there is really no comparison from an architectural standpoint. Crushed slate of pleasing tints of red or green, is employed as a surfacing. The shingles are uniformly eight inches wide and are exposed four inches to the weather. No painting is necessary as the red or green crushed slate is natural and therefore cannot fade.

The purchaser, however, should guard himself against buying a slate surfaced shingle that is not guaranteed by a reliable and responsible manufacturer. There are so many kinds of roofing and shingles on the market today each claiming to be the best that it becomes necessary for the buyer to get some satisfactory assurance that the roofing or shingles are represented honestly.

Unpreparedness.

"Was that speech you delivered extemporaneous?"
"No," replied Senator Sorghum. "I had to read it from notes. I didn't have time to commit an extemporaneous speech to memory."

Beautiful, clear white clothes delight the laundress who uses Red Cross Ball Blue. All grocers. Adv.

No Insurance.

In a small town a restaurant proprietor who is a close observer of the table manners of some of his guests, has posted the following sign:
"Not responsible for Injuries Caused by Eating with Knives."

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Charles H. Fletcher*. In Use For Over 30 Years. Children Cry for Fletcher's Castoria

Gave Wifey Away.

"My house is so well organized," said Mrs. De Gaw, "that I don't go into my kitchen once in a week."
"That's the pleasant way she puts it," her husband explained. "As a matter of fact, she's afraid of her cook."

We know of no liniment that equals Hanford's Balsam in its healing properties. Adv.

An Involuntary Passenger.

"Pa, who was it that first rode in a submarine?"
"Jonah, my son."—Boston Transcript.

Keep Hanford's Balsam in the stable. Adv.

The old toper frequently gets away with more than he can carry.

Clear Title.

Uncle Mose aspired to the elective office of justice of the peace in the "black bottom" part of town. One bar there was to his preference. He could neither read nor write. His master advised him to go to the commissioner of elections and ask whether he was eligible. Mose went and returned.

What did he tell you, Mose?"

"It's all right, suh," answered Mose; "dat gen'lemun suttinly was kind, yeh suh. He tole me Ah was illegible fo' date office."

Smile, smile, beautiful clear white clothes, Red Cross Ball Blue, American made, therefore best. All grocers. Adv.

Some husbands look as if their wives had got them in exchange for trading stamps.

But a mother-in-law can lay down the law to a lawyer.

The art of bluffing lies in knowing when not to.

To cool burns use Hanford's Balsam. Adv.

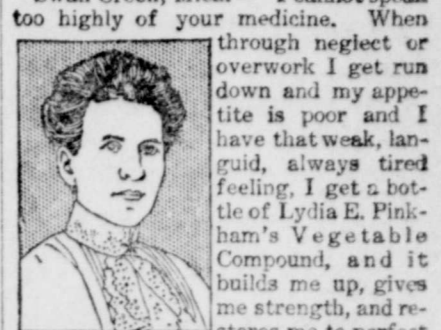

One little dimple has caused many a fall.

WOMEN WHO ARE ALWAYS TIRED

May Find Help in This Letter.

Swan Creek, Mich.—"I cannot speak too highly of your medicine. When through neglect or overwork I get run down and my appetite is poor and I have that weak, languid, always tired feeling, I get a bottle of Lydia E. Pinkham's Vegetable Compound, and it builds me up, gives me strength, and restores me to perfect health again. It is truly a great blessing to women, and I cannot speak too highly of it. I take pleasure in recommending it to others."—Mrs. ANNIE CAMERON, R.F.D., No. 1, Swan Creek, Michigan.

Another Sufferer Relieved.

Hebron, Me.—"Before taking your remedies I was all run down, discouraged and had female weakness. I took Lydia E. Pinkham's Vegetable Compound and used the Sanative Wash, and find today that I am an entirely new woman, ready and willing to do my housework now, where before taking your medicine it was a dread. I try to impress upon the minds of all ailing women I meet the benefits they can derive from your medicines."—Mrs. CHARLES ROWE, Kennebec, Maine.

If you want special advice write to Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

ADVICE TO THE AGED

Age brings infirmities, such as sluggish bowels, weak kidneys and torpid liver.

Tutt's Pills

Have a specific effect on these organs, stimulating the bowels, giving natural action, and imparting vigor to the whole system.

It is almost impossible for a woman to drive a nail, yet she is usually an expert with the hammer.

When a man has "wheels" he thinks he is the whole machine.

Be Warned in Time

Do you have backache? Are you tired and worn out? Feel dizzy, nervous and depressed? Are the kidney secretions irregular? Highly colored; contain sediment? Likely your kidneys are at fault. Weak kidneys give warning of distress. Heed the warning; don't delay—Use a tested kidney remedy. None so well-recommended as Doan's Kidney Pills. None so universally successful.

A Kansas Case

Mrs. I. A. Pierce of St. Phillips, Kan., says: "I was hardly able to get around on account of a constant pain in my kidneys and hips. I had awful dizzy spells and pains in my head, and my feet and hands were terribly swollen. I lost my ambition and I was all run down. Four boxes of Doan's Kidney Pills rid me of these ailments and I have felt fine ever since."

FOSTER-MILBURN CO., BUFFALO, N. Y.

Paxtine

A Soluble Antiseptic Powder to be dissolved in water as needed For Douches

In the local treatment of woman's ills, such as leucorrhoea and inflammation, hot douches of Paxtine are very efficacious. No woman who has ever used medicated douches will fail to appreciate the clean and healthy condition Paxtine produces and the prompt relief from soreness and discomfort which follows its use. This is because Paxtine possesses superior cleansing, disinfecting and healing properties.

For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been relieved say it is "worth its weight in gold." At druggists. Etc. large box or by mail. Sample free. The Paxton Toilet Co., Boston, Mass.

Electric Light Plants

For your ranch or residence.
Are you aware of the fact that you can now have your own Electric light plant, giving you the same dependable service that you would receive in the city.
The plants we are selling really do this. With one of our plants installed in your home you are freed from the fire danger that is always present with Acetyline or hollow wire gas systems.
Beside ever ready flow of light you have the current on tap for electric irons, Electric Sweepers, washing madhine, etc.
The first cost is lower than you expect, and the upkeep expense is nothing compared with other systems.
We have prepared a little booklet giving you information on the size plant to buy etc, we will be glad to mail you one of these or have one of our men call and see you.

See or call Harry A. Nelson if you want to buy a pure bread Percheron stallion. He has some good ones and can save you money.

Mr. Busy Man !

We know you are in a hurry, but just take a minute off and let us whisper in your ear something about our splendid printing facilities.

Our new equipment makes us able to do any class of printing you need, and we, above all things, keep the quality up. 15 years in the printshop is our record. When the Chief does your printing you can always be assured that is right. When you get too busy to come to the print shop, or don't know exactly how you want it printed, just phone us and we'll be right over to take the order or offer a suggestion on how it should be printed.

PRICES

Well, our prices are as low as anybody's. We compare price and quality with any print shop in Texas. We are in the printing business because we like it and not altogether for money. If Money was our God, we'd change occupation. We will make the price right.

It don't take always to get your work either when you give us your order. We usually deliver same day order is received. We want your business, and if quality, low prices and quick delivery is what you want, we're looking for you.
