A.M. JONES

which are grouped under the general description of "near-beer."

Then came Bevo-a cereal beverage, not a "near-beer," but offered purely for what it is-a delightful, wholesome and nutritious drink. Bevo met with instant and complete success. A whirlwind success.

Owing to Bevo's popularity, some beverages are now being offered in a way to make the appearance of the package look as much like the Bevo bottle as possible. The intention is obvious. But you don't taste the shape of a bottle -it's the flavor of the contents of the bottle that you must depend upon for

Then beware of impersonators-don't be satisfied to try to identify Bevo by the shape of the bottle alone -

There are these certain identification marks that are your protection against imitations. Not just imitations of the product, remember - but those more insinuating imitations which try to deceive you by putting an old failure into a bottle similar to a new success. So look for these unmistakable marks of the genuine Bevo-demand that the bottle be opened in front of you, then-

Look for the Seal See that it is unbroken covering the Crown Top

Be sure the Bottle bears this label

Bevo is a pure drink. This means more than that it contains pure ingredients-it means that though you might often well be afraid of possible germs in milk or water, Bevo, being a pasteurized prod-uct in sterilized bottles, is absolutely free from bacteria. Bevo is a nutritive beverage—the fine cereals from which it is made give it this quality.

Bevo is a delightful and refreshing soft drink—unlike any you have ever tasted—indeed a Triumph in Soft Drinks. You can't get these good qualities in anything but Bevo-demand

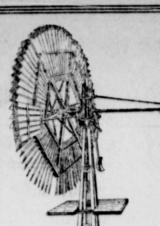

You will find Bevo at inns, cafeterias, restaurants, groceries, department and drug stores, soda fountains, dining cars, steamships, canteens, soldiers' homes, navy, and other places where refreshing beverages are sold. Your grocer will supply you by the case Bevo is sold in bottles only—and is bottled exclusively by

D MEXICO

NOVELIZED FROM THE PHO-TOPLAY SERIAL OF THE SAME NAME RELEASED BY THE UNIVERSAL FILM MAN-UFACTURING COMPANY

SYNOPSIS.

Liberty Horton, American heiress and owner of a large Mexican estate, is captured and held for ransom by Juan Lopez, a noted Mexican insurrecto. While in his camp she overhears a plan to attack an American town and army camp. She escapes with the aid of Pedro, a faithful servant, and while a rescuing party, headed by Major Winston, U. S. army, Capt. Robert Rutledge of the Texas Rangers, stop pursuit, she rides to warn the Americans, but is too late and the Mexicans attack. They are repulsed by American soldiers that night. Pancho Leon threatens the major with exposure of misappropriation of funds left in his care, unless he, Major Winston, forces Liberty to marry his son Manuel. The Major refuses. Liberty, who has heard the argument between Pancho and the Major, steps into the room, and to save the Major's honor, she agrees to marry Manuel. Rutledge prevents Pedro from killing Manuel. The marriage takes place. Major Winston, with Rutledge, leaves to Join the troops, who have in the meantime received orders to cross the line, and bring back, dead or alive, the parties responsible for the Discovery outrage. Manuel goes to Liberty's room that night and is watched by Therese. Liberty tells him that she is his wife in name only. As he is leaving, Therese attempts to kill Manuel. Pedro arrives at the hacienda in time to hear Therese telling Liberty that although she is Manuel's wife in the eyes of the law, in the eyes of God she (Therese) is his wife. Pedro confirms this statement. Manuel joins Lopez. Liberty makes a desperate effort to escape. Lopez attempts to blow up American troops at Lacinda, but the plan is foiled by Liberty. An aviator arrives at the camp of Major Winston with orders to stop the invasion pending negotiations. Rutledge goes to rescue Liberty, who, with Pedro, escapes into the desert. Major disobeys orders and goes to aid Bob, who with four troopers is surrounded in a hut. After escaping numerous perils in the canyon, Liberty and Pedro are made prisoners by Lopez, but they manage to escape. Pedr across his dead body. A Mexican detachment come upon the scene and find Liberty with the smoking revolver in her hand and take her to Chihuahua prison. In the meantime, Lopez and his band attack Major Winston's troopers and the Americans meet with disastrous defeat. Major Winston is wounded during the fighting. While the Mexican detachment is on its way to Chihuahua prison with Liberty they come across the unconscious figure of Pedro, who has been thrown from his horse while on his way to Winston's camp. He is made a prisoner and they take him along with Liberty. Bob. who has been held at bay by a band of insurrectos, manages to escape. Major Winston's troops are annihilated; the major, himself, being the only one left alive. Pedro and Liberty arrive at Chihuahua and are thrown into cells. Pedro makes a vicious effort to escape and kills one of the guards. He is overpowered and taken to the torture chamber. Liberty, who, in the meantime, is endeavoring to free herself, partially succeeds, only to find herself imprisoned in a subterranean chamber.

SIXTEENTH EPISODE

Court-Martialed.

Soon after Major Winston was is making land loans now at 8 . placed in the improvised grave by his brave and loyal comrades, he lapsed into unconsciousness, for he was seen the regular rate

SEE, PHONE OR WRITE HIM

Weak and ill from the loss of blood.
When he recovered seme hours later all was dark and silent about him. He slowly raised himself up and gazed out of his shelter. There, spread out on the sand of Diablo Pass, were the bodies of his faithful fighters.

> the contrary, he was considered one of the bravest men that ever shouldered a rifle, and it was his love of fighting that had won him his epaulets. . His record in the Civil war, where he fought under Sheridan, had won him distinction and the appointment of sergeant major. He came from a family of fighters, and, ever since he was old enough to understand the meaning of the word he loved to fight. When he Spanish-American war broke out he was one of the first to go back into service, although he was actually retired at the time. Fighting was his very life, and though he had been wounded many times, and his poor old body was fairly chipped with bullet marks, yet he considered it the greatest honor any man could have, and the greatest tribute he could pay his country and his flag.

> He had often said that a man had but two things to live for; one was his wife, and the other to fight for his country. Colonel Horton agreed with the Major in this, for there was no more courageous soldier than Liberty's father. The two veterans had been boys together, and had grown up in each other's friendship. They had enlisted together, suffered military hardships together, and, on more than one Civil war they had hunted Indians in

traversed the old Santa Fe highway alone, the Major and Colonel Horton had led the columns of troops which went in search of the terrible Apaches. and to them was given a great deal of the credit for routing these roving

During the years that had passed he had seen, and taken part in, some of the most important fighting in his country's history. He had known the tremendous joy which comes with victory and the depression which accompanies defeat. There had been battles from which he and his company had emerged without the loss of a single man. On the other hand there had been times when he led only a few, discouraged and disheartened men from the field; remnants of his company. But, never, during all his years as a soldier, until now, had he suffered such an overwhelming defeat. For, of the 200 men that had made up his little company, not a single one of them had survived the onslaught of these Mexicans, but himself. Never had he been called upon to send in such a report as the one he would have to give to Washington on the fight at Diablo Pass.

As he stared at the bodies of his troopers his mind seemed to become dazed. He wondered whether it was all a reality or the result of his wound. Perhaps he was still unconscious and was looking on this terrible scene in his dreams. Weak and haggard, from long nights and days of exposure in the open accompanied by lack of food; his courage gone; his heart heavy; he presented a picture of deep misery. And, as he gazed at the blood of the youths great tears came to his eyes, and he permitted them to roll down his burned cheeks. At that instant he would have given his life to have been able to save them. It seemed a travesty of war that he should be allowed to live and they to die. They were young men. many of them; men who were needed by their mothers, their wives, their sisters and their sweethearts. The world needed them to assist in carrying on its affairs, but, when a man reaches his age, there is little left for him to do. In the years that had gone he believed it the duty of every man, whether young or old, to be ready to surrender his life, at an instant's notice, for his country. But now as his eyes rested on the scene before him he wondered whether he was right. One drop of the blood that had flowed in the veins of these American youths was worth more than a hundred illiterate and degenerate Mexicans, like Lopez and his band, that had taken their lives.

These men had given their lives to a band of bandits and thieves; miserable cutthroats, who believed the world should support them without their having to work for it, and who

sought to accomplish this by inciting a rebellion in the hopes that they would finally obtain control of the government. Then the entire country of The Major was not a weak man, on Mexico would be in their hands to

treat as they saw fit. did not, then there was something wrong with that government, some- with hungry eyes at his procies

Believing he was acting for the best, of the body, the coyotes carefully the Major had taken his troops across drew nearer. the border. Later he had received in- At that moment a small group of structions from Washington to delay cavalry appeared three or four miles the invasion pending negotiations. He away on the edge of the desert. Slowhad disobeyed the orders because he ly they approached and found the unbelieved the debt that Pedro made the conscious form of the unfortunate manight of the Discovery outrage should for with his canteen in his hand, be paid in full, and the Major wanted which lay powerless in a small pool to assist in collecting that debt.

These men, whose bodies were now scattered before him, some of them torn and shattered and many disfigured beyond recognition, had believed it their duty to demand payment from Lopez and his band, and, when he had asked his company how many of them stood ready to follow him, every one of his men had stepped up.

True, they were young men, many of them, and they doubtless had wives, mothers, sisters and sweethearts at home waiting for their return. Perseized and murdered by Indians, if he haps the world did have need for them

their country had needed them, too, and, true Americans, all of them, they had unflinchingly gone forward to

avenge the wrongs that had been done to American men, women and children on the border. Instead, they had given their lives. But, out there in Diablo Pass, in the stillness of the night, surrounded by the dead, the Major made a solemn vow that the death of every one of his troopers would be avenged. Lopez would pay for this day's work, with his miserable life. and, unless the inevitable hand of fate prevented him, the Major would collect the debt and see to it that he was paid in full.

These thoughts and the disheartening spectacle before him, together with his wounds and long period of fasting. seemed to unbalance the mind of the brave man. He managed to pull himself out of the pit dug for him by his men and staggered to one of the bodies. He stooped and taking the canteen from the poor fellow, quenched his thirst. It refreshed him. But it did not ease his puzzled and tired brain. His wound pained him, and he was conscious of a peculiar feeling in his head. Strange objects seemed to appear before his gaze. They came quickly and departed as suddenly. Mysterious visions seemed to haunt him, as he stood there helpless and alone. It must be a sickness. Perhaps it was the fever. He had seen thousands of soldiers afflicted with this dreadful disease; he had seen hundreds die with it. Just then, he would have welcomed anything that would have relieved him from his pain.

For some time he stood there wondering in which direction to go. He knew the canyon; for had he not led his troops to this very spot? But, his memory slowly failed him, and, though he racked his poor fevered brain be was at a loss to know 'which way to turn. Finally, dazed and delirious, he wandered aimlessly into the desert.

The poor slave Pedro, who had been dragged to the torture chamber by the Mexicans, had been tortured almost to the point of death. One of the guards pressed a button, which released one of the huge blocks in the wall. They picked up his body and threw it through the aperture. It struck a large opening, and then slid down between the walls into a pool in an underground chamber. It was the room where Liberty was being held prisoner, and, just as Pedro's body struck the water, she was about to scoop up some of the water to quench her terrible thirst.

As the dark object struck the water she drew back in terror. Then, as it rose to the surface, she was startled as she recognized the slave. He was too injured to try to save himself. and Liberty rushed to his aid and dragged him out of the pool, and assisted him to his feet. But, the next

instant he fell in a heap on the ground. During this time, Rutledge and his comrades were out in the desert, searching for some signs of Winston's troops. The insurrectos had been completely fooled by the rangers, and it was some time after Bob and his companions escaped before they realized the futility of their fire. At first the Mexicans believed they had wiped out the remainder of Rutledge's men, for their shots were not returned from the mission. Finally one of their number was sent out to investigate. He approached the ruins under cover of the Mexican volley, and, as he neared the spot he dropped on his hands and knees and crawled cautiously up. Slowly he raised his head above the ruined walls. It was a desperate move, and he was taking a big chance of laving his head blown to pieces. But, as he peered over the top all was silent within, for, all that he saw was the bodies of the dead rangers, and Rutledge was not among

He hastily returned to his companions and informed them of the way in which they had been baffled by the Americans. They were enraged and the order was given immediately to start in pursuit. After searching for several hours for Bob and his men the insurrectos gave it up and returned to join Lopez and his band.

. The morning of the fourth day If the Mexicans were content to sit found the Major.still staggering on, his undisturbed and permit Lopez and his body wrecked and his mind shattered. bandits to rob and kill that was some. His canteen was empty, and in the thing which did not concern the United frantic efforts to find water he fell on States. But, when he crossed the the sands and began to dig with his border and trespassed on United States naked fingers. Slinking coyotes hovterritory, killed American citizens and ered about, while overhead the everrobbed and burned their homes, in ad- watchful buzzards circled. Finally dition to assaulting American women, from sheer exhaustion he stretched unit was time for the government at conscious where he fell. There he lay, Washington to intervene. And, if they impotent against the carrion-hunting greatures of land and air, which gazed form. Encouraged by the quietness

of water. One of the little party, which was Rutledge and his surviving rangers, maddened by thirst, plunged to the edge of the pool to drink, but the captain stopped him.

"My God, man, don't touch that water!" shouted Bob.

"I must," whispered the fellow in despair.

"It's a poisoned spring!" declared Rutledge. "It will finish you. Can't you see it's got him?" and he motioned to the prostrate form of the

DESTROY OR DRIVE AWAY CORN ENEMIES

Corn-Root Aphis-Winged Viviparous Female, Greatly Enlarged, and Antenna of Same, Highly Magnified.

(Prepared by the United States Depart- | next spring. The object is to repel ment of Agriculture.)

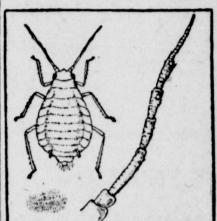

Since the corn-root aphis which attacks the roots of corn throughout the ing them from colonizing the aphids is not suspected because it passes ala small, stout, soft-bodied, whitish insect and may be seen in infested fields by pulling up an unhealthy corn plant which works in conjunction with this pest cares for the eggs of the aphis over winter and in the spring, when the eggs hatch, the young aphids are carried out and placed in contact with the roots of certain wild plants, such as smartweed. If corn is planted in such infested places, the ants transfer the aphids to the roots of the corn plants. The aphids sap the corn of its nourishment and often cause heavy loss to the crop. Measures of Destruction.

Timely cultivation and repellents are the best measures to destroy or drive away these enemies. It is too late to apply the plow-before-planting remedy, but plans well may be made for taking fall measures which will place the pest at a disadvantage next frequent deep disking in fields damaged by root aphids, is a good practice from the standpoint of community control, and also has its advantages to the individual farmer because the plowing disturbs the ant colonies, kills many of the aphids, and destroys the weeds upon which they live. The diskof ants and prevents the growth of aphid eggs.

Use of Repellents. used to advantage at planting time one acre.

states east of the Rocky mountains, is on the corn roots and driving them assisted in its destructive work by a from the treated fields. BIG IMPORTANCE OF SILO TO ANY FARMER

Economy in Feeding Will Be in Great Demand This Year-Silage Solves Problem.

The importance of the silo this year will be understood when we consider that under ordinary conditions the silo will save about 40 per cent of at will entitle him to master's de- corn crop used as silage. When we remember the value of feed and the corresponding value of cattle and sheep we will realize the saving by putting corn in the silo.

Every farmer that has cows, sheep, goats, beef cattle and other animals will need silage. And now is the time to prepare for the sile.

Of the silage crops corn is the best where corn is the surest and best crop. But where sorghum, milo, kafir or feterita are the surest and best they will be the crops to plant. In other words, the crop that will produce the greatest tonnage of the best silage will be the best crop for the silo. And any of the crops mentioned will make good silage if cut at the right stage of ripeness and properly packed in the silo will make fine feed.

Economy in feeding will be in great demand this year. To provide this an abundance of silage will be needed. With silage it will be an easy matter to winter cattle and sheep and a little silage for the work teams will be beneficial to them.

USE VETCH AND RYE TO KILL QUACK GRASS

Careful Tests Have Been Made by Officials of Wisconsin Seed

Inspection Department. Are any of your fields infected with

quack grass? If so, and the field is too large to summer fallow, there is still another way. "Vetch will fetch it."

well-drained soil immediately after the grain crop is harvested the first the work. One teaspoonful of paris but if you have a good, three- step will be taken in a process which has been tried and found effective in over the plants when the worms ap-

tions upon the use of winter rye and vetch in this connection are given by

"After the grain is harvested plow and thoroughly prepare the seedbed then sow rye and vetch at the rate of two bushels of the former and 20 to 30 pounds of the latter to the acre. Both the rye and vetch are quick to sprout and will come up before the quack grass gets a chance to recover. Winter vetch makes an abundant fall growth and covers the ground like a carpet. In the spring both the rye and vetch will resume growth at a rapid rate, until at corn planting time these crops will be from two to three feet high. Thereupon the rye and vetch can be turned under for green manure or cut for hay, and the land planted to a cultivated crop at once, with slight chances of quack grass making an appearance.

"Like clover and alfalfa, vetch is a legume and as such is valuable as a soil improver by means of the nitrogen it takes from the air and restores to the soil through its roots. Hence the vetch-rye treatment for quack grass can be recommended as doubly

SPRAYS TO CONTROL **PESTS ON CABBAGE**

Powdered Arsenate of Lead With Little Soap Added Is Recommended by Expert.

(By C. C. VINCENT, Department of Horticulture, Idaho University.) No doubt many gardeners have noticed the white butterfly with one or two black spots on the fore wings flying about the garden in close proximity to the cabbage plants. The eggs deposited by these insects hatch into the worms that eat the large holes in the cabbage leaves. The house wives have seen these snail-like pupae when removing the outer leaves from the cabbage.

By a little effort on our part, these worms can be held in check by using arsenical sprays. Powdered arsenate of lead one-half pound to 25 gallons of water, with a little soap added to By sowing winter rye and vetch on make the spray stick better, sprayed on the leaves of the cabbage will do green to one pint of flour, sprinkled pear, is also good.
