DAPHNE, AIDED AND ABETTED BY HER SISTER-IN-LAW. SUCCUMBS TO LURE OF THE SHOPS.

Synopsis .- Clay Wimburn, a young New Yorker on a visit to Cleveland, meets pretty Daphne Kip, whose brother is in the same office with Clay in Wall street. After a whirlwind courtship they become engaged. Clay buys an engagement ring on credit and returns to New York. Daphne agrees to an early marriage, and after extracting from her money-worried father what she regards as a sufficient sum of money for the purpose she goes to New York with her mother to buy her trousseau. Daphne's brother, Bayard, has just married and left for Europe with his bride, Leila. Daphne and her mother install themselves in Bayard's flat. Wimburn introduces Daphne and her mother to luxurious New York life. Daphne meets Tom Duane, man-abouttown, who seems greatly attracted by her. Daphne accidentally discovers that Clay is penniless, except for his salary. Bayard and his wife return to New York unexpectedly.

The desire to have a piece of land of one's own is a natural instinct i the heart of every properly developed man and woman. In earlier years, or account of the great areas of land available in the United States, no great difficulty was experienced by any an bitious settler who wished to becom his own landholder, but the rapid increase in population, combined with the corresponding rise in the price of land, has completely changed this co dition. Land which a generation ag might be had for homesteading, no commands prices ranging to \$100 at acre and over. At such prices it quite hopeless for the city man wit limited capital, to attempt to buy farm of his own. To pay for it h comes a lifelong task, and the prol ability is that he will never do mor than meet the interest charges. he is serious in his desires to secur a farm home he must look to cou tries where there is still abunda fertile land available at moderate co and where these lands are to be pu chased on terms which make it po sible for the settler with small cap tal to become a farm owner as t result of a few years' labor. He w also want land in a country who the practices of the people are sin lar to those to which he has been a customed; a country with the sa language, same religion, same gene habits of living, with laws, curren weights and measures, etc., based on t same principles as those with whi he is familiar. He wants a cour where he can buy land from \$20 \$40 an acre which will produce big or bigger crops as those he h an acre. He wants this land whe social conditions will be attractive himself and family, and where he c look forward with confidence to be in a few years independent, and v started on the road to financial s

He vowed that he would, and he meant it. She was a most missable creature.

He rose to leave, but she stopped him to say, "What play shall we see?" This was the occasion for elaborate debate till Bayard gave signs of trum-

Place de la Concorde. Gabriel, the architect, and an unnamed engineer of great imagination, constructed the pavilions and balustrades, laid the groundwork for the achievement in the middle of the eighteenth century. The equestrian figure of Louis XV. which stood in the square until the Revolution, was the work of Bouchardon. Pigalle, one of his contemporaries, surrounded this statue with figures emblematic of Strength, Wisdom, Justice and Peace. The square received its present form in 1854 from designs by Hittorf. The great statues of the cities were made by four famous French sculptors, each of whom did two figures. At the entrance to the Champs Elysees, which forms the western boundary of the place, are the famous "Horses of Marly," by Guillaume Couston, and at the eastern side at the entrance to the Garden of the Tuileries, are the "Renomees" of the horses.

arm and back, and very light on their feet. They are short-legged, but very fleet-footed and great jumpers. They begin to practice jumping as soon as they can walk. The favorite way of jumping is to spring up and kick with the toes of both feet and come down again on the feet. Many of them can in this way touch a point from 12 to 30 inches above their heads. In looks they resemble the Japanese far more than the Chinese, but they are lighter in complexion and very ruddyfaced. The girls and young women are good looking. Some are handsome. SAGE AND SULPHUR DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Color, Gloss and At. tractiveness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is mussy and troublesome. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, at a small cost.

Pon't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two your hair becomes beautifully dark, glossy and attractive .- Adv.

(Prepared by the United States Depart-ment of Agriculture.) Birds have such an important part in the courses of nature study given in most schools and colleges that more should be done to attract them to, school grounds or campuses.

Unfortunately the campus, like the park, has suffered from too formal landscape gardening. Cropped hedges Visiting Miss - Matter? Why, my are not inviting to the birds, and wooded campuses where formerly birds abounded have been so filled

with buildings, so gardened and formalized, that birds are now scarce, Some corner-preferably of original woodland and undergrowth if that still exists-should be set aside and allowed to run wild, as a bird sanctuary In addition to the help that birds give as protectors of trees and shrubbery against injurious insects they furnish, on school grounds, a distinct educational resource. There is scarcely an advanced school in the country that does not offer courses in bird study; and the study of birds out of doors is a necessary supplement to that in classroom and laboratory. For this reason the educational need should be kept in view by those in charge of college and school grounds. Plants which furnish bird foods should be added, nest boxes put up,

and winter feeding carried on as an interesting and instructive part of the work in bird-study classes. It is further suggested that the teacher of ornithology should be called in to advise in relation to the planning and treatment of the campus.

Those who are interested in attract. ing birds to public and semipublic reservations can get a publication devoted to this subject by writing to the United States department of agriculture at Washington for Bulletin 715.

VAN DYKE FOUNDS PRIZE

Annapolis, Md .- Dr. Henry Van Dyke, preacher and author, who has served as a chaplain in the navy during the war, has devoted the pay he has received for a year as a lieutenant commander to the establishment of a prize which will be given annually to the midshipman of the graduating class at the naval academy who writes the best essay on a patriotic subject. The amount will be devoted to the purchase of Liberty bonds, the income from which will pay for a suitably inscribed watch. This will be presented to the successful graduate at dress parade one evening of June week.

The winner of the prize will be determined by a committee composed of the heads of the departments of English, seamanship, electrical engineering and physics, and ordnance and gunnery.

Origin of Christmas Carols. Christmas carols originated in England in the time when mystery and morality plays were very popular, and

to set the stage properly for each act required quite a little time. The carols were what music between the acts of a play is to the American people, and to keep the audience from getting tired, the "walts" between the acts were filled in by companies of singers who came before the curtain and sang what to us today are the Christcords at the markets in mas carols. Gradually, to give them variety, dancing was introduced. All the Christmas carols were not religlous, however, in their character; some were love songs, while others were

convivial in their nature.

Opportunities for Returned Soldiers-Both Skilled and Unskilled Labor Required.

(Prepared by the United States Department of Agriculture.)

In response to requests for information, the bureau of public roads of the United States department of agriculture has collected from the highway departments of the various states figures indicating the profitable number of returned soldiers and sailors that can be used during 1919 in road construction and repair work. Of the 38 states replying only 29 gave definite figures. They report they can use 11,637 soldiers and sailors as skilled laborers, and 91,-904 as unskilled. (Prepared by the United States Depart-ment of Agriculture.) That it is possible to feed beef cows

in the corn belt more economically during the winter is snown by a report of United States department of agriculture investigators who made a study of winter feeding costs on five repre-

sentative farms in that section. This reduction in the cost of feeding is possible without detriment to the cows or calves through larger use of farm byproducts in the rations.

Avoid feeding excessively, avoid costly rations, use more cheap roughages. such as straw and corn stover, feed silage where conditions make it more economical than corn fodder.

The first farm used as an example is in east central Iowa. The breeding herd consisted of a grade bull and 22 grade cows, from which 20 calves, were obtained. The cows were given excessive amounts of high-priced feed for both of the years for which records were procured, says the bulletin.

They were turned on stalks November 15. Winter feeding began a few days later and lasted until May 1. when the cows were again turned on

pasture. During the 165-day interval each cow received the following: Stalks.....1 1-5 acres at \$1 an acre.

As the average yield of corn on this farm was 50 bushels to the acre, and as the best corn was cut for fodder, the cows, considering the corn in the fodder and the additional grain fed, received a total of 22 bushels per head. This is almost a fattening ration. If the corn had been husked from the fodder and only the stover fed, there would have been sufficient roughage for the cows. Estimating that three-200, unskilled 2,500; Minnesota, skilled fourths of a ton of stover was eaten per acre of stalks and that the stover from the fodder fed would go two tons to the acre, and allowing the cows. three bushels of corn each during the winter instead of 22, they would receive the following daily ration:

This ration would be sufficient for their needs.

By merely eliminating the excessive amount of corn (19 bushels) from the ration a saving of \$11.40 could have been made and the feed bill reduced very nearly one-half, or from \$24 to

\$12.60 per cow.

HURRY, MOTHER! REMOVE POI-SONS FROM LITTLE STOMACH, LIVER, BOWELS.

GIVE CALIFORNIA SYRUP OF FIGS AT ONCE IF BILIOUS OR

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels needs a gentle, thorough cleansing at once.

When peevish, cross, listless, pale, doesn't sleep, doesn't eat or act naturally, or is feverish, stomach sour, breath bad: has stomach-ache, sore throat, diarrhœa, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well, playful child again.

You needn't coax sick children to take this harmless "fruit laxative;" they love its delicious taste, and it always makes them feel splendid.

Weekly Health Talks What Is the Cause of Backache? BY DOCTOR CORNELL

Backache is perhaps the most common ailment from which women suffer. Rarely do you find anybody free from it. Sometimes the cause is obscure, but Dr. Pierce, of Buffalo, N. Y., a high medical authority, says the cause is very often a form of catarrh that settles in the delicate membranes of the feminine organs. When these organs are inflamed, the first symptom is backache, accompanied by bearing down sensations, weakness, unhealthy discharges, irregularity, painful periods, irritation, headache and a general run-down condition. Any woman in this condition is to be pitied, but pity does not cure. The trouble calls for Dr. Pierce's Favorite Prescription, which is a separate and stinct medicine for women

It is made of roots and herbs put up without alcohol or opiate of any kind, for Dr. Pierce uses nothing else in his pre-scription. Favorite Prescription is a natural remedy for women, for the vegetable growths of which it is made seem to have been intended by Nature for that very Thousands of girls and women, purpose. oung and old, have taken it, and thousands have written grateful letters to Dr. Pierce saying it made them well. In taking Favorite Prescription, it is reassuring to know that it goes straight to the cause of the trouble. There is but one way to overcome sickness, and that is to overcome the cause. That is precisely what Favor-

ite Prescription is intended to do. Send 10c for trial pkg. of Tablets, Address Invalids' Hotel, Buffalo, N. Y. Constipated women, as well as men, are advised by Dr. Pierce to take his Pleasant Pellets. They are just splendid for costiveness.

BRED in the war trenches of Europe, a wave of ordi-mary ITCH is spreading over the country. This skin disease, history shows, has always prevailed, following wars and the concentration of armies. It was common during the Civil War and following that conflict. There was an epidemic of the Itch after the Spanish-American War. Now history is repeating itself after the great European struggle.

Was an epidemic of the separation itself after the great War. Now history is repeating itself after the great European struggle. Returned soldiers and those with whom they come in contact will find a recognized remedy for the Itch in Hunt's Salve, commonly known as "Hunt's Itch Cure." Legislature Unanimously Urger Buying of War Savings Stamps

Wise spending, wise saving and the buying of War Savings Stamps is the financial program suggested by the present Legislature. In fact, a resolution was unanimously passed in both the Senate and the House in which the War Savings campaign is enthusiastically endorsed. Senator W. L. Dean of Huntsville and Representative C. F. Richards of Lockhart, presented the resolution.

"The importance of the War Savings Campaign is evidenced by this • action of the Legislature," said Frank M. Smith, Federal District Director for the Eleventh War Savings District. "Every War Savings Stamp bought means much more for the support of the Government. It also means that the investor is making of himself a better citizen and laying aside a reserve for emergencies."

The resolution on War Savings, passed by the Texas Legislature, follows:
