MIAMI, Roberts County, TEXAS, Thursday, JULY 24, 1919.

No. 56.

## ROSS PLANS TO EDUCATE PUBLIC THROUGH CHAUTAUQUA CIRCUIT

Place the public health on a plane that it has never been before by the American Red Cross as a part of its peace time plan. Nurses, returned from active duty, will tour the United States on a Chautauqua circuit, spreading the gospel of good health and the proper care of the sick by the study and practice of hygiene.

The Chautauqua an official representative of the Red Cross of Nursing will tell the story of the Southwestern Division of what is being done and their co-operation. All of the nurses have had actual experience abroad. Not only have they in hospitals and cared for the wounded, but they have been in constant touch with the repairs, the sick, the aged, and the tuberculous. Lectures of the nurses will be on five general topics, three of which are public health education in the home of the community. The first of these topics pleads for employment of a public health officer in every community. This will be carried on in cooperation with the State Board of Health and Education, the State Anti-Tuberculosis League and other State health organizations in communities where no such organizations exist. The Red Cross will furnish a nursing service, financed by public funds.

The second part of the nurses' message will be that of home hygiene and what contagion in the home. The importance of taking the course of education on these subjects, so that the general public will know how to protect themselves in the home, to keep the health of the family at the highest hygienic point, how to care for minor illness, and when sickness occurs, how to assist the physician and nurse.

## FACTS ABOUT THE GIGANTIC BRITISH AIRSHIP R-34

It is not generally known that the flight of the British Airship R-34 is an event of the greatest importance in establishing the possibilities of aviation for practical commercial and passenger-carrying purposes. It is the first Trans-Atlantic crossing by air from East to West. The other two, one by commander Read in the America NC-4 by way of the Azores in three "hops" and then the non-stop flight from Newfoundland to Ireland by Captain Alcock, were from West to East.

The dead weight of the airship is 30 tons, and when fully equipped for flight, except for gasoline, water, and oil, is sixty tons. Its length over all is 665 feet, height (over all) 92 feet, width 80 feet. It has 19 gas bags (not balloons) with a capacity of 2,300,000 cubic feet of gas. It is longer than the Singer Building is high. Five Sunbeam motors of 12 cylinders each supply the motive power. Magneto ignition is, of course, exclusively used because of its intense heat and absolute reliability. For this purpose two magnetos are used on each twelve-cylinder engine, that is, one magneto for each six cylinders or ten magnetos for the sixty cylinders which form the total power plant. The normal speed of the engine is 2100 revolutions per minute, each engine develops 275 horse power, or 1375 horse power in all.

This power was transmitted to the 5 propellers through clutch-and-gear mechanism, not by direct drive as is the case with airplanes.

It carried 30 officers and crew and one stowaway. The officers are: Major G. H. Scott, Commander; Major G. G. H. Cooke, Navigating Officer; Capt. Greenhard, first Officer; Lieut. Shutter, Engineering Officer; Lieut. Durrant, Wireless Officer; Capt. Harris, Meteorological Officer; Lieutenant Commander Zachary, Lansdowne, of the United States navy was on board, representing the United States Navy Department, by special invitation of the Royal Air Force of Great Britain.

The Royal Air Force of England is a separate governmental department composed of a combination of the Army and Navy Aviators, and many of them wear the naval uniforms in preference to others.

The 2050 sea miles from Ireland to Nova Scotia was traveled in 53 hours at an average speed of 35 miles per hour. Continuing 1080 miles further to New York, made the total non-stop distance 3130 miles.

The average speed for the full trip was 28 sea miles per hour. She arrived safely at Roosevelt Field, N. Y. July 6th, where she was anchored to large concrete blocks set in the ground by the United States Government, in preparation for her arrival. This work, including the service of 400 expert mechanics, cost \$110,000 in all.

The Royal Air Force requested that no airplanes be allowed in the air to escort it upon its arrival in this country. The reason for this request was that the flame of exhaust from the airplane might ignite some of the escaping gas from the airship and thereby cause fire or explosion.

## Cumberland Singers

### GRAND OPENING CONCERT FIRST DAY OF CHAUTAUQUA

Something that brings back old and pleasant memories is always welcome. There is something about the old familiar songs, particularly, that both the young and older people enjoy.

The Cumberland Singers in the first place are all good singers. Their voices blend beautifully and each member is also a soloist of much ability. Their program has been carefully chosen. The old familiar tunes predominate, yet a goodly number of the stirring, thrilling, patriotic songs are included. Their program ranges from selections from Faust, Maunders' "Olivet to Calvary," to the up-to-date musical comedies; from such old favorites as "My Maryland," the "Auld Plaid Shawl," "Seeing Nellie Home," and "Grandfather's Clock," to the modern patriotic numbers like "The Americans Come" and the "Tri-Color." Afternoon of the first day of chautauqua.

MIAMI CHAUTAUQUA AUGUST 17-18-19, 1919

### THRASHING STARTED

The thrashing operation is starting up this week all over this section of the country. Not all the threshers have gotten started, but several crews are busy, and some wheat is coming to town now. The rains of last week held things back some. Practically all the cutting and shocking is done, and there now is left only to begin plowing as soon as the shocks can be removed from the field.

It is reported that there are needed at least half dozen more threshing rigs in this community, if we are to get through before cold weather.

Those who are threshing are getting from 20 to 35 bushels per acre, five to ten more bushels than they expected, after the rust was found in the wheat. Thirty days ago, farmers were placing a guess at 12 to 20 bushels per acre, and now are threshing 20 to 35 bushels.

### THE PANHANDLE ART EXHIBIT.

With the close of the harvest of 1919 in the Panhandle of Texas, we will be able to show the greatest art exhibit ever presented to the human eye, of crops and every other industry of the soil, as it is found in living form upon these far flung plains. The office of the Secretary-Manager of the Panhandle Plains Chamber of Commerce is a very busy place in connection with the work of gathering a pictorial history of the territory covered by this organization. The directors in each county are undertaking to get these pictures just as far as possible. We desire that every person who lives in the Panhandle and Plains country of Texas, and who is glad of that fact, should assist their county director in obtaining these

photographs. If it is more convenient for you to mail them direct to the office of the Secretary at Amarillo, that will be very greatly appreciated. We want the scenes of the wheat harvest, the gathering of all the grains, the cattle industry, hogs, sheep, goats, chickens and the kids. We also want a photograph of all the beauty spots that the Panhandle possesses and they are many. Will you co-operate with us in this movement, which means much to the people who reside in the Panhandle of Texas and to multiply who would desire to come here, if the half had been told them concerning this region.

Our address is Panhandle-Plains Chamber of Commerce, Amarillo, Texas.

Next week completes my Summer Music Class, and I expect to leave first of August for a months vacation. Having had many urgent requests to teach here during the winter, I have considered doing so, provided there is a class sufficiently large to justify my remaining.

Would like to request all those who wish to study to either see me or phone me at Mrs. J. E. Kinney's before next Wednesday as I wish to make definite plans before leaving for my vacation.

Mrs. Aurelia Baker.

NO newspaper can succeed without advertising, therefore we solicit the patronage of our readers for those who by their advertising help to make this paper possible.

### WHAT WE DON'T KNOW

When we know when the fates are against us, we know when we're losing a fight. We don't seem to know, as he days come and go, when everything's really all right. We know our ailments quite fully, we can tell all our friends of our woes. We know a man but with faithfulness can describe every burden he knows. We know a few know when they're happy, and fewer are able to tell.

When we know when the fates are against us, we know when we're losing a fight. We don't seem to know, as he days come and go, when everything's really all right. We know our ailments quite fully, we can tell all our friends of our woes. We know a man but with faithfulness can describe every burden he knows. We know a few know when they're happy, and fewer are able to tell.

We know a few know when they're happy, and fewer are able to tell.

### DISTANCE NO BARRIER

Distance is no barrier to operations of the American Red Cross. Its activities in Siberia extend from Vladivostok to Ekaterinburg, 4126 miles, to Chelyabinsk, 4100 miles. At the western main depot, 1000 miles from Vladivostok, the Red Cross field extends to Habrovsk, 1000 miles. Only the thread of rail and uncertain telegraph system meet these points. Red Cross supplies for western Siberia traverse half the circumference of the globe.

inger Sewing Machines for sale New and Second hand. Sewing Machines and Typewriters cleaned and repaired. J. T. Cantrell, Miami, Texas.

### TEMPLETON DEFEATED.

Reports from over the District show that Mr. Bledsoe of Lubbock defeated Atty. Templeton of Wellington in the race for State Senator to succeed the late Senator W. S. Bell. From every county we were able to hear from, Bledsoe carried the vote almost ten to one, safe Collingsworth county where Mr. Templeton received the majority vote.

### VISITS SISTER AFTER THIRTY-SIX YEARS.

Mrs. Ocie King, and grandson, William King of Atlanta Georgia came in this week to visit the lady's sister, Mrs. Olive Dixon. The sisters have not met in 36 years until this week, which looks to us like a long time between visits. They left Sunday to visit their brother, A. R. King in Lipscomb county and will return by and visit the Arch King family north of the river.

FOR SALE. About twenty-five head of good mules and mares. Will give time until October 1, 1920, with notes drawing 10 per cent. G. N. Powell 565-t-p.

FOR SALE. Nine head good work horses. Will sell on six months time for bankable notes. See or phone Frank Pursley.

## THE FIRST STATE BANK OF MIAMI

OPENED UP FOR BUSINESS IN SEPTEMBER OF 1907

CAPITAL		SURPLUS
STOCK		And Profit
\$25,000		\$300,000

We solicit your business and offer you the service of a strong and progressive organization. Our endeavor is to make our service such that our customers will recommend it to their friends.

B. F. TALLEY, President  
W. L. MATHERS, V-Pres. H. E. BAIRD, Cashier  
I. WHITSEL, V-Pres. H. A. TALLEY, A-Cash.

## Mr. Grocery buyer.

We want to impress upon you that we have one of the best stocks of nice fresh groceries obtainable. We are offering them to you at real attractive prices, and guarantee to give you honest and courteous treatment. We want your business and are willing to serve you right, and your patronage will be appreciated.

Webster Grocery Co

## Stop, Look, Listen

WE HAVE SEVERAL CAR LOAD

of groceries for the harvest trade not yet arrived, but we think we can almost hear the rumble thereof. We still have a few articles of both Staple and fancy Groceries of Standard Grade to offer you at a reasonable price and we guarantee satisfaction or money refunded.

THANK YOU, CALL AGAIN

LET US BE YOUR GROCER

MIAMI PRODUCE CO.

# Ford

THE UNIVERSAL CAR WE ARE TODAY UNLOADING

a car of new Ford automobiles, and will have them ready for delivery immediately, and have on the road a half car of Ford Trucks and 35 Fordson Tractors, which we are expecting immediate delivery on. Get your order in early for immediate delivery.

J. A. Covey & Son, Authorized Agts.

## ANDREW CARNEGIE SAID

Andrew Carnegie's words concerning saving should carry weight. He has tried it and he knows. He says:

"For every dollar you can produce as a result of hard earned savings, midas, in search of a partner, will lend on credit a thousand. It is not capital that men require; it is the man who has proved that he has the business habits that create capital."

Suppose you begin forming business habits by placing your first deposit with us tomorrow.

(unincorporated) Roberts County Depository

# U. S. FIELD TRIALS OF POISON GAS

## Second Dead Sea Off English Coast.

London.—A sea in which nothing may live has come into being off the southeast coast of England. It is a second Dead sea.

Formerly this sea abounded in life. It was the home of the succulent shrimp, the merry mussel, the winsome whelk and the coy cockle. Now the natural home of those domestic dainties has fallen under a blight, and they have been obliged to pack up their shells and silently steal away.

Pegwell bay is where the Dead sea lies. It was once the most famous of the shell-fish areas. Its downfall is traced to the sinking of an oil tank steamer early in the war. The vessel was torpedoed one night and thousands of gallons of crude oil flooded over the Downs.

The oil swamped the haunts of shrimp, mussel, whelk and cockle. They were lubricated to death. Further sinkings caused more poison to invade the shell-fish beds, the shrimps' breeding waters, and now the whole area is dead.

## HE SLEEPS ON WINDOW LEDGE

Thousands Watch New Porter Slumber on Perilous Couch in Philadelphia.

Philadelphia.—Office workers in the buildings near Broad and Chestnut streets and thousands of pedestrians in the street had the chill of their lives as they watched a man lying on the ledge of a window of the Land Title building, taking a siesta.

Entirely oblivious to the commotion he was creating, he slept peacefully on his arms outstretched in luxurious ease, his feet striking over the edge of the sill from which was a sheer drop of forty or fifty feet to the pavement.

His slumbers, however, were soon brought to an end when repeated telephone calls to the building superintendent's office told of the sleeper and his perilous couch. The man turned out to be a new porter and John, the head porter, climbed out, woke him and soon brought him "back to earth," both figuratively and physically.

## LATINS BUILD BETTER HOMES

Influence of Italians Who Have Lived in United States Aids Movement.

Rome.—The Italian who has lived long in America is helping to Americanize Italy more potently than any other factor. He has introduced American ideas and American ways of doing things at every possible turn when it is practical and more efficient than the Italian.

The Italo-American has brought back from America an idea of better housing conditions, and if he decides to settle again in Italy he builds a home patterned along American lines with plenty of space around it, and with its division of rooms.

## U. S. SHIP LOSSES \$30,000,000

War Risk Bureau Paid Damages on 152 Vessels That Were Lost During the War.

Washington.—Just how spectacular was the rise in ship values during the war was shown in an announcement by the war risk bureau that the Standard Oil company's steamer John D. Archbold, first ship insured by the government agency, was protected by a policy for \$770,000 in 1914, but when she was torpedoed in 1917 her insurance had been increased to \$2,200,000. The marine and seamen's division of the bureau paid losses on 152 vessels with a tonnage of 397,059, and on 275 lives lost by the hazards of war. Total monetary losses amounted to about \$30,000,000.

## Public Now Permitted to Know Details of the Tests Conducted.

## ANIMAL LIVES SACRIFICED

Conditions Were Reproduced As Nearly Like Those of the Battlefield as Possible—Greatest Secrecy Maintained.

New York.—Tucked away in a barren pine belt in New Jersey, near Lakehurst, was located one of the most interesting army camps in the country, for there tests were made in actual large scale field trials of new gases which looked promising for warfare in laboratory tests. Of course the greatest possible secrecy guarded all proceedings there, the personnel, both enlisted and commissioned, having been selected with great care, so that nothing would leak out. Now that the camp is disbanded, scarcely a trace of it remaining, Lieutenant Colonel W. S. Bacon, chief of the proving division, tells of the work of the camp in the Journal of Industrial and Engineering Chemistry.

While the camp lasted all the things done with gas on the combat fields of Europe were tried out there. The camp had trenches, dugouts, concrete bomb-proof retreats, so that gas effects might be accurately noted and results applied to overseas work. There were hospitals for the gassed, goats, dogs, guinea pigs and monkeys that were subjected to military exposure, and the sort of care that humans received abroad was given to those animal sufferers. They were saved when possible, and when not possible the camp authorities knew they had a gas which would be fatal also to enemy soldiers. The camp called at all times for the exercise of chemical, electrical, medical, engineering and military skill of high order, and it became one of the most valuable agencies in the war.

## Proper Bursting Charge.

"To make clear the trials and tests necessary," Lieutenant Colonel Bacon writes, "before a substance was finally recommended let us take as an example substance X, which has been found in the research laboratory to be promising, both as to toxicity and ease of manufacture. Enough of this substance was made to fill several hundred shells of various calibers. The first step toward making a recommendation was to determine a proper bursting charge for the substance."

"After the bursting charge had been determined large numbers of the shell were repeatedly fired on trenches, wooded areas, rolling and level ground, etc. in the same numbers as used in actual warfare."

"Animals were placed in these areas and samples of the gas taken. After a number of such experiments, very accurate and constant results were obtained, upon which, if the substance proved satisfactory, data could be given to the artillery as regards how many shells of this particular gas should be used, with corrections for size of area, wind velocities, temperatures, ground conditions, etc. Trials were continually held to determine how many high explosive shells could be fired with gas shell on the same area without affecting the concentrations."

"The use of the high explosive shell in combination with gas shell was highly important in order to disguise the gas bombardment. The burst of gas shell fired alone can be distinguished by the small detonation."

## Lines of Trenches.

Two complete lines of trenches and several impact grounds were used for the work, and shells were fired for as great distance as 5,000 yards. Not only were the most minute accounts kept of all conditions at the point of firing, but a sampling contrivance was arranged by which at all times and places the intensity and effect of gas-charged air could be recorded. Photographs were also taken of every explosion as an aid in determining the

## Atlanta Rivals Reno in Its Divorce Mill

Atlanta, Ga.—Because of the great number of divorce suits undenied in the Atlanta courts Judge John T. Pendleton, who a few weeks ago declared that Atlanta is out-Reno Reno in divorce records, has recommended the appointment by the county of a "divorce defender" to investigate thoroughly all divorce pleas and actively represent the defense in all undenied divorce cases.

"If husbands and wives knew that both sides to these family troubles would be aired in court and that the faults of both sides would be exhibited before the jury, there would be a lot of people more willing and eager to settle their differences peaceably instead of rushing into divorce courts," declared Judge Pendleton.

## FORTUNE LOST IN STRIKES

Labor Disorders in Ruhr Coal District of Germany Prove Financial Disaster.

Berlin.—The strike recently concluded in the Ruhr coal district has cost the miners \$8,000,000 in wages. The output deficit for April is 3,330,000 tons, representing more than \$34,000,000. The loss to physical property is believed to be so great as to preclude profitable operation for a long time to come.

The miners in the Ruhr coal fields are more than \$25,000,000 out on their wages account as the strikes have been going on intermittently since the beginning of the revolution. In the Hamborn district miners struck 63 days out of 140 working days between November 9 and April 28.

The loss to the nation as a result of the coal strikes cannot be computed. It caused a general paralysis of railway traffic, the shutting down of industrial plants and a loss of revenue and freight to the state railways. The national strike fever is believed to have caused a depreciation in the national currency of more than \$4,000,000,000, and to have added to the value of the German mark abroad.

## TRAIN APES AS FARM HANDS

Doctor Garner Plans Establishing Colony of Chimpanzees in United States.

New York.—Dr. Richard Lynch Garner announced his intention of establishing a colony of chimpanzees and gorillas in the United States to uplift the entire ape race. He has just returned after two and one-half years spent in the French Congo for the Smithsonian Institution.

The professor said he believes apes, if given the advantage of modern education and environment, would develop into a race that would sow and reap and toil in the mills. In refined young lady apes the professor sees a possible solution of the servant problem.

"Sam, a boy ape that shared my home in Africa, learned to fetch things I called for," he said. "He became as particular as I about bed sheets being smoothed out, and couldn't go to sleep without a pillow. If man could train a dog to herd sheep, man can make a farm hand out of an ape."

conditions that would be most effective in practice, low-lying clouds of gas and wide diffusion being the things desired. From 125 to 150 samples of gassed air were taken daily on the ranges.

There was a research laboratory for the analysis of gases under field practice, a chemical laboratory to prepare gases for the experimental work, and a landing plant. The filling of every shell was analyzed and immediately after firing, samples of the released gas were at once analyzed for decomposition products.

# HOME TOWN HELPS

## BUILD WITH IDEA OF BEAUTY

House Should Never Be Planned Solely Along Lines of Economy and Practical Utility.

An earnest plea for more beauty in building is submitted by a writer in the magazine Touchstone, who says in part:

"Building a home should be approached with reverence as well as joyous enthusiasm. There is no adventure in life more fraught with romance than the creating of a home. We are apt to turn to the past for precedent in architectural styles, whereas we should concern ourselves chiefly with the honest expression of our needs and surroundings."

"Love of beauty was almost a religion with the Greeks. To build an ugly thing was a misdemeanor punishable with ostracism. Our country would be a much more delightful and much more agreeable place to live in if our home builders were guided by wise architects who took as much thought for beauty as they do for economy and profit. Every home is an investment, and a beautiful home returns far more interest on the money expended than does an ugly one."

"Would it not be well for us, now that we are facing an era of home building such as the world has seldom known, to pause a little and approach our task with greater carefulness? We should remember that we are building for the future as well as for present delight and that our descendants may turn to our work with respect, as we look into the past and bow before the genius of the ancient master builders."

## TRELLIS EASY TO CONSTRUCT

Twisted Wires Support Sweet-Pea Plants in a Most Satisfactory Manner.

A very satisfactory sweet-pea trellis can be made by stretching wires on a frame of two-inch hard wood or one-inch pipe, the length of the frame being the same as the length of the

rows. The wires should be placed loosely about the frame, as shown, then tightened by twisting them with a spike. A trellis of this kind can be used for several years, and if desired can be removed at the end of each season.—Popular Mechanics Magazine.

## Red Raspberries on Town Lot.

Just a small patch of a good variety of red raspberry will afford fresh fruit for the table for many weeks. Some of the new varieties are ever-bearing. Perhaps one of the best is the Erskine Park.

In setting out the plants first manure and spade the bed as for a garden. If the plants are trained to a wire trellis they can be set two feet apart. Six or eight plants will be sufficient for an average family and ought to produce at least a pint a day from each plant.

By having so few plants, they can be watered and well cared for. Hand weeding about the plant is always the best way to cultivate raspberries.—Thrifty Magazine.

## Do You Think It Paid?

St. Joseph, Mo., employed a full-time expert garden instructor last year who organized the pupils of the elementary school into garden clubs. About 3,000 pupils reported that they were doing garden work before the schools closed in June, says their superintendent. Of this number 2,384 entered their names for membership in the United States school garden army. The school children gardened 32 acres without help and helped their parents work an area of 394 acres. Although the season was very unfavorable, a conservative estimate of the food produced by the pupils would be \$15,000 at market prices.

## Keep the City Clean.

With springtime usually comes a "clean up" campaign, and a movement in that direction is general in cities and towns throughout the United States. Appeal is made to civic pride, and people are urged to make their localities better places in which to live. This is good and desirable. But why not keep cleaning up all the year round? If things are not thrown into the streets, particularly bits of waste paper, they will not have to be picked up. Receptacles for refuse, if placed in back yards, and used, will help much in maintaining a condition of neatness. The cleanly habit can easily be acquired.

# DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

## MR. SUN'S STORY.

"Well," said the Sun Fairies, "you haven't been telling us a story for ever so long, Mr. Sun. We expect to be cheered up. We have all been taking a good rest and we're a little tired of resting."

"We'd like to be brightened up and you're the one to brighten us up, Mr. Sun," they said. "You flatter me," said Mr. Sun. "Ah, but we don't," said the Sun Fairies. "But you do," persisted Mr. Sun, "you surely do."

"How can we flatter you," the Sun Fairies asked, "when you are the brightest thing? Now, aren't you really?"

"Well, I suppose I must admit I am a little bit bright, though I do hate to do so," said Mr. Sun.

"Tell us a story," they all urged. "What shall I tell you about?" asked Mr. Sun.

"Anything at all," they said. "That's both easy and difficult," said Mr. Sun.

"What do you mean?" the Sun Fairies asked.

"It's easy because I can pick out anything and it will please you as a story, and yet it is difficult because instead of knowing just what I am to start out and tell you about I have to think up a story and its title, its beginning and its ending."

"Not very hard for the bright Mr. Sun," the Sun Fairies said.

"Now," Mr. Sun said, "I may be bright in shining but I'm not so bright in story telling."

"Nonsense, you're only modest," the Sun Fairies said. "Pray begin your story."

"I will tell you," said Mr. Sun, "of the story the King of the Clouds told after luncheon the other day. You know I have been visiting for some time and haven't been shining. I've been taking a rest and one of my resting days I had a luncheon engagement with the King of the Clouds."

"We've been resting too," said the Sun Fairies, "and we know that day you had lunch with the King of the Clouds for you were not quite sure whether you would shine and he wasn't quite sure whether it would rain and we weren't quite sure whether we would come out or not."

"That was the day," said Mr. Sun. "The King of the Clouds said that he didn't know whether the story was true or not but anyway he said it was an old, old story of the Cloud people and that Nurse Fog often told it to the little raindrops and the Mist grandchildren."

"It seems that years and years and years ago the sun used to shine each day. Every day I would be bright, as bright as bright could be. It's so long ago that I can't quite remember whether it is a true story or not myself."

"The people on the earth got tired of the sunshine. They said they didn't enjoy anything, no matter how bright and warm and lovely and sunny unless there were some other sorts of days too."

"Of course there were some who didn't agree. Some said they would like every day to be beautiful and sunny, but the great majority of people said:

"Nonsense, unless we have rainy days we won't be able to appreciate and enjoy the sunny days. It would be like having sugar and candy and ice cream all the time in the children's world."

"It would be horrible if they ever had too much candy and ice-cream and so wouldn't like it and it would be horrible if we had too much sunshine and so didn't care for it."

"So the King of the Clouds said the story goes (for he is so old and has lived so long he can't remember so far back) that I sent a messenger to the clouds with the Purple Fairies and I said, "Purple Fairies, can't you send some one to take my place who won't shine all day long, who won't beam and smile, but who will cry?"

"And the Purple Fairies sent the King of the Clouds. So that was how he came around to taking a job in the world, a job, he says, which will always keep him more or less busy."

## Nightgowns Taken Off.

Little Vivian entered the parlor one morning and her quick eye discovered that the slip coverings had been removed from the furniture.

"Oh, look, mamma!" she exclaimed. "The chairs have tooked them nightgowns off."

"You flatter me," said Mr. Sun. "Ah, but we don't," said the Sun Fairies. "But you do," persisted Mr. Sun, "you surely do."

# WORSE THAN DEADLY POISON

Kidney disease is no respecter of persons. It attacks young and old. In most cases the victim is unaware of the approaching danger. Nature backs. Headache, indigestion, lame back, lumbago, sciatica, rheumatism, pain in the joints and lower abdomen, difficulty in urinating, are indications of trouble brewing in the kidneys.

When such symptoms appear you almost certainly find quick relief in GOLD MEDAL Haarlum Oil Capsules.

This famous old remedy has been the test for two hundred years in fighting mankind to fight off disease. It is imported direct from the laboratories in Holland, where it helped to develop the Dutch line of the sturdiest and healthiest in the world, and it may be had almost every drug store. Your money is promptly refunded if it does not relieve you. Be sure to get the GOLD MEDAL Brand. In sealed ages, three sizes.—Adv.

## Playing Safe.

Robson—Why are you offering a thumping big reward for a wretched-looking cat of your wife's? Dobson—Only to please the old chap.

Robson—But such a big reward certainly brings the brute back then you'll look jolly stek.

Dobson—Don't worry, my boy, beast won't come back. You drowned it myself.—Boston Post.

## SHAKE INTO YOUR SHOE

Allen's Foot-Ease, the antiseptic powder to be shaken into the shoes and worn in the foot-bath. It relieves painful feet, smarting feet and takes the sting of corns and bunions. Allen's Foot-Ease is a certain relief for sweating, tired, aching feet, and makes walking a delight. Sold everywhere.—Adv.

## The Debt Affirmed.

Wife—Everything you have you owe to me. Hub—That's what Doctor Brown says.

Wife—Who's Doctor Brown? Hub—The stomach and nerve specialist.

## Buy a Farm Now.

Because land is cheaper than it will be again. The U. S. Railroad Administration is prepared to furnish free information to homesteaders regarding farming opportunities. We have nothing to sell; no money loan; only information to give. Write fully with reference to your needs. If the state you want to learn about is Edwards or Missouri, write to the U. S. Railroad Administration, Room Washington, D. C.—adv.

## Military Tactics.

Mother—Do you want any more for dinner? Returned Soldier—No, thanks; too hard to mobilize.

## "BAYER CROSS" ON

GENUINE ASPIRIN

"Bayer Tablets of Aspirin" to genuine must be marked with safety "Bayer Cross." Always buy unbroken Bayer package which contains proper directions to safely relieve Headache, Toothache, Earache, Neuralgia, Colds and pain. Handy boxes of 12 tablets cost but a few cents at drug stores—larger packages, also, Aspirin is the trade mark Bayer Manufacture of Monocacetic acid ester of Salicylic acid.—Adv.

## The Style Nowadays.

Knicker—"Has Smith made up his wife?" Bocker—"Yes, but course he doesn't know on what terms."

## A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy. The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is in every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try the great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure to mention this paper.—Adv.

Especially Sense of Harmony. "My wife doesn't sing any more." "Did she lose her voice?" "No; she found her senses."

You can purchase a man's labor but you've got to cultivate his good will.

A lawyer doesn't know everything as he thinks you think he does.

MURINE'S Resists, Refreshes, Soothes, Strengthens—Keep your Eyes Strong and Healthy. If they Tingle, Smart, Itch, Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Drug Stores. Write for Free Eye Book. Murine Eye Remedy Company, Chicago, U. S. A.

## REMINDERS OF OUR DEAD IN PERSHING SQUARE

How of "graves" built by Mrs. Laura Prisk in Pershing square at Forty-second street and Lexington avenue, New York city. These graves will serve as a reminder to the throngs who pass of the supreme sacrifice made by over 60,000 American soldiers.

**THE KITCHEN CABINET**

Finish every day and be done with it. You have done what you could, some blunders have crept in; forget them as soon as you can. Tomorrow is a new day; you shall begin it well and serenely and with too high a spirit to be cumbered with your old non-sense.—Emerson.

**WHAT FOODS GO TOGETHER**

We should avoid in our menu planning to serve today a cream soup, fat meat, sweet potatoes, a vegetable with drawn butter sauce and a salad with mayonnaise dressing and ice cream with chocolate sauce — all dishes very high in fuel value. We must not feast one day and starve the next. Dishes hard to digest should be withheld entirely from children, but dishes well liked but difficult of digestion may be served at a meal which also provides for the children, without an entirely different menu. Concentrated foods should be served with something which will serve to dilute them, hence the custom of serving dry crackers with cheese or combined with a white sauce on toast, mixed with rice, macaroni, hominy, bread and milk in various dishes.

Butter, another concentrated food, is used on bread and potatoes. Small portions of food of various kinds can be digested where large ones would cause trouble.

The most important thing for the housewife to see to each day is that her family has well balanced meals, or if a light meal one time, make it up in the next so that the daily average is well kept.

The housewife who plans her meals a week or a month ahead has the opportunity to give her family the best of balanced meals.

A good rule to remember in serving food is never to give the same dish or flavor twice in the same meal. If it is of pronounced flavor even if served in entirely different form, for no one enjoys a tomato salad following a tomato soup and tomato catsup and tomato conserve on the same table. Each food should be cooked to develop its own particular flavor and not be served so smothered in seasoning (however good) that destroys its peculiar charm.

Condiments aid digestion, add flavor and enhance the pleasure of many dishes; however they should be used sparingly and never given to children.

Serving meals in courses helps to enhance the artistic effect, and is often easier than getting the meal all on at once. The last course should be like the last word—one that leaves a sweet and pleasant taste in the mouth and a desire to have more.

The woman who studies food combinations and proper serving of them will enjoy a trip to some tea room or hotel to see some new garnishment or new dish which it will be her pleasure to repeat for her family.

Talk happiness; the world is sad enough without your woes.  
No path is wholly rough,  
Look for places that are smooth and clear  
And speak to these to rest the weary ear.  
Of earth, so hurt by one continuous strain  
Of human discontent and grief and pain.

**A SYMPOSIUM OF SALADS.**

A salad is one of the indispensable dishes. In these days a dinner is not complete without some form of salad appropriate to the meal served.

**Cheese Jelly Salad**—Mix half a cupful of grated cheese with a cupful of whipped cream, season to taste with salt and pepper and add one tablespoonful of gelatin dissolved in a cupful of water. Mold in large or individual molds and when the jelly begins to harden cover with grated cheese. Serve with French dressing to which grated cheese has been added.

**Benares Salad**—Add two tart apples chopped to two cupfuls of grated coconut, and one-half cupful of celery, two tablespoonfuls of chopped onion, one tablespoonful each of chopped parsley and red pepper. Serve with French dressing.

**Goldsmith Salad**—To one-half cupful of minced apple add one-fourth of a cupful of minced celery, one-fourth of a cupful of minced olives, hickory nuts and green peppers. Mix with a mayonnaise dressing and serve in pepper or tomato cups.

**Head Lettuce With Blackstone Dressing**—Wash and drain the lettuce until free from moisture then serve with four tablespoonfuls of mayonnaise dressing, four tablespoonfuls of whipped cream, two tablespoonfuls of chili sauce, two tablespoonfuls each of tomato catsup and vinegar. A spoonful or two of creamed Roquefort cheese may be added for variety.

**Spanish Pepper Salad**—Dissolve half a box of gelatin in half a cupful of cold water and add a half cupful of vinegar. Add half a cupful of sugar, the juice of a lemon and a teaspoonful of salt, with one cupful of boiling water. Mix with six canned pimentoes, two cupfuls of celery, one cupful of pecans cut fine, then mold in individual molds and serve on lettuce with mayonnaise dressing.

*Nellie Maxwell*

**ROYALTY IN JAVA**

Pomp and Majesty Always Accompany Sultan.

Gold Umbrellas an Indispensable Adjunct of Procession With Which Ruler Dazzles the Eyes of His Faithful Subjects.

The most cherished batik day in my memory was the day we went to see the palace of the sultan of Djokjakarta, who has an establishment of 15,000 wives, children, grandchildren, soldiers and servants. An old Dutch official showed us everything except the old sultan himself. A gold umbrella, the insignia of Javanese royalty, always accompanies the sultan and his family wherever they go. On state occasions many gold umbrellas are carried behind the sultan or held over him by his maids of honor, who live in one of the shedlike entrances to the private apartments of the sultan.

These maids of honor, to whom we talked through an interpreter, were handsomely dressed in the finest batik sarongs and wore glittering jewels on their bare necks. No one can be admitted to the honorable post of maid of honor until she has reached the secure age of 70 years, and those we saw, to judge by their wrinkled faces and bony shoulders, must have held the position from twenty to forty years. The royal batik workers in the palace also are old hags, so that there may be no grounds for jealousy on the part of the sultan's 300-odd wives. The soldiers guarding the entrance to the different courtyards were as fine-looking men physically as one might see in Java, in spite of their perfect come-opera uniforms.

They seemed taller than they actually were, because each of them wore a black fez tall as a chimney-pot and held himself as straight as a ramrod, as he marched across the piazza with slow, majestic step, which was not unlike the ritualistic walk of a high church acolyte or a stately Shinto priest. The soldiers as a rule wear nothing above the waist, but in deference to the "cool" season, perhaps (the temperature had dropped to only 85 degrees or so) they were, when I saw them, wearing blue and black jerseys with broad stripes running around their muscular torsos.

Their brown batik sarongs were not trimly and tightly folded about the waist, as most Javanese wear them, but were bunched up in a fantastic way like a huge bustle or pannier over one hip, to allow them, I inferred, to get at the kris, which was always worn on the tucked-up side. Their feet were bare, yet I noted that several of them were wearing puttees above their shoeless feet. When on guard at the entrance they do not stand as our sentries do, but squat in Javanese style or sit cross-legged in semi-Turkish fashion. Their officers, rich young noblemen, were obviously elegant dandies, who disported with an indescribable grace and air the most wonderful cream and chestnut batik sarongs.—Asia Magazine.

**China and the Y. M. C. A.**

That the "Y" but of war-time days in France is a good thing which should be preserved and copied in China is the decision arrived at at a conference of some 60 Chinese Y. M. C. A. secretaries who were appointed to work among the hundreds of thousands of Chinese coolies employed as laborers in France. It was the first time that any of them had come in contact with the work of the association and they have been so impressed they have decided to carry on the organization work which now reaches chiefly the higher classes, among the coolies and others. China was well represented at the conference. Delegates came from widely separated parts of the republic, such as Manchuria, Shanling, Kiangsun, Chi-Li, Hupeh and many other places.

**Work for Business Farming.**

A large number of Montana farm bureau members have organized a state farm management association and will offer over \$300 in cash prizes for the advancement of this type of work. There will be a prize of \$100 for the best kept and most accurate farmer's account book, another \$100 for the best organized farm as shown by the account book, and a \$100 trophy as sweepstakes will be offered as a combination prize. A \$25 shield will be awarded to the county or farm management club showing the most results accomplished from keeping and studying record books in groups. These prizes have been donated by commercial firms doing a state-wide business, all of whom recognize the importance of this work.

**Taught to Use Both Eyes.**

The royal air force of England has instituted an eye drill that has made many splendid pilots out of men who otherwise would have been useless. It was discovered that a large percentage of men only use one eye at a time, and in the early days pilots were not tested for eye balance. Many men were then passed into the air service who could never land correctly. When these deficiencies were discovered a school was formed and under an eye specialist twice a day airmen undergoing the cure were paraded for eye drill and taught how to use both their eyes at the same time. The result was that 85 per cent of the men who would have been bad pilots became good ones in a little while.

**Kentucky = The Home of Attractive Women**

Looking their Best all the Time is the Chief Business of the Blue Grass Belles.

**The Secret of Their Beauty**

It is health, robust health, that is responsible for the Kentucky girl's good looks. If she gets sick, she proceeds to get well. Possessed of health, she knows that personal charm and attractiveness need not worry. They are hers. That is the secret.

The story of Mrs. Hattie Hamilton, 817 Myrtle Avenue, Latonia, Kentucky, is typical. She says: "I have never in all my life, until recently, weighed over 102 pounds. Finally, I began to take Peruna. My weight now is 120. While I didn't really need it, I have started on the third bottle. Peruna has certainly done me a great deal of good and I recommend it to my friends. Several are taking it."

It is surprising the amount of dependence placed by women everywhere upon Dr. Hartman's World Famous Peruna. For forty-five years it has been a household remedy for coughs, colds, catarrh and all catarrhal inflammation whether

**ECZEMA!**

THIS isn't one of those fake free treatment offers you have seen so many times. We don't offer to give you something for nothing—but we do guarantee that you can try this wonderful treatment, entirely at our risk, and this guarantee is backed by your local druggist.

This makes the offer one which you can absolutely depend upon, because the druggist with whom you have been trading would not stand behind the guarantee if he did not know it to be an honest and legitimate one.

Hunt's Salve, formerly called Hunt's Cure, has been sold under absolute money back guarantee for more than thirty years. It is especially compounded for the treatment of Eczema, itch, Ring Worm, Tetter, and other itching skin diseases.

Thousands of letters testify to its curative properties. M. Timerlin, a reputable dry goods dealer in Durant, Oklahoma, says: "I suffered with Eczema for ten years, and spent \$1,000.00 for doctors' treatments, without result. One box of Hunt's Cure entirely cured me."

Don't fail to give Hunt's Salve a trial—price 75 cents, from your local druggist, or direct by mail if he does not handle it.

**A. B. RICHARDS MEDICINE CO., Sherman, Texas**

**As Wifey Views It**  
"Why is your husband not at his office?"  
"Says he's going to lay off for a couple of weeks. Doesn't feel lively. He's inclined to worry about himself."  
"Is he sick?"  
"Oh, no."  
"Then why lay off?"  
"I suppose he needs more time to worry about himself."—Louisville Courier-Journal.

In Greece a person sentenced to death is not executed till two years have passed.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Adv.

There's a good thing about a dog; he does not pretend to be anything else.

The leaf of the pineapple plant can be wrought into a serviceable cloth.

The tenderness and flavor of Libby's Dried Beef are frequently commented upon.

Libby, McNeill & Libby  
Chicago

**Grow Wheat in Western Canada**

One Crop Often Pays for the Land

Western Canada offers the greatest advantages to home seekers. Large profits are assured. You can buy on easy payment terms.

**Fertile Land at \$15 to \$30 per Acre**—land similar to that which through many years has averaged from 20 to 45 bushels of wheat to the acre. Hundreds of cases are on record where in Western Canada a single crop has paid the cost of land and production. The Governments of the Dominion and Provinces of Manitoba, Saskatchewan and Alberta want the farmer to prosper, and extend every possible encouragement and help to Grain Growing and Stock Raising.

Though Western Canada offers such low figures, the high prices of grain, cattle, sheep and hogs will remain.

Loans for the purchase of stock may be had at low interest; there are good shipping facilities; best of markets; free schools; churches; splendid climate; low taxation (none on improvements). For particulars as to location of lands for sale, maps, illustrated literature, reduced railway rates, etc., apply to Dept. of Immigration, Ottawa, Can., or **F. H. HEWITT, 2012 Main Street, KANSAS CITY, MO.**

# Delicate Mechanism

Despite its scope Swift & Company is a business of infinite details, requiring infinite attention.

Experienced men must know livestock buying with a knowledge of weight, price, the amount and quality of meat the live animals will yield.

Each manufacturing operation must be done with expert skill and scientific precision: A highly perishable product must be handled with speed and care to avoid loss.

Chemists, engineers, accountants, and other specialists are required to take care of our intricate problems.

Alert wisdom and judgment must be used in getting stocks of goods into the open channels of demand through our four hundred branch houses. Branch house organizations must show activity and energy to sell at the market in the face of acute competition from other large packers, and hundreds of small ones.

All these requirements of intelligence, loyalty, devotion to the task, are met in the personnel of Swift & Company. Yet the profit is only a fraction of a cent per pound with costs at minimum.

How can the workings of this delicate human mechanism be improved upon?

Do you believe that Government direction would add to our efficiency or improve the service rendered the producer and consumer?

Let us send you a Swift "Dollar". It will interest you. Address Swift & Company, Union Stock Yards, Chicago, Ill.

Swift & Company, U. S. A.

Mr. and Mrs. C. M. Williams and baby of Lordsburg, New Mexico are spending the week with Miami friends. Mr. Williams was manager for the Panhandle Lumber Company at Mobeetie several years ago, but has spent the past seven years in New Mexico. He is however about ready to move back to Texas.

"Bub" Stribling returned Sunday with his discharge from Uncle Sam's overseas forces. "Bub" left us last year and was in France in a very few weeks after leaving Miami.

Henry Ball came in Friday and is spending a few days with Miami friends. Henry was discharged from the army first of the month, spent a few days down in Missouri and will go from here to Mineral Wells and resume his old position.

Ground was broken this week for the new D. D. Payne residence near the Clarence Locke residence. Mr. Payne is building a modern 6 room house, double garage and other nice improvements about the new place.

Miss Lula Byrd of Panhandle has been visiting Miami friends this week.

Mike Nickle and Charlie Wells, two of the first Miami boys to go overseas came in, wearing three gold bars each and the red triangle. These two boys, and Orran Coffee left here together, stayed together all the time and were discharged together, an exceptional experience for hometown boys, they tell some very interesting experience.

Edward M. Gilette spent part of this week here disposing of some land south of town.

W. S. Martin returned yesterday from Amarillo with a new Oakland Touring car.

Mr. and Mrs. S. C. Osborne spent part of last week with relatives at White Deer. Mrs. Jeanie Smoot returned home with them for a few days visit.

W. F. Locke of Parma spent Tuesday night with homefolks.

Mrs. S. E. Fitzerald and son, Earl will leave this evening for Union, Missouri where they will spend a few weeks visit.

John Nelson came in yesterday afternoon, discharged two weeks ago and has been visiting since with his brother, Clarence near Dallas. Mrs. Clarence Nelson came in with him for a few days visit.

The Presbyterian Ladies Aid meets with Mrs. Patton next Wednesday afternoon. All are requested to be present.

P. C. R. Covart of Oklahoma City is visiting his sister, Mrs. U. S. Strader this week.

Mrs. Jim Williams and children of near LeFors visited her sister, Mrs. J. K. McKenzie this week, and while here rented a house from Grandpa Christopher, to which they will move September 1st, and send the children to school at Miami this winter.

Mrs. Dan Kiehn is visiting friends in Amarillo this week.

Discharged Soldiers should have their Discharges filed with the county Clerk, lest some of them become lost. A Special book has been supplied the county clerk for this purpose, and there is no charges for having the discharges filed.

The Miami Base Ball Team are preparing for a big game tomorrow with Pampa, on the Miami diamond, starting at 4:30, and tomorrow night they are giving a dance. They will also play Glazier Sunday afternoon at Miami. They are promising some good fast games and want everyone to come out and see them.

FOR SALE Brood sows, farrow soon. One good Lister. F. W. Preesang.

FOR SALE. A few sheep, some good stock hogs and brood sows. See or call me at the Gray farm South of town. H. C. Hill.

University fund shall be sold under such regulations, at such times, and on such terms as may be provided by law; and the Legislature shall provide for the prompt collection, at maturity, of all debts due on account of University lands heretofore sold, or that may hereafter be sold, and shall in neither event have the power to grant relief to the purchasers. And until such time as the University endowment fund shall be divided, in accordance with constitutional provisions, the proceeds from the sale of lands, as realized and received into the Treasury of the State, together with such sum belonging to the funds as may now be in the Treasury, shall be used as follows: First, to pay the public free school fund as now or may hereafter be authorized by law to be invested; and the interest accruing thereon, and any income from the use of the said interest and income, shall be subject to appropriation by the Legislature, and may be available for the redemption of bonds based on the University endowment and to be redeemed from the said interest and income from the use of land, as may be provided by law, to aid in the construction, equipment and maintenance of the University of Texas and the Agricultural and Mechanical College of Texas, and the total of such bond issues outstanding shall at no time exceed four and one-half million dollars, and the Legislature is hereby authorized to appropriate out of the general revenues of the State such moneys as may be necessary to cover deficiencies in the interest and sinking fund accounts of the bond issues herein provided for. Provided that the portion of the alternate sections of the lands granted to railroads, reserved by the State, which were set apart and appropriated to the establishment of "The University of Texas" by an Act of the Legislature of February 11, 1875, entitled "An Act to Establish The University of Texas," shall not be included in or constitute a part of the permanent University fund.

Sec. 12. The Legislature shall provide by appropriation for the equipment, maintenance and development of the University of Texas, and the branches of the said institution named in this Article and such other branches as may hereafter be established by law; for the Agricultural and Mechanical College of Texas and its branches as now or hereafter may be established by law; for the College of Industrial Arts for the Education of White Girls; for State Normal Schools; and for the Prairie View State Normal and Industrial College for colored youths.

Sec. 13. The Legislature shall give encouragement and direction to and make provision for the educational activities of the respective State institutions provided for in this Article, and as may be adequate for the promotion of literature and the arts and sciences, pure and applied, and for instruction in the professions, of a University of the first class; and for instruction in all those branches of learning which relate to agriculture, animal husbandry, the natural sciences, pure and applied, connected therewith, the mechanical arts and military science and tactics, requisite to the development of an Agricultural and Mechanical College of the first class; and for the education of white girls in the literary branches of the arts and sciences, and in social and domestic economy of the age, as may be necessary to establish and maintain a College of Industrial Arts of the first class for white girls, and for instruction in all the branches requisite to the development of normal schools of the first class.

Sec. 14. The Legislature shall give encouragement and direction to and make provision for the educational activities of the respective State institutions provided for in this Article, and as may be adequate for the promotion of literature and the arts and sciences, pure and applied, and for instruction in the professions, of a University of the first class; and for instruction in all those branches of learning which relate to agriculture, animal husbandry, the natural sciences, pure and applied, connected therewith, the mechanical arts and military science and tactics, requisite to the development of an Agricultural and Mechanical College of the first class; and for the education of white girls in the literary branches of the arts and sciences, and in social and domestic economy of the age, as may be necessary to establish and maintain a College of Industrial Arts of the first class for white girls, and for instruction in all the branches requisite to the development of normal schools of the first class.

Sec. 15. The Prairie View State Normal and Industrial College for the instruction of colored youths of the State, having been located at Prairie View, in Waller County, as a branch of the University of Texas, is hereby declared a branch of the Agricultural and Mechanical College of Texas. And in lieu of the separate apportionment of a part of the University endowment, as authorized in Section 11 hereof, the said Board of the Agricultural and Mechanical College may apportion to the Prairie View State Normal and Industrial College such part of any fund realized from any authorized bond issue for the Board for the purpose of permanent improvements as the Board may determine to be equitable and the fund so apportioned shall be available only for the purpose of constructing permanent improvements for the said Prairie View State Normal and Industrial College.

Sec. 2. The Governor of this State is hereby directed to issue and have published the necessary proclamation for the submission of this proposed amendment to the Constitution of the State, said amendment to be held throughout the State on the first Tuesday in November, 1913, and all voters favoring the amendment shall have written or printed on their ballots the words: "For the amendments to Sections 11, 12, 13, 14 and 15 of Article VI of the Constitution of the State of Texas, changing the constitutional status of the University of Texas, the Agricultural and Mechanical College of Texas, the College of Industrial Arts at Denton, Texas, the San Houston Normal Institute at Huntsville, Texas, the North Texas State Normal at Denton, Texas; the Southwest Texas State Normal at San Marcos, Texas; the West Texas State Normal at Canyon, Texas, and the East Texas State Normal at Commerce, Texas, and other state educational institutions, and determining the interest, respectively, of the University of Texas, the Agricultural and Mechanical College of Texas, the Prairie View State Normal and Industrial College in the University permanent fund, and providing for the support, direction, and development of State Educational institutions."

Sec. 3. The Governor is hereby directed to submit this amendment to the qualified voters at an election to be held throughout the State on the date herein specified, and the sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of the general revenue not otherwise appropriated, for the purpose of issuing the proclamation and publishing the amendment as required by the Constitution and laws of this State.

GEORGE F. HOWARD, Secretary of State. (Attest—A True Copy).

THE Dining Room should be a cheerful place, for when you eat your meals amid pleasant surroundings you do much to aid digestion. And good digestion means health.

# ROAD BUILDING

## BENEFITS OF COUNTRY ROADS

Among Other Things They Cheapen Cost of Transportation of Farm Products to Market.

Good roads promote self-respect in a community. They make possible social intercourse. They bring the benefits of churches and schools within the reach of all. They help to keep the boys on the farm. They cheapen the cost of transportation of farm products to the markets and thus add to the value of farm lands much more than they cost. They mark the degree of civilization of the rural community. This, in short, is the value of good roads as seen by the extension service of the University of Missouri College of Agriculture.

The building of good roads is of the greatest importance to a community. What kind of a road should be built? Of what should it be constructed?

Good Roads Like This Bring Farmer Nearer to City Markets.

What are the things to be considered in locating the road? What "grade" should be maintained? How should the road be drained? What are the laws governing highway construction? There are a few questions answered in extension circular 68 dealing with country roads.

Matters of prime consideration in locating a road are: Easy grades, good drainage, exposure to sunshine, elimination of culverts and bridges by avoiding unnecessary creek crossings, directness and the number of farms to be served for a given length of road. Whenever possible to avoid it, a good location should not be rejected merely because a certain roadway has been in use for some time. If the location of a used road is bad it should be changed if possible. In relocating roads avoid railroad crossings at grades.

The grade of the road is important for on this depends the weight of the load which can be hauled economically. By grade is meant the rise or fall in feet for each 100 feet in horizontal length of road, usually expressed in percentage. A 5 per cent grade means that the road rises or falls 5 feet each 100 feet along its center line. It has been calculated that on a smooth country road the load that one horse could pull on a level would require two on a 5 per cent grade, three on a 10 per cent grade and four on a 15 per cent grade. Engineers usually figure a 6 per cent grade as a maximum.

Road work in Missouri has not been as well managed as other public work. Projects have been too narrowly limited to localities, resulting in fragmentary effort. Skilled locating and supervision of construction have been generally lacking. The remedies are: First, a wider co-operation and the adoption of broad schemes of improvement, preferably with units no smaller than counties. Second, the absolute elimination of political considerations in the spending of money. Third, securing good engineering advice in the preparation of plans and requiring careful engineering supervision of construction.

## ENGLAND SPENDS 50 MILLION

Grants to That Amount Will Be Distributed for Reconstruction of Roads and Bridges.

Grants amounting to \$50,000,000 will be distributed by the British road board for the reconstruction of roads and bridges in England in 1919. Demobilized army units will be used to do the labor. Local highway authorities will be required to match this appropriation by at least as large a program of road work as they carried out in the year before the war. Area taken into consideration, England's program is thus far in excess of that of the United States, including both federal aid and state funds.

## POOR ROADS ARE EXPENSIVE

Congressional Report Places Annual Loss at \$504,000,000 for Transportation Alone.

The congressional report of 1914 placed the economic loss of the United States through poor roads at an annual figure of \$504,000,000 for transportation costs alone. The heavy increase in tonnage since that time probably makes the loss today close to \$1,000,000,000.

# Up the Magdalena River

Scene on the Magdalena River.

THE trip by the Magdalena river from the sea to Bogota, the capital of Colombia, is one of the most interesting the traveler can find, says the London Times. The time of the voyage varies from nine to fourteen days, according to whether it is made in the wet or dry season.

During the trip one ascends from sea level to 9,000 feet above it; there are three separate train, and two steamer journeys; the scenery varies from sweltering forest to wide, airy pastures, wheatfields and ragged blue mountain peaks; the dwellings of the people change from insouciant, palm-thatched huts to the imposing Spanish style stone mansions of the ancient city of Bogota.

Puerto Colombia, with the turquoise Caribbean washing its feet, is a port by courtesy. Steamers call there for the convenience of Barranquilla. Wide-spread, sunny, flower-bedecked Barranquilla sits upon the bank of the Magdalena, and continually and passionately discusses the question of water transport, for it can have no direct access to the sea until the Magdalena bar is conquered.

From Barranquilla one takes a river steamer to La Dorada. On the flat-bottomed river boat, drawing only a foot or two of water, travelers must provide themselves with a canvas cot, but nothing else, and the Barranquilla hotels specialize in providing the visitor for Bogota with the outfit—a pillow of tree-cotton, a couple of tiny sheets, a mosquito netting "bar," a couple of little towels. No other bedding is needed, for the heat is stifling but the judicious also take table delicacies and everything needed in the way of beverages, with the exception of coffee, of which there is a constant and most excellent flow.

Soon the forest closes down to the edge of the water, as unconquered, as dominant, as in Quesada's day, 400 years ago, Quesada took two years to ascend the river to Bogota, the survivors of his party arriving ragged and starving; the marvel is that a single one of those adventurers reached the plains.

## Scene of Great Beauty.

The jade of banana leaves, whipped into rags by the wind, the glaucous green of lilies, the emerald of the palms, the Jasper of the great forest giants, is only broken here and there by a trail of flowering vine or the rare sight of a high-perched mauve or gold orchid; where open spaces occur there are low-growing bushes covered with flowers, and one sees a host of butterflies and birds, but usually there is nothing but the river and the green wall of forest. When rain falls in a straight sheet even the forest is blotted out and the alligators and turtles of the margins are invisible until the sun reappears.

When a stop is made for wood or to deliver merchandise to some little trading point the outlet for some rich region producing sugar, hides, coffee or tobacco, all the village comes to the little wharf, guns are fired and the church bell is rung in the steamer's honor; there are a number of such places below Puerto Berrio. Puerto Berrio is important as the starting point for the wonderful Cauca Valley, worth some trouble to reach and possessing a perpetual June climate, a wealth of fruit and flowers, a fertile soil and mountains sown with precious minerals.

At La Dorada, where the blue mountains have suddenly come nearer and turn green and purple, there is little but a row of modest cottages, and the railway sheds; but here is the train for Beltran, the line leaving the river, and traversing a wonderful country of bright green pastures with sturdy herds grazing, fine luscious trees and hills that rise grotesquely, topped with fantastic rocks like battlemented castles of the middle ages. All this region is famous for its tobacco, and has exported it to Europe for over a hundred years. The train stops at Honda, where one looks far down at the rapids; the town is bright and pretty, the center of a gold mining industry, and here, by the way one buys four cigars of excellent tobacco for the equivalent of 25¢.

There is another halt at Mariquita,

where Quesada died, and where today an English company has established one of the terminals of an aerial tramway across the broken country, forests and mountains into the Cauca valley. The tall standards march along into the distance almost directly west; I believe that the enterprise has been, as it deserves, very successful—I heard of a grand piano having been carried triumphantly by this air line.

## Trains Go Slowly.

About five hours is occupied by the train journey and then Beltran is reached with its waiting steamer for the rio arriba. The steamers for the upper river are small, the dining-tables set out on the open main deck in picnic style. There are only six cabins on this little boat, and most of the score of passengers sleep outside under a sapphire velvet sky set with a million diamonds. This sky seems very close above; the air is soft, full of woodland scents; at night one hears the song of the river, only overcome when at first flush of dawn hundreds of ringing bird voices begin to call from the bushes.

With full daylight comes realization of the beauty of the rio arriba. Here the steep, folded mountain spurs stand down to the water's edge, little white cliffs marking the force of the flood in the rainy season; brilliant green on the long crests, these spurs take on deep violet shadows in the innumerable clefts and gorges.

When the steamer reaches Girardot, with its scarlet blossoms, its cobbled streets tipping down to the river, and its eternal clothes-washing on the flat stones of the margin, there is but one section of the journey still to be traversed—the railroad to Bogota. During this final stage there is a great deal of steady climbing to the upland plateau, and a long run across the cool plains.

One passes through regions of wonderful fruit—rose-apples and nisperos, grandillas, and manzanas and melons; ascends through a cutting whose slides are jet black because here is a seam of excellent coal providing fuel for the railway; and, after rolling through level lands where cattle graze peacefully beside willow-bordered brooks, sees at last the twin peaks of Monserrat and Guadalupe, with the white walls of Bogota at their feet. The mountains stand like a vast purple barrier; beyond lies that lake of legends, Guatavita, a score of gold-bearing rivers; the emerald mines of Muso from which the finest stones in the world, and the largest annual quantities, are produced.

## Rationing and Improved Health.

It is not true that under rationing the health of the nation is suffering from lack of good food," says the Weekly Scotsman. "On the contrary, the health of the children in the schools has never been so good, and but for the influenza epidemic the death rate would in all probability never have been so low. Of essential foods everyone has had enough. Butter has been short precisely because it was necessary to safeguard the child's milk, but no one who understands the work done by the ministry of food in securing the raw material for, and arranging the manufacture of, margarine will say that the subject of fat in general has been neglected."

## Not Worth \$10.

An American unused to court etiquette was invited just before the war, says Collier's, to dine with a German prince. A glittering flunky presented a silver plate to him just before the hors d'oeuvres were served. He blushed, fumbled in his pocket, then said to himself, "I have nothing but a \$10 note, but I don't think any German dinner is worth \$10," so he let the plate pass. He then discovered that the plate was intended to receive the white gloves that he ought to have worn!—Boston Post.

## How Paris Was Named.

In 52 B. C., when Caesar conquered Gaul, Paris was called in Gallie, Lutetia (Mud-town). At that time it was inhabited by a Celtic tribe, the Parisii. They burned their town rather than surrender to Caesar, so that general ordered a new town built at the same time, and called it after the tribe, Parisii. This was the original form of the present name, Paris.

# FARM STOCK

## PLAN OF GRAZING FOR GOATS

Give Vegetation Opportunity to Grow by Dividing Range on Which Animals Forage.

(Prepared by the United States Department of Agriculture.)

The production of more mohair and meat can be obtained in raising goats on the range by following a plan of grazing which will give the vegetation a chance to grow sufficiently to maintain itself. Most goat ranges are used throughout the year. This and the general practice of driving the goats out from a corral at the ranch headquarters and back every day for months or throughout the year have been largely responsible for deterioration of the range. An excellent method of giving the forage a proper opportunity for growth is to divide the range into three areas—one for spring, another for summer and fall, and a third for winter.

The number and distribution of the goats on these divisions should be such

A Flock of Angora Goats on a Texas Ranch.

as to secure proper and uniform utilization of the forage. The divisions should be protected from grazing except during the seasons determined upon. On successive parts of the summer and fall range grazing should be deferred until after seed maturity of the forage plants so as to insure proper revegetation. On winter range the forage close to the sheds should be reserved for stormy periods only.

The old practice of bedding the goats on the same bed ground every night in the year prevents proper management of the range and results in overgrazing, in uneven utilization of the forage and general depreciation of the range. This in turn has a bad effect on the condition of goats and the production of meat and mohair. The use of many bed grounds widely distributed over the range aids materially in improving the quality and quantity of the forage, reducing the trailing and driving of the goats, and securing better growth of goats and mohair. The ideal system is to bed the goats wherever night overtakes them, and it is this system, called the "bedding-out" system, that growers of goats are urged to adopt whatever practicable.

The bedding-out system cannot be strictly adhered to during kidding, during periods of stormy winter weather, nor just after shearing; but its use at other times is practicable and it has many advantages.

Range to be suitable for goats should possess a mixture of browse, grasses, and weeds, be free from continued heavy rains and snows, and be well supplied with bed grounds and watering places. Browse furnishes most of the range feed for goats throughout the year, so that it should be abundant. Grass and weeds are necessary for does and kids during the spring and summer, and are of considerable value at all times to give variety to the forage.

Plenty of fresh palatable feed has a marked beneficial effect on mohair production, growth of the goats, and the proportion of kids raised. It also reduces the proportion of losses. Therefore, instead of overstocking a range with inferior goats, the producer should stock it with the number of high-grade goats which it can conservatively carry.

The range goat should be the large, well-built, early maturing Angora, producing a large quantity of fine mohair. The body and chest should be relatively broad and deep, the back wide and straight, the thighs full, the ribs well sprung, and the legs short, strong, and set wide apart. Such Angoras make possible a substantial revenue from two sources—mohair and meat.

The does should be uniform, of good size, have good constitutions, be good producers of mohair, and should produce sufficient milk to insure proper growth of their kids. The bucks should more nearly approximate the ideal than the does. They should be large and vigorous and should produce a large quantity of high-quality mohair. Only those wethers which produce a very large quantity of fine mohair should be retained in the herd after they are two years old.

## Most Popular Hog.

The butcher hog, weighing between 200 and 250 pounds is the most popular with the packing companies because it furnishes everything that is desirable in meat, and consequently will command a higher price.

# Pretty Party Frocks

If you would forget that there is anything in the world but joy, spend a little time looking at the party frocks in which the summer girl will dance some hours away. If these dance frocks flourished in the daytime, bees and butterflies might pursue them, for they certainly borrow from flowers their color and piquancy and sunshine glimmers in their brocades and embroideries. Evening gowns indulge in sumptuous materials, in gold and silver tissue, in rich embroideries and twinkling sequins and all kinds of shimmering things—including the new shot taffetas. Finally they turn to tulle and laces or sheer crepe. A world of fine and fragile fabrics belongs to them.

The two pretty party frocks shown here are of the simpler designs, one of them in white and the other in black with embroidery and brocade sash in metal and colored brocade. The white frock has a slim underslip of embroidered satin, draped about the ankles and full draperies of fine net ending in points about the bottom, hang over it. A vestee of twinkling sequins fills the V-shaped opening of the bodice—the net makes a filmy drapery that falls from the shoulder. For a lovely finishing touch a narrow ribbon hangs in loops and ends from the girdle.

Black georgette over a satin serves for the dimmed gown at left of the picture. Its construction is so simple that the picture tells all that can be told. It has a plain bodice with round neck, but with brocade. The skirt is gathered to this and hangs straight with overhanging panel at the front. It is embroidered near the bottom. The same embroidery appears at the sash below the hipline. A very gorgeous sash of heavy brocade ribbon runs the wide girdle with one long hanging end.

## Petticoat Substitute.

The long, slim suit and dress skirt almost make the wearing of petticoats an impossibility. But we may be as modestly and comfortably clad, if there are the long bloomers to take their place. These bloomers or petticoats are usually chosen in dark colors and may be had ankle length, shorter and with or without ruffles. A new style has an accordion plait piece set in just above the shoe top. For summer the short silk jersey bloomers in flesh and pink with even insets of lace at the knee, are perhaps the newest. Camisoles of silk jersey with lace or embroidered pink and blue silk are also very new.

# Hats for Midsummer

Dress hats for midsummer, as compared to other millinery, are as orchids compared to other lovely blossoms. These millinery blooms are the most fragile, most splendid of all, the fairest and the shortest lived. They are midsummer interpreted in hats by designers whose fancies are unhampered by thoughts of anything but beauty. They look to the sheerest fabrics and to the most beautiful colors to translate their thoughts into millinery.

In the group of three hats made for the heart of summer, two are of printed georgette and one of plain georgette in the sheerest quality. The same wide-brimmed, graceful shapes appear developed in laces, malines and nets. Brims usually have lines in flowing curves about the face and crowns are often flexible. The hat at the right of the group is a lovely example. A vague flower motif against a black ground provides color. There is no trimming except the sash of velvet ribbon, in one of the colors in the crepe, that is brought about the crown and tied in a bow at the back.

In the hat at the left there is a hint of sport styles in the covering. It is of white crepe georgette with gay figures of Rin-tin-tin and Nanette sporting themselves over its surface. A covered silk cord with small tassels at the ends disposes itself in a careless bow on the crown—to answer "present" in case any one asks for the whereabouts of trimming.

In the last hat, georgette is shirred over a wire frame with a wide ruffle flowing about the brim edge. This is one of a few models in which the crown is not flexible. Although in this particular hat there are no flowers or fruit in the trimming it is an exception to the rule, the designer having placed a sash of ribbon about the crown, tied in a generous but simple bow near the front.

Julie Bottomley

## Substitute for Furs.

The reported decision of clothing manufacturers, particularly specialty houses, of going more into leather-lined or convertible overcoats for next fall and winter finds an echo in the women's wear trade. According to a dress goods representative the suggestion that leather be substituted in some cases for fur trimmings has met with quite a little response. The price consideration is not one that holds the important place for the change, even though there is a difference in favor of the use of leather, but the novelty of leather trimmings is expected to be a big factor.

Blue and orchid is a color combination much in evidence this season, especially for evening and semi-evening gowns.

RELATING TO SPECIAL TAXES BY CITIES, TOWNS AND COUNTIES FOR PUBLIC IMPROVEMENTS, PUBLIC ROADS, ETC.

Senate Joint Resolution No. 20. Proposing an amendment to Section 5 of Article 8 of the Constitution of the State of Texas, by changing said Section 5 so as to provide for the levy of taxes by counties, cities and towns...

Section 1. That Section 5 of Article 8 of the Constitution of the State of Texas be amended that the same will hereafter read as follows: Section 5. The State tax on property...

Section 2. The sum of five thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 3. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 4. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 5. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 6. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 7. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 8. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 9. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 10. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 11. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 12. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 13. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 14. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 15. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

of the State of Texas during the war between the States served in organizations for the protection of the Frontier against Indian raiders or Mexican marauders and to indigent and disabled soldiers of the militia of the State of Texas...

Section 1. That Article 16 of the Constitution of the State of Texas be amended by adding thereto a new section to be numbered Section 49 as follows: Section 49. The Legislature shall have power to create a division of the net proceeds arising from the operation of the prison system during any one fiscal year between the State of Texas and the prisoners confined in the Penitentiary or their dependents...

Section 2. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.

Section 3. The sum of Five Thousand (\$5,000.00) Dollars, or so much thereof as may be necessary, is hereby appropriated out of any funds in the State Treasury not otherwise appropriated...

Section 4. The Governor of this State is hereby directed to issue the necessary proclamation for said election and to have the same published as required by the Constitution and laws of this State.
