

BY BILL ELLIS

WE MENTIONED the food stamp problem a few weeks ago, and this week we have another angle on that costly government program.

Senator John Tower has pointed out that the loose federal regulations are actually taking food from the mouths of the needy and giving it, at the expense of you and me, to the undeserving.

This is the trouble with most of our federal programs. They may be well-meaning when they start out, but eventually they become abused, to the point that the ones for whom they were created for originally end up missing the boat while others, not even needing the program, get benefits.

Senator Tower pointed out in a recent newsletter that the food stamp program has degenerated into a gigantic boondoggle. The senator quoted figures showing that the program began 10 years ago as a "modest" program to cost \$40 million a year, and has mushroomed into a fiscal monster that will devour \$5 billion of the taxpayers' money this year.

The use of the stamps has increased from one of every 439 Americans in 1965 to one of every 13 Americans today, and Tower warns that the growth of the program is likely to continue mushrooming.

Under the present setup, the senator points out that some able-bodied persons who do not want to work can get food stamps. Also, owners of jewelry, furs and luxury appliances can get the stamps. Minor children can get them without the approval of their parents.

Tower is helping to sponsor the National Food Stamp Reform Act, which he believes will save taxpayers as much as \$2 billion a year, and at the same time get the food stamps to those who genuinely need them.

The proposed act contains 41 separate provisions to reduce the overall cost of the program by eliminating fraud and abuse by redefining eligibility requirements.

The administration of the food stamp program would be transferred from the Department of Agriculture to the Department of Health, Education and Welfare, in order to eliminate costly administrative duplication in the welfare system.

Among the provisions of the act will be the elimination of the present complicated system of income deductions which makes it possible for families making as much as \$20,000 a year to be eligible for stamps.

The bill would also deny food stamps to able-bodied persons without small children who are not willing to work.

Monthly reviews would be set up to determine whether a food stamp recipient should retain his eligibility.

If you agree with the bill that Senator Tower is helping to sponsor, perhaps a letter to him, or to Congressman Mahon would lend him a helping hand. After all, it's your tax dollars and mine that are supplying stamps to some folks we'd just as soon didn't get them.

++++

THE ANNOUNCEMENT this week at Texas Tech which proposes the use of feedlot manure for a new energy source, should be a big plus, both for the area and for the nation.

When feeding operations are going full speed, this immediate area has about as much feedlot manure as any comparable area in the nation. Add in Deaf Smith County, and we'd top them all.

And no one can argue that our energy supply has needed a boost of sorts.

At this writing, we don't know all of the details on the Tech program, but it appears that a tremendous breakthrough has been achieved, which could solve two problems at once—the problem of what to do with excess feedlot manure, and how to supplement our energy supply.

Glad to know our ole Alma Mammy is taking the lead in this program.

INSTALL HOLDER...Five members of Bovina's Boy Scout Troop 202 are shown installing a trash barrel holder behind Don's Medicine Chest this week. Pictured from left are Doug Tucker, Eric Allison, Michael Nance, Don Paul Spring and Bret Whitten. The scouts installed seven holders early this week and expect

to have a number of others installed by the end of next week. Residents may have the barrel holder installed for \$3.50 with the proceeds going into the troop fund. The city furnished materials and Bovina Pump Company constructed the trash barrel holders at no cost.

SATURDAY

Beauty Pageant Deadline Nears

The deadline is Saturday for entering the Second Annual "Little Miss" and "Miss Baby Doll" pageants which will be held on Thursday during the 1975 Bull Town Days, reminds Mrs. Daryl Kirkpatrick, chairman of the pageant committee.

Girls ages nine through 13 are eligible for the "Little Miss" portion of the pageant while girls ages four through eight are eligible for the "Miss Baby Doll" pageant.

The event will begin at 8 p.m. Thursday, Aug. 14, in Bovina Schools auditorium.

Any business firm, civic organization, parent or grandparent may sponsor girls, according to Mrs. Garry Beauchamp and Mrs. Randy Barrett, members of the committee.

In addition to the entry blank and \$10 entry fee, a photograph of the contestant must be submitted.

"Miss Baby Doll" contestants will model play clothes and dressy outfits. "Little Miss" contestants, in addition to appearing in dress clothes, will present a talent in the

pageant. A panel of out-of-town judges will determine the winners.

Some 26 local beauties entered the 1974 pageant with Pam Rhodes crowned "Little Miss" and Misti Boozer crowned "Miss La Petite."

An official entry blank may be found in this issue of The Blade.

ETHYLENE FROM MANURE

Ag Team Reveals Discovery

An announcement concerning an agricultural waste research program was made at a joint news conference Tuesday afternoon at Texas Tech University in Lubbock which is expected to create an economic boom in the major cattle feeding counties in Texas. Parmer County, the number two county in cattle feeding in the state, along with

Deaf Smith County, the number two county in cattle feeding in the state, along with Deaf Smith County, the number one cattle feeder, stands to derive numerous benefits from the research.

Beef cattle manure has been found to yield significant amounts of ethylene, an important product derived from petroleum and natural gas, according to a spokesman at Texas Tech's Information Service.

The discovery was made at Texas Tech by a research team working on a project supported by the Environmental Protection Agency's agricultural waste research program at the Robert S. Kerr Environmental Research Laboratory at Ada, Okla., Pioneer Natural Gas Company of Amarillo and Texas Cattle Feeders Association.

The Environmental Protection Agency provided 73 per cent of the \$108,000 project with additional funding by Pioneer Natural Gas Co. and the Texas Cattle Feeders Association.

large portion of BHS students who desire to become occupationally (Continued on Page 9)

IN TEXAS

Cattle Totals Down; Parmer Remains 2nd

A total of 99,000 head of cattle reported on feed in Parmer County January 1 made it the number two county for cattle on feed in the state, Agriculture Commissioner John C. White has announced.

Cattle on feed in Parmer represented 7.5 per cent of the statewide total of 1,327,000 head and helped to make Texas the leading state in numbers on feed as of January 1.

At the same time, the total number of cattle on feed in the state as of the first of the year decreased some 878,000 from the 2,205,000 on feed as of January 1, 1974, according

to statistics compiled by the Texas Crop and Livestock Reporting Service.

Marketings of Parmer County cattle and calves on feed for slaughter totaled 330,000 in 1974 out of a statewide total of 3,899,000.

With seven feedlots in the county with the ability to hold 1,000 or more head as of January 1, Parmer County's total capacity in these lots stood at 285,000 head.

A total of 1,200 feedlots were reported in Texas at the end of 1974, with all but 199 of them having a capacity of under 1,000 head.

PLANS NEAR COMPLETION

12th Annual BTD Just Two Weeks Away

Plans are rapidly nearing completion for the 12th Annual Bull Town Days, Bovina's community celebration, scheduled for August 14-15-16-17, according to Ken Horn, chairman of the event.

Along with a number of old favorites on the annual program will be two new attractions this year—an air show and a slow-pitch softball tournament, Horn said.

The air show, sponsored by Chuck's Spraying Service, Inc., and

the Bovina Jaycees, will feature Marion Cole of Shreveport, La., a well-known stunt pilot and Ted Stallings of Bovina. The air show will be held Saturday afternoon in Norvell Strawn's pasture north of town.

The slow-pitch softball tournament, sponsored by the Jaycees, will get underway Thursday and continue through Sunday with 16 teams expected to enter the double

elimination event, according to Mike Spears, director of the tournament.

Also on tap for the 12th BTD celebration are the "Little Miss" and "Miss Baby Doll" pageants, sponsored by the Bovina Jaycee-Ettes; the traditional cow calling and beard growing contests; the BTD Queen Contest, under direction of Mrs. Ray Anderson; the chuck wagon breakfast with Vernon Estes and members of the Roping Club in charge; the old timers reunion and luncheon, Bovina Woman's Study Club; horsemanship activities, Roping Club; BTD parade, chamber of commerce; carnival and barbecue; Super Stars, activities for the younger citizens, Jaycees; awards presentation and downtown entertainment; the 15th Annual Quarter Horse Show, Roping Club; style show, presented by the Brownsabout; and western dance, American Legion.

AUGUST 9

'Mutt Show' Set At Park

A "Mutt Show," sponsored by the Bovina Jaycee-Ettes will be held in the city park at 4 p.m. Saturday, Aug. 9, according to Mrs. Larry Mitchell, spokesman for the organization.

The entry fee has been set at \$1.50 with first, second and third place ribbons awarded in each category. First place winners will also receive a package of dog food, said Mrs. Mitchell.

Eleven categories will be judged in the show, including longest, shortest and curliest tail, longest and shortest ears, lowest to the ground, largest and smallest dogs, longest and shortest from nose to tail, shaggiest, saddest face, largest and smallest paw, best costume, oldest and in best condition and best groomed.

All "mutts" entered in the contest must conform to a slate of rules drawn up by the Jaycee-Ettes. All dogs must have collar and leash, be clean and brushed and have rabies vaccination tags. If fighting occurs, dogs and owners will be requested to leave the park and each child must be accompanied by an adult.

"We want every child in town to enter their dog," said Mrs. Mitchell. "We think it will be a fun event for everyone involved."

Rainfall Totals 5 Inches

Skies were clear over Bovina Monday for the first time in a week with additional rainfall Tuesday and Thursday afternoons of last week bringing the total for the seven-day period of five inches in the city.

The larger amounts of moisture appeared to be concentrated in the vicinity of Bovina and Oklahoma Lane with the city of Friona reporting 2.71 inches through Thursday and Farwell reporting 3.2 inches of rain.

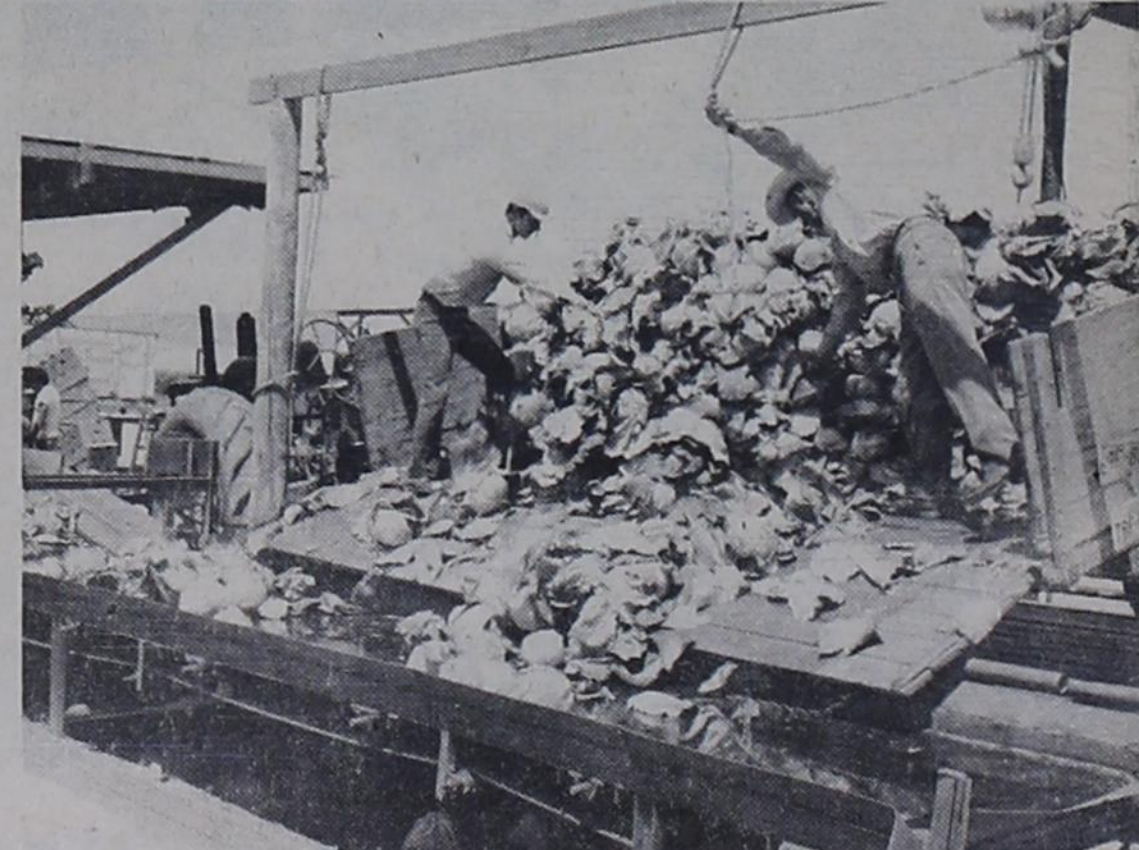

Jon Lin Riddle, who farms in the Oklahoma Lane area, reported seven inches of moisture through Thursday with other farmers in that community reporting as much as six inches of moisture. Reports from northeast of Bovina were in the five-inch range with farmers at Rhea receiving from one and one-half to two inches of rain in the seven-day period.

The moisture was considered a multi-million dollar boon to farmers, many of whom were able to "kill" their irrigation motors for the first time in many months. The only drawback to the wet, cool conditions in the area appear to be to the cotton and some vegetable crops here. Cotton, already late in developing this year, will be even later because of the cool weather, however, cotton growers are hoping for a late frost which would allow the crop time to mature.

Herb Evans of the Soil Conservation Service office in Friona noted that some water had been caught in the Running Water Draw damsite near Bovina, the first since the dam was completed in November of 1973.

Quote
Of The
Week

He that boasts of his descent is like the potato. The best part of him is underground....Thomas Overbury.

HARVEST BEGINS...The first load of 1975 cabbage was delivered to Gateway Farm's processing shed Monday, according to a spokesman of the firm. Harvesting of the crop this year is later than normal because of weather factors. Roland Lusk, manager of the company,

predicted a good yield and fair price for the cabbage crop. Some loads of cucumbers are also being processed. About 950 to 1,000 acres of cabbage, cucumbers, cantaloupe, bell pepper and pumpkins were planted in the Bovina area this year.

Current Comments From . . .

H.M. BAGGARLY in the TULIA HERALD....We live in an age when everybody believes in the economic equality of man. Gone are the days when people accepted the status into which they were born, when a person recognized his limitations. A person aware that his IQ was 70 sought out those vocations which required an IQ of no more than 70. He accepted the wage that was paid for work that required an IQ of no more than 70, and he was reasonably happy.

Of perhaps one's future was not determined by his IQ but by his ambition, his health, or some other factor. He preferred a job with not too much responsibility, not too much pressure. He liked short hours because of his love for fishing. (We are not talking about those souls fired with ambition to improve themselves, to rise above their upbringing, who aspired to live on the other side of the tracks instead of in the ghetto where they were born.)

There was a time when a young man graduated from high school, or left before graduating, refused college or training in some skill, and planned to spend his life as a day laborer.

We still have this type, but unlike those of another generation, today they want and demand the same standard of living as the highly skilled, the talented, the one with an IQ of 150 who has taken advantage of his ability.

Attitude of many persons today is, "Regardless of what I do, I am worth just as much as anybody else and I deserve the same income," or "It isn't a question of what I am worth, it requires X amount of dollars for me to have the same standard of living as everybody else, so that is what I must have—otherwise I go on relief."

Street sweepers and garbage collectors see no reason why they shouldn't make as much as accountants or nurses.

Not only have the differences in skills been ignored by a new generation but also ignored is the differences in responsibility.

There are numerous menial jobs which require nothing more than the performance of routine tasks which could almost be performed by a robot. There are no decisions to make, no thinking to be done, job security for life if the person merely displays the intelligence of a

seven-year-old child. There are no problems to take home at night, no anxieties.

Then there are jobs where one major decision after another must be made, decisions which are seldom black or white but gray, problems with no satisfactory solutions but which demand the ability to select the lesser of several faulty solutions. There are jobs demanding the ability to please a board of directors, no two of whom agree. Consider the legislator who must with his vote on a highly controversial issue try to please his constituents.

Some jobs carry more than ordinary responsibility. A court recently ruled that a surgeon is responsible personally for the mistake of his anesthetist. Our highly mechanized society demands much repair work. Consider the times a serviceman due to inefficiency, lack of knowledge, or what have you, must come back again and again before he finally corrects the problem. Meanwhile, it is his employer who must bear the added expense, perhaps paying the serviceman more in wages than was charged for the job! Yet, the serviceman feels that he should make the same wages as his employer.

When the time comes that everybody makes the same, regardless of skill or responsibility, then everybody is going to prefer the less demanding job, the one requiring less responsibility, less skill. Why spend the money for a college education if the high school graduate makes just as much? Why assume the problems of management, including anxiety, taking problems home at night, if the employee makes just as much? These are very real problems.

Used to be that everyone dreamed of owning his own business, being his own boss, but there are many today who scorn this life. They prefer, perhaps wisely, working for a company with its good wages, fringe benefits, and lack of managerial responsibilities. Used to be that everyone dreamed of owning his own home. But now many feel that it is more desirable, less expensive to rent. With rising real estate taxes, with the state shifting a greater part of the cost of education to the local district, with higher building repair costs, perhaps they are right.

+++
PAUL DURHAM in the DIBOLL PRESS....Much has been said about Governor Dolph Briscoe's claim that the recent legislative session passed a considerable amount of legislation without an increase in state taxes. We too have taken note of the accomplishment in earlier issues, and we still feel that the 64th Legislature was correct in charting a moderate course.

But we are not beginning to hear from public school officials concerning the "no new taxes" business. The governor, they say, has hoodwinked the people with his claim of no new state taxes, while passing the buck to local school districts to come up with new funds. In other words, many school districts will be going to the property owners for more money.

Lt. Governor Bill Hobby in a recent newsletter defines the new program this way: "Basic to the new funding system is the shift from a multifactor economic index to market value in determining a district's local taxing ability."

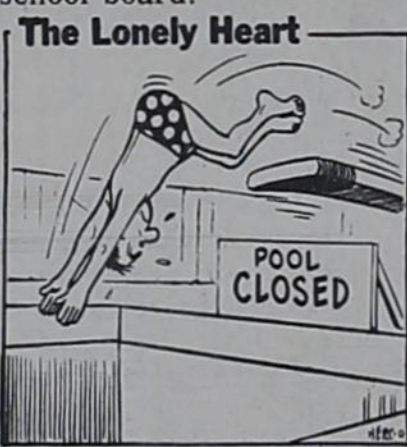

"Each district's local share of the total Foundation School Program costs will be determined in direct proportion to its ability to generate local ad valorem tax revenue. State funds will be distributed among the districts in an amount sufficient to finance the cost of each district's program not covered by its ad valorem tax revenue or state and county available school funds. The effect of this new system is to send more state money where the need for additional revenue is the greatest—the poor districts."

Several area superintendents subscribe to the thinking that the changes in the state foundation program will benefit the larger big city schools most, while putting the bite on the smaller, rural districts for more local money.

If this proves to be the case, there will likely be considerable taxpayer dissatisfaction when new property tax statements go in the mail October 1. However, it appears that most school officials are still cautious about the new program until they can sift through the legal tangles and learn exactly what it all means.

It is our guess that the state education foundation program will shift more of the tax burden to local school districts, and then this trend will continue. Right or wrong, such a move will continue to eat away at the savings and earnings of property owners, and state officials should not crow about no new taxes at the state level while putting new burdens on us locally.

There is just so much money in our pockets for taxes. It's now a matter of who gets blamed for taking more of it—the governor or the legislature or the local school board.

agri-facts
By John Ricci
Newcomer to the crowd is the Zapper. The "crowd" is the continuing deluge of technological innovations being utilized by the American farmer. Among the observable effects of this wave of modernity are the following: the new commercial cotton flour processing plant at Lubbock, soybean cheese experiments at Iowa State University, new hybrid wheat developments, new farm equipment . . . and the Zapper. Testing is continuing, but the initial results are interesting if not downright exciting for the most unique system of weed control since the hoe. Emitting a high energy microwave transmission directly into the soil . . . or Zapping it . . . has proven in a variety of tests to be an effective control device for weeds. All the side effects seem to be beneficial. First there are no harmful environmental factors and those involved in testing the zapper report a definite improvement in crop performance in the zapped soil. Welcome to the crowd, Zapper.

Reflections From The Blade

20 YEARS AGO—JULY 27, 1955

Work on Bovina's new school building is in the completion stage now, says W.H. Willoughby, superintendent. The painters lack some two or three weeks and there is still some work to be done on the portion of the building that was damaged by water due to a faulty joint in a copper water line June 23. The public address system is to be installed soon. Billie Sudderth has been contracted to do the yard work.

Representatives of the National Bank Examiners, Federal Deposit Insurance Corporation, and the Federal Reserve System were in Bovina Monday and Tuesday of last week. No estimate can be made on how long it will take for a decision to be made about Bovina's proposed bank, says C.R. Elliott, one of the directors.

Dr. Sam Johnston has begun his medical practice in Lubbock. He was graduated from Bovina High School in 1946, received his degree from Texas Tech in Lubbock in 1949 and was graduated from the University of Texas Medical School at Galveston in 1954. He interned in San Bernardino County Hospital in California, completing his internship in June.

15 YEARS AGO—JULY 27, 1960

Four vacancies remain in Bovina Schools' faculty for the coming school year after a band teacher was hired last week. John Foster, who has been junior high band director for the past two years at Lamesa, has been hired to direct Bovina's band. He plans a two-week band clinic before school starts to help emphasize the band program and start preparing the band for the first football game on Sept. 3—five days after school starts.

Bovina Glass Works, a business that has operated from the owner's garage here for the past four years, will move into a new location on Highway 60 in the near future. Owners of the business are A.R. and Wayne McCutchan, a father and son team that has conducted a contract glass business here since 1956.

First Baptist Church of Bovina announced last week the sale of their former church building to Calvary Baptist Church in Friona. The Friona church will move the building this week. It will be used both as an auditorium and educational plant by that congregation.

Connie Lindeman, Teddy King Exchange Double Ring Vows

Connie Sue Lindeman, daughter of Mr. and Mrs. Homer Lindeman of Friona, became the bride of Teddy Lee King, son of Mr. and Mrs. D.T. King, also of Friona at 7 p.m. Saturday, July 12.

The ceremony was performed in Friona's United Methodist Church by Bobby McMillan, pastor of the church.

The church was decorated with a candle arch in the center of the altar with a center bouquet of agapanthas, blue and purple delphiniums and baby's breath. The kneeling bench was decorated with two bouquets of purple gladiolas, blue and purple delphiniums and baby's breath on white pedestals on either side.

Mrs. Johnnie Walters, organist, and Lisa Cummings, both of Friona, presented "Twelfth of Never" and "We've Only Just Begun."

As the bride was escorted to the altar and presented in marriage by her father, she wore a Victorian styled gown of candlelight silk georgette over peau de soie accented by re-embroidered Alencon lace. Lace applique on the sheer silk bodice traced an intricate pattern which featured a deep scallop above the empire waistline. The sheer fitted sleeves repeated the lace applique just above the wrist and soft flounces fell over the wrists. The gown featured an a-line skirt which swept to back fullness and cascaded to a wide chapel length train. Her veil of candlelight silk illusion edged in lace extended from a picture hat. The bride carried a nosegay of blue carnations, purple agapanthas and baby's breath.

Following tradition, the bride wore a sixty year old lavalere which belonged to the bride's maternal great-grandmother, Mrs. Emmett Wells of Grapevine, Texas for something old. Something new was a gold watch, a gift from the groom. Something borrowed was a gold bracelet from the bride's mother. She wore the traditional blue garter. Pennies minted in the couple's birth years were worn in her shoes.

Cindy Gammon of Friona was maid of honor. Bridesmaids were Johnnie Walter of Friona, Suzann Phillips, cousin of the bride from Lubbock and Kathy King, sister of

the groom from Lubbock.

The feminine attendants wore formal length gowns of blue and purple printed organza with a moulded bodice softly gathered to a front midriff, featuring a v-shaped neckline and soft ruffle type sleeves. They wore large white picture hats trimmed with organza streamers and carried clusters of purple and blue carnations.

Gregory Clayton of Lloyd, Florida was best man. Groomsmen were Roger White of Brownwood, Texas, Dale Parsons of Friona and Dee King, brother of the groom from Friona. Serving as ushers were Ted Lindeman, brother of the bride and Kelwin King, brother of the groom, both from Friona.

A reception was held in the Fellowship Hall of the church.

The table was covered with a white lace cloth with a white satin drape tied with blue bows. The three-tiered wedding cake was topped with white wedding bells.

A centerpiece of blue carnations, purple agapanthas and baby's breath and candelabra of purple candles centered the table setting. Punch was served from a silver punch bowl.

Amanda Mason, Amal Malouf, Kim Bryant and Pam Wilcox served cake and punch. Lori Long, cousin of the bride, and Marilyn Jones served chocolate bundt cake from the groom's table.

Mrs. Rusty Lindeman, sister-in-law of the bride from Mesquite,

Mrs. Teddy King

Texas, presided at the guest register.

Others assisting with the reception were Mrs. Olan Turner, Mrs. Billie Sides, Mrs. Johnny Hand and Mrs. Mack Ragsdale.

Special guests were Mrs. Jewell Lindeman of Kress and Mrs. Madalene Gay of Grapevine, Texas, grandparents of the bride, and Mrs. Clarice King of Plainview and Mrs. Clara Prosser of Friona, the groom's grandmothers.

For a wedding trip to Ruidoso, New Mexico, the bride chose a long three-piece purple and white ensemble. She wore a corsage of summer flowers.

The couple will be at home at Brownwood, Texas, where they will be freshman students at Howard Payne University.

The bride is a 1975 graduate of Friona High School, formerly employed at Friona State Bank.

The groom is also a graduate of Friona High School and will be a student at Howard Payne University in Brownwood, Texas.

Spears, Boozers

Attend Austin Jaycee Meeting

Mike Spears and Mr. and Mrs. Lowell Boozor of Bovina attended the Jaycee summer board of directors meeting and a banquet honoring the Five Outstanding Young Texans this past weekend in Austin. Spears is a state director; Boozor is president of the Bovina Jaycees.

Directors met to plan programs and projects for 1976, according to Spears.

Among the outstanding Texans honored at the banquet was Jim Conkwright of Hereford.

Sgt. Webb

Arrives At Altus AFB

U.S. Air Force Master Sergeant Bobby H. Webb, son of Mrs. Bessie L. Webb of Bovina, Texas, has arrived for duty at Altus Air Force Base, Oklahoma.

Sergeant Webb, first sergeant for the 11th Air Refueling Squadron, a part of the Strategic Air Command, previously served with an Air Force support unit in Turkey.

The sergeant attended Danville (Ark.) High School. His father, Claudia H. Webb, resides on Retirement Ranch, Clovis, New Mexico.

PENNI LOU WADLEY...John Wadley of Oklahoma City announces the engagement and approaching marriage of his daughter, Penni Lou Wadley, to Charles Stephen Ivy, son of Mr. and Mrs. Tony Ivy of Vinita, Okla., formerly of Bovina. The

couple will exchange wedding vows Saturday, August 9, in the First Presbyterian Church in Oklahoma City. Miss Wadley was graduated in May from Oklahoma State University at Stillwater. Ivy will be a senior at OSU this fall.

Caldwells Have Son

Mr. and Mrs. Bruce Caldwell of Bovina announce the birth of a son at 1:27 a.m. Sunday, July 27, at St. Mary's Hospital in Lubbock.

Named Brandon Scott, the new arrival weighed six pounds, 15 ounces, and was 19 inches long at birth.

Mr. and Mrs. Caldwell are the parents of one other son, Chris, two.

Grandparents are Mr. and Mrs. Bedford Caldwell and Mr. and Mrs. Don Murphy, all of Bovina. Great-grandparents are Mr. and Mrs. Elvin Murphy and Elmer Patton, all of Ballinger and Mrs. H.D. Phillips of Lubbock.

Caldwell, recently discharged from the U.S. Army is engaged in

farming with his father. Mrs. Caldwell is the former Miss Darlene Murphy.

Baptist Men Host August Breakfast

Men of the First Baptist Church will host the August Christian Men's Fellowship Prayer Breakfast at 6:30 a.m. Monday in Fellowship Hall of the church.

All men of the community are invited to attend.

Members of the host church will prepare the breakfast with lay members in charge of the brief program.

How to get the most from the lease.

Why bother looking at other systems when you can lease the best system available? Gifford-Hill's 360.

You don't have to tie up money buying a system. Instead, you can sign up for one of the most competitive lease programs in the irrigation equipment market. That frees your capital to put into land, equipment or whatever you need.

The 360 is the most reliable system on the market. And it's backed by one of the most reputable service networks in the industry.

So check with us about the options available to you with Gifford-Hill's leasing program. And let us show you why the 360 is the most for the lease.

Mrs. Kirkpatrick
OYW Candidate

The Board of Advisors for the Outstanding Young Women of America Awards Program announced this week that Mrs. Daryl (Karen) Kirkpatrick of Bovina has been selected for inclusion in the 1975 program.

Mrs. Kirkpatrick, nominated by the Bovina Woman's Study Club, is president of the Chamber of Commerce and Agriculture, a member of the Young Homemakers Chapter here and active in other church and civic work.

The nation-wide program was conceived, and is today guided, by leaders of the nation's major women's clubs and organizations. The board is chaired by Mrs. Dexter Otis Arnold, honorary president of the General Federation of Women's Clubs.

"In every community there are young women working diligently to make their cities and country a better place in which to live," said Mrs. Arnold. "They achieve personal excellence in their chosen professions, homes, clubs and churches. They are the backbone of their communities and they deserve to be recognized for their achievements."

Mrs. Kirkpatrick, along with about 6,000 other nominees throughout the United States, is now being considered for further state and national awards. This fall, 51 Outstanding Young Women, one from each state and the District of Columbia, will be named as their state's Outstanding Young Women of the Year. From the state winners, the nation's Ten Outstanding Young Women of America for 1975 will be selected by a panel of distinguished judges. The national winners will be presented in an awards ceremony this fall in Washington, D.C.

"Our Board of Advisors and Editors salute all those chosen for this honor. We take great pride in bringing their accomplishments to the attention of the public," Mrs. Arnold concluded.

GOLDEN WEDDING ANNIVERSARY....Mr. and Mrs. Roy Delashaw will be honored with a reception honoring their 50th wedding anniversary Saturday, August 2, at 405 Farley Trail in Austin. Calling hours will be from 2 to 5 p.m. Hosting the event will be their children—Leroy Delashaw of Oklahoma City, Jim Delashaw of Austin, Dr. J.B. Delashaw of Longview, Wash., Jerry Delashaw of Tulsa, Okla., and Mrs. Linda Hyde of Austin. Mr. and Mrs. Delashaw were married August 1, 1925, in Frederick, Okla. They operated a meat business in Electra and owned and operated a grocery in Levelland before moving to Bovina in 1946. The couple farmed here until 1954 when they moved to Plainview where they operated the Delashaw Caged Egg Farm. The couple retired in 1973 and moved to Austin. They have five children, 10 grandchildren and two great-grandchildren. Three of the children attended Bovina Schools. Dr. J.B. Delashaw is a graduate of Bovina High School. Friends of the couple are invited to attend the reception.

Son Born To Pikes

Mr. and Mrs. Sterling (Rick) Pike of the Rhea Community announce the birth of their first child at 4:07 p.m. Monday, July 21, at Parmer County Community Hospital in Friona.

Named Michael Shane, the new arrival weighed seven pounds, eight ounces.

Grandparents are Mr. and Mrs. Earl Dean Boyd of Rhea and Mr.

and Mrs. Harold Pike of Amarillo. Great-grandparents are Mr. and Mrs. Lloyd Boyd of Ft. Scott, Kan., Mr. and Mrs. J.A. Mills of Mapleton, Kan., Mrs. Grace Peterson and Mrs. Inez Pike, both of Council Bluffs, Neb.

Pike is employed by Tom Paine in Bovina. Mrs. Pike is the former Miss Dala Boyd.

ON HECE

Mrs. Corn Attends Workshop

Mrs. Gwen Corn, home economics instructor at Bovina High School, recently completed a five-day Home Economics Cooperative Education (HECE) Workshop held to train new HECE teachers. Sponsored by the Department of Occupational Education and Technology of the Texas Education Agency, the workshop was held July 7-11 at the Joe C. Thompson Conference Center on the University of Texas campus in Austin.

Home Economics Cooperative Education, which will be offered at Bovina High School for the first time this year, is a program which provides in-class instruction and on-the-job training for high school students who are interested in home economics-related occupations.

Students enrolled in the

program will attend classes at school during a part of each day and will be employed for a minimum of 15 hours a week in a home economics related occupation.

In addition to regular classes, the students receive daily instruction related to the world of work and the home economics occupation in which the student is employed.

Students eligible to participate in the program are juniors and seniors, 16 or older. Approved occupations for HECE students include art and craft aide, bridal consultant, child care aide, clothing assistant, communications aide, companion to the elderly, consumer aide, dietetic aide, fabric coordinator, fashion coordinator, floral designer, food caterer, food

service employee, home furnishing aide, housekeeping management assistang, physical fitness assistant, tester of food and tester of textiles.

IN AMARILLO

Gwen Clements Takes Course

Mrs. Gwen Clements of Bovina, piano and organ instructor, recently attended the National Keyboard Arts Teaching Techniques '75 Workshop in Amarillo.

The three-day workshop for teachers was one of a series held in 29 cities this summer. Conducting the workshops were members of the Keyboard Arts staff—musicians and educators who have been instrumental in the development and teaching of Keyboard Arts music education materials.

National Keyboard Arts, headquartered in Princeton, N.J., is a nationwide network of music educators who continually pool their knowledge and experience in order to develop more effective ways to teach.

Highlight of the workshop was presentation of the

basic music study program, a newly-revised course introduced for the first time this summer. Conducting the workshops were members of the Keyboard Arts staff—musicians and educators who have been instrumental in the development and teaching of Keyboard Arts music education materials.

National Keyboard Arts, headquartered in Princeton, N.J., is a nationwide network of music educators who continually pool their knowledge and experience

Also included in the workshop were sessions on sight reading, ear training, jazz improvisation and composition. Classes on organized and flexible teaching approaches were available and session on such key lesson factors as practice, technique and assignments were also offered.

ELECTRICALLY DRIVEN
More dependable. Not dependent on weather conditions. Does not rob water from the sprinkling system. Can be run to different position in field without having well in operation.

RUGGEDLY BUILT
Most systems were developed under ideal conditions (i.e. sandy, level land). The Zimmatic was developed under some of the most adverse conditions (i.e. heavy soil, hilly land).

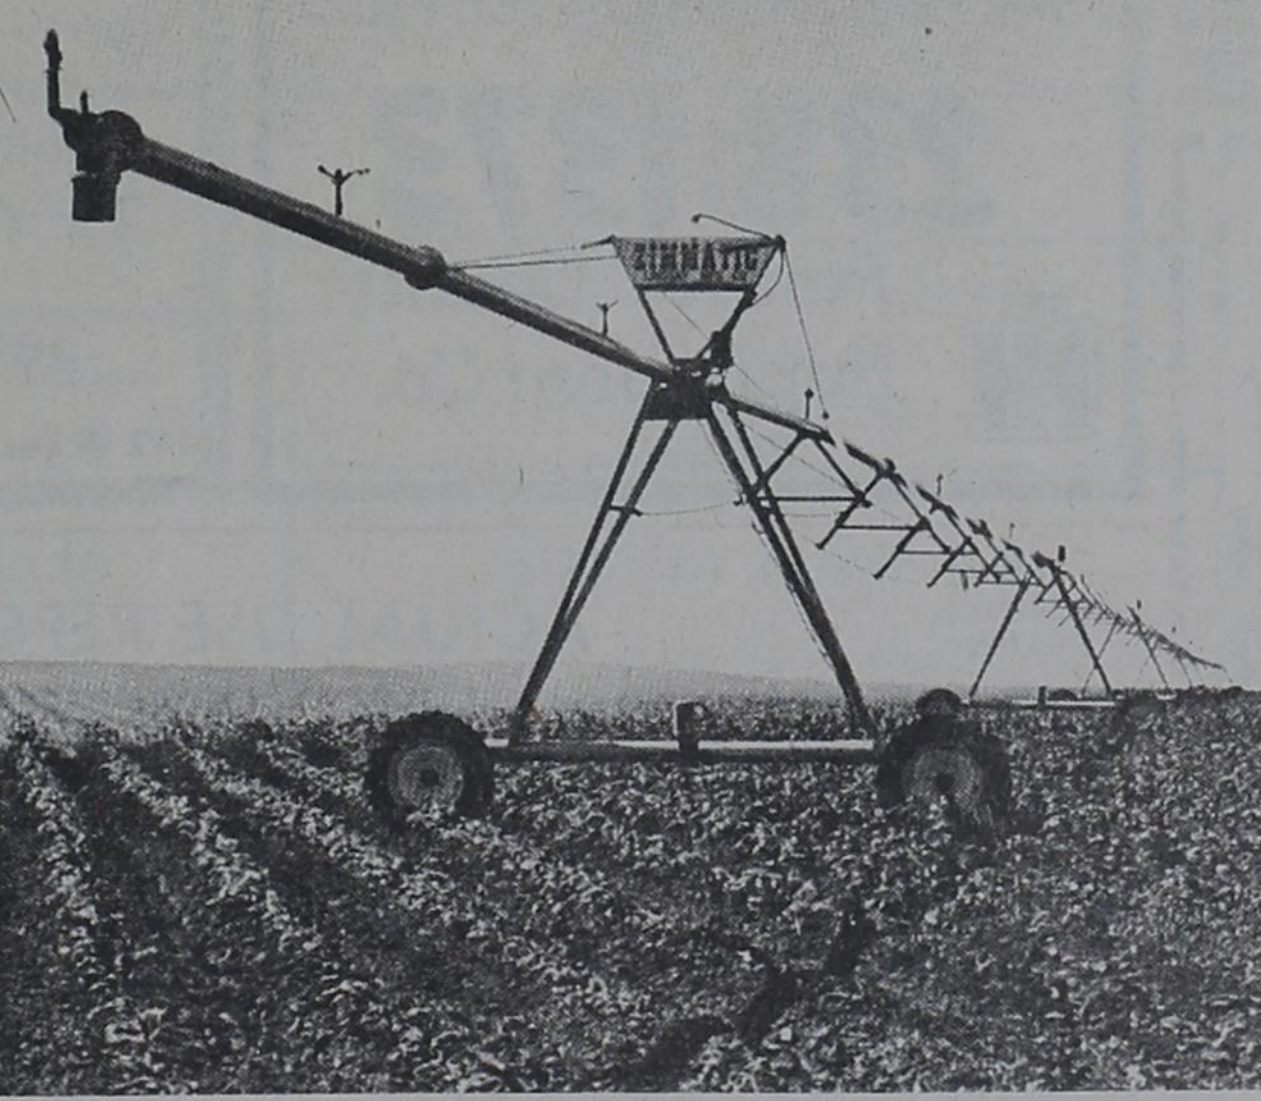

ENCLOSED DRIVE
Worm gears that drive the machine are completely enclosed in oil. Timken bearings are used throughout the system. No chains to rust and break. No soft steel ratchets to wear out. Double gears prevent the system from coasting downhill.

UNI-KNUCKLE JOINT GIVES UNLIMITED FLEXIBILITY ON HILLSIDE
PAT. No. 3738687
The exclusive Uni-Knuckle allows the pipe line to go up and down sharp hills without having any pesky hoses to stretch out of shape.

FLOATING TOWERS
Pat. Pending
The Zimmatic features a floating drive-towers are attached to the pipe by means of a sleeve. This allows the towers to rotate. One tower can climb a steep incline while the next tower is travelling downhill without putting any stress on the pipe.

COMPLETELY REVERSIBLE
The Zimmatic can reverse itself automatically or with a push of a button. On most reversible systems you have to go to each tower and make adjustments before you can make the machine travel the other direction. Reversibility is a must in self-propelled irrigation.

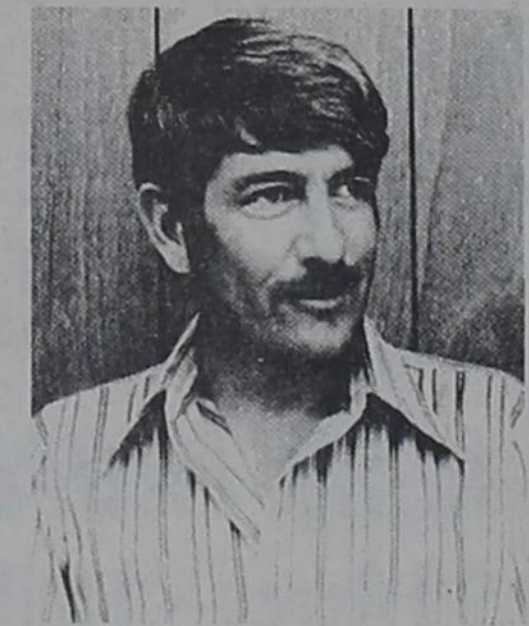

"Built By Lindsay!"
You Can't Buy Better

STURDY UNDER-TRUSS DESIGN
The under-truss design adds strength to the system. Some under-truss machines have problems with rod shifting. Zimmatic's braced truss legs will not allow this to happen. Systems that have cable suspension have trouble with stretching and sagging.

EXTRA LONG WHEELBASE
The 14' wheelbase on the towers combined with the rotating sleeve drive units and Uni-Knuckle gives the Zimmatic flexibility that no other machine can match. This allows the machine to operate on land that no other would dare try. Some are too top-heavy, while others have trouble with pipe breakage due to pipe twisting.

LEGAL NOTICE

The Deaf Smith Electric Cooperative, Inc., P.O. Box 753, Hereford, Texas, 79045, is making an application for a loan from Rural Electrification Administration which provides for the construction of approximately 9 miles of 69 KV transmission line and one 7500 KVA substation. This line will be along a general point 2 miles South of Dimmitt in Castro County, East about 2 miles, thence North about 2 miles to U.S. Highway 86, and East 5 miles. This substation will be located on this transmission line, about 4 miles West of Nazareth. The loan also provides for approximately 200 miles of distribution line to be constructed in Castro, Parmer, Oldham and Deaf Smith Counties.

These facilities will make it possible for the Cooperative to meet the increasing demands for electric power of the member owners. If there are any comments on the environmental aspects of the proposed construction, it should be submitted to the Cooperative on or before September 1, 1975. Additional information may be obtained at the Cooperative office at the above address. 1tc

No Sugar Program Hurts Beet Farmers

It is an important factor in local and state economies. Sugar is one of the few foods the nation does not produce in sufficient quantity to meet its own needs. The U.S. presently imports about half its requirements, Bunker pointed out. In the absence of a domestic industry, American consumers would be totally vulnerable to prices set by foreign cartels or embargoes established by such combinations, Bunker said. According to Bunker, the nation's balance of payments deficit is significantly affected by the importation of sugar, citing Department of Commerce data showing 11.5 billion pounds of raw sugar was imported in 1974 at a cost of \$2.25 billion. In contrast, the domestic industry invigorates the economy. In 1974 beet sugar processing plants purchased 22.1 million tons of sugarbeets valued by the U.S. Department of Agriculture Crop Reporting Board at \$971 million, Bunker pointed out. Industry payrolls and purchases of other raw materials by the nation's beet processing plants amounted to more than \$200 million annually. In addition, the industry spent \$316 million during the last 10 years for new capital

expenditures, Bunker said. Rowland M. Cannon, President of the Utah-Idaho Sugar Company, Salt Lake City, testified in Washington on behalf of the domestic beet sugar processing industry. Water has really been traveling around during the rains of the last few weeks. Neighbors become upset with one another when rain water starts moving around. Rain water is hard to control once it gets enough volume and enough velocity to start causing problems. But, rain water can be controlled. If runoff is controlled on short watersheds the water can never gather enough force to cause any damage. What does this mean? It means that on dryland farms and sprinkler irrigated farms parallel terraces will keep the water runoff well controlled. On furrow irrigated farms the row lengths and the degree of slope are the key factors. The steeper the slope the shorter the rows have to be. If you are interested in controlling the water on your farm before it washes away your neighbor--contact the Soil Conservation Service in Friona.

INSUR-MATION
Jay Claborn
Parmer County Farm Bureau Insurance, Phone 247-3280 or 247-3152
Where is the best place to keep my policies?
At home where you and your family have easy access to them. Insurance policies are simply a copy of a contract. There is no reason to keep them in a safety deposit box since if the policies are lost, stolen or in a fire, duplicates can be obtained from your company. Occasionally legal problems make it preferable to keep policies within easy reach. In the case of life insurance policies, a beneficiary might need a court order to open a safety deposit box and this could delay payment. Numbers of the policies and company names should be kept in a separate place from the policies as a double check.

Sixty County Workers Receive Disability Pay

"Parmer County has 60 disabled workers drawing \$11,000 per month disability social security benefits," William Ent, social security operations supervisor, stated today.

"Much confusion exists concerning how disabled one must be to receive this type of social security benefit. The degree of disability required for eligibility is written into the Social Security Law.

A worker is considered disabled if his medical evidence shows that he has a physical or mental condition which: (1) prevents him from doing any substantial gainful work, and (2) is expected to last (or has lasted) for at least 12 months, or is expected to result in death.

"Naturally," Ent continued, "such a definition rules out short term illness or payment for injuries which would not ordinarily be expected to keep a worker off this job for a year.

"If a worker has no idea

how long he will be off work because of illness or accident, he should resolve any doubt in favor of filing a claim for disability benefits with the nearest social security office or representative," Ent emphasized.

SCS Publishes Book On Food

The Soil Conservation Society of America has announced publication of a 53-page softbound book on the world food situation.

In announcing the special publication, H. Wayne Pritchard, the Society's executive vice-president, expressed concern about food production and the ever-increasing pressure on land resources.

Single copies are available from the Soil Conservation Society of America, 7515 Northeast Ankeny Road, Ankeny, Iowa 50021, for \$1.50, postpaid. Quantity prices are available upon request.

"Question No. 1 - is he worth saving?"

LACK OF RESPECT FOR AUTHORITY

Nauseating statistics give unmistakable evidence of decay in our Western civilization. The rapid increase in drunkenness, divorce, and crime in our nation is alarming. In spite of all efforts to curb them, these excesses continue to climb.

Crime, according to latest reports, is increasing four times as fast as our population. We cannot continually lower our moral standards of our country, but "We must return to the teachings of God if we are to cure this sickness." Righteousness exalts a nation, sin is a reproach to any nation.

The divorce rate soars at a dizzying pace. Our nation has become so inebriated on the "wine of custom," aged "twenty long years" in Hollywood, that the authority of Divine Law concerning divorce and remarriage is in total oblivion to most of the population. The United States reels under the tragic truth that she holds the record for the highest rate of divorces on this planet! The stench of this decay will not be changed until respect for authority be restored.

Immorality among our nations youth is a frightening forecast for the future. Seventy five percent of all boys and 50 percent of all girls have engaged in immoral relationships before graduation from high school according to a recent article in a leading journal. The author concluded that the basic problem was the failure of parents to teach their children what is right and wrong! A failure to teach them respect for authority to govern conduct.

In every instance in past history, when the morals of a nation have declined, that nation has fallen. As a nation, we are precariously balanced on the edge of oblivion because we have grown fat on a diet of freedom and prosperity without due regard for the restrictions of authority, which are essential for the development of the muscle, fiber and bone of character.

Divorce Rate Lower Here, Report Shows

How high is the divorce rate in Parmer County compared with that in other communities? How many local residents are divorced? How many have remarried after being divorced?

For the great majority of men and women in the local area marriage is a once-in-a-lifetime undertaking. For others, who start out with equally high hopes, their marriages end up on the rocks.

In general, the divorce rate has been on the rise for a number of years and is still mounting. This is indicated in the latest surveys by the Department of Commerce, the National Center for Health Statistics and others.

In Parmer County, it appears, the number of marital splitups is on the low side. There are fewer divorces and separations, in proportion to

population, than in most parts of the United States.

According to the latest tabulations, some 23 out of every 1,000 local residents over the age of 14 are either divorced or separated from their spouses.

The comparable national average is 53 per 1,000. In the West South Central States the rate is 55 and, in the State of Texas, 56.

During 1974, the figures show, there were approximately 970,000 divorces in the United States. That was 57,000 more than in 1973.

On the other hand, the number of marriages that took place in the year, 2,235,000, was unexpectedly small. It was the first time since 1958, in fact, that a drop was recorded.

The decline, at a time when the

population of marriageable age was larger than normal, is attributed to prevailing economic conditions. Many young people have postponed their marital plans.

Because of the decrease in marriages and the increase in divorces, there was 1 divorce in the year for every 2.3 marriages.

In Parmer County, according to the most recent figures, there are some 160 men and women who are divorced or separated.

Many others, who were once in the divorced column, have since remarried. In general, it has been found, there are about 2.5 such persons for every one who is currently divorced.

On that basis, it is estimated that there are about 400 local residents in that category.

Beef Equation

Prepared by The Beef Industry Council of The Meat Board

$$1 \text{ cow} + 1 \text{ bull} + \text{grass} + \text{hay} = 80 \text{ lb. calf}$$

$$1 \text{ calf} + \text{cow's milk} + \text{grass} = 400 \text{ lb. calf}$$

$$1 \text{ calf} + \text{grass} + \text{hay} + \text{crop residues} = 800 \text{ lb. yearling}$$

$$1 \text{ yearling} + \text{grain} + \text{hay} \text{ or silage} = 1,100 \text{ lb. steer}^*$$

*Generally cattle are not fed grain during the first 3/4 of their lives. Total Grain consumption ranges from 2 to 3 lbs. of grain per pound of market weight, or about 2,100 lbs. of grain in total.

the germination of the seed as well as the survival of the seedlings.

Town people can utilize cover also. In odd areas where there is no grass such as alleyways, small grain can and does stop blowing dirt and looks better than weeds.

First Application Relieves Itchy Skin Rash

Also Helps Promote Healing
Medicated Zemo quickly relieves itching, irritated skin. Then Zemo helps nature heal and clear red, scaly skin rashes externally caused. For fast relief, get Zemo Ointment or Liquid.

SCS News

Cover cropping is an old out-dated practice that is no longer pertinent to today's technology. Wrong! Even though our father's used it when the old mankiller tractors were being used it is still useful. In fact more uses are being found all the time.

The age old use of sowing turnrows to small grains to keep them from blowing is still good. Now it has the added attraction of controlling erosion from tallwater.

Even irrigation will not boost new grass seedlings enough to give it the vigor and size to survive the blow season. A dead litter crop will protect young seedlings and prevent high winds from killing them. This same dead litter crop also insulates the soil so that there is hardly any evaporation loss. This gives the grass a better chance because moisture conditions are better. When grass is seeded where no irrigation water is available a dead litter cover is essential for

Spain Retires FROM Florida.

OR, HOW AMERICA picked up FLORIDA for \$5 million.

No luxury hotels. No drinks served at the pool. Just sand and palms and alligators. And a lot of fighting for it that destroyed property throughout Florida.

Americans in Florida figured Spain owed them \$5,000,000 in property damages.

Our government offered to pick up the tab for Spain, if Spain would retire from Florida. Spain accepted. And was out.

You know, money from our citizens helped pay for things back then. And it still does.

Today, you can help with U.S. Savings Bonds. And at the same time, they let you build savings. Easily. Automatically.

This happens when you join the Payroll Savings Plan, or buy Bonds where you bank. Year after year, you accumulate more and more savings. And it can add up to a bundle.

So maybe you'd better start this week. Because, someday, you'll have to retire, too.

Now E Bonds pay 6% interest when held to maturity of 5 years (4 1/2% the first year). Lost, stolen or destroyed Bonds can be replaced if records are provided. When needed, Bonds can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

Take stock in America.

200 years at the same location.

OFFICIAL MEDALLION...This design was selected by the Parmer County Historical Society as the official design of the Parmer County Bicentennial Medallion which will be coined by the organization. The first choice design was submitted by

Bobby Wied of Friona. Medallions are expected to be available for purchase by November 1. Purchase locations and prices for the medallions will be announced at a later date.

Historical Society Selects Design

A design for a Parmer County Bicentennial Medallion has been selected by the Parmer County Historical Commission and is to be coined for sale. The sketch was submitted by Bobby Wied, an instructor in Friona Schools.

The obverse design of the medallion features a bust of Martin Parmer, for whom the county is named. The county's location is outlined on the map of Texas with the dates 1776, 1876 and 1976 inscribed at the bottom of the medallion. At the top of the medallion are the words, American Bicentennial and Parmer County.

The dates on the medallion represent the following--1776, the nation's birth year; 1876, the year in which Parmer County was created; and 1976, the Bicentennial of the United States.

The medallion should be available for purchase by Nov. 1, according to Hugh Moseley, chairman of the historical society. A list of purchase locations and prices for the medallion will be released at a later date.

COUNTY AGENT REPORT

AFTER PUTTING a lot of hard work into that vegetable garden, it's important to harvest crops at the proper time.

Produce that is picked too soon can be either too tough or too tender and often lacks in flavor or substance. That which is harvested too late may also be tough, fibrous or squasy, depending on the crop. Once produce passes its peak of maturity, its flavor begins to decline.

Many vegetable crops should be harvested on a regular basis as they will mature over a period of time. Certain crops such as okra, squash, tomatoes, beans and cucumbers can be harvested every two or three days.

Most vegetables can be easily picked or snapped off the stalk or vine. However, care should be used not to damage the plants. It may be best to use a knife when harvesting certain crops such as okra and eggplants. Also, use care to avoid stepping on vines or breaking stems when harvesting vegetables.

HECE Program

(Continued from Page 1) competent to enter full-time employment upon graduation from high school.

Jacobs stated that an advisory committee of local business men and women will be established to assist Mrs. Corn with the program.

Mrs. Corn will be responsible for the selection and placement of students and will correlate the classroom and practical education.

Open letter to Publisher Bill Ellis

RE: Bulltown Bulletins 7-23-75
Water on US-60 Monday 7-21-75

There is no practical way or place to build a "dam" to keep the water off US-60 from rains such as we had 7-21-75.

We would like to suggest applied Soil & Water Conservation. There is no telling how much water and soil were lost in that rain. Applied conservation would have reduced these losses.

When we think of the good fertile topsoil and water lost during these rains it hurts. Think of the irrigations that could have been saved by applied conservation, instead of long rows running up and down the slopes.

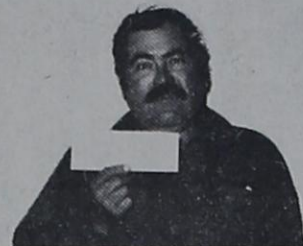

Sincerely,
Herb Evans
Soil Conservation Service
Friona, Texas

She attended a five-day workshop recently in Austin, receiving instruction in all phases of the program.

Any business firm or individual interested in employing an HECE student for the coming school year may contact Mrs. Corn or the Bovina High School office.

LAST WEEK

Rain Delays Play In Softball Loop

Three games were played Wednesday night of last week in the men's slow-pitch softball league with the five-inch rainfall here causing postponement of all other games on the schedule.

A number of men worked on the baseball field Wednesday in hopes that the field would be usable the remainder of the week. However, a one-inch rain Thursday afternoon forced the remainder of the games to be called.

The postponed games will be made up by tonight (Wednesday), according to Wayne Spears, assistant commissioner of the league.

The Bovina Jaycee-Farwell-Jaytee tilt, originally scheduled Monday night of last week, was played Monday night; the Big Nick Traders-Sherley Grain, a Thursday night game, was played last night (Tuesday); with three make-up games on tap tonight (Wednesday). Of the three played tonight, one was a Thursday night game and two were Friday night games.

In games Wednesday night of last week, Big Nick's Traders defeated Charles Oil, 27-6; Roy's Repair downed Joe's Braves, 17-6; and Sherley Grain edged Agri-Sprayers, 11-9.

In the first tilt of the evening, Mike Grissom went the distance on the mound for Big Nick's Traders with Billy Shepherd tagged as the losing pitcher for Charles Oil.

In the five-inning tilt, called because of the 15-run rule, the Traders picked up five runs in the second inning, nine in the third, two in the fourth and 11 in the fifth inning. Charles Oil scored three runs in the second and three in the third inning. For the Traders, Mike Spears and Jim Atwell picked up four hits in five times at bat with Grissom aiding his cause with three hits in four times at bat.

In the second game of the evening, Roy Lee Stowers was credited with the win for Roy's Repair with Joe Rodriguez tagged for the loss. Roy's Repair picked up six runs in the

second, eight in the third and three in the fourth innings. Joe's Braves tallied one run in the first, four in the fourth and one in the sixth innings. Leading hitters for Roy's Repair were Elbert Shelby, three for four and Doc Shelby, a perfect four for four.

In the nightcap, Eldon McCormick went the distance on the mound for Sherley Grain to pick up the win with Manuel Quintana the losing pitcher. Sherley Grain scored four runs in the third, four in the fourth and three in the fifth innings. Agri-Sprayers started off in the lead with one run in the first, then tallied one in the third, two in the fifth and five in the seventh to almost pull the game out of the fire.

Games on tap for the next five playing nights are as follows:
Tonight (Wed.)--Bovina Pump versus Charles Oil, Farwell Jaycees

versus Roy's Repair and Charles Oil versus Agri-Sprayers.

Thursday--Farwell Jaycees versus Agri-Sprayers and Charles Oil versus Joe's Braves.

Friday--Bovina Jaycees versus Sherley Grain and Bovina Pump Co. versus Roy's Repair.

Monday--Bovina Pump Co. versus Sherley Grain and Farwell Jaycees versus Charles Oil.

Tuesday--Big Nick's Traders versus Roy's Repair and Bovina Pump Co. versus Agri-Sprayers.

STANDINGS
As Of July 25

TEAM	W-L	Pctg.
Big Nick	4-0	1.000
Roy's Repair	4-0	1.000
Farwell JCs	2-2	.500
Sherley Grain	2-2	.500

EXPECT 16 TEAMS

BTD Slow-Pitch Tournament Set

A new attraction to the 12th Annual Bull Town Days festivities has been added to the slate for sports buffs in the area—a double elimination slow-pitch softball tournament scheduled to begin Thursday, Aug. 14, and continue through Sunday, Aug. 17, according to Mike Spears, director of the tournament which will be sponsored by the Jaycees.

Some 16 teams are expected to enter the event with teams entering from Hereford, Muleshoe and Clovis in addition to Bovina. Eight teams have entered the tournament as of

this week, Spears said, with confirmation expected from several others by next week.

Any team interested in entering is asked to contact Spears. Entry fee will be \$40 and a new softball, he added. Trophies will be awarded the championship team and second and third place teams.

Teams entering the tournament by this week included Big Nick's Traders, Roy's Repair and Bovina Jaycees from here, the Lumberjacks of Muleshoe, Wade's Sporting Goods of Clovis and three teams from Hereford.

MINOR DIV. CHAMPS.....Agri-Sprayers, Inc., coached by Holly Anderson and Melba Moore, took championship honors in the minor division of the girls' summer softball program here. The girls' program

was sponsored by Lions Club and Jaycee-Ettes. Members of the team were Gail Turner, Tracey Moore, Sally Ann DeLaRosa, Delma Flores, Shana Gober, Jodi Stone, Kathleen Jenkins, Isabel Garcia, Valerie

Lynn Shepherd, Kathy Moore, Anissa Atkins, Anna Contrasa, Melissa Chisom, Vicky Tamez, Bennethe Williams, Stacey Jarvis and Marcella Ransom.

MAJOR DIV. CHAMPS...Sponsored by Roy's Repair and coached by Olga Serna and Anita Serna, Roy's Repair capped the championship in the major division of the girls'

softball program this summer. Members of the team are, front row, left to right, Kim Naegle, Vickie Shepherd, Gwynn Powell, Wendy Hall and Lisa Schilling; back row,

left to right, Melissa Allisor, Ginger Glascock, Lisa Shepherd and Lisa Schilling. Not present was Lynette Bentley.

Farwell JCs Set Tennis Tournament

A tennis tournament, sponsored by the Farwell Jaycees, has been scheduled for Thursday, Aug. 7, through Sunday, Aug. 10, at the Farwell High School tennis courts, according to a spokesman for that organization.

Deadline for entering competition is Friday. Entry fees are \$5 for

singles and \$10 per team for doubles. Those interested in entering the competition may contact Robert White, Doyle Johnson, Johnny Actkinson or Larry Jones.

Four divisions of play, including men's and women's singles and doubles, will be featured in the

tournament. White said if enough interest is displayed in the tournament, the Jaycees plan to make it an annual event.

New lights are expected to be installed at the courts in time for the tourney.

Helps Shrink Swelling Of Hemorrhoidal Tissues

caused by inflammation

Doctors have found a medication that in many cases gives prompt, temporary relief from pain and burning itch in hemorrhoidal tissues. Then it actually helps shrink swelling of these tissues caused by inflammation.

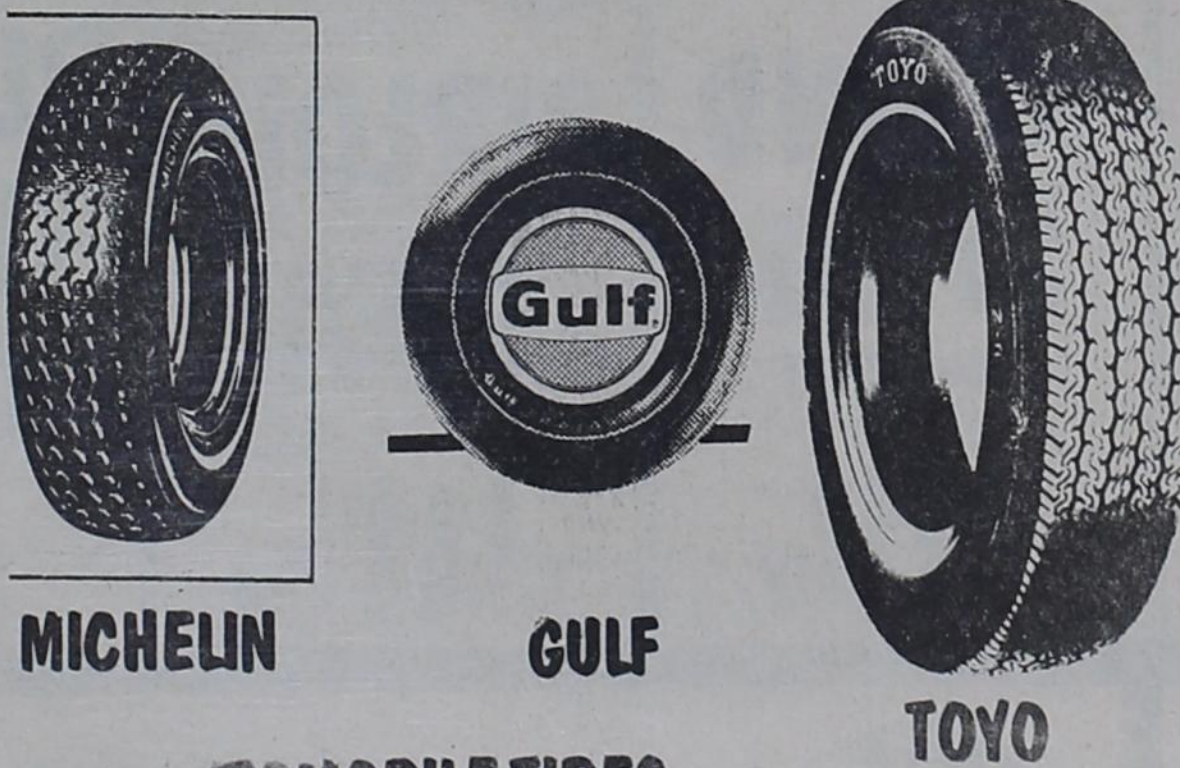

The answer is Preparation H®. No prescription is needed for Preparation H. Ointment or suppositories.
