Rebel Battleship Sunk by Loyalist Airplanes

When Spanish government planes bombed and sank the rebel warship Espana, above, in the Bay of Biscay, off Santander, it was the first time in world history that a big battleship had succumbed to air attack under war conditions. The battle was dramatic. A little British freighter tried to run the Bilbao blockade. The 15,452-ton Espana dove to aid the freighter and for Santander. The Espana opened fire and the freighter flashed radio calls for aid. Thirty-two Loyalist planes in Santander took to the air, circled over the Espana and began dropping bombs. There was a direct hit on the poopdeck. The Espana sank.

News From 4-H Clubs of County

At a recent meeting attended by 100 Eastland county 4-H club boys, three Eastland county 4-H club boys were elected as officers of all the boys 4-H clubs in the county. The following officers were elected at this meeting: President, Marlin Sneed, Ranger; vice president, Lawrence Taylor, Carbon; secretary-treasurer, Elbert Bennett, Kokomo.

The county 4-H club officers will meet with the county agents once each month to formulate

plans for boys' 4-H club work of Eastland county. This group will formulate plans for county and district encampments, 4-H club Sundays, 4-H club achievement days, 4-H club banquets, 4-H club rallies, as well as to assist other boys in choosing and carrying out of club demonstrations.

SEED DELIVERED FOR COTTON DEMONSTRATION
 Seed and fertilizer has been delivered to seven Eastland county 4-H club boys who expect to use three acres of cotton for their 4-H club demonstration this year.

The cotton club plans were formulated several weeks ago by the county agents and the 4-H club boys. This club is sponsored by Eastland county bankers, cotton ginners and buyers, civic organizations, business men and others who are interested in 4-H club work.

These sponsors loaned each boy the amount of money to carry out a complete cotton demonstration. The sponsor took a note from the boy signed by himself and his dad, and this note is due this fall after the crop is harvested. The sponsor will visit the boy at least once each month, and he will try to encourage his boy to produce more cotton per acre than some other sponsor's boy.

These cotton demonstrators expect to carry out a complete cotton demonstration. They expect to accomplish this by contouring

rows, using good cottonseed, treating seed with ceresan before planting, fertilizing and dusting for boll weevil and the cotton flea hopper.

The 4-H club boys are using two different kinds of fertilizer, namely 11-48-0 and 16-20-0. One hundred pounds of each kind is mixed together and then 66 2/3 pounds per acre is applied. All the land has already been listed, and the fertilizer will be distributed in the lister furrow and then the ground will be relisted, throwing the dirt back of the fertilizer. The fertilizer will be planted on top of the fertilizer.

Before planting starts each boy will treat his cottonseed with 2 per cent ceresan to permit earlier planting which is conducive to setting a good crop of bolls before the appearance of the weevil in sufficient numbers to cause a great damage. At the same time the treating of the seed will insure a better stand of cotton.

All cotton demonstrators are using one variety of seed, that is the California Acala seed.

Powdered sulphur is to be applied when needed to control the cotton flea hopper. The cotton will be dusted with calcium arsenate as many times as needed to control the cotton boll weevil. The maximum amount of the cotton is to be picked and none to be pulled in bolls unless necessary at end of the season. The cotton is to be stored until sufficient cotton is on hand to justify

STAFF

Mr. and Mrs. Aubrey Alford were the guests of Mr. and Mrs. Spencer Hazard last Sunday afternoon.

A gloom of sorrow came over this community on learning of the death of Mrs. Z. Z. Butler of Phoenix, Ariz., on Saturday. Mrs. Butler was the sister of Walter Duncan of this community and the mother of Carl Butler of Olden, and has a host of relatives and friends at Staff, Eastland, Olden and Ranger to mourn her departure. Mrs. Butler resided with her family in the Staff community for many years before moving to Phoenix.

Mrs. L. B. Bourland received a message last Saturday that her sister-in-law, Mrs. Mason Nabors of Fort Worth was seriously ill. Mrs. Bourland left immediately for Fort Worth. The word came Tuesday that Mrs. Nabors is somewhat improved. Mrs. Nabors resided in this community before making her home in Fort Worth.

fy cleaning of the gin roll, and then the cotton is to be ginned and the seed kept for planting seed for 1938. Each cotton demonstrator will be required to exhibit at least twenty bolls of cotton and one stalk at all of the fairs in Eastland county where premiums are offered.

Each demonstrator must keep a complete record on his demonstration on approved 4-H club book. This record is to be submitted to the county agents as soon as all cotton is harvested and sold from the demonstration plot. A summary of each record book as well as a summary of all record books will be printed in the county newspapers.

If as many as twenty boys are enrolled in the Eastland county 4-H cotton club, they will be eligible to compete in the state 4-H club cotton contest in which four prizes are offered to the 4-H club congress to be held in Chicago next November.

This club is to be known as the Eastland County 4-H Cotton club. The following boys have already secured their seed and fertilizer: Callan Guy, Carbon; George Gilbert, Carbon; Vernon Bennett, Kokomo; Jerrell Johnson, Kokomo; Bobbie Revels, Kokomo; J. B. Adams, Morton Valley, and Neil Eaves, Kokomo.

and has a host of relatives and friends in Eastland county who wish for her a speedy recovery.

Edward White of Stamford was the dinner guest of Maurice Hazard Sunday.

Mr. and Mrs. Cecil White of Stamford were guests of Mr. White's parents, Mr. and Mrs. W. H. White, last Saturday night and Sunday.

Mr. and Mrs. Arthur Horn, who have been making their home in Washington, D. C., where he was working for the government, were on their way to their home in El Paso last week and visited in the homes of Mrs. Horn's sister and brother, Mrs. Spencer Hazard and Truman Horn. Mr. and Mrs. Horn visited a number of places of interest while making their home in Washington, among them being New York City. Mr. and Mrs. Horn were reared in this community.

Mr. Horn's parents, Mr. and Mrs. J. W. Horn accompanied them to their home in El Paso, where they will spend a few months visiting.

Mrs. Morton, the mother of Mrs. Arthur Horn, also accompanied them to El Paso for a visit.

Social Security Act Calls For a Staff of Only 4,500

By United Press
 WASHINGTON. — The Social Security Act is administered by a staff of 4,500 in seven buildings in Washington and one in Baltimore.

Although the 2,500 clerks employed to set up account numbers and a wage record system in Baltimore are on a "temporary" basis, officials estimate that eventually a staff of 7,500 will be necessary.

It is expected that the wage records division will be transferred to Washington when building space is available or decentralized among the 12 regional offices in order to handle more conveniently the thousands of claims.

Employees of the Social Security board administer only the old age benefits, unemployment compensation and public assistance provisions of the act. Public health, child health and vocational rehabilitation work are in charge, re-

Tearful Tike Wows 'Em at Wedding

It's usually the bride's mother who sheds a few tears at a wedding. But at one of London's most fashionable nuptial affairs it was this young man, completely unimpressed and ungratified by the fact that he was a page boy, surrounded by bridesmaids lovely in lace and trailing taffeta. He took one look down the aisle, turned toward the cameraman and burst into tears.

QUAKE FORECASTS NEARER

By United Press
 BUFFALO, N. Y. — The Rev. John P. Delaney, Canisius college seismologist, believes that earthquakes may be forecast some day, just as the weather is predicted now. Father Delaney said that progress along this line of scientific research is being made.

"Braddock to train at Stone Lake." The office blond-thinks boxers should keep away from hard drink.

As claims for monthly old age payments and lump-sum retirement and death payments mount during future years, the number of field offices probably will increase to 400.

respectively, of the Treasury, Labor and Interior departments.

The Treasury department acts as financial agent for the board, collecting all taxes and making all disbursements.

In addition to 12 regional offices in key cities the board has set up 116 field offices to handle claims and in the near future to handle applications for old age benefit cards, which has been the work of the Post Office department.

As claims for monthly old age payments and lump-sum retirement and death payments mount during future years, the number of field offices probably will increase to 400.

Plans For Ranger Kid Movie Draw Interest of Many

R. E. Garner, manager of the Arcadia theatre, said this morning that a great deal of interest is being shown in the "Kid Movie" to be made here soon, using a cast of about 75 local children.

Melton Barker, movie producer who discovered Spanky McFarland, now starring in Hal Roach's Our Gang productions, will direct the picture.

Children between the ages of 3 to 12 years who have not registered and wish to try out for a part must register at the Arcadia theatre at once. When the casting director arrives Thursday he will get in touch with those who have registered and have them come to the theatre for an interview.

A \$2 show for only 25 cents.

Instructed Verdict Of Not Guilty Given By 88th Court Jury

An instructed verdict of not guilty was returned Monday in the 88th district court by the jury in the case of H. A. Allen, charged with disposal of mortgaged property.

Instruction for a verdict of not guilty was given by Judge B. W. Patterson following empaneling of the jury, the defendant's plea of not guilty, and discovery of an error in the indictment.

The indictment charged the disposal of mortgaged property allegedly occurred Sept. 28, 1937, to J. W. McCaskill. The property named in the indictment, a cow, allegedly was mortgaged to the First State Bank of Rising Star. Jury was composed of P. C. Larkin, W. S. Baker, J. N. Jordan, A. A. Creighthead, J. D. Barton, W. E. Kellett, A. H. Johnson, J. M. Jones, N. J. Hager, D. Rogers, F. F. Basham and L. M. Barron.

No evidence was introduced.

Good Sorghum Is Grown By Boys

Six 4-H Club boys of Eastland county will grow six acres of Dwarf Yellow Milo in 1937. E. E. Blackwell, leading farmer of the Alameda community, donated the seed to these six boys to be planted, with the idea in mind of improving the grain sorghums in the county.

Pioneer's Condition Reported Improved

Condition of J. F. Edmondson, Eastland county pioneer who has been seriously ill at his home in Carbon, was reported improved on Tuesday. He is the father of A. A. Edmondson, deputy tax collector, and brother-in-law of Earl Bender, Eastland.

Jealous Judy Prefers Gentlemen

Her owner, a Mr. Gay of London, says "Judy," small Brazilian monkey, is a "perfect lady" when the men are around, but when the ladies appear, Judy turns ragingly jealous. Here the camera-men snapped Judy just as she hurried a rock at Mrs. Gay, and Judy wasn't fooling. The monkey is accused by uncontrollable anger at the mere sight of a woman.

Credit Is Urged For All Pensioners

AUSTIN, May 11.—An appeal to the grocers, butchers, druggists, landlords and others to extend credit to Texas' old age pensioners, was issued today as May payments to 126,000 were delayed for lack of an allotment from the Social Security Board at Washington.

W. A. Little, acting director, said the checks for the May payments are ready for mailing but are being delayed until the federal grant is received.

"Our understanding is that the Social Security Board is waiting for a deficiency appropriation from Congress and all states are in the same position," Little said.

Mr. Bob in town Friday night.

County 4-H Boys Have Good Peanut Demonstrations

Four of the 34 Eastland County 4-H Club boys enrolled in the peanut club, will carry out a complete demonstration by fertilizing, inoculating seed, contouring rows.

Two acres for each and the land listed. 50 pounds per acre of 11-48-0 fertilizer has been distributed in the lister furrows and then the land was rebudded, throwing the dirt back on the fertilizer. These demonstrators will plant two bushels of peanuts per acre, and all of the seed planted will either be hand selected or improved seed.

Some of the demonstration plots will be stripped cropped with cane to prevent the soil from blowing away after the peanuts are harvested. These demonstrations will be in the following communities: Kokomo, Flatwood and Grandview.

Mothers' Day Is a Reunion Day For Alameda Family

Mothers Day was celebrated at the home of Mrs. H. W. Rogers of Salem community in the form of a family reunion. Five generations were present and dinner was served in picnic style under the trees.

In the afternoon an old-time singing was enjoyed by all present. Children present were: Mrs. P. J. Richardson and Mrs. Addie Wisdom, Hatchel; Mr. and Mrs. E. M. Campbell, Ranger; Mr. and Mrs. L. L. Rogers, Cheaney; Mr. and Mrs. C. R. Rogers, Gorman.

Great-grandchildren present: Norma Jane and Buster Richardson, Hatchel; Emcee Stehla, Winters; Hazel, Ethel, Glenda, Wanda and Patsy Perrin, Cheaney; Bob and Clinton Reuels, Gorman; Fred and Buddy Rogers, Salem; Jimmie Ted Stiffner, Willis Derrel, Jeneva and Wanda Ruth Campbell, Ranger.

LUM LOVE SERVICE STATION PINE AND RUSK STREETS PHONE 225 — RANGER

WASHINGTON — Through a triumph of tree budding and grafting, the Department of Agriculture has developed a peach tree said to be immune from root knot.

Root-knot, a disease which causes extensive damage to trees in the light sandy soils of the South and Southwest, is caused by the eelworm, which lives in the soil and attacks the roots of the trees.

Two rootstocks for peaches, both so resistant to root-knot that they are virtually immune, have been introduced and tested by the department. Both promote vigorous growth of peach trees budded on them—also normal bloom and fruit.

Seedlings of the Shall peach, a variety grown in the extreme northwestern part of India, were reported resistant in 1934. Further tests have confirmed its desirability, the department said.

The second rootstock, a hybrid, is from a cross between the Quetta nectarine and the Bolivian cling peach. The Shall may be propagated from seed. The hybrid propagates readily from root cuttings.

EXHAUSTIVE STUDY FINDS CRIPPLED PROGRAM NEEDS

A study of the types of disabilities of 290 crippled children and 413 disabled adult cases has shown R. E. McGlamery of Eastland, supervisor of the crippled children's division of the state department of education in this district, building of the crippled children program should emphasize four cardinal points. The points enumerated by McGlamery are prevention, early discovery, treatment and education and vocational training. J. J. Brown of Austin, is director of the state crippled children's division.

Findings of McGlamery's study are told in the following article, which he prepared: A recent study of the types of disabilities of 290 crippled children and 413 disabled adults in my section of the state has shown the need of building our crippled children's program in such a manner as to emphasize four cardinal points, viz: 1, prevention; 2, early discovery; 3, treatment, and, 4, education and vocational training. In the study of a total of 703 disabled persons located in the 75 counties that we may say make up the northwestern section of the state the following facts were revealed as to the types of disabilities: Disabilities due to disease, 396; disability due to accidents, 145; disability due to deformities or injuries at birth, 132; disability due to causes not shown, 30. The large number of disabilities due to accident, 145, serves to emphasize the need for renewed energy on the part of every community. The seriousness of the types of injuries received in the accidents is shown when it is known that it was necessary to make 75 amputations in the 145 cases. Since only those persons who are so badly injured that they require special hospitalization or are permanently disabled and who come from homes unable to provide the needed care are referred to our division it is evident that a much larger number of persons have been injured than are reported to our division. For that reason the crippled children's division is cooperating with all other agencies that are striving to make ours a safer country in which to live.

A further study of the survey indicates that 396 persons were disabled from disease. In many instances had the effects of the disease been discovered at an early age and brought to a place where the proper treatment might have been had, the crippled condition could have been avoided. Early discovery of children who are liable to be crippled as a result of disease will surely prevent many twisted limbs, distorted joints and crooked backs. It is estimated by competent authorities that early discovery followed

by the proper treatment will keep 90 per cent of the potential cripples from being actual cripples. For that reason the crippled children's division is making every effort to find potential cripples and secure treatment for such as soon as the results of the disease are known. The census trustees of the school districts in the state can render a most worthwhile service to the crippled children's division by making diligent inquiry concerning cripples in the school districts.

Once the crippled child has been discovered prompt and efficient treatment should follow. Under its influence threatened limbs are saved from distortion, inflamed joints are soothed and healed and aching backs are put at rest. Not only are these results obtained for the early discoveries, but in many, many instances fine results are secured for those who have been crippled for longer periods. To secure this treatment for those who are not able to provide it for themselves the crippled children's division was created in the state department of education. Each year hundreds of crippled children are sent to 30 hospitals scattered throughout the state, where treatment is given by 33 of the finest orthopedic and plastic surgeons in the state. The hospital are designated by the state board of control and the state board of health chooses the surgeons. In addition to treatment hundreds of braces and artificial limbs are supplied by the funds derived from both state and national governments and the contributions of public spirited citizens to the Texas Society for Crippled Children. During the last fiscal year, July 1, 1935 to July 1, 1936, 1797 children were hospitalized at a cost of more than \$200,000.00.

With the discovery and the proper treatment of crippled children there yet remains one other point which should properly be included in a well-balanced children's program; namely, education and vocational training. Under the division of vocational rehabilitation in the state department of education vocational training may be provided for the physically handicapped after they have reached the age of 16 years, provided, of course, that the applicant is susceptible to such a program. Under this program 118 persons in this section have been in training during the present fiscal year, July 1, 1936 to July 1, 1937, and others are being placed each week. The type of training given is for

the most part of two kinds. Persons interested in a profession are helped to secure training in schools, for the most part state institutions, and those who desire training in a trade are placed in some shop or place of business where they are given apprentice training. At the present time, May 6, 1937, there are 76 persons still in training in this section, divided about equally between the two types of training mentioned.

As yet there has been little or no provision made for the education of the physically handicapped child in the state. The state does not maintain a division on special education. We do not find in Texas any sight-saving cases, practically no speech correction classes, and very little is being done for the semi-blind and the semi-deaf child. There is at the present time a bill in the national congress, known as Senate Bill No. 1634, which should it become a law, will grant aid to the several states in setting up and maintaining improved services for the education of the physically handicapped child. If, and when, this measure has become effective in the several states it will fill a wide gap in affording security to the physically handicapped children of the nation.

There remains one other point of special interest as revealed in the survey just made. Of the 703 cases studied it was found that 132 persons were disabled because of congenital deformities or injuries to brain and nerve centers at birth. Among the 290 crippled children studied it was found that there were 29 cases of spastic paralysis, due to such injuries. The crippled children's division is directing special efforts toward the establishment of what is known as "spastic centers," where the disabilities arising from this type of paralysis may be studied and corrected. Some wonderful work is already being accomplished at one such "local center" that is already in operation. There are many such cases throughout the state and up to the present time little has been done for them.

Other interesting facts concerning the survey of crippled children as revealed in 290 cases. Diseases: Infantile paralysis 69 cases Spastic paralysis 28 cases Osteomyelitis 25 cases Hare lip, cleft palate 29 cases Club feet 22 cases Spinal curvature 13 cases Tuberculosis of bone 20 cases Fractures (old) 18 cases Boys 165 cases Girls 125 cases Braces furnished in 50 cases The number of cases handled in recent months in larger counties: Callahan, 7; Colman, 18; Comanche, 29; Dawson, 14; Eastland, 28; Hamilton, 14; Jones, 14; Haskell, 11; Nolan, 24; Stephens, 14; Taylor, 12.

Outstanding Bull Of Texas Selected

SAN ANGELO, Texas—Publican Domino 19th, 2300-pound Hereford bull, owned by C. M. Largent and Sons of Merkel, has been judged the outstanding bull in Texas in a contest conducted by the San Angelo Standard-Times.

James Brooks of Brady nominated the bull for the title. His maternal award was a silver loving cup recognizing the honor. The bull is four years old. He has sired 35 calves and has trev-

eled 30,000 miles in the United States, entering numerous stock shows. During his three years in the show ring, he has won many first places and grand championships. After winning the grand championship at the Fort Worth Fat Stock Show in 1936, the bull was retired to his owner's Merkel ranch. Publican Domino now lives in style. He has a private barn and a private attendant.

In this era of lecturers and strip-tease artists, success seems to lie in learning how to address an audience, or undress before it.

You Can Do Fast Work with the McCORMICK-DEERING 10-ft. Tractor Binder

THIS binder, designed for use with McCormick-Deering Tractors, brings real speed to the harvest. It is operated through the power take-off of the tractor and has double the daily capacity of an 8-ft. grain binder. In this roller-bearing binder the sickle, reel, canvases, packers, and binding mechanism take their power direct from the engine of the tractor—the binder main wheel simply supports the binder. If the grain clogs, the operator halts the tractor while the binder clears itself. In lodged or very heavy grain, the forward speed of the tractor can be reduced while the normal speed of the binder mechanism is maintained, assuring uninterrupted operation.

Come in and let us tell you more about the McCormick-Deering Tractor Binder. WE CARRY A COMPLETE LINE OF PARTS!

KENNEDY TRUCK & TRACTOR CO. PHONE 338 312-314 MAIN ST. RANGER

REMEMBER MOTHER AND

Don't forget to have us clean and put your Winter Garments in Moth-Seal Bags. Bags only 10c extra with clothes cleaned to be put away.

Also We are agents for Merchants Cold Storage Co., and will be glad to handle your fur garments to be put in Cold Storage. Garments valued up to \$100.00 — stored \$3.00, plus 50c carrying charge.

WIN A KELVIN HOME 1ST PRIZE IN KELVINATOR CONTEST

Fact 1. The new 1937 Kelvinator is Plus-Powered. It has as much as double the cooling capacity of many other well-known refrigerators of equal size. Fact 2. The new Kelvinator runs only half as many minutes per day—during the rest of the time it maintains low temperatures using no current at all.

NASH CARS MORE THAN 1000 OTHER PRIZES including KELVINATOR REFRIGERATORS Plus-Powered, with all the latest features, as described in this advertisement. KELVINATOR RANGES Gas or electric—your choice—the finest money can buy. KELVINATOR ELECTRIC WASHERS With exclusive Fin-Flex agitator and Pressure-Astor Wringer—the industry's newest developments. KELVINATOR ELECTRIC IRONERS The very last word in home ironing equipment.

ONLY 90¢ A WEEK BUYS A PLUS-POWERED KELVINATOR KELVINATOR cuts the cost of better living! The K two facts displayed here on the left prove it. They mean that day after day, month after month, year after year, Kelvinator will save you money. They mean also that Kelvinator is built to "take it." No matter how hot the day, no matter how oven-like your kitchen, Kelvinator keeps foods always SAFE. Kelvinator quickly pays for itself. That is why so many present refrigerator owners are replacing with 1937 plus-powered Kelvinator. At our small weekly payments—as little as 90¢ a week—it's easy. Easy for YOU, too! Come in today, and let's talk about it.

ONLY KELVINATOR GIVES YOU ALL THESE ADVANTAGES BUILT-IN THERMOMETER • RUBBER GRIDS IN ALL ICE TRAYS • CERTIFICATE OF LOW OPERATING COST 5-YEAR PROTECTION PLAN KILLINGSWORTH, COX & CO. Radios Hardware Funeral Directors Farm Implements Furniture
