Eastland County Federation Installs Officers For Year

The Eastland County Federa-tion, T. F. W. C., which meets three times a year, held its last meeting under the past regime in park at Lake Cisco, an allsession Saturday, opening at

Mrs. N. A. Brown of Cisco, re-tiring president, called the meet-ing to order. Minutes were subnitted by retiring secretary, Mrs. Medora Pitcock, of Eastland.

The report of delegate Mrs. W. A. Martin to sixth district conven tion at Brady was presented. The federation voted to have a year book for 1937-38. The handsome crocheted spread was exhibited and became the property of Mrs. W. L. Jackson of Ranger.

Officers for 1937-38 were in stalled by Mrs. Phillip Pettit of Cisco. They are: Mrs. W. A. Mar-tin, Eastland, president; Mrs. M. H. Hagaman, Ranger, vice president; Mrs. N. A. Brown, Cisco, secretary; Mrs. John Nix, Morton Valley, treasurer; Mrs. W. A. Sutton, Gorman, parliamentarian.

A short address was made the new president, who announce ed her appointments for one year: Mrs. W. H. Mullings, Eastland, onding secretary; Mrs. W. K. Jackson, publicity. Year book committee, Mrs. J. M. Perkins, chairman; and Misses Ruth Ramey and Mary Carter of Eastland Mrs. M. H. Hagaman of Ranger, and Mrs. Phillip Pettit of Cisco. Standing committees: Rural club extension, Mrs. E. N. Strick-

land of Cisco, chairman, and Mmes. J. Turner of Flatwood, Ed Sutton of Gorman, Bill Tucker of Child welfare, Mrs. Medore Pit-

ock of Eastland, chairman, and Mmes. Sam Ritchey of Bass Lake, Holmes of Ranger. Parks and playgrounds, Mrs. James Horton of Eastland, chair-

man, and Mmes. W. E. Tyler of Rising Star, J. M. Pittman of Flatwood and Fred Drienhofer of

Scholarship and loan, Mrs. A. J. Olson of Cisco.

Library extension, Mrs. G. wood, Henry Capers of Bass Lake, J. LeRoy Arnold of Eastland.

Housing Firemen Is City's Problem

By United Press PORT ARTHUR, Texas .- Port Arthur has a problem on its

On June 8, 9 and 10, 2,500 visiting firemen" will be here. The occasion is a state convention of the Firemen's and Fire Marshall's association.

The problem is not where to take them or what to show them, but where to put them.

R. E. Mcknnis, secretary of the junior chamber of commerce, has been toying with this problem since he learned that hotel accommodations for the three-day period will be limited to 250.

"That leaves more than 2,000 delegates to be housed," McInnis said. "After discussing the housing problem, it was decided by a committee composed of Jaspe George, E. E. Fondren, Harvey Day, Fire Marshal Jake Freeman and myself to set a standard gates in private homes."

In accordance with this decision it was agreed to set a price of \$2 a day for a single room and \$3.50 a day for a double room.

Response to a call for cooperation in housing delegates by local housewives and home owners was satisfactory," McInnis reported.

In the meantime "the fire-house boys" are getting ready. They report there will be a "hot time"

'PLAY BALL'

Spring is here in the newspapers too. You'll find advertisements for Spring suits and dresses. Others on seeds and gardening equipment. Porch furniture and hundreds of other springtime purchases are spread before your eyes.

When the umpire walks back of the plate and roars "Play Ball!", Spring is here to stay. Thousands of fans have waited for this thrilling moment . . . to see white base-lines against green grass... to hear the sharp crack of a three-bagger . . . to join their cheers with the crowd in this great American sport. From baseball, Americans have borrowed the phase, "Play Ball," as a synonym for fair-and-squre, aboveboard dealings.

These advertisements are your guide to reputable merchandise. Merchants and manufacturers who stand back of these advertisements are unwilling to risk their reputations by extravagant claims for inferior products. They are "up to bat" every day. They cannot afford to "strike out" on your good-will. That is why the advertisements in this newspaper will save you time, trouble, worry, and money.

Oceans Are Called A Weather Index

By United Press

LA JOLLA, Cal.-The weatherman of the future who hopes to escape blame if a sudden storm spoils the family pienic or rains out a baseball game, will do well to search the depths of the ocean, instead of scanning the skies as is the practice today.

That is the conviction of Dr. Harald U. Sverdup, director of the Institution of Oceanography here, whose studies have convinced him that deep down in the sea is to be found the secret of accurate long-range weather forecasting.

"Consider the atmosphere and te ocean as two huge machines," he said. "They are kept in operation by the run, run with varying speeds, and one affects the other in their continual exchange of heat and water vapor.

"If in the future, after we Information given him by infl ave more complete knowledge of ential business men was the the surface and sub-surface cur- basis of his charges that a "bilrents in the ocean, we can show lionaire" favored a Fascist dictathere is a lag between the ma- torship in America, William E. chines, the key to indisputable Dodd, ambassador to Germany, exweather predictions will be hours." Dr. Sverddup is convinced, he said, there is a strong inter-rela-

the surface waters cool, sink to the bottom and flow away to create deep currents."

Dr. Sverdrup speaks with authority on Arctic conditions.

He was a member of the staff of the famed Norwegian exploration ship, Maud, which eruised the Arctic for six years, and when the vessel was ice-locked off the Siberian coast in 1919 and 1920 it was Dr. Sverdrup who made an ethnological study of the little known Nomadic tribes of that sec-

He was the first white man to spend an entire season with the trange inhabitants of that seldom isited tundra.

Snake Takes Long Trip In Bananas

RUSTON, La .- A 30-inch baby boa constrictor, with a yen for in the U. S. Senate that he be retravel, came to a bad end here.

The Nicaragua-born reptile embarked on a tour of the Western "To prove that a certain change of the Pacific Ocean, and now he Hemisphere by attaching himself in the sea makes itself felt later is convinced the contrast between to a stalk of bananas. When the in the atmosphere would be one the Pacific and the Atlantic is banana plantation harvested its of the most important scientific most discernible at extreme crop, "Snaky" went with the banana plantation harvested its nana stalk. He was stowed away on a fruit boat, shipped to New Seven years ago Dr. Sverdrup cific really deserves its name," he Orleans and then taken to Ruston began his study of the mechanics said. "This very deep water is aboard a produce truck.

The snake was discovered enjoying a snooze by R. C. Lyons, groceryman. Lyons promptly whacked the boa to pieces with a butcher knife.

Identification of "Snaky" was not established immediately. Dr. John R. Fowler, head of the zool-Technological College, first exdepartment at Louisiana pressed the opinion that the snake was a "bush-master," one of the most poisonous of all snakes.

Closer examination revealed the snake to be a young boa con-

Dr. Fowler said that the snake probably had been with the stalk of bananas since it was cut on the plantation. Refrigeration under which the bananas were placed to prevent ripening too quickly, apparently had caused the snake to go into "hibernation," from which he aroused only after having hung in the higher temperature of the grocery store.

Campers Warned Of Outdoor Danger

AUSTIN, Tex .- As the summer eason approaches, a word of warning is timely to prospective campers, Boy Scouts, Girl Scouts, mmer vacationists, fishermen, and others who enjoy getting out into the open, relative to the possible dangers that may be encontracting infection under the changed enverinment. This is especially true of diseases that may e transmitted through food and water supplies.

Typhoid fever is a disease the amount of which is greatest, as a rule, where there is the least sanitation. It is an unnecessary and preventable disease. It is spread from person to person by water, milk, fingers, flies and food. Every ease is contracted by taking into the mouth some substance contaminated with typhoid organisms, and these occur only in nature in the bowel and bladder discharges of persons sick with typhoid or from carriers, persons who have had typhoid and who after recovery still harbor the germs in their systems.

Persons planning a variation or trip where sanitation may not be

A Rattling Good Snake Hunt

Sneaking up on a snake looks easy the way Oklahomans did it is Blaine county's annual rattlesnake hunt recently. First, find vey, champion hunter, demonstrates at right in top photo, grab the reptile just back of the head. Lifting the snake's rock shelter with his stick is Fred Bennett. To show off your prize, especially a nine-rattler, take a hint from John Garvey, lower left, and wear leat, er gloves. But, according to Maxine Bennett, lower right, Mr. Snake is still a public menace until he's in the bag

THIS CURIOUS WORLD By William Ferguson

THE PRESIDENT AT THE PRESENT TIME, IS MOVING AWAY FROM EUROPE AT THE RATE OF ABOUT FIFTY FEET PER YEAR!

IT has long been the theory of some scientists that the earth's continents were much nearer to each other in past ages than they are now. South America, Antarctica, Australia, and India can be fitted around Africa like pieces of a jig-saw puzzle. cording to those holding to the above theory, the continents actually floated away.

rigidly enforced or where food necessary to secure protection Play safe and have your doctor handlers are not regularly examined should protect themselves against this disease and the immunity established is good for two against this disease by being vaccinated. Senate Judiciary Reports Unfavorable On Court Changes.

WASHINGTON, May 18 .- The Senate judiciary committee, by a vote of 10 to 8, today approved an unfavorable report to the Senate on President Roosevelt's judiciary program.

The vote came three hours after announcement by conserva-tive Justice Willis Van Deventer that he will retire from the court

The judiciary committee vote and the Van Deventer retirement, effective June 2, heightened indications Mr. Roosevelt's program is headed for compromise revision or outright defeat.

Senate supporters of the court plan, however, refused to concede the announcement of the dean of the court conservative group would have any effect on the outcome of the controversy.

The judiciary committee vote, announced by Sen. William Borah of Idaho, had been forecast in unofficial polls. Borah said the com mittee also voted to reject all com-

promise amendments. It was admittedly too early to determine the sweeping implications of Van Devanter's retire

BIG SHOT DICKSHOT Spring Vacation For Schools Urged

FORT WORTH, Tex.-Here's a conservation idea that wouldn't need study to win the support of school children: a two-week vacation each spring when Texas wild flowers are in bloom.

That is a suggestion by Mrs. J. L. Mimms of Fort Worth, wellknown conservationist. She sug gested that the vacation begin ometime between April 19 and 26 because "that's when Texas wildflowers are blooming their

most gorgeous colors."

Mrs. Mims also suggested that somebody open a "pilgrimage bu-reau" to direct visitors—and natives-to the places where flowers are most beautiful. Most person seeking the sites of beautiful wildflowers fail to go to the right places, she said.

Oh yes-there was an suggestion regarding the twoweeks spring vacation for school children to enjoy "Texas in loom." The two weeks would be added on the regular term before it ended for the summer!

ourse is August 16 to 19. The number of delegates or representatives is limited to three from each county, to represent the home demonstration clubs in the county at the annual meeting of the Texas Home Demonstra tion association.

HIGH TIDE OF **SPRING**

Blossom Time and bird time ... new leaves gleaming on the trees, and grass of unbelievable greenness springing underfoot.

Lets get outdoors!

There's magic in May sunshine that stirs desires to fulfilment. The flower-bed we've planned for years—we'll plant it now! We'll get new screens, the shining kind, and throw away the frayed old things that flies came through last summer. We'll get a new lawn-mower . . . a birdbath for the corner by the hedge . . . a lawnchair or two, and a big bright umbrella with a tiny table for tea.

Can you afford all these delightful things? Of course you can! It's astonishing what values are offered in the stores this month. As you go through your paper you'll see them. Smart, cool, outdoor dresses . . . gardening hats and tools and gloves . . . croquet and deck-tennis and badminton sets . . . comfortable porch swings and outdoor furniture . . . all so inexpensive that you can buy them now without waiting and wishing.

Read the advertisements. Plan your purchases. And let your Spring dreams come true.

'Swollen Bureaucracy' Does Have Its Uses

The federal bureaucracy is a fearful thing, as every- adment was submitted. body knows. It is a swollen organization of political appointees, engaged in officious meddling, which consumes ial sessions since. At the end of attributes the difficulty to exposthe taxpayer's substance and struddles the neck of Uncle | 120 days legislation is no nearer ed wires. Sam like the Old Man of the Sea.

But it does have its uses, now and then. If you are inclined to doubt it, consider the record of the U. S. Food and Drug Administration during the recent Ohio river floods.

As soon as the waters started rising, inspectors for this branch of the bureaucracy started down the great river valley. They had a thousand-mile beat to cover, from Marietta, O., to Cairo, Ill., and their object was to destroy all fruits, vegetables, medicines, flour, and other foodstuffs that were contaminated by the flood waters.

This was tough on the local storekeepers, manufacturers, and wholesalers. Most of them co-operated without a whimper, though, and those who whimpered had to co-operate anyway. The inspectors were thorough and unvielding.

In one town, 200 carloads of flood-damaged food were hauled off to a stone quarry and destroyed. In another, 120 tons of water-soaked coffee were destroyed. In Louisville, the inspectors went through 95 drug stores and destroyed all commodities that the water had touched.

And the result of all this was that not one single epidemic occurred while the flood waters were receding. Typhoid, dysentery, and the other maladies that "inevitably" take their toll after a flood disaster were distinguished by their absence. The bureaucracy had got there ahead of them.

It is interesting to measure this activity against the standards of, say, 50 years ago.

At that time no one would have dreamed that it might be a proper function of the federal government to keep flood-polluted foods and medicines away from the people. It would have been argued-if anyone had been visionary enough to raise the point-that those things were best left to local management.

To have urged that Uncle Sam keep a staff of trained men on the payroll to snoop around the shelves of the corner grocery store would have qualified a man for immediate admittance to the booby hatch.

THE

The moth, its eggs, all life and germs are destroyed in proper dry cleaning. Then, if put in Moth-Seal Bags, your garments, whether they be fur, fur-trimmed, wool or silk, will be safe and ready to use when needed. Moth-Seal Bags are only 10c each with garments cleaned to be put

No Better In U.S.A.

Our dry cleaning is not only as good as the best in the U. S. A., but it is far superior to 75% of all done. We could not make this statement without fear of contradiction if it were not for the following facts:

For over 15 years we have maintained an active membership in our National Institute and Research Laboratories, located in Washington, D. C., and always keep our equipment as well as our processes and methods up to the best as determined by their constant research and comparative tests.

Cold Storage For Furs

Furs, if properly dry cleaned, put in Moth-Seal Bags, and kept out of the sun or other hot places, will be safe, and will last as long as if put in cold storage. This method affords you the advantage of having a clean garment when you are ready to use it, and the cost is the same or less, according to the length of the coat. We will be glad to send them to a Certified Cold Storage company if your prefer. Their seal and tag will be your evidence of cold storage.

We want to do your knitted garments, hats, rugs, leather goods, etc.

\$710.61 JUNE \$646.17 JULY \$549.03 **AUGUST SEPTEMBER** \$488.53 **OCTOBER** \$604.39 **NOVEMBER**

DECEMBER \$609.42 \$651.64 **JANUARY FEBRUARY** \$630.54 MARCH \$831.82 APRIL \$716.49 GR. TOTAL

THE ABOVE FIGURES REPRESENT THE AMOUNT OF MONEY WE HAVE SPENT IN RANGER DURING THE PAST ELEVEN MONTHS, SINCE JUNE 1, 1936, FOR LABOR AND MATERIALS:

It has been estimated that around \$550 worth of laundry business is done in Ranger each week. Of this amount we get just a fraction over one-third. It is also estimated after careful survey that somewhere in the neighborhood of \$65 worth of laundry work is sent away from Ranger each week . . . this much money actually taken out of circulation in Ranger, and the only amount or part that stays in Ranger is the small commission that is paid the driver.

Since we have taken over the Ranger Steam Laundry, which was closed down a year ago, the business has been built up to where there are now ten people working for the company. They earn their bread here . . . they spend their money here. . . . We pay our taxes here . . . That helps the schools, and we are glad to have a part inall civic and social affairs for the best interests of the city.

But it is not fair to send laundry work away from your own home laundry people when the matter of only a few cents is involved. Keep your laundry work in Ranger . . . Give your neighbor and home town people the first chance . . . Let's spend our money in Ranger . . . keep our own people in Ranger . . . and make Ranger the real shopping center of the Oil Belt!!!

This does not include church donations, school and football advertisements, food given to the poor, or the laundry we do for the Ranger nursery. Any advice or co-operation from your department will be appreciated. Our aim is to make Ranger proud of this institution.
