THE WEEKLY CHRONICLE Established Nov. 1, 1887

Futered as second-class matter at the postoffice at Eastland, Texas, under Act of March, 1879.

Published Every Friday Phone 601 Office of Publication: 106 East Plummer Street

NOTICE TO THE PUBLIC

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation, which may appear in the columns of this paper, will be gladly corrected upon being brought to the attention of the publisher.

Obituaries, cards of thanks, notices of lodge meetings, etc., are charged for at the regular advertising rates, which will be furnished upon application.

Tolerance Is Not Only Right, It Is Good

America may well be proud that its very name is still almost another word for tolerance.

The instinct to tolerate in others the freedom we expect for ourselves is deep in the American consciousness. We don't think much about it, because we are all brought up that way, and it is natural.

But in a time when whole governments and systems are being built on tolerance, it might be well to think a little about why tolerance is a good thing. For leaders like Adolf Hitler are denouncing it not only as weak in itself, but as an unbearable handicap on a state.

Americans like tolerance because it is right. We believe that no man is good enough or wise enough to rule other men without their consent. And we believe that no man's rights are safe unless he is willing and able to grant to other men the same rights he expects for himself.

It is the very denial of these rights over many years that lies at the bottom of Europe's discontent. One racial minority, long suppressed and kept under, when it gets at last a chance to be on top, becomes equally oppressive of its former oppressors.

There is no end of this. Europe can never be tranquil until at last there are no oppressed racial minorities to smolder and plot revenge when their hour comes.

But many Americans view racial and religious tolerance in its lowest terms. They grudgingly admit the right. and with clenched teeth vow that they will grant it, no matter how repulsive it may be to them to do so.

That is, of course, better than no tolerance at all. But it is negative.

Tolerance has its positive side, more important than the fecting the 3,700,000 Federal, negative. It lies in the fact that all races and all creeds have rich contributions to make to American civilization. They have made them in the past, and given their opportunity, will make them in the future.

- American life is rich and productive beyond anything of money WPA should have for that authoritarian states can ever achieve, simply because the way is wide open to all people to contribute their House when it voted to grant an share.

Tolerance is not a burden, a source of weakness, grudgingly maintained because it is known to be right, but a source of strength, and a guarantee of the highest possible to conduct an investigation of the development of the nation of the future.
