COMING YOUR WAY with farm telephones

The job of building new farm telephone lines—held up during the war years—is well under way again.

In more than 200 rural areas in the Southwest, telephone people are hard at work making surveys, talking to farmers, engineering the lines, ordering the materials, setting the poles, stringing the wire, and installing telephones.

It's a big job, and we have a big goal—165,000 new farm telephones in the next five years. Scarce materials are making it no easier for us right now, but we hope to bring telephone service to 40,000 farm homes this year.

We can't work everywhere at once, but we realize the need for farm telephones, and we'll be coming your way just as soon as we can.

I GIVE YOU TEXAS By Boyce House If we could call them back, Would you—would I? From out the far, sweet realms of peace and rest. To toil once more, with troubled, aching breast. Along the steep, the stony, thorn-grown way, Or would we rather they might stay, If we could call them back? If we could call them back, Would you—would I? 'E'en though it be to pleasures as of old, And to the joys that come when hearts unfold With Love in all its wondrous power— Ah! would we ask it for one little hour, If we could call them back!

When one has lived a long, full life and his step becomes feeble and his friends of the olden days are gone, then falling into the last sleep is the natural, the inevitable end of life's chapter—on this side of the veil.

This is somewhat the thought that a friend of mine, Frank Jensen of Dallas, has beautifully expressed in a poem written after his father passed on. His father had known the hardships of pioneer days—droughts, depressions, cyclones, hailstorms and had earned his rest. The poem is entitled "If We Could Call Them Back" and has a message of philosophic resignation: If we could call them back, Would you—would I? And ask that they go with us down the road, And take again Life's weary, heavy load, And all the sorrows—now forever flown, Or would we choose to travel on alone, If we could call them back?

The EYE that looked ahead It was early in 1871. Across the boundless reaches of the Southwest, surveying parties for the Texas and Pacific Railway pushed their way through wild, rugged country. They were the advance men—engineers who marked the way for the shining twin rails that were to follow. They were men of courage and vision, too—men whose eyes looked ahead to the possibilities of a vast empire rising out of the Southwest. Because their eyes looked ahead and because they were determined to realize their dream of a transcontinental railroad across the Southwest, these early builders conquered almost unsurmountable difficulties. Today their dream of empire is a reality. The Southwest is a mighty land—it is in the vanguard of the new industrial growth of the nation. During these past 75 years of progress, the Texas and Pacific has been a dominant factor in the Southwest's growth. It has furnished its industrial and agricultural development—it has furnished a life line for the flow of commerce. Today, the Texas and Pacific is providing even greater service for the people of the Southwest... with its famous Sunshine Special, the only complete through daily train linking Texas and the East. The coming of the Eagles will usher in a great new era in rail transportation. Yes, Texas and Pacific still looks ahead... seeking new horizons of achievement for the Great Southwest. W. G. VOLLMER, President 75 Years of Service TEXAS AND PACIFIC RY.

Throughout our nation's history there have been occasion when skeptics said "it couldn't be done" . . . and American Labor went ahead and did it! Sometimes the job was one of peacetime production; sometimes of war production. Always there have been obstacles to overcome. Yet Labor never fails to forge ahead in that same spirit of progress so characteristic in our nation's growing strength.

NO ONE can say that about me! I've heard people who have party-line telephones (I have one, too) complain about others on their line—say they talk too much, or listen in, or interrupt. But they don't say that about me. No, sir! I figure if you want other folks to do right by you, you've got to do right by them. So I watch my telephoning. "Even Stephen" is my motto. Keep the calls short and let the other folks get in their share of talk. It works, too! We never have any trouble on our party line. SOUTHWESTERN BELL TELEPHONE CO.

Plan Heating AS PART OF HOUSE. Illustration of a family in a living room with a heater.

When heating is planned as part of house and equipment installed when it is built or remodeled, it can be included as part of monthly payments. In this way the finest automatic natural gas heat costs so little more each month that even the builder of a modest cottage can afford it. Evidence of this fact is that many of the 2,200 homes being built here in the Southwest in one of the nation's largest single home building projects will be heated with central automatic gas furnaces. Below are two popular types:

Basement-type GAS FURNACE. For large houses with basement or ground floor utility room is the forced-air furnace with filters. It sends cleaned warmed air balanced with right amount of moisture to every part of house. It is automatically controlled to maintain desired temperature.

Closet-type GAS FURNACE. For the cottage where space is limited this closet-type furnace is ideal for installation in small space. It too, provides clean, warm air throughout the house. It is completely automatic. It is quiet, efficient and costs little to operate.

Vent to A Flue... Remember, flues are necessary for venting the new gas heating equipment. Only when vented heat is used are wall sweating and stuffy air eliminated. Lone Star Gas Company

COOKED A FINE DINNER: THEN THREW IT TO DOG. One lady recently stated that she used to throw her own dinner to the dog most of the time. It made her sick just to look at anything to eat. Powels are regular and normal. She is enjoying life once more and feels like "some other woman" since taking this New Compound. INNER-AID contains 12 Great Herbs; they cleanse bowels, clear gas from stomach, act on sluggish liver and kidneys. Miserable people soon feel different all over. So don't go on suffering! Take a Taxi Executive's word for it!

For Safety, Economy, Mileage choose the tire that OUTWEARS PREWAR TIRES

One of the taxi fleets that tested the new B.F. Goodrich Silvertown before it was offered for public sale was Yellow Cab, Louisville, Ky. In addition, it was tested on police cars and the B.F. Goodrich test fleet over millions of miles in all kinds of weather under severest conditions, and even at high speeds. All these tests supported the findings of Mr. Thomas A. Ballantine, President of Yellow Cab, Louisville, Ky., that: "...their wider, flatter tread gives our cabs better traction and surer, safer stopping. And in actual mileage, tests on our fleet prove they OUTWEAR PREWAR TIRES."

We know you'll want these tires for your car. So be on the safe side, see us today.
