Children Need Health Protection In Winter, Too

Young children may suffer as much from winter illnesses as they do from those commonly known as "summer complaints," in the opinion of Dr. George W. Cox, state health officer, and his advice to parents as the winter season approaches is to guard babies and young children against these winter health hazards.

Influenza, tonsillitis, pneumonia, bronchitis, and asthma are included among those disease which may be dangerous winter illnesses among young children since they affect the respiratory or breathing system. Such disease as pneumonia may develop from a neglected cold, they may follow as an after effect of measles or whooping cough, or they may occur suddenly and with very little warning. These diseases of the respiratory system are more prevalent in winter than in summer and are much more difficult to combat than digestive ailments such as summer complaint.

"These winter diseases are particularly dangerous to babies and young children," Dr. Cox stated. "Nearly all of them are spread through the secretions from the nose and mouth. Children not in vigorous health are naturally more susceptible to these complaints and the first line of defense," Dr. Cox cautioned, "is to strengthen the powers of resistance against disease: the second is to keep them under medical supervision and the third is to make sure they avoid contact with others who have coughs, colds, or fevers."

MAVRICK SPOTLIGHT

The Seniors this year, for the first time in the history of E. H. S. are sponsoring an entire column dedicated to the players that have made E. H. S. famous. We will call this column the "Mavrick Spotlight" and will appreciate any ideas for improvement.

Naturally our first will call attention to Johnnie Hicks. He was our "high point" man last year in football and has two more years to play. He weighs 155 pounds and stands only five feet and six and one-half inches in height. He has lettered as full back every year he has been in high school, and is well known all over this part of the state. He has black hair, brown eyes, and is number 33 on the football field. His other interests are basketball, in which he plays guard, and baseball, where he plays third base. In track he runs the 440 yard relay, and does the discus throwing. Johnnie has been the fire boy from his class ever since he has been in high school.

We are looking forward to another year with Johnnie, after this year, because he plans to stay over another year before entering college.

SENIOR SPOTLIGHT

This week the spotlight of the mighty senior class shines on that "little" number all the girls have been whispering about. He is tall, brunette, brown eyed, Jimmy Watson, from Odessa. Jimmy is not new here but is just an old student coming back; he went to school at South Ward until he was in the second grade when he moved to Odessa. He likes Tommy Dorsey all right, but will take Georgia Carol's "To Each His Own" any time. His favorite pastime is hunting and he also like to draw. His favorite sport is football. His favorite stars are Ingrid Bergman and Gary Cooper. Here is wishing all the luck in the world to a swell senior.

WHO IS IT?

Each week the "Round-Up" will feature some person in "WHO IS IT?" A description will be given of the person but his or her name will not be told until the next week. The person for this week is a Senior who has brown hair and dark brown eyes. She weighs 122 pounds and is five feet and five and one-half inches in height. She plays the piano and plans to major in music in College. She sings alto in the Harmony Girls. A few of her favorites are swimming, horse back riding, and she above all adores football. "In Love In Vain" by Perry Como is tops in her estimation. She is also a member of the mighty Double Seven Club.

JUNIOR SPOTLIGHT

This week the Junior Spotlight stops on popular Shirley Frazer, the class cheer leader. Shirley has auburn hair, brown eyes, is 5 feet and 5 inches in height, and weight 108 pounds. Among her favorites are "To Each His Own," "Night and Day," fried chicken, marble ice cream, typing, red and black, football, basketball, and of course, Bobby Blair. She is an active member of the Sub-Deb Club and the Harmony Girls. Here's wishing luck to a swell girl.

TRIP TO EASTLAND CREAMERY

The first year homemaking girls found their trip to the Eastland Creamery very interesting. Mr. Kilgore took the girls through and explained every step in the care of

milk from the time it is received until it is sold to the consumer. He showed how the milk is tested for bacteria when it is just received, how it is pasteurized, colled, and bottled. The machine that washes and sterilizes the bottles and the lights that sterilize the equipment and air in the pasteurizing room were particularly interesting.

The girls watched the making of Eskimo pies and were served just before leaving.

SOPHOMORE SPOTLIGHT

This week our spotlight shines on a very pretty and also a very popular girl. She has blonde hair, blue eyes, is five feet and one inch height and weighs 96 pounds.

Her greatest interests are in a certain senior boy and football. Her favorite song is "To Each His Own" and her favorite movie stars are Dana Andrews and June Allyson. In the way of food, chocolate cake is tops. Her favorite pastime is sleeping.

As you all know by this time we are talking about none other than Betty Ferguson.

How much light is ENOUGH to study arithmetic?

Arithmetic requires concentration, close attention to small type, extra work for young eyes. BETTER LIGHT is needed for such exacting work to help prevent unnecessary eye fatigue, drowsiness, lack of interest.

Check carefully the lamp your children use for studying—be sure the lamp bulb is large enough—at least 100-watt or 150-watt size—and see that it has a shade which spreads the light—prevents glare.

TO OUR MANY FRIENDS

We can scarcely express to everyone of you how grateful we are for your sympathizing letters and words of consolation. Yet the loss of our son, who was a father, a brother and husband, so prostrated as that we are hardly able to write this reply. You all have assured us that time will reconcile us to our great bereavement. Yet God moves in mysterious ways, and it would help if we had the wisdom to understand why a man in his prime, such as our loved one had to be called. Yet your sympathizing words and letters have enabled us to bear our sorrow. God bless each and all of you for your sweet words of consolation.

B.F. GOODRICH SILVERTOWN OUTWEARS PREWAR TIRES

Shipments of the new B.F. Goodrich Silvertown are arriving regularly, and we may have your size. But there's more demand for some tire brands than others, and the big extra demand is for Silvertown, the tire that outwears prewar tires — even at high speeds. There's a reason! The new tread design is wider, flatter and puts more rubber on the road. More and stronger cords support this tread — give it extra resistance to bruising and blow-outs. Please check your needs well in advance. Talk to us. We'll do our best to keep your car rolling until we can get new tires for you.

SIDE ISSUES . . .

(Continued From Page One)

them and interested in them. Marvin Hutto says his son Charles found a whole apple limb covered with blossoms the other day, and came in the house yelling about it, as well he might.

But Mrs. Don Parker, being a woman and not being disposed to let any mere man have the last word on any subject, told of a pear tree owned by a neighbor of hers that had pear blossoms all over it recently. So I guess the phenomenon must be quite widespread this season.

I had started once or twice to write a piece in this column about how springlike it became in Eastland County after the first fall rain came, with green grass bursting out all over and even the trees putting on new leaves and a look of spring.

But I didn't realize just how springlike it really was until all this talk of fruit trees blossoming came up.

Coach Johnny Little after his team had lost its first two games of the season said, "That preacher just left too soon."

By "that preacher" he meant the coach for the past two years, Chief Warden, and of course his remark was purely in jest except that he was implying that if the preacher had been around, maybe the players would have had better luck and might not have received so many early season injuries.

Chief Warden, who in private life is Rev. Chief Warden, Methodist pastor in Cisco, was at the meeting of the Eastland Lions Club the

other day and seemed as happy as ever about everything.

He said he was going to school part time and the other 72 hours a week was working toward the early completion of the new building for his church in Cisco, which it seems to me is known as the East Side church. Or something like or unlike that.

Anyway, Chief and his congregation have been a long time on the project, have done most of the work themselves, and have much to look forward to.

Businesses are changing hands at such a rapid rate, and others are moving hither and yon in Eastland so swiftly that it is hard to keep up with all the activity.

One move often paves the way for another.

As when J. O. Earnest moved his grocery store into his new building, that let Mr. and Mrs. Charlie Fagg's furniture store get into his former building.

And that in turn cleared the way for a new Eastland drug store to be opened in the former furniture store location by Doc Davis, until a couple of years ago an Eastland pharmacist, and Fred Maxey.

As Tom Lovelace says, when a family vacates a house, it means four or five household movings, usually, these days.

Mrs. D. E. Hayden of San Saba has been the guest this week of her sister and family, Mr. and Mrs. E. L. Wittrup.

The cautious golfers wear two pair of pants, just in case he gets a hole in one.

It is said that Oregon obtained its name from oyer-un-gen, a Shoshone word meaning "place of plen-

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure.

When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages are sometimes further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.
