NEED A DESIGN FOR

A few years back there was a womans club in a certain town which was on the point of disbanding because of a growing lack of nterest. Starting out with a good membership it moved along for awhile with good interest and good attendance. In time the attendance begun to drop off and interest die out. All efforts to get a good attendance failed and club members gave serious consideration to the matter of disbanding. One day a new comer in the com munity who attended a meeting of the dying club caused some consternation by the announcement that the club was dying and deserved to die for the reason that ageous visitor said, is a challenging, absorbing interest compelling ity need. One of the first things a new telephone operator learns is to be always ready for the next call-your callanybody's call!

THESE DAYS

Operators have a lot of calls to handle nowadays. There are more telephones in use than ever before and calling is at an all-time high. The switchboard at times is literally ablaze with lights-each one calling for "Number, please?" and each one getting a "Number, please?" as quickly as skilled and courteous operators can manage. If your call is not answered at once, you'll know that nimble fingers will reach it as soon as they possibly can.

As soon as much-needed new equipment can be obtained and installed, we'll be ready to handle your calls quicker and better than ever before,
