Odie Alsobrook, Dallas; C. V. Culver, Hillsboro; J. W. Baldwin, Wichita Falls; Sam Harmon, Gainesville; C. C. Farris, Houston; Mr. Langford, Wichita Falls; E. K. Burt, Wichita Falls; Mr. Griffin, Wichita Falls; J. C. Man, Jr., Wichita Falls; David D. Pickrell, Division Superintendent for Premier, Ranger; Gus Clemens, San Antonio; W. B. Osborne, Alice; Mr. and Mrs. Roy Gaines, Sinton.

Geologist Have Eastland County Field Day

Members of the Dallas and Fort Worth geological societies as well as other geologists from over the state, to the number of approximately 100 have been in Eastland county for the past two or three days, according to the best information available, on what the profession calls a "Field Day."

The purpose of these field days, as we understand it, is for various geologists to go over a certain territory and make a study of it from the geological standpoint and then at some future meeting of the associations have a general discussion on the particular territory visited.

Eastland county, being in the oil limelight at this time, makes the visit of these geologists especially interesting.

Women To Serve As Regulars In Armed Forces

WASHINGTON, June 12, (UP)—President Truman today signed into law a bill making women regular members of the Army, Navy, and Air Force.

Until now, women in the WACS and WAVES have been reservists on temporary active duty.

The Air Force immediately announced plans for a regular "women in the Air Force" to be designated as the "WAFS".

They will not exceed two percent of the over-all strength of the Air Force, as required by the law for all three services.

New Oil Activities Announced In Three Widely Separated Sections

Starting in 15 days, a test of the Ellenberger will be drilled on the W. E. Kirkland, six miles west of Eastland by Homer G'over of Tyler and Eastland.

Glover also will drill north of the Bilake pool on the Willie Ezell, inside the line of Eastland County, to the Caddo.

On city-owned land northwest of Eastland, the Tex Harvey Oil Co., of Dallas will drill. The land was acquired by the city in connection with Lake Eastland.

Totsy Glen, Edith Wren, and E. M. Theat Jr. who received B. B. A. degrees from Baylor University on May 31st. They were members of the largest graduating class in Baylor's 103-year history. Totsy Glen and Edith Wren have accepted positions with the Phillips Petroleum Company in Borger, and E. M. Jr., will enter Baylor Law School in the fall. They are all graduates of Eastland High School. Their parents are Mr. and Mrs. E. M. Theatt of Eastland.

BRYAN BLALOCK, above, of Marshall, who will address members of the Eastland County Dairy Association and others interested in the promotion of the dairying industry in Eastland county, at the free barbecue being given at the association at the Eastland City Park Monday evening at 7:30 o'clock by the Eastland Chamber of Commerce.

White Hooded Men Break Up Girl Scout Camp

BIRMINGHAM, Ala. June 12 (UP)—Authorities today promised to investigate a night raid on a nearby Girl Scout Camp by a band of men wearing the white robes and hoods of the Ku Klux Klan.

Two white girl scout instructors conducting a "leadership training" course for some 20 Negro girls reported that the masked men broke into their tent late Thursday night and gave them 24 hours to "get out."

Scout officials said the camp was broken up yesterday to safeguard the lives of the students and instructors.

Among ancient books in the University of Oklahoma library's "Treasure Room" is the 1483-printed "Speculations and Confessions" of John of Westphalia.

Eastland Men Attend Dallas Youth Meeting

D. E. Frazer and W. E. Moore of the State Department of Public Welfare Eastland regional and area offices were in Dallas Tuesday, Wednesday and Thursday of last week, attending Child and Youth Week.

Mrs. Joseph M. Perkins, also of Eastland, addressed the meeting on the opening night. The affair was closed Thursday with an address by Governor Jester.

Music Students' Annual Spring Recital Given

Mrs. A. F. Taylor presented her music pupils in their annual spring recital Thursday and Friday nights, in the High School Auditorium. The stage was beautifully decorated with palms and tall baskets of gladioli on either side with fern laced in a low lattice which extended almost to the center of the stage. In the center background was a large arch laced with fern, with a tall basket of gladioli in the center.

Mrs. Taylor presented students from pre-school age up through college age. She had four who were her former students and who are now majoring in music in college. She also had several four-piano numbers which were very good and showed that much time had been spent with their preparation. The Beethoven Chorus gave two very good numbers. Both programs were very good.

Vacation Bible School To Open Monday 9:00 A. M.

Mrs. F. L. Drago, superintendent of the children's department of the Methodist Church, announces that the Vacation Bible School will open Monday, June 14. The classes start at 8 o'clock a. m. and finish at 11 o'clock. The school will run 2 weeks, Mondays through Fridays, and all children, regardless of the church they regularly attend, are invited.

The school is run by the following women:

Junior Department—Mmes. Milton Day, Charlie Joe Owens, Hubert Jones, Emmett Powell, R. D. McCrary, Rudolph Little, Carmen Ammer and J. M. Cooper.

Primary Department—Mmes. J. U. Johnson, W. E. Brashier, E. J. Turner, Jim Carter, Homer Smith, and F. L. Drago, and Miss Patsy Young and Emily Long.

Kindergarten—Mrs. Ed. Willman, L. E. Corbell, C. G. Stinchcomb, Russell Hill, and Miss Shirley Frazer.

Rubber Co. Grant Wage Hike

CLEVELAND, June 12, (UP)—The Firestone Tire and Rubber Co., and the United Rubber Workers, CIO, today signed their first master contract, including an 11-cent hourly wage increase for 23,000 employees.

The wage increase will become effective Monday, bringing the Firestone workers average hourly pay to \$1.65.

PROCLAMATION BY THE GOVERNOR OF THE STATE OF TEXAS

To All To Whom These Presents Shall Come:
WHEREAS, Milk is Nature's most nearly perfect food and of recognized and vital importance to our national health and well-being; and

WHEREAS, the care, the preservation and the improvement of the great American Dairy Industry, with its sales more than twice the mill value of all steel production and its 10 million people who are wholly dependent on the dairy and allied industries for their livelihood, are of transcendent interest to all Americans as a matter of practical living; and

WHEREAS, the State of Texas, with over one million four hundred thousand milk cows, valued at 150 million dollars, produced from the farmers of Texas a cash income of 110 million dollars in 1947; and

WHEREAS, the State of Texas has advanced from a rank of 30th place in 1930 to 8th place in 1947 in value of dairy products in the United States; and

WHEREAS, The Dairy Industry each year reaches, during the month of June, its peak of production, both in volume and in quality, because of Nature's marvelous abundance of the grasses of the fields for our dairy herds, during that period; and

WHEREAS, as a consequence the American Dairy Industry has set aside the month of June as a period in which the health and life-giving values of milk and dairy products may best be indicated to the American public, as well as to indicate the wonderful enjoyment that humans experience in the consumption of milk and dairy foods; and

WHEREAS, in recognition of the great advancement of dairying in Texas; and as a tribute to the 338,000 farmers in Texas who own milk cows

NOW, THEREFORE, I Beauford Jester, Governor of the State of Texas, in full appreciation of the opportunities here presented for constructive public service, do hereby proclaim the period of June, 1948, as JUNE DAIRY MONTH FOR THE STATE OF TEXAS, and do urge that the month be fittingly observed, in private and in public, in order to increase appreciation and consumption of milk and dairy products and to improve our standard of health, our enjoyment of delicious dairy foods, and our financial well-being.

IN TESTIMONY WHEREOF I have set my hand and caused the Great Seal of the State of Texas to be affixed. Done at the Capitol in the City of Austin, this 19th day of May, A.D., 1948.

SEAL

BEAUFORD JESTER
Governor of Texas

BY THE GOVERNOR:
PAUL H. BROWN
Secretary of State

Senate Approves American Aid To Western Europe

WASHINGTON, June 12 (UP)—President Truman had a Senate go-ahead today to lend American support, and perhaps eventually U. S. arms, to Western European alliances to check aggression and insure world peace.

The Senate voted 69 to 4 yesterday to "advise" the President it favors renewed efforts to curb the United Nations veto power. The resolution also looked toward U. S. backing for such defense pacts as the five-power "Western Union" arrangement in Europe.

It came amid even stronger hints that the U. S. will not stand idly by in event of a military showdown in Europe.

Sens. Walter F. George, Ga., and Carl A. Hatch, N. M., Democratic members of the foreign relations committee, told the Senate that in such a case this country would give "actual military support to Europe."

Senate President Arthur H. Vandenberg called upon members to face "the grim reality that peace may fall" by voting for the resolution. He termed it an effort to make certain "another war will not be our fault."

Episcopal Service At 11 A. M. Today

Regular services will be conducted at 11 o'clock Sunday morning at Holy Trinity Church with the Rev. James W. McClain in charge.

The morning prayer service which is usually held at 8 o'clock when the regular service occurs at 11 o'clock, will be eliminated on this Sunday.

NORMAL FREIGHT SHIPMENTS TO BERLIN RESUMED AFTER RED HALT

GETS B. A. DEGREE

Miss Edith Allison, daughter of Mr. and Mrs. J. C. Allison, who last Monday received her Bachelor of Arts Degree from Hardin-Simmons University at Abilene. She majored in Bible and minored in psychology. Miss Allison was an active member of Beta Mu Kappa, national honorary music society, of America; University Chorus, A Cappella Choir, Life Service Band, Greater Council of B. S. U. and Colt Club.

Miss Allison Gets B. A. Degree From Hardin-Simmons U.

Miss Edith Allison, daughter of Mr. and Mrs. J. C. Allison, received her Bachelor of Arts Degree with a major in Bible and a minor in psychology at Hardin-Simmons Monday morning. Commencement exercises were held in Behrens Chapel. Lieutenant-Governor Allan Shivers delivered the commencement address.

Miss Allison was an active member of Beta Mu Kappa, national honorary music society of America; University Chorus, A Cappella Choir, Life Service Band, Greater Council of B. S. U. and the Colt Club.

Attending class with her were her brother and wife, Rev. and Mrs. Joe W. Allison. Mrs. Allison received her B. S. degree with a major in elementary education and a minor in English. She was a graduate of Wayland Junior College and taught school at Hale Center for three years before coming to Hardin-Simmons to finish work for her degree. Joe Allison will receive his B. A. with a major in Bible and minors in speech and sociology after he completes six more hours of Greek. Before attending Hardin-Simmons Rev. Allison had served four years in the Navy.

Miss Allison left Monday morning with a group of Hardin-Simmons students to attend the South wide Baptist Student Retreat at Ridgecrest, North Carolina. Rev. and Mrs. Joe Allison will leave soon for California to attend the Golden Gate Southern Baptist Theological Seminary at Berkeley, after visiting her parents at Olton, and his parents, Mr. and Mrs. J. C. Allison, of Eastland.

Negotiators Hint End Of Wage Deadlock

WASHINGTON, June 12, (UP)—Soft coal wage negotiators hinted today that the week-long deadlock in negotiations of a new 1948 contract has been broken.

Charles O'Neill, operator spokesman, and John L. Lewis, United Mine Workers president, told reporters after a two-hour negotiating session this morning that the conferences will resume at 3 P. M. Monday.

In contrast to other days of the week, both men declined to discuss any detail of the negotiating session. In the past, this has usually meant that some progress had been made.

BERLIN — The Russian army cut off rail freight traffic from Western Germany to Berlin for a time today, but finally reached an agreement with the British permitting resumption of normal shipments to the German capital.

Col. Hans W. Holmer, chief of the transport division of the American military government, announced that Russian-British negotiations had led to settlement which would permit resumption of normal freight traffic to Berlin by early evening.

Holmer said the Russians gave the green light to Allied freight trains, on which about 2,000,000 Germans in Berlin depend for food and other supplies, after conferences with the British authorities in Berlin and at Helmstedt, which is on the Russian-British zonal border.

Gen. Lucius D. Clay had denounced the Russian action but had taken no action to enter the dispute, waiting to assemble all the facts. The British-Russian agreement settled the matter in the meantime.

The Russian move had been interpreted at first as another step in the Soviet campaign to force the Western Allies out of Berlin, but quick settlement of the issue suggested that the Soviets had intended no drastic action, and that Soviet officers might have misunderstood orders for new controls on traffic.

By Proclamation June Is Dairy Month In Texas

June is Dairy Month in Texas by official proclamation, signed recently by Governor Beauford Jester. The proclamation was presented by the Governor to Herman Heep, Director of the Texas Jersey Cattle Club, at a brief ceremony held at the Heep Jersey Farm near Austin. Mr. Heep, Texas Breeder of fine Jerseys, is President of the American Jersey Cattle Club. At the official ceremony he accepted the proclamation as the representative of Grover Sellers, Sulphur Springs, President of the Texas Jersey Cattle Club, who was unable to be present.

Governor Jester told Mr. Heep that he wished to congratulate the Jersey breeders of Texas for having more Registered Jerseys than any other State in the Union. "Texas population is increasing rapidly as a result of new industries locating in Texas," the Governor told the gathering. "This means that we need more milk and dairy products to supply these people. This does not necessarily mean more cows, it means better cows, better pastures, soil improvement, better feeding practices and herd management. I predict that there will be a strong demand and good market for milk in Texas for many years."

In the proclamation, the Governor paid tribute to the 338,000 dairy farmers in Texas, who own 1,200,000 milk cows valued at 150 million dollars and which produced 4 1/2 billion pounds of milk in 1947 with a net value of 110 million dollars to milk farmers. During the past 20 years Texas has advanced from twentieth to eighth place among the States in value of dairy products. In spite of this increase, Texas has grown so rapidly that the State is still importing dairy products.

Way Cleared For Injunction To Halt Strike

WASHINGTON, June 12, (UP)—A presidential fact-finding board today cleared the way for the government to seek an injunction against the threatened nationwide maritime strike by reporting that it would tie up the entire shipping industry.

The board said that "if the status quo can be maintained, real and sincere collective bargaining may finally avoid the disruption."

Six maritime unions have threatened to call their 100,000 members out on strike at midnight Tuesday unless their contract demands are met. A Taft-Hartley law injunction would prohibit the walk-out for 80 days.

Free Barbecue For County Dairy Association Monday Night At The Eastland City Park At 7:00 P. M.

The Eastland Chamber of Commerce will give a barbecue for the Eastland County Dairy Association at the Eastland City Park Monday evening at 7:00 o'clock. The barbecue will consist of plenty of free food and a short program. Those interested in promoting the dairy industry in Eastland County is invited.

Principal speaker at the Monday night barbecue will be Bryan

Members Of Local Band Attending Ft. Worth Clinic

About twenty members of the Eastland High School band are attending a band clinic at T.C.U. Fort Worth for two weeks, beginning today. They are to be instructed by five very notable professors, and hope, by making this study, to have a much better band next year.

While at T.C.U. they will live in the dormitories and barracks left empty by the students on vacation. They will pay regular room and board and eat in the school's cafeteria.

Flies From South America For Grand Mother's Funeral

Requiem memorial services for Mrs. E. E. Jones of Cisco were held at the Holy Trinity Episcopal Church in Eastland Friday morning at 10:30 with Rev. James McClain officiating. Attending relatives included Mr. and Mrs. Dickey, of Dallas, grand niece of the deceased and Vance Bowman, who flew from Columbia, South America to attend the services. He is employed by the United States Oil Company there, and received a month's leave on learning of his grandmother's illness.

Eastland Mavs. Play Weatherford There This P. M.

After playing five consecutive games at home the Mavericks will go on the road for three games. The first one to be played this afternoon at Weatherford. The other two will be played at Mineral Wells and Strawn.

★ WASHINGTON COLUMN ★

Congress Must Work Fast For 'Electioneering' Record

BY PETER EDSON
NEA Washington Correspondent

WASHINGTON—(NEA)—If this year's elections were to be decided on some other basis than personalities, hunches or emotions, the most important issue would be the record of the 80th Congress, which has had a Republican majority, versus the record of the Democratic President Truman.

It has been a "business" Congress, definitely reversing the trend of the "labor" Congresses in the Roosevelt years.

This probably explains why Fortune, the \$1.25 glamor magazine of big business, leads off this month with the statement that "the 80th Congress has accomplished more important, useful work than perhaps any other peace-time Congress."

"This could be damning with faint praise." But it will be quoted widely by Republican congressmen as justification for their record over the past two years. It is also open to Democratic challenge.

FORTUNE lists nine good things this Congress has done: Refusal to seat Senator Bilbo of Mississippi, the European Recovery program, aid to Greece and Turkey, aid to China, passage of the Mundt "Voice of America" authorization bill, the Taft-Hartley labor law, tax reduction, the Lodge-Brown bill creating the Hoover commission to study reorganization of federal government, and the travels of 200 congressmen in Europe last summer.

Bilbo wasn't seated, he was allowed to go home and die. ERP, the Truman Doctrine of aid to Greece and Turkey and the concept of the Voice of America came from the Democratic administration. Aid to China was taken up by the Republicans, against the wishes of the President and Secretary Marshall, who thought they had learned by experience that it couldn't be made to work.

It is still too early to tell whether the Taft-Hartley law is good or bad. It has been used effectively to stop John L. Lewis once and now faces a second test. The law has not brought labor peace.

Taxes have been cut, but even the Republican leadership admits that they will have to be raised next year, or else government will have to go back to deficit financing.

The Hoover reorganization commission doesn't report till 1949, so it's too early to tell.

Even the Fortune editors, at the end of their piece, admit briefly that the 80th Congress has some debits. Listed are failure to do anything about admitting displaced persons, the effort to raise the wool tariff while the administration was trying to negotiate trade agreements with 23 nations at Geneva, the Howard Hughes probe.

That's a piker list, likewise open to challenge.

THE real record of the 80th Congress is being made in the last two weeks of the session. There may be some fast work at the finish, but at present the list of measures to be by-passed looks longer than the list of measures on which action will be completed.

In passing judgment here, it is important to note the wide difference between the progressive Senate and the reactionary House. The Senate has passed long-range housing and education aid bills. Both are apparently being killed in the House. The House quit cold on a long-range farm program. If anything gets done on this it will be through the efforts of the Senate. The House Rules Committee has for two years held up Universal Military Training. But give this same committee credit for blocking a tax reform bill so bad it was disgraceful.

Nothing effective has been done about the cost of living. The national health program is dead. Minimum wage standards will not be raised. Social security extension will be far less than recommended, if anything is done at all. Budget cuts will be insignificant even if ERP funds are reduced far below necessary minimums.

There is an awful lot in this record not to be proud of.

★ THE SCOREBOARD ★

Joe Has the Killer's Attitude, But What About His Muscles?

BY HARRY GRAYSON
NEA Sports Editor

POMPTON LAKES, N. J.—(NEA)—John Roxborough says Joe Louis has the same mental attitude he took into the battle pit the second time he tackled Max Schmeling.

Manager Roxborough talks as though that's all the long-term Brown Bomber requires at Yankee Stadium, June 23, to regain the prestige he lost when Jersey Joe Walcott twice set him on the seat of his silk panties at Madison Square Garden last Dec. 5.

"Joe spent 32 days on Irving Roane's farm, 26 miles northwest of Kalamazoo," explains Roxborough. "There was no golf, no diversions. Outside of his handlers and myself, those he saw or talked to were farmers. He had plenty of time to think, and he headed for Pompton Lakes and the boxing routine in the state of mind that was his before he knocked Schmeling into the hospital."

Roxborough took Louis to Roane's farm to get his mind off of and keep him away from golf. Had it not been for the golf courses there, he would have put in the roughing-it period at West Baden.

"Joe dried out for the first fight with Walcott, that's true," says Roxborough. "But he also was baked and burned out before it on golf courses. He doesn't play golf like the average fellow. He isn't satisfied with less than 36 holes a day. And any trainer will tell you that the muscles used in the golf swing aren't the ones that enable you to punch a bloke on the nose."

SPEAKING of the second edition with Herr Schmeling, June 22, 1938, Louis was given a tremendous lift at the last minute by Henry Armstrong and the late Eddie Mead.

Louis moved in at Pompton Lakes as Armstrong moved out to cuff Barney Ross around for the welterweight championship.

Rain postponed the Ross-Armstrong scrap, and Hammering Henry returned to Pompton Lakes, and shared the camp with Louis for two or three days.

While there, Fat Eddie Mead, who had a great time with fighters, saw the late Jack Blackburn trying to teach Louis how to ward off and get away from right-hand punches.

"What's he doing that for?" veteran manager Mead asked Roxborough. "The only way he can get away from a right-hand punch is to belt the other fellow with one. Why waste time with a hitter like him?"

Roxborough was greatly impressed, and Louis even more so when the super-aggressive Armstrong smothered Ross with punches.

Roxborough put Mead in Louis' corner for the Schmeling encore that was to make or break Smoky Joe. It was Eddie Mead who shouted "Go get him!" and shoved a snarling Louis out of the corner to destroy Schmeling in just two minutes and four seconds.

But that was 10 long years ago. Joe Louis' mental attitude may be quite all right for this one, but how about the state of his fighting equipment?

Think You Can Make It, Chum?

Bulwinkle-Reed Bill Vetoed By Pres. Truman

WASHINGTON, June 12, (UP)—President Truman today vetoed the Bulwinkle-Reed bill which would exempt rate agreements among railroads and other carriers from the anti-trust laws if approved by the Interstate Commerce Commission.

No legislation giving a major industry immunity from the anti-trust laws should be enacted unless alternative safeguards are provided for the public interests," Mr. Truman said in a veto message sent to the Senate.

"This measure fails to provide such safeguards."

Bernadotte, Advisers Fly To Jerusalem

CAIRO, June 12, (UP)—Count Folke Bernadotte and his United Nations advisers made a flying trip to Jerusalem today while Arab and Jewish leaders still continued to charge each other with violations of the Palestine truce.

Bernadotte said he would stay in the Holy City for just a few hours "to get a first hand impression of the situation." However, one team of truce observers already was in Palestine and others were reported on the way.

U. S. To Send Patrols

LAKE SUCCESS, June 12, (UP)—The United States will send truce patrol ships and planes to Palestine in response to an urgent appeal from United Nations mediator, Count Folke Bernadotte, it was learned today.

Michael, Weds Anne

Michael, former King of Roumania, and his bride, Princess Anne of Bourbon-Parma, appear at the Greek Royal Palace in Athens where they were married on June 10. (NEA Radio-Telephoto).

Truman To Speak On Relations Of U. S. And Russia

Enroute With President Truman June 12 (UP)—President Truman switched abruptly from domestic to foreign issues today in preparation for his speech on Soviet-American relations at Berkeley, Cal.

The President may have indicated the tenor of his speech at Eugene, Ore., last night when he told a crowd gathered about the rear platform of his train that Marshal Josef V. Stalin was "a prisoner of the Politburo."

Divers Report 150 Trapped In Submerged Ship

COPENHAGEN, June 12 (UP)—Danish navy divers reported today that the bodies of an estimated 150 men, women and children were packed in the submerged cabins and engine room of the coastal Steamer Kjobenhavn, which struck a mine and sank in 10 minutes off the coast of Jutland yesterday.

The United Steamship Company, owners of the vessel, said no more survivors have been found other than the 261 persons rescued yesterday.

Nineteen bodies have been recovered. Divers later today will begin the task of bringing the other bodies to the surface.

The fastest bird known to man is the swift. Some species of swifts attain speeds estimated at 200 miles per hour.

Hog producers are being asked by the U.S. Department of Agriculture to increase pig production this fall by at least 10 per cent.

Defeated Rooster Ruled Winner

MANILA (UP)—The Philippine supreme court dug out a centuries-old Spanish royal decree to settle a cockfight.
The court ruled that victory must be awarded to a defeated rooster, even though he is fatally wounded, if his adversary balks at continuing the fight.
The ruling ended a spirited controversy which began when a referee awarded victory to a prostrate and dying rooster. He based his decision on the fact that the adversary, though unscratched, walked away and refused to finish the fight.
A Zambeanga court reversed the referee's decision, ordering that \$420 in bets be handed over to bakers of the surviving rooster. The losers took the cast to the supreme court.

Surgical Methods Born In War Credited With Saving Lives

ROME (UP)—During World War II modern surgery, developing new techniques and methods, reduced the mortality rate to a low unprecedented in warfare and saved millions of men from permanent disfigurement or disability.
"That only 18,000 amputations were done in more than a million (American) casualties was a tribute to the medical departments," Comdr. Morris Weintrob of Brooklyn told the International Congress of Surgeons here. "During the same period 120,000 (American) civilians lost limbs because of accidental injury or disease."
He delivered a paper on "Surgical Lessons of World War II," in connection with the opening of a United States Navy medical ex-

hibit, which proved one of the high points of the convention. After the conference, the exhibit was taken on tour through northern Italy, upon request of medical authorities in several cities of that area.
Weintrob and Naval Capt. H. H. Kessler of Newark, N. J. demonstrated the exhibit.
"World War II produced no outstanding discovery in surgical technique," Weintrob said in his paper. "Nevertheless, several important lessons were learned."
"Results were better because trained specialists were brought closer to battle areas, while blood and plasma were available earlier and in greater quantity, and rear area treatment by specialists was more highly concentrated."
One of the most useful discoveries war surgeons made was in a simplified treatment for burns. A simple petroleum jelly pressure dressing was found much superior to the complicated procedure previously used in treating burns, Weintrob said. Early skin grafts were made possible by penicillin and sulfa and "gave excellent results in the healing and reconstruction of burned areas."
Airmen involved in crackups often were injured in the middle

POLITICAL ANNOUNCEMENTS

The Eastland Telegram is authorized to publish the following announcements of candidates for public office, subject to the action of the Democratic primaries:
FOR COUNTY SCHOOL SUPERINTENDENT (Unexpired term).
H. C. (Carl) Elliott
FOR SHERIFF
J. B. Williams (Re-election)

third of their faces, surgeons found. Surgeons devised new ways to prepare the patient for facial reconstruction jobs when he could be removed to base hospitals.

Navy dental officers developed a plastic eye which could be moved from side to side or up and down like a real one. It was also superior to glass eyes in that it was held in by suction and could not fall out. It also proved to be "weather proof."
Scores of heart operations were performed under battlefield conditions to remove sections of sharp- or bullet-logged in the heart, Weintrob said.

Resistance to stem rust is the "backbone" of wheat improvements, says the U. S. Department of Agriculture.

Pace That Kills
ROCKLAND, Mass (UP)—The average American housewife takes approximately 18,000 steps daily, according to an estimate by the National Foot Health Council.
Dr. Joseph Lelyveld, chairman of the council, said the disclosure emphasizes the need for medium rather than high heels on Mrs. America's shoes. High heels are all right for evening wear, however, Dr. Lelyveld said.

NEW LIGHTING SPELLS HOSPITALITY IN CAREER GIRL'S ONE-ROOM APARTMENT

The dismal, uninspiring one-room apartment pictured at the lower right is now a comfortable living room-bedroom with an air of spaciousness that belies its 18½x12½ foot dimensions. Subtle touches of light have been tucked behind the bookcase, in the figurine cabinet and on top of the antique cherry chest in addition to comfortable light for reading with the new Certified floor and desk lamps.

By Mary E. Webber
General Electric Home Lighting Specialist

Not long ago, a young business friend of mine was complaining about the dismal appearance of her bedroom apartment and now depressing it was when she entertained. And, indeed it was, until the girl took her imagination in hand and devoted long evenings to re-decorating the room into the cheerful smart-looking living room-bedroom pictured above.

The small room, shown in the "before" picture at the lower right, is typical of countless rooms found in many family hotels and

attractive and more comfortable groups. Her three most cherished possessions—a Royal Doulton collectin in a handsome cabinet; an antique cherry chest of drawers; and her books, formed the nucleus of her redecorating plan.

She actually borrowed her color scheme of rich fuchsia, sea green and pastel pink from the Doulton figurines. Because she loved her books and used them frequently, she made her library the center of interest in her room. The mahogany bookcase was moved to the center wall opposite the door and flanked with two inexpensive, low bookcases to add width to the grouping.

A floral wall hanging, mounted on a rod above the bookcase, added height and dramatic interest to the setting. Sturdy striped cotton slip covers in blue, green, fuchsia on an ivory background, replaced the faded slip covers on the lounge chairs.

Light Touches
Notice how the skimpy-shaded bridge lamp has given way to a handsome pair of Certified floor lamps beside each of the chairs. These newly styled lamps give more light than any lamps of their type ever on the market before, and because they're equipped with three-lite blubs, they offer a

rooming houses throughout the country. If you're trying to make a home in one of them, you may find many of her unusual decorating tricks suitable for your own use.

Furniture Rearranged
First of all, the young girl rearranged her furniture into more

choice of light—high for reading and low for conversation.

The final touch that sets the whole grouping apart and makes it distinctly different is a light (two 60-watt lumiline lamps) tucked behind the mahogany bookcase to light the wall hanging.

Although you may not see it in the photograph, tiny fluorescent lights have also been tucked in the top of the collector cabinet to light the figurines and bring out their subtle colorings.

Red Becomes Studio Couch
Here again, rearrangement of the bed and desk brought new beauty and comfort to the room. In order to save precious wall space in the small room, the girl placed her desk at a right angle at the head of the bed, making it possible to use one Certified Lamp for writing at the desk or reading in bed. A trim, tailored slip cover and bolsters in yellow twill, transformed the bed into a smart studio couch.

New draperies in the same yellow twill to match the color of the walls set a pleasant background for the occasional chair and new

Political Candidates Put On Spot In Unusual Test Of Capabilities

By ALEX TROFFEY
United Press Staff Correspondent
PALO ALTO, Cal. (UP)—Names in big type and not-so-candid photographs on posters often are all voters know of political candidates. So the Palo Alto Mail Dispatch decided to change the situation.

It is putting office-seekers on the spot and their careers on the

junior portable CLM lamp, which replaced the awkward senior floor lamp.

At the opposite end of the room the girl erased the last bit of bedroom atmosphere by replacing perfumes and make up with a pair of fluted pink pots of philendron, chosen to repeat the colorings in the new Huldah print.

table by asking them to fill out scientific questionnaires about their activities and capabilities and then publishing the results. The Mail-Dispatch claims such "career profiles" are a "first" in the nation.

So far eight candidates have agreed to bare their lives. The newspaper says "busy electioneering by candidates is a weak excuse for the 30 to 60 minutes it takes to fill out the career inventory . . . so that voters can have the democratic prerogative to examine pertinent and unbiased factual information . . . without benefit of editorial coloring."

The surveys are the Van Allyn qualification inventories widely used by business and industry for selection and placement of personnel and by educational institutions in vocational guidance work. They make much lighter reading than the usual political statements.

They reveal a person's vocational abilities, limitations and character (honesty, public loyalty, etc.) and measurements of ideologies, progressiveness, conservatism, socialism, etc.) are not included.

For instance two boards of trustee candidates, Charlie P. Burgess and Donald R. Lilly, were quizzed on 35 identical subjects. Their answers were analyzed and summed up in terse paragraphs under each subject heading. Some of the deductions were not at all complimentary.

Scores ranging from "0" to "6" were given all responses, and zig-zag charts carried under the photographs. Burgess and Lilly both averaged "2" on their charts, excelling with the highest score of "6" in a few subjects, getting average scores in many others, but drawing blanks in some.

On the subject of administration, for example, Lilly "does not care to assume full responsibility for decisions of critical importance but prefers collaboration with others. Has had courses in economics and political science in college. He had no experience in

operating his own business or as a corporation officer. Will stick to his decision regardless of the opinions of others."

On the subject of people, Burgess' answers show he "finds people stimulating to him, but has had no training or experience in matters dealing with the human equation."

The candidates also give their views and are rated accordingly on the subjects of tools, machines, dexterity, strength, drafting, accounting, mathematics, records, grammar, art, foods, health, services, animals, agriculture, speech, entertainment, writing, research, selling, adventure, music, languages, religion, minerals, electricity, mechanics, meteorology, construction, chemistry, physics, athletics and transportation.

Too Much Water

JAMESTOWN, N. D. (UP)—Too much water caused the Frank Sailer home to burn to the ground. Firemen were unable to bring their equipment to play against the blaze because of the flood swollen Pipestem River; the house was reachable only by a foot bridge.

To bring you more oil,
we've built a
10-story structure
in the open Gulf

Designing and building the equivalent of a 10-story structure in the open sea called for all the ingenuity and skill of the country's best engineers. Utilizing carefully controlled directional drilling, as many as seven oil wells can be drilled from this structure.

Your need for oil is today so urgent that the oil industry is searching for and producing oil in locations once considered impractical for exploration and production. The most spectacular of these locations is in the open Gulf of Mexico, where Humble and other oil companies hope to find beneath the Continental shelf some of the oil you need.

To prove this region, and to produce oil from it, calls on the best engineering skill and scientific knowledge available in the United States, and requires the investment of huge sums of money.

The Humble Company now has off-shore drilling operations under way in water 50 feet deep, eight miles off the coast of Louisiana.

The drilling rig rests on what can be best described as the tenth story of a building, with the first four stories under water. The structure is built to withstand the worst weather the Gulf develops.

On this platform are living quarters for the crew, which will work around the clock in shifts. There is storage space for all the materials needed to meet foreseeable drilling conditions. And, above all, the structure has been designed to provide a safe home for crew members beyond reach of the ocean waves.

You are asking for more oil than ever before in history, and the oil companies' decision to risk drilling in the open Gulf is a good example of how the oil industry is doing everything that possibly can be done to provide you with more oil.

You can help this effort by making your personal demands for petroleum products reasonable, by cooperating with programs designed to conserve oil products for the uses to which they are best adapted, by the exercise of patience as the oil industry acts to meet the need.

All supplies and materials are brought to the "sea-going" drilling rig by boat. Here a tug maneuvers a barge loaded with drilling mud into position for unloading.

Every late device is utilized to speed up this effort to supply you with more oil. This radar charts the movements of boats, enables the operator, by radio, to tell them where they are and give them a course to and from port. It makes a valuable contribution to safe navigation, especially when a sudden fog rolls in.

The barge, Cap, a converted LST, is anchored about 25 miles from the large structure as construction begins on one of several smaller drilling platforms to be erected off the Louisiana coast.

CHURCHES

Christian Science Services
"God the Preserver of Man" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, June 13.

The Golden Text is: "The Lord bless thee and keep thee: The Lord make his face shine upon thee, and be gracious unto thee: the Lord lift up his countenance upon thee, and give thee peace" (Numbers 6:24-26)

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you. (Matthew 6:33.)

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "In divine Science, man is sustained by God, the divine Principle of being" (page 530.)

All's Well; Merely Mirage Out At Sea

WILMINGTON, Cal. (UP) — Everything was normal aboard the liberty freighter Allen C. Balch, en route to Long Beach, Cal. from the Canal Zone, until she reached a point 10 miles off lower California, then everything went topsy-turvy.

The entire horizon rose up and became cliffs and rolling hills, said Second Mate Eugene O. Ward. Three small U. S. Navy vessels, approaching from the north, appeared in double image, one of the images being upside down and directly over the other.

The cliffs and hills seemed to be rolling along like ocean waves.

Russia And West Reach Deadlock In German Zone

By JOHN B. McDERMOTT
United Press Staff Correspondent
BERLIN (UP)—Events of the past three months have been established beyond doubt that Russia and the Western Allies plan to go their separate ways in Germany.

Marshal Vassily Sokolovsky, Soviet military governor in the Allied Control Council, tossed gasoline on a smoldering fire when he walked out on a Control Council meeting March 20.

A series of explosions followed in succession. Anti-British and anti-American propaganda flooded Germany's Soviet zone. Rail, air, and highway restrictions to and from Berlin were announced by Soviet officials. The Russian zone economic commission was propped up by placing Commun-

They Will Tell Press About Public

SPOTLIGHT BRIGADE

The newspaper's broad appeal to the public, through editorial policy, classified advertising, display advertising and circulation, will be stressed when Texas publishers convene for their 69th Annual Convention in San Antonio, June 18 and 19. Pictured above are four of the men who will address the convention. Left to right, they are: Ralph Nicholson, publisher of the New Orleans Item, who will deliver a luncheon address on the importance of an unbiased editorial policy; W. H. Conrad, published of the Medford (Wis.) Star-News will share with the Texas newspapermen, ideas on classified advertising which have made that department of his weekly newspaper one of the most successful in the country; Walker Sausse of New Orleans, head of one of the largest advertising agencies in the South, will talk about display advertising in an address titled, "Where Do We Go From Here," and E. H. Pierce, publisher of the Jasper (Ala.) Mountain Eagle, and president of the Alabama Press Association, will explain the method of building newspaper circulation which has gained readers by the score for his publication.

Longer Life Expectancy For Babies Of Today

CHICAGO (UP)—Babies born in 1947 have a better chance of living to old age than any of their predecessors, according to the president of the Chicago board of Health.

Dr. Herman N. Bundesen said babies born last year will live an average of 66½ years, compared with a life expectancy of only 49½ years which babies had in 1900.

The number of babies born last year was 3,910,000. Of them, 3,700,000 will reach 21 and 2,500,000 will see 65.

If present children had to face the dangers of

Building Project Bows To Robbins In Their Nests

TWO RIVERS, Wis. (UP)—Construction was resumed on a new theater after all concerned agreed there would be no activity around a certain hawthorne tree at the building site.

Surveyors were laying out markers when Frank Wallo, who operates a nearby cafe, pointed to a bird's nest in the tree. Two young robins were in the nest. "Can't you wait until the little fellows are a bit older?" Wallo pleaded.

The men thought they could. So until the fledglings can fly, the theater construction will go on all

turn of the century, he said, fewer than 1,000,000 would live to

sets in key positions.
In western Germany it appeared that the Russians moves were part of a planned offensive to force the three Allied powers out of Berlin.
But two key developments upset their schedule:
1. They did not expect the

American commander, Gen. Lucius D. Clay, to put up such strong resistance.
2. A collision between a Soviet fighter plane and a British passenger aircraft increased tension to a point where the U. S. and Britain were ready to go all the way to halt Russian aggression.

many is seen in its 30 month record.
Russia used her veto power 69 times or 72 per cent of the time on legislation approved by the U. S., Great Britain and France. The United States used the veto 12 times, France 13 times and Britain twice.

other events added up to the fact that the western Allies were trying to split rather than unify Germany. But the three powers countered by pointing out that it was Russia who had blocked most of the Control Council steps for the recovery of Germany.

Charges and counter charges mounted. The stage was set. Sokolovsky stalked out of the Control Council chambers on March 20. His action rocked the four-power government so dangerously that now it appears to have collapsed completely.

EASTLAND, TEXAS

Stuffy Fellow

This ex-king of the jungle strikes no fear into the Japanese young ter at Tokyo's Ueno Zoo. All the zoo's wild animals were tilled, stuffed and mounted during the war to prevent their possible escape during air raids.

Golden Orange Refreshment

Thirsty? Just WHISTLE

IT'S SMART TO SAVE

The smart thing to do is set a goal for yourself and save for it. So much each week or month, regular as clockwork.

Save to buy a car or a home. Save for pleasure. Save for profit. Save for security. Saving is smart business any way you look at it.

Start your account at Eastland National... And make it grow.
