BANISH SUDDEN TEMPERATURE CHANGES with Flue-Vented gas heating appliances

If you are heating only one or two rooms, you are exposing yourself and your family again and again to sudden temperature changes, which make you susceptible to taking cold.

Anything that can help stop colds, the forerunner of many serious illnesses, is of vital importance. Protect your family against sudden changes in temperature indoors. Give them healthful, pure warm air in every room with flue-vented gas heating appliances.

You have only to ask an owner of flue-vented gas heating appliances to be convinced of the value of this health protection.

Your good health and that of your family is your most desirable possession. Don't go another week without health protection of flue-vented gas heating. Invest in clean-type central furnaces, wall furnaces, floor furnaces, gas-stove radiators and other modern flue-vented gas heating appliances for the health protection of your family, today.

AUTOMATIC FLUE-VENTED HEATING APPLIANCES WORK THREE WAYS TO PREVENT COLDS:

Only flue-vented gas heating equipment can be equipped with automatic thermostatic controls. Automatically these controls maintain the ideal temperature, protecting you against common colds and more serious sickness which may follow.

Flue-vented gas heating equipment is designed to give you positive air circulation. Doesn't just "throw out" heat. Result: No frigid floors. No chilly corners. No cold feet when flue-vented gas heating equipment is installed throughout.

Air is noticeably fresher because products of combustion are carried off through the vent to the out-of-doors. Wall and window sweating is eliminated.

THE STORY OF TEN LITTLE FREE WORKERS

THESE ARE THE WORKERS
REDDY DOCTOR RAILROADER MINER STEELWORKER FARMER LAWYER GROCER SALESCLERK REPORTER
Ten little free workers in this country line and fair. But if you cherish your freedom—worker have a care! Ten little free workers—Reddy was doing fine Until the socialists got him—then there were nine.
Nine little free workers laughed at Reddy's fate Along came federal medicine—then there were eight.
Eight little free workers thought this country heaven But the government took over the railroad—then there were seven.
Seven little free workers—'til the miners got in a fix Uncle said coal's essential and took over Tuesday fix.
Six little free workers 'till the day did usure The steel mills too were nationalized—then there were five.
Five little free workers—but the farmers was here no more The farms have been collectivized—then there were four.
Four little free workers 'till the government did deuce All must have free legal advice—then there were three.
Three little free workers—the number is getting low. But with government groceries selling food—then there were two.
Two little free workers—our story's almost done. With clerks at work in federal stores—that leaves only one.
One little free worker—the reporter son-of-a-gun Mustn't criticize government—so now there are none.
Ten little workers—but they are no longer free They work when and where ordered, and at a fixed rate you see. And it all could have been prevented if they'd only seen fit to agree And work together instead of saying "it never can happen to me!"
This little story points out what CAN HAPPEN to you in Free America and is the story of what HAS HAPPENED in some countries and IS HAPPENING in others as socialization of industry progresses.
