The withering heat of the past month continues to be with us the temperature soars above the 100 degree mark day after day.

Through Friday, when the mercury reached the 105 degree mark at 1:30 p.m. and was expected to climb even higher later in the day. That marked the 16th of 17 days in August on which the temperature was above 100 degree mark, or at least that high. Lowest maximum for the 17 day period was 98 degrees and that might not be considered so

Sunday's forecasts promised little relief, if any. For that matter, weathermen said that nothing was in sight to give any hope of a break in the dry, hot weather.

To shw the seriousness of the situation, a farmer reported this week, "If it doesn't rain pretty soon we won't need a rain," meaning that after that time all hopes for a rain which would benefit crops and pasture will be gone after a few more dry days. All it would do then would be to cool

Inside the city the worry is the water supply. Many folks have given up trying to keep their lawns alive during the heat wave, and those who haven't may have to do so soon in order to conserve the water in the lake for drinking and domestic purposes, unless the long awaited rain comes.

Many of the teachers for Eastland Schools this fall are having a difficult time getting in their their summer college work and

dy has been unfolded on the hos- said. pital hill, but the real work on the

structure has not begun. The starting date has been tentatively set around the last part of August or the first of Sepember. A big prgram is being planned for the occasion and most of the citizens of the city and community should be on hand for the event, which will be a very impor-

tant one for Eastland. Any one person or persons can not be given credit for the accomplishment, although some have stood out in their work on the project. And there is still a lot of work to be done on the hospital and who can tell who will be out-

standing in that. Everyone who has taken part in the movement, from its beginning last year, is to be commended; but there is still a lot of work be done and those who do it

ill deserve commendation also. Perhaps it will be the same ones in many cases, but we are sure that there also will be many

At any rate, the project seems to be assured of success at the moment, but the enthusiasm be- recruiter in charge, recruiting sub hind the movement must keep growing to really make it completely successful.

Workshop Course Organized Here

Dr. R. A. Collins, Dean of Education at Hardin Simmons University, Abilene, organized a work shop course in education at East-land high school, Friday night.

The course is held annually at the Eastland high school as an extension course of the Univer-sity. Most of the teachers in the Eastland schools will attend the two week session.

Dr. Collins met with the group at 7:30 p.m. Friday. Everyone interested in such a course is in-vited to attend classes.

Notice to Long Distance Telephone Users

Certain changes in charges and practices pertaining to long distance calls within the State of Texas will be made effective September 1, 1951.

Basic Station-to-Station Day Rates

There will be increases on only 124 of the 815 mileage distances. In no case will the increase amount to more than 5 cents for the initial period of conversation on day stationto-station calls. There will be no increases in the station-tostation day rates over 202 miles.

Station-to-Station Night and Sunday Rates

A discount of approximately 20 per cent from the stationto-station day rate will continue to apply on all station-tostation calls costing over 50 cents completed during night hours and all day Sunday.

Person-to-Person Day Rates

Rates for person-to-person calls, which cost more to handle, are based upon the station-to-station rates. The differential will be 50 per cent instead of the present 40 per cent. The minimum differential of 15c will be continued.

Person-to-Person Night and Sunday Rates

The night and Sunday discount on person-to-person calls generally will continue to equal in amount of money the discount on station-to-station calls between the same points.

> The principal changes to be made are described above. More detailed information may be obtained at any company business office.

"CHURCH" FOR THE AUTO AGE—The Rev. Dr. Ernest Lyman Mills, pastor of Dorchester Methodist Church, conducts services at Boston's first "drive-in-church." The congregation, many of them in bathing suits and play clothes, heard the sermon through individual speakers hooked into autos in the same manner as for open-air movies. The drive-in-church is an idea taking hold in more and more cities as ministers seek to compete with the Sunday driving urge.

In Areas With Light Rainfall Grass Is A **Dependable Crop**

As a result of continued research and experimenting, many improved varieties of grass, including native grasses, are now available for permanent pastures, and rotation with cultivated crops.

There are cool weather grasses and hot weather grasses and deeprooted grasses that thrive in areas where rainfall is light. So it is now possible to have pastures that carry livestock the year around. Less work-lower feed costs.

Grasses increase organic matter in the soil, give it improved water holding capacity and control erosion.

If you are interested in cheaper gains and less work, along with a dependable crop, talk grass with the County Agent and Soil Conservation Service. Get over on the safe side.
