Around The Square By Mack

The way these automobile wrecks are coming it seems like it won't be long until it will be dangerous to be safe. And the sad part is that a lot of these injured people are not to blame. They are just not quick enough to dodge the speed demons and wild drivers. Getting to the point, we are afraid to nose out into the highway. You take your life in your hands every time you do.

A few days ago we had the family bus down town. We were parked south of the court house, when we decided to go home. We backed out, and being near the Ection, looked in four direc-There was not a car in sight so we moved about ten feet, shoved our arm out, indication were to make a right turn, when one of these demons swished by and turned in front of us The reason we didn't cuss, is because we've been trained better. but if had had a gun we would have been tempted to use itmurder or no murder.

A driver of this type doesn't deserve a driver's license, and his should be revoked. What he needs is a good stiff jail sentence, the kind where they would throw him so far back it would take six dollars to send him a post card.

If we were a speed cop half the houses in Texas would have "For Rent" signs on them in less than a week. The other half would be occupied by sane drivers. But you see we are not a speed cop. We have some friends, though, and we intend to use our influence with them, if we have any.

We are enjoying some real duck weather at this time. Rain has been falling for many hours. In fact it started Friday night, continued over Saturday and Sunday and at 5 o'clock Monday it is still falling. Precipitation to date is .80 of an inch.

This will not overflow the lake, but it will sure break up a lot of dry clods, sprout small grain and improve grazing in this area.

Hog raisers are beginning to complain about the drouth. Seems like some of them are having to run their hogs through the tank and shrink them before they will hold slop. We wonder why they don't fill the cracks with Fair
