# Here's 14-Day Reducing Diet

#### SWEET AND LOW

A whole new concept of eating has been made pessible by discoveries in the field of low-calorie foods. Up to a short time ago it was necessary for those on low-calorie diets to avoid the kind of foods they liked-and to walk away with averted eyes from any sweet dessert. But today there's a new answer . . and thousands of people with weight problems are singing the theme song: "Sweet and the second annual the seco Low". The answer is found in the new sweetened, low-calorie foods which open up wonderful new possibilities for the millions of people who must watch their calories. Now you can serve complete, balanced, tasty meals . . . simply substituting low-calorie desserts and dressings for the high-calorie ones. See what I mean in today's menus.
