BOVINA

"In The Agricultural Center Of Parmer County"

WEDNESDAY, JULY 25, 1962

BOVINA, TEXAS

VOL. VIII, NO. 4

WHITTLIN'

BY DOLPH MOTEN

Not enough Bovina people took time out Monday morning to listen to Jack Seale speak here. Seale, mayor of Amarillo and Republican candidate for U. S. Representative from this (18th) district, made a semi-formal visit here...at least it was a scheduled visit and the public was invited to attend.

The visit was in form of a coffee at Bovina Restaurant. Though Seale is a Republican, we think this Democratic community should have been better represented. There were only a handful of Bovina folks present.

Possibly his visit here should have been better advertised. We asked a friend of ours, who is a Democrat, why he didn't come and hear Jack Seale. "I wasn't invited," he answered.

"Whatta you mean, you weren't invited? Last week's issue of The Blade said the public was invited," we countered.

"Yeah, I know that," he said, "but when Don Yarborough was coming here you called me and reminded me about it three times. That's the way I like to be invited. Then I know I'm welcome."

So probably there would have been more people on hand to hear Jack Seale if a better job of promoting attendance had been done.

All last week we've noticed little ole posters around town announcing that he was going to be in Friona Monday night and there was a quarter page ad in Farm and Home Section of Parmer County Newspapers last week announcing the Friona visit. Only mention that he was going to be in Bovina was a small news story in last week's issue of The Blade.

Frankly, we were late getting to his talk here. We were sorry for that, but our tardiness was unavoidable. We heard enough to find out, however, that he made the same type talk that would be expected of a Republican candidate. He sounds politically sincere; we just don't go for that line of political thinking.

Seale impressed us as an individual.

If for no other reason, we were impressed because he's mayor of Amarillo, a good-sized country town, and is only 34 years old. He's been in office more than a year. That means he was elected to the office when he was 33 and possibly 32. We know nothing about city politics in the big city to the northeast of Bovina, but we'd guess that a fellow has to have something on the ball, so to speak, to be elected to its highest government office at such a young age. To win election to the office would require a man to know something or somebody. Probably a lot of both would be the right combination.

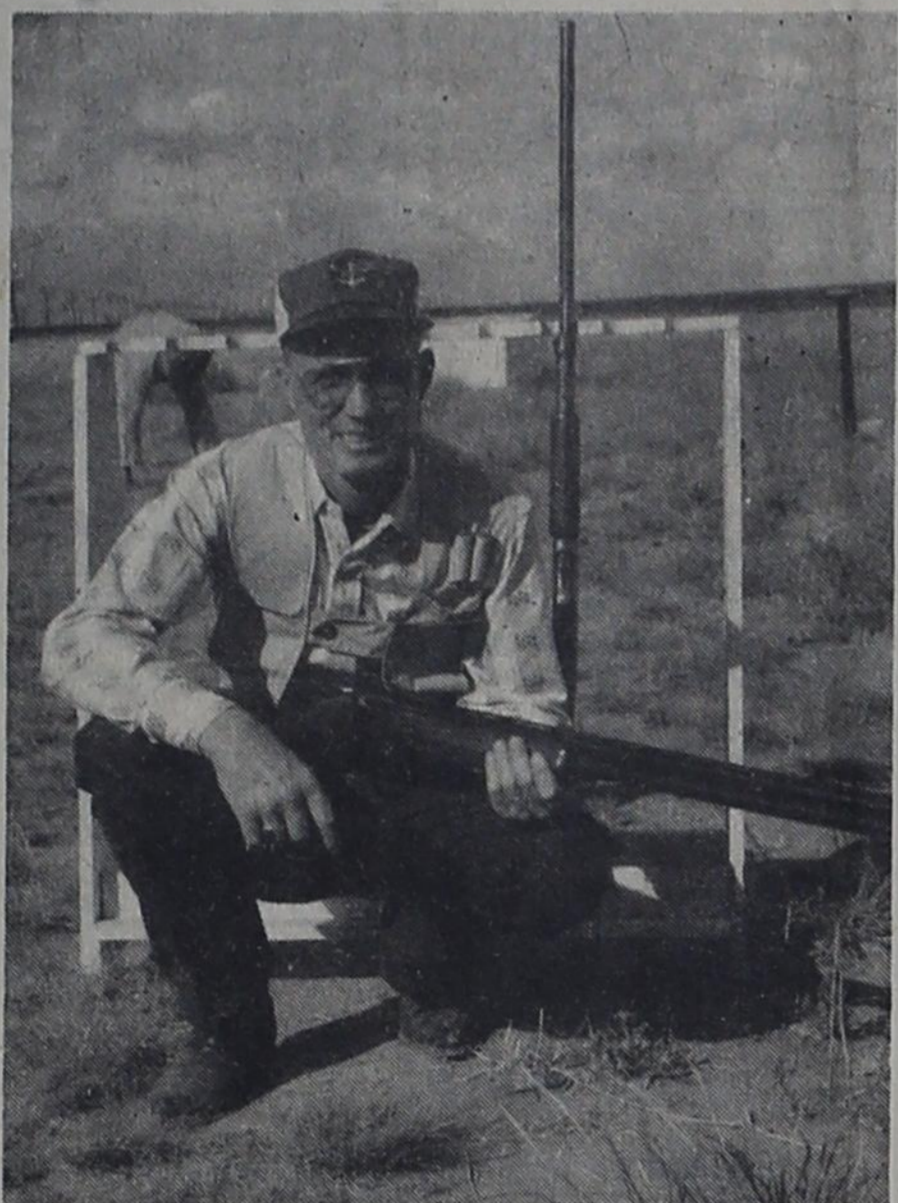

Be that important politically or not, we were impressed by the fact.

Seale told us during his talk here, incidentally, that if he is elected to the representative post, he will resign as mayor effective after the election. And he said he would resign now if members of his city council felt he wasn't doing a good job as mayor because of the time which he is devoting to the campaign.

The reason, he said, he is seeking election to Congress is because "we feel we can't go on with the type government we have now." We don't know exactly what is meant by that, of course, but we'd guess that it means that Seale and his backers are dissatisfied by the present Democratic administration and fact that it wears 'liberal' label.

Still, his opponent in the race, Walter Rogers, Democrat from Pampa, isn't a liberal as such, as far as we know. As a matter of fact, we'd always considered Mr. Rogers middle-of-the-roadish and not as a radical in any shape, form or fashion. (We don't mean to imply that we're an authority on Walter Rogers career in Washington, we're just saying what our impression of him has been.) Seems to us that Rogers did

(Continued on page 2)

TES FOR FIRST--Sonny Roach tied for first place in first half of July-August trophy shoot for members of Bovina Gun Club. The shoot was Sunday afternoon at the range northeast of town. Roach hit 46 of 50 targets to tie with R. L. Duke of Friona for the first-half lead.

SUNDAY AFTERNOON--

BGC Plans Team Shoot

An invitation team trophy shoot will be staged by Bovina Gun Club Sunday afternoon.

The shoot, to which some six or eight teams will be invited, will be at shooting range south-east of town. Shooting will begin at 2.

Trophies will be presented to each member of winning team. A trophy will also be awarded to high individual in entree shoot. There will be five men on each team with each man shooting 50 targets.

Sunday afternoon of this week Sonny Roach and R. L. Duke tied for first place in first half of an individual trophy shoot for members of the club.

Other half of the two-month shoot will be in August. Trophy for the two-month period will

be a shooting jacket. Winner will be individual who has highest average in the two shoots.

Roach and Duke each had 45 hits out of 50 shots. In third place was Larry Fairchild of Friona with 44. Tied for fourth and fifth place were R. L. Hopingardner and Glenden Sudderth with 42 each. Howard Looney had 41, George Douglas and Jerry Roach 33 each, Mark Charles hit 30 and Jimmy Charles had 23.

Improvements are being made at the range this week. Concrete shooting walks were scheduled to be poured and efforts to "beautify the area" in general are being made, according to Art Mast, club secretary.

AUGUST 18--

Bovina Roping Club Sets Horse Show Date

Date of Second Annual Bovina Quarterhorse Show is Saturday, August 18.

Show will be sponsored by Bovina Roping Club and will be at club's arena west of town. Horses will be exhibited in

Crawford To Short Course

Roy Crawford, Bovina High vocational agriculture instructor, is in College Station this week attending a short course on meats.

The course started Tuesday and concludes Friday.

25 classes, Robert Calaway, club president says. Eighteen of these will be halter classes with six performance classes. Entry fees will be \$5 per horse.

Planners of the show hope to have 100 head of animals at least to be exhibited. There were some 70 head entered in the first show held last year.

The show will have approval of American Quarterhorse Association. Judge will be Frank (Curley) Daugherty of Olton. Judging will begin at 10 a.m. and will continue until all classes have been judged. Serving as announcer for the

Hughes Funeral Here Thursday

Funeral services for Mrs. Harlett Jane Hughes, 91, former resident of Oklahoma Lane community, were conducted at Bovina Methodist Church Thursday afternoon.

Mrs. Hughes died Tuesday morning in Amarillo.

She lived at Oklahoma Lane 13 years, moving from there in late 1940's.

Survivors include five daughters, Mrs. Lucille Clifton of Morse, Mrs. Mattie Day of Springdale, Mrs. Mollie Wofford of Shawnee, Okla., Mrs. Ona Pesch of Abilene and Mrs. Mabel McKnight of Springfield, Colo.; two sons, O. J. Hughes of Springfield, Colo., and C. A. Hughes of California; 32 grandchildren, 61 great-grandchildren and five great-great-grandchildren.

Rev. Harold Morris, church pastor, officiated at the services. Nephews of Mrs. Hughes were pallbearers.

Claborn Funeral Home of Friona was in charge of arrangements.

Weather by Willie

It has rained good rains in only small spots. Look out the next 10 days. I think it will cover all western part of state.

--Willie

State Land Sells; Laundry Planned

Former site of state highway department headquarters here will be location of a new self-service laundry.

B. V. "Shorty" Hughes of Farwell was high bidder for the 1.41 acres of state-owned land and improvements at intersection of Third Street and Highway 86.

He announced this week that the laundry will be put in when legal work on the property is complete. Hughes estimates that it will be some 30 days before construction is ready to begin. He figures it will take "three or four" months to build a building and furnish it with washers and dryers.

Hughes' plans call for construction of a building 36 by 90 feet. It will be equipped with 30 washers and eight dryers. The building will be constructed of tile or steel, Hughes says. Ample parking space will be reserved for laundry cus-

tomers, he pointed out.

Hughes' successful bid for the property was \$6255. State had appraised value of the property at \$7650. State has

granted its approval of sale of the property to Hughes, however, Sealed bids were submitted and opened in May. Taylor-Evans, a farm supply

headquarter in Amarillo, submitted the only other bid. It was for \$6150--\$150 less than Hughes'. Hughes, who owns a self-

service laundry and automotive parts store in Farwell, says that he will use east half of the property here and that west half is for sale.

Parmer Grand Jury Returns Indictments

Two indictments of four counts each against Emmett Tabor, former mayor of Bovina, were returned by Parmer County Grand Jury following a

Monday session. A shortage of \$13,055.21 was found in City of Bovina funds following Tabor's resignation as Mayor in February. Resti-

tution of the entire amount was made. He was charged with felony theft following his resignation.

Each of the indictments charged Tabor with theft, embezzlement, forgery and passing, according to Hugh Moseley, county clerk.

Tabor was released on bond following the filing of charges in Friona.

In other action Monday, the grand jury returned two indictments against R. G. Sparks of Bovina, each indictment

charging statutory rape and incest. His bond is set at \$12,500 on each charge.

Gary Green was indicted on a worthless check charge; three indictments were returned against Abel Gomez for forgery and passing; Seth Large Jr., Alvin Hollings and Wilkie Lee Alford were indicted for auto theft and burglarizing Bovina Dairy Freeze; Joe Morris was indicted for forgery and passing and the same forgery and passing charge was returned against Harold F. Robinson.

Charles L. Mercer served as foreman of grand jury. Members other than Mercer were A. W. Anthony Jr., Claude Miller, Joe Blair, Wyle M. Bullock, C. V. Potts, Tom Caldwell, E. W. Chester, Alvin Glasscock, Cly Henson, J. B. Jennings, Clarence Johnson.

Tabor, a barber in Bovina, was a veteran member of Bovina city commission. He had served two two-year terms as city commission. He had served his first two-year as mayor at time of his resignation.

Funeral Tues. For C.C. Kesler

Connie C. Kesler, 83, father of Jack Kesler of Bovina, died Saturday morning at his home in Madill, Okla.

Mr. Kesler was a former resident of Bovina and had lived in Friona until August of last year.

Funeral services were conducted Tuesday afternoon at First Baptist Church of Friona. Rev. Bill Burton, church pastor, officiated.

Survivors include his wife of the home, a daughter, Mrs. Grady Whit of Amarillo, and three grandchildren.

Mr. Kesler moved to Bovina in 1941 from Dodge City, Texas. He had lived in Friona from '42 until he moved to Oklahoma last year.

Burial was in Friona Cemetery under direction of Claborn Funeral Home of Friona.

No Injuries In Accident

Three Bovina women escaped injury when the car in which they were riding overturned east of Hub on Dimmitt highway Saturday morning.

Mrs. W. E. Williams, and Mrs. Margaret Caldwell and Rita were on their way to a church meeting at Ceta Canyon when the accident occurred.

The car ran over a broken bottle causing a tire to blow out and then turned over.

Damage estimated at \$125 was done to Mrs. Williams' '59 Ford. Mrs. Williams was driving the car.

CONGRESSIONAL CANDIDATE -- Jack Seale, candidate for U. S. Representative of 18th District on Republican ticket, spoke briefly in Bovina Monday morning. He's shown here delivering his address in banquet room of Bovina Restaurant. Seated at his left is Frank Hinkson, Lazbuddie farmer.

Jack Seale Speaks Here

Jack Seale, mayor of Amarillo and candidate for U. S. Representative from 18th District, spoke to a disappointingly small crowd Monday morning in banquet room of Bovina Restaurant.

Seale is running against Democrat Walter Rogers of Pampa, who now holds the post. A total of 13 people were present for Seale's talk here--six of those from Bovina.

Seale won the Republican nomination for the office uncontested after Frank Hinkson, Lazbuddie farmer who had filed for the office on Republican ticket, dropped from the race.

The 34-year-old candidate explained his platform to his listeners, pointing out that he felt "we must have a change in our government. We can't keep going the way we are." A native of Amarillo, Seale

was elected mayor in April of '61 after serving on city commission for a two-year term. He is engaged in home building and land developing business.

He said in his talk that if elected he would be in favor of getting government out of all competitive business and for less centralization of government.

Seale spent the day Monday in Parmer County, also campaigning in Farwell, Lazbuddie and Friona.

Boys Baseball Program Going Into Last Week

With just one week of play remaining, Oklahoma Lane Farm Supply has taken a slight lead in boys baseball league here.

Bovina Implement Yankees remain close on their heels, however. OLFS has played one more game than have the Yanks and have one more win.

Two games were cancelled this week because some players were away at church camp. The games are slated to be made up no later than next week.

In Thursday night play, Lions trounced Charles Olters 20-7 in a game halted at end of four innings by 10-run rule. Tim Crume was winning pitcher as

Mike Grissom took the loss. Larry Mitchell, of the Charles team, was games leading hitter with a single and a double.

In Thursday's nightcap, OLFS bested Parmer County farm Supply, 12-7. Oklahoma Lane's Randy Robertson, who is probably the league's leading hitter, had a home run in his only of-

ficial time at bat as he walked three times.

Only one game was played last (Tuesday) night, too. OLFS won that one from Lions, 12-1. Tilt between PCFS and Charles Oil was postponed.

In an exhibition game Tuesday (Continued on page 2)

TO MUSIC CAMP -- Part of the 20 members and five sponsors of First Baptist Church Youth Choir are shown as they prepared to leave for music week at Glorieta Baptist Assembly, which is near Santa Fe, New Mexico. The group left early Thursday morning and is scheduled to return today (Wednesday).

Miss Stanberry Weds Richard Morris In Evening Ceremony

Miss Evelyn Stanberry, daughter of Mr. and Mrs. Alfred Stanberry, and Richard Morris,

Mrs. Richard Morris

son of Mr. and Mrs. Dewey Morris of Farwell, exchanged wedding vows Friday evening in home of bride's parents.

Rev. Spencer Blake of Canyon read the double ring ceremony. The bride, given in marriage by her father, wore a street length dress of blue chiffon. The dress featured a full skirt and was topped with a short lace jacket with elbow length sleeves. She wore a half hat of white with a small veil and a white orchid corsage completed her ensemble.

For her daughter's wedding, her mother chose a two-piece costume of turquoise file with matching hat. She wore an orchid corsage.

The mother of the groom wore a blue crepe dress and

complemented her costume with an orchid corsage.

Following the ceremony the bride's parents hosted a reception.

The brides table was laid with a white cloth and centered with an arrangement of daisies intermingled with orchid sweet peas in a milk glass container. Refreshments of wedding cake and punch were served to guests.

Attending the wedding were Mr. and Mrs. Alfred Stanberry, Mr. and Mrs. Thogle Stanberry and family, Mr. and Mrs. Clois Stanberry and family, Mr. and Mrs. Buford Stanberry and family and Mr. and Mrs. Dewey Morris of Farwell.

Following a short wedding trip to points of interest in Colorado the couple will be at home in Farwell.

Boys Baseball--

Monday night, Bovina's Babe Ruth team took a 10-7 verdict from a group of Little League all-stars. R. B. Riley pitched for the younger boys while Jesse Stone and Larry Riley threw for the BR group.

In a peewee game Thursday, Dairy Freeze outscored Bovina Auto Parts, 9-4. Bruce Caldwell was winning pitcher and Greg Hromas took the loss.

Only game scheduled for Thursday night of this week is Bovina Implement vs. Lions. Game between Red Tops and OLFS will be played late Friday afternoon, prior to softball

league games.

Monday night of next week, Charles Oil takes on Bovina Implement and Red Tops meet Farmer County Farm Supply. Tuesday night send OLFS against Lions with a make-up game between Bovina Implement and PCFS also slated to be played.

The two peewee teams will play Monday at 5:30.

Ten Commandments For Gentlemen

1. Thou shalt do thy setting-up exercises each morning first thing upon arising.
2. Thou shalt bathe carefully and brush thy teeth well immediately thereafter.
3. Thou shalt by preference wear a white shirt and white underlinens.
4. Thou shalt select thy necktie to harmonize with the color of thy suit.
5. Stripes and spots shall be worn with a solid-colored suit.
6. Thou shalt choose thy socks with tact and discernment. Thy shall not be allowed to fall down or reveal the bare leg.
7. Thou shalt wear no more than one ring on thy fingers, not counting thy wedding band, of course.
8. Thou shalt permit thyself a discreet perfume, but it shall be only on your handkerchief.
9. Thou shalt wear a vest whenever thou wearest suspenders.
10. Thou shalt dress on weekends with as much care as thou reservest for boss and customers during the week.

as much to please the conservative voters as he did any other kind. But evidently not.

What he did to displease Republicans, we don't know, but we do know that at least some of them are displeased.

Whether or not Rogers will make an active campaign for re-election to the office we don't know. If he does, we hope he comes to Bovina. We think he can draw a good-sized crowd here.

And whether he comes or not, he'll get our vote, along with the rest of the Democrats, in the general election in November. Back to Seale: he said in his talk here that he thought two-party system was coming thing in Texas. He went on to say, however, that the two-party system hinged partly on getting some Republican candidates elected this November.

If that's what it takes, we don't have much hopes for two-party system in our state. We don't think Republicans are going to make any better showing this year than they have in any recent years. Texas Republicans made the most of a freak set of circumstances and got Republican John Tower elected senator.

From here, it looks as though that's about all they'll have to crow about until his term ends. Give the Democrats a reasonable good candidate in each race and they'll win over Republicans so much it'll get monotonous.

Mrs. Jahnke's Brother Dies

M/sgt. Jim Raindl of San Antonio died last Tuesday at Brook General Hospital in San Antonio after a lengthy illness.

He is the brother of Mrs. Henry Jahnke of Bovina. Mrs. Jahnke was in San Antonio at the time of his death.

Burial was at National Cemetery at Fort Sam Houston.

He is survived by his wife, three daughters, one son, his mother, five sisters and four brothers.

CHECK THE SAFETY OF YOUR FARM THIS WEEK

ONE THING A FARMER DOES NOT WANT TO CULTIVATE IS AN ACCIDENT

- MACHINERY and equipment should always be kept in good repair, and used with guards and safety devices in position.
- BUILDINGS and your home should be kept in good repair at all times, with all safety hazards carefully eliminated.
- CLOTHING that is loose-fitting or torn should never be worn around moving machinery.
- FIRE HAZARDS are everywhere . . . be careful with matches . . . don't smoke around the barn!
- GUNS should always be stored unloaded, and put where children can't get at them.
- ANIMALS may bolt if startled; warn them of your presence by speaking before approaching.
- WATER HOLES on your property are a potential danger to children . . . they should be fenced off to prevent mishaps.
- INSURANCE keeps your family and farm safe from the hazard of financial disaster. Be sure you're fully covered.

Candlelight Ceremony Unites Miss Moore, Robert Mullen

Miss Mardell Moore and Lt. Robert F. Mullen of Reese Air Force Base of Lubbock exchanged nuptial vows Saturday evening in a candlelight ceremony at Bowman Chapel of First Methodist Church, Lubbock.

Parents of the couple are Mr. and Mrs. Hylton Moore of Bovina and Mr. and Mrs. Paul L. Mullen of Plymouth, Ind. Given in marriage by her father, the bride wore a floor-length gown of white silk organza. The sweetheart neckline was re-embroidered with floral lace and the skirt featured appliques of floral lace. Her veil of silk illusion fell from a crown of pearls and crystals. She carried a cascade arrangement of white roses.

Traditional wedding music was provided by Roy Melugin, organist and Bobby Boyd of Amarillo, soloist.

Candlelighters were Miss Ann Walden, cousin of the bride, and Mrs. Dessie Berry of Lubbock.

Kimberly Langer of Bovina and Gail Buckley, niece of the groom, were flower girls. They wore identical blue silk organza dresses and carried satin lined baskets with arrangements of blue flowers. Paul Buckley, nephew of the groom, was ring bearer.

Mrs. Barbara Thomas of Abilene, college friend of the bride, served as matron of honor. Other bridal attendants were Misses Janet Bell, Juanita Carrell and Rosemary Cronin all of Lubbock. They wore identical dresses of blue silk organza with bell shaped skirts. Matching circular veils formed

the headpieces. They carried long stem white roses.

The father of the groom served as his son's best man. Groomsmen were Lt. George Stober of Buffalo, N. Y.; Lt. James R. Buckley of Monterey, Calif.; and Wendell Spence, cousin of the bride, from Lubbock.

Wedding guests were registered by Mrs. Marion Spence at the reception in the church parlor. Others in the house party were Miss Ann Walden of Littlefield, Mrs. Bobby Boyd of Amarillo, Mrs. Kitty Reeves of Odessa, Mrs. Dale Stanley of Littlefield, Mrs. Verne Walden of Littlefield, Mrs. James Buckley of Monterey, Calif.; Mrs. Barbara Simmons, Mrs. Catherine Manley, Mrs. Carolyn LaBoon, Mrs. Dessie Berry and Mrs. Glenn Hunt all of Lubbock and Mrs. Fred Langer of Bovina.

For travel the bride wore a suit of brown cotton and arnel triacetate with beige and gold accessories. She added a rose corsage from her bridal bouquet to complement her ensemble.

After a wedding trip to Buffalo, N. Y. and Niagara Falls the couple will leave for Hickman Air Force Base, Hawaii where he will be stationed.

The bride is a graduate of McMurry College, in Abilene, and has been teaching in the Lubbock Public Schools for the past four years. She is a member of national sorority Kappa Kappa Kappa.

The groom is a graduate of Buffalo University and received his pilot training at Reese Air Force Base in Lubbock.

To Baptist Camp

Mrs. Hodge Rigdon and Mrs. Ovid Lawlis sponsored four intermediate girls at Baptist Intermediate camp at Floydada recently.

Post-Nuptial Coffee Honors Mrs. Bill Strawn

Mrs. Billy Strawn was honored with a post-nuptial come and go coffee Tuesday morning in the home of Mrs. G. C. Anderson, Jr.

Greeting guests in receiving line were the honoree, her mother, Mrs. Vernon Estes, and her mother-in-law, Mrs. Norvell Strawn.

Members of the house party were Miss Brenda Jones, Miss Judy Roach, Miss Linda Estes, Miss Vicki Strawn, Mrs. Kent Glasscock, Mrs. Roy Charles Dodson and Miss Virginia Embree.

Approximately 60 guests signed the guest registry at which Mrs. Glasscock presided.

A floral arrangement of yellow and white gladioli intermingled with daisies in a silver footed epergne graced the serving table which was laid with an ecru lace cloth. Refreshments of coffee, punch hors d'oeuvres and individual cakes were served from silver and crystal appointments. Presiding at the table were Mrs. Paul Jones and Mrs. Bedford Caldwell.

Hosting the affair were Meses. Paul Jones, W. E. Thornton, A. L. Hartzog, Lee Sudderth, Bedford Caldwell, Earl Stevenson, R. E. Wilson and G. D. Anderson, Jr.

B'day Dinner For Mrs. Hastings

Mrs. Pearl Hastings was honored with a birthday dinner Sunday in the home of her daughter and family, Mr. and Mrs. Charles Hawkins.

All four of her children and her sister were present for the celebration.

Attending were Mrs. J. T. Swin, Jr. and son of Roaring Springs, Mr. and Mrs. Dean Hastings and family, Mr. and Mrs. Gordon Hastings and daughter of Lubbock, Mr. and Mrs. Charles Hawkins and family and Mrs. Mable Reynolds of Farwell.

NOTICE--Bids are now being accepted by Bovina Schools board of trustees on a three-room dwelling located on Eighth Street. Buyer must move the building. It may be inspected by contacting Superintendent Warren Morton. Deadline for submitting bids is Monday, August 13. The board reserves the right to reject any or all bids. 3-2tc

4-H Club Members Attend Record Book Workshops

SOIL CONSERVATION DISTRICT NEWS

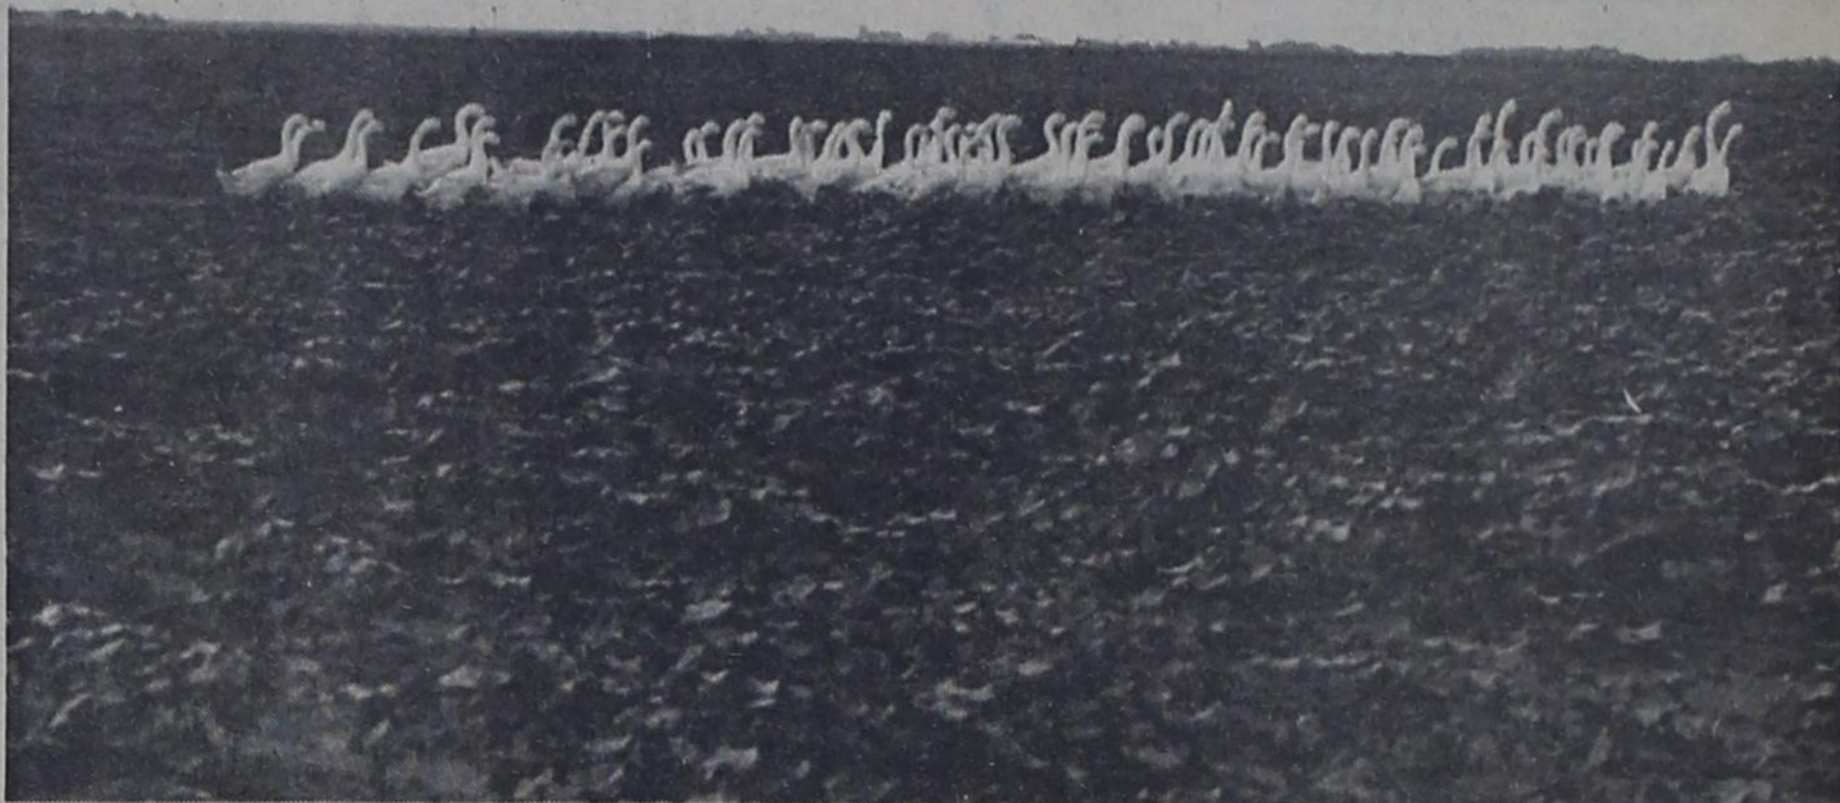

Twenty-three 4-H Club boys and girls attended special county-wide 4-H Record Book workshops conducted July 17 and 18 in Bovina High School Study Hall and Hub Community Center. Extension Service Agents, Miss Ettie Musil and Deryl L. Coker conducted the training. Instructions for the record books have been revised for this year. Record books are very different with the organization and stories of new instructions. Record books are an important part of the 4-H Club program. They give special training for youth in the importance of keeping records of time, money and energy management of all projects.

Records may be entered in the following awards programs: achievement, agricultural, automotive, beautification of home grounds, beef, canning, citizenship, clothing, crop protection-crop production scholarship, dairy, Danforth leadership training, dog care and training, dress revue, electric, Texas Electric, entomology, field crops, foods-nutrition (Favorite Foods), fire prevention, garden, grain marketing, health, home economics, leadership, poultry, poultry fact finding, recreation, safety, Santa Fe, swine, tractor, wildlife conservation.

As one of the sixteen requirements for each club, 50 per cent of the club members must submit 4-H record books to be eligible for a certificate. To be eligible for a certificate with a red or blue seal 75 per cent of the members must submit records. For a purple seal 90 per cent of the club members must submit 4-H records.

Wherever you live—in the country, suburbs, or urban area — you live in a watershed, an area where runoff water from rain and melted snow drains in a common outlet such as a stream, creek, river or lake. The watershed can be as small as a few acres or as gigantic as the Mississippi River Basin. On a well-protected watershed, the excess water finds its way slowly down grassed waterways taking very little of the valuable top soil with it. The chance of flooding on the bottomland is greatly reduced. Therefore the damage to private and public property is lessened. In fact, of the 13,000 small watersheds in the United States more than 8,000 need protecting.

STRIKING COTTON FIELD scene is the group of geese above, which were seen patrolling the place farmed by Mose Glasscock, one mile east of Farwell. The geese are said to be good for removing grass from cotton fields.

WITH THE COUNTY AGENT DERYL COKER

The current situation indicates that we could have a potential problem with the sorghum midge in grain sorghum this year. Last year the sorghum midge caused a great deal of damage on grain sorghum. Losses ranged from 20 to 100 per cent in a number of the High Plains counties. 1961 was the first year that we on the Plains encountered this particular insect, although we were fortunate that Farmer County was not affected as much as counties to the east and south. We could be affected this year, so farmers should be on the look-out for this insect.

Each female is capable of laying from 50 to 250 tiny white eggs during the 24 to 48 hours which it lives as an adult. A single larva is capable of destroying the developing seed. The adult male lives only a few hours to one day, but an average number of 16 days are required for the midge to develop from egg to adult. Midge damage closely resembles blasted or blighted sorghum heads resulting from disease and hard rain during the flowering stage.

the corn leaf aphid with sorghum midge, so no one should take control measures for sorghum midge until they know that the insect is present. The corn ear worm also known as the cotton boll worm or tomato fruit worm is fairly numerous in some fields of grain sorghum in the county. Serious grain sorghum losses can result where populations are large. This fact may be more important this year where yields have apparently already

been reduced by weather conditions. The presence of these ear worms or boll worms in grain sorghum does not guarantee that we will have a serious boll worm problem in cotton but indications are that our boll-worm population will be larger than in the past three or four years. I strongly urge that fields be checked to determine whether the problem exists. A large infestation of these worms can definitely lower your yields.

FOR SALE

1955 Ford school bus, good condition, chain hoist 1 1/2 ton. Sealed bids will be accepted until 8:00 p. m., August 9, 1962. Mail bid to Lazbuddie ISD, Box A, Lazbuddie, Texas. The board reserves the right to refuse any or all bids. Also used tires and wheels, size 822.5 and 750.20.

SAFETY is always in SEASON

NATIONAL FARM SAFETY WEEK JULY 22-28, 1962

Through a watershed project, conservation measures are established on the land, flood prevention dams are built, and channel improvements made where needed. The dams are designed to catch and hold peak runoff water and discharge it at a reduced rate down the streams and creeks. In many cases these dams are designed for multiple use. The permanent pool of water backed up by the structure can be an important source of water for industrial, domestic and irrigation use. Most of the multi-purpose reservoirs provide ideal recreational facilities for swimming, fishing, boating and wildlife habitats.

Millers Say Government Goofed On Sedimentation

The government's provision that premiums on wheat with high sedimentation ratings would be included in the 1962 wheat price support was made over the objections of the people who are the biggest customers--the millers and bakers.

According to the millers, the sedimentation test is by no means a reliable test within itself to indicate the relative baking quality of wheat.

"Our industry is very much opposed to using sedimentation ratings as a basis for premiums," said Ray Pritchett of the Golden West Seed Company in Texico. Pritchett owns the New Mexico Milling Company in Clovis and Portales, N.M.

It has been proven that wheat with a high sedimentation test --up to 70--can be very poor wheat for milling purposes, and is very often just that.

"If this type of wheat is put into the government loan program, it will never be sold, for premium or otherwise," said Pritchett. Since it would be of

little value to millers, he predicted that the government's storage problem would be increased, and farmers with this type of wheat, if they can get the market price, would be wiser to sell than to store it.

"Of course, elevators are in business for storage, so they don't care how long it stays there," Pritchett said.

Pritchett recently mailed a letter to C. H. Moseley, chief of the Dallas ASCS office, at the latter's request. He also sent copies to Congressmen Walter Rogers, George Mahon, senator John Tower and others.

In the letter, Pritchett told what he thought of the sedimentation program, summing it up as a "waste of the taxpayers' money."

The following statement was presented before the Sedimentation Conference in Fort Worth last September by R. D. Zumwalt of Burrus Mills, Dallas. It was entitled "How Millers and Bakers Look at the New Sedimentation Test."

Actually, this title is a misnomer; the test is not something new which was developed yesterday; in fact, many cereal chemists have been working with it for the past several years and, like many other things, it has some good characteristics and some not so good. To understand its purpose, we should go back to the miller of yesterday. He didn't have elaborate laboratory facilities to tell him which wheat was suitable for family flour and which was suitable for

bakery flour, so he made his selection simply by chewing a few kernels of each lot to test the gluten. The strong gluten was put aside for bakery, while the weak went to family flour. Later on, cereal chemists related gluten quantity to the measurement of nitrogen in wheat. While the test indicated quantity of gluten, it did not tell the quality of the gluten, so further tests became mandatory. More than twenty years ago most mills were using machines to ascertain gluten quality, and this is true today. The attitude of the milling industry is well stated in the following letter to Mr. Horace D. Godfrey:

"The USDA announcement of August 23rd stating that premiums based on sedimentation values would be included in the 1962-crop wheat price-support operation is of great interest to the flour milling industry. The announced purpose of the move--that is, to encourage production of higher quality wheat--is commendable. The industry itself spends a great deal of time, money and effort in behalf of this objective every year.

"Because of the importance to everyone concerned, that the new premium schedule be as practical and as workable as possible, we wish to urge that those who will be vitally affected in its day-to-day operation will be given an opportunity to review it in light of our experience. Millers have been checking and working with the sedimentation test for many years and are well aware of its value as well as its limitations as a single test for determining the baking quality of wheat. There is practically complete agreement that at best the sedimentation test gives only a rough indication of quality, and I know of no miller who feels that it alone is accurate enough to reliably indicate the relative baking quality of wheat.

"I wish to take this opportunity to offer the cooperation of the Millers National Federation in furnishing technical information and advice which may be of help to the Department in connection with its newly announced program. Inasmuch as any schedule of premiums which

might be developed will not go into effect until the 1962 crop, there should be ample time for the industries which will be most affected to thoroughly explore and appraise any proposed schedule before it is adopted and announced."

C. L. Mast, Jr., Exec. VP. Perhaps it will be of interest to you to study the information on the sheets given to you (copy of sheets attached) on which you will find on No. 1, thirty points of observation which are usually made for the selection of wheat -- one of these tests being sedimentation. Obviously, some of the factors weigh very heavily and others hardly at all. The information on a sheet before you covers seven lots of wheat used in varying percentages to build a mill mix from which a particular type of bakery flour was produced. Actually, with today's high-speed bakeries producing many different types of breads with different methods, it has become necessary for the flour mills to supply flours with specific characteristics for those particular bakeries. This particular mix would be considered not exceptionally strong but, as I have said previously, it was designed and manufactured for a specific baker, and it suits him perfectly. We were surprised when we found the sedimentation grading of "his particular mix to actually run 41.2, whereas a weighted average of the individual wheats was 47.48. This, no doubt, is an unusually wide variation, because it will be noted on the other sheet before you that various blends of only two wheats checked within a two-point margin.

When the program of incorporating sedimentation tests into next year's wheat loan program was announced, it was without prior consultation with the milling industry, and our

trade organization, the Millers National Federation, has been working diligently in an effort to learn the answers to the following questions:

(1) How accurately can the test results be reproduced? Under ideal conditions, what is the margin or error that can be expected?

The answer to this question is best found by referring to Dr. Walter T. Greenaway's report to the Association of Cereal Chemists. He tells of difficulties in checking between collaborators. Everything must be exact in order to check within two points, and low moisture wheat sometimes gives erratic results. Under ideal conditions our laboratories can usually check within two points; and, if they are further away than this on the first run, they can go back, do it over again, and, possibly, get within the two-point tolerance -- but it isn't easy.

(2) What effect does storage of a year of longer have on sedimentation values?

We have no specific knowledge. However, I would personally doubt that the storage period would affect it to any appreciable degree. I have here a sample of wheat produced in 1932, and it might be of interest to run a sedimentation test on it.

(3) What correlation, if any, is there between sedimentation values and baking quality as measured by the baking test?

I am afraid there is very little correlation. One of the large milling companies told me they had sent to a statistical company in Chicago the detailed results determined by their mill laboratory on more than one thousand samples and asked that organization to correlate sedimentation values to baking quality. It was reported back to this milling company that inor-

der to find a correlation the factor would have to be .5 or higher, and in the case of the one thousand samples, they came up with a factor of .4; thus resulting in their statement that there was no correlation between baking quality and sedimentation values.

(4) Since the USDA had decided to use sedimentation values, from a practical standpoint where should premiums begin? Where should discounts begin?

This is the hot one. From a practical standpoint, where should premiums begin and where should discounts begin? From the information floating around, I have heard some people advocate premiums beginning at 40, and possibly, applying on increments of 5 running up through 60. (This is the general pattern announced by USDA after this talk was presented.) One miller advocated a discount of ten cents per bushel on mellow varieties of wheat; I have not heard anyone suggest discounts below 40.

(5) If, for instance, premiums start at 40, what should the increment be between upward or downward graduation of a premium or discount scale?

This is closely related to #4, and that's where the heat is really encountered. What should the premiums be? As a miller and as a supplier to the baking industry, we have the obligation to furnish the product at a cost as reasonable as possible, so that the baker, in turn, may supply the consuming public with a product within the reach of everyone. We have had protein premiums applicable to loan values for many years and, no doubt, some wheat producers have received premiums beyond value, while other wheat producers have failed to receive full value for the quality wheat they produced. We, as millers, are heartily in accord with the principle of paying for quality. This, of course, is indicated by the spreads applicable to various wheats, as the high side and the low side for the particular protein wheat involved. In periods of abundant protein these premiums are relatively low. This year, with the scarcity of protein, they are extremely high. Still, the fact that there are high and low premiums indicate that someone is willing to pay for quality. The impact on the milling industry would be negligible if sedimentation loan value premiums were determined at a level not higher than the present loan or support protein scales. A discontinuance of protein premiums could then be accomplished in 1962, and sedimentation values substituted without causing extreme confusion; not only within the milling industry, but also within the grain trade as well. This is a personal observation and does not necessarily rep-

resent the view of the milling industry.

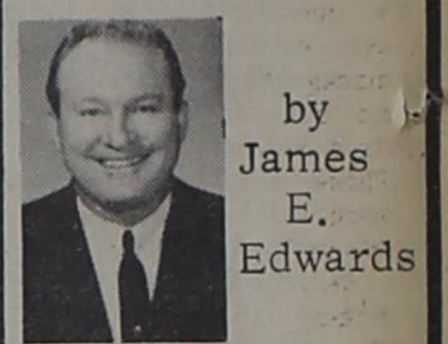

(6) Within the present knowledge available to your company, do you think your grain department will be able to buy wheat on the basis of sedimentation values?

This can be answered in the affirmative; the grain department can buy wheat on the basis of sedimentation values; but there will be other factors considered on each lot if it is destined to the milling department. For all practical purposes, wheat purchased for the milling of bakery flours is presently bought on sample. The laboratory analyzes it and, if it fits, the grain department is instructed to buy it. Regardless of its sedimentation value, the laboratory will still run proteins as long as flour specifications call for specific proteins, and I doubt that the entire

world trade in wheat flour will discontinue protein specifications for a long time.

In conclusion, gentlemen, you must accept sedimentation tests, even with its higher laboratory costs and, sometimes, erratic results. It has merit when considered in the light of its limits. However, I doubt that anyone presently considers that the tests are more than an indication of wheat quality. If discretion is used in the application of loan premiums applied to sedimentation values, I believe the change will be most beneficial.

FOOTSAVING EDUCATION

by James E. Edwards

Do ill-fitting shoes affect a child's disposition?

The obvious answer is "yes!" but shoe men would differ. Probably 95% of the children's shoes that we take off are outgrown and the only unhappy children are those who can't have the style they want.

Contrary to all of that evidence we frequently hear that babies are fussy until their mothers take off their outgrown shoes. That seems to be quite conclusive but mothers whose babies wear corrective casts or braces usually report that the babies don't seem to mind a bit.

In view of the conflicting evidence we can be sure that it is not safe to allow children to wear tight shoes with any confidence that they will get crabby before they get bunions.

HD Agent's Notes

BY MISS ETTIE MUSIL

This is Farm Safety Week, July 22-28. The theme for this week is "Family Safety at Work and Play." Never a day goes by that we do not hear of serious accidents happening on the farm and in the house. Many accidents occur within our home that do not get publicity in the newspapers or on the radio.

I'm sure many of you have had cut fingers, scalds or burns, or ripped clothes because of carelessness. After it happened, I'm sure you could think back to say, "I knew better, I should have held the knife a little straighter" or "I should have been a little more careful and took my time."

Yes, we have to take time to practice safety. Safety is always in season, whether fall, spring, summer, or winter. We could even consider safety as good management. Remember the extra time it took you to apply first aid to a bruise or cut? These accidents usually occur when you are busy and every minute is precious to you.

We can learn to incorporate safety into everything we do. How many times have you read on the label of an aerosol can not to puncture it or throw it into the incinerator. It may explode while you are still holding it or explode from the trash you are burning. We know this, but we ignore the directions.

For appliances we have many safety rules we ignore. For instance, never plug a portable dishwasher into an outlet that is not grounded. Water and electricity do not get along together. Never use a combustible cleaning ingredient or solution in an automatic dryer or combination washer-dryer. That is unless you don't object to blowing out the front of it.

We've mentioned the hazards of clothing before, but we'll mention them again. Shoes rate high as causes for accidents. Broken-down counters on shoes or too-high heels often cause falls or sprained ankles. Slippery finishes on the soles of new shoes are often hazardous, especially on children's shoes. You can rub the shoe sole with light sandpaper, or over some sand, to prevent slipping.

Unbuttoned long sleeves are dangerous for you men while checking irrigation wells or working on tractors and implements. Many an arm has been twisted off or badly injured from

loose shirt tails or sleeves. Are you taking time to practice safety? Do you have guards on tractor shafts or irrigation motor shafts? Loose clothing could very quickly pull you into the shafts. Maybe you homemakers could insist that these guards be replaced for safety's sake.

Have you heard your friends say, "We surely were lucky"? Practice safety, don't leave safety to your guardian angel. We often take needless chances with little practices such as standing on a wobbly chair to reach to the top shelf. Steady chairs or stools are so much easier to stand on.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

"The agnostic can't find God for the same reason a thief can't find a policeman."

PCA, back in 1951 and 1952 was becoming increasingly aware of bureaucratic pressures concerning the operation of the various activities. They responded by making a hard, but determined effort to become independent of the USDA as soon as they were able to repay government funds.

Farm Bureau gave full and successful support to this movement which resulted in the present independence of the agencies which are now under the management of their own farmer members. This might be an indication of what should happen to some other government-aided agencies which have since become able but not willing to launch out on their own.

This is National Farm Safety Week, and farmers and all others should be glad for the cooperation given by newspapers, radio, T.V. and other mediums of publicity. If the emphasis makes each of us just a little more conscious of our responsibility to our fellowman, ourselves and our families in our driving, work and play, it is well worth while.

There has been a lot of information regarding the frequency and types of accidents, but we would like to mention two or three of particular importance to rural areas such as ours: 1. One-third of tractor fatalities occur on the highways. 2. Three out of four traffic deaths occur on rural roads and highways. 3. Accidents happen close to home. Facts reveal that 65 per cent of all fatal accidents occur within 25 miles of home. 4. It is important to insure adequate and proper marking of slow-moving farm vehicles, including lights. 5. Encouragement should be given to regulations requiring that the operation of tractors and self propelled farm equipment on public highways be restricted to qualified vehicle operators.

As we said last week, office secretary Nell Davis is spending this week down at Corpus Christi at the annual Farm Bureau Institute. We are not sure at this time whether others from the county have been able to go or not.

Cards are being mailed soon, and we hope you will not neglect filling for your five cents per gallon state and four cents per gallon federal tax refund on non-highway used fuels.

CONSIDER THIS: The sacrifice of the wicked is an abomination to the Lord; but the prayer of the upright is his delight. Proverbs 15:8.

Farm And Ranch Loans Long Term, Low Interest

ETHRIDGE-SPRING Agency, Friona Phone 8811

Plainview PCA Retains Top National Rankings

The Plainview Production Credit Association held its place in 1961 as the nation's largest, according to figures recently released by the Farm Credit Administration.

Serving an eight-county area of the High Plains, the Plainview association ranked first in three categories among nearly 500 associations serving the United States and Puerto Rico.

The association led in total loan volume, net worth and amount of capital stock owned by association members. It also held high rankings in the nation in two other categories, loans outstanding on December 31, 1961 and in accumulated earnings.

The association's 1961 loan volume totalled \$37,205,000, highest in its history. Total net worth and reserves was \$4,292,183, and capital stock, all member owned, totalled \$2,792,370.

The agricultural credit organization had \$12,833,000 in loans outstanding on December 31, 1961, fourth highest in the nation and highest among 36 associations in Texas.

"We are gratified that our association earned this recognition among the nation's Production Credit Association," commented L. R. Durham of Plainview, association president. "The figures themselves are important only in the fact that they reflect our continuous effort to provide dependable and progressive agricultural credit to our stockholders."

The Plainview Production

Credit Association, owned and operated in its entirety by more than 1,700 farmers and ranchers, provides agricultural credit in Farmer, Castro, Swisher, Briscoe, Bailey, Lamb, Hale and Floyd counties. Offices are operated in Plainview, Friona, Dimmitt, Tulia, Silverton, Muleshoe, Littlefield and Floydada.

Fred Conner of Plainview is acting general manager of the association. In addition to President Durham, other directors are Vice President Henry Hayes, D. S. Anderson of Muleshoe, Grady Shepard of Hale Center and Don Garrison of Silverton.

The 36 Production Credit Associations, serving all 254 Texas counties, loaned nearly \$400,000,000 in 1961. The nation's 500 PCAs had a loan volume of \$2.9 billion, a record high for any single year.

Continued action of TEXAS FARM BUREAU was instrumental in termination of the so-called merit rating system for auto insurance.

We invite those of you who have not already done so to enjoy the savings currently being made by many of your neighbors-- Dividends of 33 1/3 per cent currently being returned on most auto policies and all farm liability policies.

If your home qualifies, you can also have better coverage for less money by combining your dwelling and farm liability on a farm and ranch or home owners 3-year policy.

Life insurance of all kinds - Blue Cross Hospitalization

We have an attractive opening for a qualified man to help service our more than 500 Farm Bureau Members.

The HAPPY HOMEMAKER

BY JUNE FLOYD

Oven dishes are simple to prepare and a homemaker is able to obtain a subtle blend of flavors impossible to obtain in any other method of preparing food. Since complete meals are prepared in one all-purpose cooking pan, this method eliminates some dishwashing, too.

Basic instructions for preparing one dish meals in the oven or on top of the stove are as follows:

1. Brown meat over medium-high heat. Add fat if meat is very lean.

2. Cover pan after browning for two or three minutes. Then reduce heat to low and cook until nearly done.

3. Arrange vegetables around meat and complete the cooking over low heat.

IRISH STEW

3 lbs. lamb shoulder (cut in two inch cubes)
Stewing beef may be used if preferred

2 tablespoons fat
2 teaspoons salt
1/4 teaspoon pepper
1/8 teaspoon rosemary
1/8 teaspoon marjoram
1 onion, sliced
1 stalk celery, cut up
2 cups water
6-8 small, whole onions
6-8 medium potatoes
6-8 small carrots

Place cooking pan over medium heat. Brown meat thoroughly in hot fat. Season then add sliced onion, celery and water. Cover. After 2-3 minutes, reduce heat to low and cook about 45 minutes.

Then add remaining vegetables and thicken juices to desired consistency. Add cooked vegetables, mix lightly and heat thoroughly. Serves six to eight persons.

BEEF POT ROAST

3 1/2 to 4 lb. beef roast (chuck, round or rump)
6 potatoes, peeled
6 carrots
6 small onions
salt and pepper

Brown roast on all sides over medium high heat. Season with salt and pepper. Cover cooking pan and reduce heat to low. Cook slowly until roast is nearly done (2 to 2 1/2 hours).

Arrange vegetables around roast. Baste with meat juices and sprinkle with salt and pepper. Recover pan and cook until

vegetables are tender -- 30 to 40 minutes. Serves 8 to 10.

CORN AND HAM CASSEROLE

1 1/2 cup chopped ham
1 cup whole kernel corn
2 tablespoons butter
2 tablespoons flour
1 cup milk
1 tablespoon green pepper
1/4 teaspoon paprika
1 tablespoon onion
1/3 cup cheese, grated
1/4 cup cracker crumbs
2 tablespoons butter

Cook ham. Make a white sauce of the butter, flour, milk and paprika. Add corn, chopped pepper, paprika and onion. Pour into a greased casserole. Cover with a mixture of cheese, cracker crumbs and butter. Bake at 300-325 degrees for 30 minutes.

SKILLET HAM SALAD

1/4 cup chopped green onion
1/4 cup chopped green pepper
2 cups cooked diced ham
1 tablespoon fat
1/4 teaspoon salt
1/4 teaspoon pepper
1/4 cup water
1/2 pound sharp cheese, diced
3 to 4 potatoes

Cook and dice potatoes. Cook onion, pepper and meat in hot fat. Stir occasionally until meat is slightly browned. Add potatoes, salt pepper and water. Heat mixture slightly and stir in cheese. Heat just until cheese begins to melt.

PORK CHOPS BAKED IN TOMATO SOUP

Dredge six one-half inch thick pork chops with flour. Brown in hot fat. Place in baking dish.

(If fried in electric skillet, drain grease drippings and add other ingredients.)

1 can (10 1/2 oz) can tomato soup
1 can (10 1/2 oz.) can water
1/2 cup chopped celery
3/4 cup minced onions
3/4 teaspoon salt
1/2 teaspoon paprika
1 green pepper, chopped

Combine ingredients, heat and pour around chops. Cover dish or skillet and bake at 350 degrees for one hour or at low heat in the skillet.

Another hazard of outings that is very prevalent during summer months is water. It is always a good idea to be well acquainted with any body of water before you go swimming or wading in it.

Before any group enters any water an expert swimmer should explore the bottom for sharp dropoffs. If there is any, non-swimmers should be sure to stay in the shallow water area.

Diving should always be limited to supervised swimming areas or bodies of water with which the diver is well acquainted.

With the new ice chests now on the market any picnic can be a cold lunch picnic and there's no end to the delicious dishes that can be prepared ahead of time and then served on the spot cold.

Or, if you want to serve sandwiches, you can make a variety of spreads which have been prepared and make sandwiches just before serving time.

MOCK CHICKEN SPREAD
1 lb. pork
6 hard boiled eggs

3/4 pint salad dressing
1/2 pound stew beef
1 whole stalk celery
salt and pepper
Boil meat with salt and pepper. Cool and chill. Grind eggs, meat and celery. Mix with salad dressing. Spread on crackers or slices of bread.

PIMENTO CHEESE SANDWICHES

1 hard boiled egg
1 1/2 tablespoons chopped pimento
2 tablespoons minced onion

1 tablespoon butter
1 tablespoon flour
1/2 cup milk
1/2 pound grated American cheese
dash cayenne pepper
1/4 teaspoon salt
1 tablespoon sugar
2 tablespoons vinegar

Chop the egg; add the cheese, pimento, onion and salt. Melt the butter in a double boiler; add the sugar and flour and blend. Add the vinegar, milk and pepper while stirring and

cook until thickened. Combine with the cheese mixture. Use as a spread for either open or closed sandwiches.
