

# Lions Slate July 4th Activities

Everyone In Community Invited

A day-full of activities is planned for Bovina in observance of Independence Day, which is tomorrow (Thursday). Bovina Lions Club is sponsoring organization. Bovina Modelers, an organization of model airplane enthusiasts, will begin the day's program with flying contests at 10 a.m. The contests will be at the club's runway on Highway 86 west.

Softball and baseball games will begin at 4:30 and continue through 7:30 when a community-wide picnic will be held in out-field at baseball park. Lions Club will serve free lemonade and families are requested to bring basket lunches. The day's program will be climaxed with a Little League all-star game following the meal. The game is slated to be-

gin about 8:15. Other ballgames include a contest between two girls teams here, Three-Way Chemical and Fantasy Beauty Salon, a duel between two women's teams, and an old men's game. The girls' game begins at 4:30 with the women's game following at 5:30. Housewives will go against working women in this fray with Glenn Hornas in charge of the working women

and June McMeans captain of the housewives. In the old men's game, players must admit to being 40 years old or over, Lion Club President Warren Morton says. The contest will pit the City Dudes against the Country Bumpkins. Ike Quicquel will be manager of the Dudes. Carl Rea will have charge of the Bumpkins. Roster of Quicquel's team in-

cludes Frank Wilson, Wilbur Charles, George Turner, Earl Derrick, Warren Embree, Troy Fuller, A. L. Glasscock, Grady Hall, J. P. Macon, Dub Mayhew, W. J. Parker, Earl Richards, E. H. Young, Dave Wines, John Wilson, Aubrey Brock, Willie Williams, Odie White, J. D. Stevens and C. C. Richards. On the Bumpkins' side of the ledger are Reagan Looney, Amos Steelman, Earl Steven-

son, Norvell Strawn, Billie Sudderth, Boye Taylor, Rouel Barron, Bill Bradshaw, Jack Clayton, George Douglas, Vernone Estes, J. T. Jones, O. H. Jones, Walter Krieger, Connie O'Brien, Eddie Redden, Jesse Walling, Joe Wilson and James Taylor. Additions may, and probably will, be made to each roster, according to reports from the managers. Men interested in

playing should report to one of the managers, Morton says. Gene Ezell and Harry J. Charles will be in charge of preparing and serving the lemonade, which will be furnished by Wilson's Super Market. "The main thing we in the Lions Club want," Morton says, "is for everyone in the community to come to the activities and have a good time. We want everyone to attend the picnic

and all." Details concerning all-star game and the model airplane contests appear in other stories in this issue of The Blade. The holiday will find most Bovina businesses closed. This is one of the official flag-flying days of the year, members of Bovina Study Club remind. People interested in purchasing flags may do so by contacting a member of the club.

THE NEWSPAPER THAT WORKS FOR A BIGGER, BETTER BOVINA

WEDNESDAY, JULY 3, 1963

BOVINA, TEXAS

VOL. VIII, NO. 1

### FOUR FROM EACH TEAM --

#### WHITTLIN'

BY DOLPH MOTEN

In site of only a minimum of advance planning, it now appears that there'll be more to do in Bovina tomorrow (Thursday, July 4th, Independence Day) than most people who like to loaf on holidays will have time to get around to.

The planned activities, all of which should prove to be better than average expense-free entertainment, will be a lot of fun for participants and spectators alike, we think.

If you doubt our judgment, come on out and see for yourself.

The old men's baseball game should be worthy of being a conversation piece at least until several months after Christmas.

And model airplane enthusiasts tell us more planes are going to be flying in Bovina Modelers contest Thursday than you could expect in a small war.

Their enthusiasm is running high and the word is out that some top-notch competition will be on hand from out-of-town. Sounds as though the local boys will be hard put to keep any of their prizes at home.

But then they are the hosts and it will probably make for a better deal if they don't win, anyway. Too, that might make for better contests when and if they decide to have another model airplane show.

Biggest drawback to the Little League ballgame will be that it'll be too short. Or at least there's that possibility. The best ballplayers, including the best pitchers, should make for a fairly fast game and that will leave spectators wanting more when it's over, we're afraid.

However, it's probably better to leave a group of spectators wanting more than it is to have them feeling as though they've had too much.

The picnic is the only part of the Fourth of July activity here that we're worried about. We're afraid that the crowd won't be large enough to keep members of the Lions Club from threatening to abandon it come planning time for next year.

At the same time, we realize that Gene Ezell and Harry J. Charles are going to be in charge of preparing and distributing the free lemonade.

That, in itself, should make any activity -- picnic, ballgame, snowball chunking or dog fight -- a tremendous success. There should be no chance for failure with a team like that fixing and passing out free lemonade.

Ezell is the man, you'll remember, who invented charcoal lemonade a few years ago when he mixed his brew in a barrel which had been burned ... or something.

Though there hasn't been any great demand for charcoal lemonade since that time, the charcoal idea did catch on for steaks, hamburgers and other meats. Ezell's idea of charcoal lemonade may yet prove to be a good one.

It was, however, premature at the time, according to some critical samplers of said barrel of the tasty ... and different ... drink.

The new paving on three of Bovina's main streets, as (Continued on Page 2)

## LL All-Star Game Players Named

Third Annual Bovina Little League All-Star game will be a highlight of July 4th activities here. The contest will climax Independence Day activities and will begin shortly after 4 p.m.

Four players from each of the league's six teams were named to two squads for the all-star tilt. Players from Lions and Red Tops of Texico Farwell and Oklahoma Lane will oppose players from Bovina's three teams, First National Bank-Lawlis Gin, Three-Way Chemical-Bovina Gin and Bovina Wheat Growers-Bovina Insurance.

Managers of the teams will also serve as all-star managers.

Players named to the all-star groups are: LIONS--Doug Autrey, Allen Britenbrach, Robby Mahaney and Greg Hargrove; RED TOPS--Dean Stovall, Greg Meeks, Doug Harriman and Roddy Pierce;

## Buildings Receiving Remodeling

Remodeling of fronts of Bovina Hotel and Artistic Beauty Shop, side by side businesses on north side of Bovina's main street, began Monday.

When completed the buildings will have pink brick up to window level, Mrs. Herman Estes, who owns the businesses with her husband, says. Knotty pine will be installed above the brick.

A Colonial-type porch will be installed in front of the buildings with a patio on top of the porch. Entrance to the patio will be from the hotel's second floor.

The remodeling work is slated to take about two weeks, Mrs. Estes says. Danny Pounds is contractor for the job.

## Morton President Of Lions

Warren Morton was installed as president of Bovina Lions Club at a regular meeting Thursday night in City Drug. Roy Crawford, outgoing president, was presented a pin in appreciation for his efforts for the club during the past year.

Officers beginning new duties following the meeting, other than Morton, were Dolph Moten, vice president; Jim Russell, second vice president; Jerry Rogers, secretary; Tom Caldwell, third vice president; Jack Patterson, tall twister; Warren Embree, treasurer; Pat Kunselman, Lion Tamer; and Edward Isaac, A. M. Wilson, M. H. Carson and Bud Crump, directors.

The club made plans for annual July 4th celebration here (See stories elsewhere in this issue.)

OKLAHOMA LANE--James Symcox, Dennis Ensor, Warlick Dollar and Danny Prince; BANK-LAWLIS--Max Bird, Lowell Taylor, Ronnie Dyer and Joe Don Stevens; WHEAT GROWERS-INSURANCE--Wesley Harris, Kyle Carter, Tommy McCormick and Stuart McMeans; THREE-WAY-BOVINA GIN--Gary Lide, Johnnie Hugh Horn, Bruce Caldwell and Wayne Stone. Umpires for the game will be

Jimmy Clements behind the plate and Robert Taylor on the bases.

The all-star players were grouped following Friday night play in the closely-knotted league.

Lions and Bank-Lawlis are tied for first with 5-3 records while Oklahoma Lane and Wheat Growers-Insurance are tied for third and fourth with 4-4 records. Red Tops and Three-Way-Bovina Gin are tied for the cellar with marks of 3-5.

### LEARN ABOUT MILO --

## 43 Japanese Visit Elevator

A group of 43 feed manufacturers, poultry and livestock industry leaders and government officials from Japan visited Sherley Grain Co.'s elevator facilities here Saturday.

The stop here was a part of a tour for appraising grain sorghum production, utilization and marketing in the High Plains area.

The group recently completed a two-weeks Feed Nutrition Short Course at Oklahoma State University under auspices of U. S. Feed Grains Council through which Grain Sorghum Producers Association conducts its foreign market development program.

Members of the group represent Japanese firms which are expected to buy some 800,000 tons of grain sorghum this year. This figure is up nearly 50 per cent over a year ago, according to Nolan Chandler, of GSPA who was in charge of the tour here.

Learning about grain grading and storage was highlight of the stop in Bovina.

The group, travelling by chartered bus, spent more than 30 minutes inspecting the ele-

vator facilities here and seeing how grain is tested, graded, stored and handled before continuing the tour on to Clovis.

VISIT BOVINA -- A few members of the group of 43 livestock industry leaders from Japan who visited Sherley Grain Co. in Bovina Saturday are shown on a tour of the elevator facilities. Nolan Chandler, agricultural assistant of Grain Sorghum Producers Association, which sponsored the tour, is at left. Harry Johnson of the elevator is next to Chandler.

## 'New Bovina' Financing Considered

"We're working on financing now and chances appear favorable."

That was the report this week from Jim Ware, who is chairman of a Bovina Chamber of Commerce and Agriculture committee which is investigating possibilities of re-building business buildings on a block of downtown Bovina.

Announcement of the project, which received regional publicity, was made last week. Eight of nine property owners in the block have indicated an interest in the project.

A contractor's bid is presently being studied and another bid or two may be submitted, Ware says.

The present plan calls for 12, 25-foot front business buildings to be constructed behind the present buildings with the old buildings to be torn down and the area they now occupy converted to paved parking area.

"When a financing plan is worked out, we feel we'll be able to take more definite steps toward our goal," Ware says.

### HERE TOMORROW --

## First Model Airplane Contests Scheduled

Contestants are expected from as far away as Lubbock and Amarillo in Bovina Modelers First Annual Model Airplane Contests which are scheduled tomorrow (Thursday).

Those who enter the contests will be trying for first and second place prizes of airplane kits and accessories. They will compete in junior and open divisions of four contests.

The action will be conducted on Bovina Modelers new field on Highway 86 west.

Contests include stunting, balloon busting, balloon diving and combat.

Start time will be 10 a.m., and sponsors of the program expect it to continue several hours.

Registering for contests will begin at 8 a.m. Entrance fee will be \$1 for first event and 50 cents for each additional event.

Contestants 15 years old and younger will compete in the jun-

ior division. Others will be in open competition.

The contests will continue as long as it takes for the entrants to complete their turns in each event. "If we have several contestants, the contests may continue throughout most of the day," Jerry Rogers, a club officer, says.

Several out-of-town model airplane enthusiasts are expected to be here for the contests, Rogers says.

The public is invited to view the model airplane flying. There will be no admission charge.

## Fire Hits Downtown Building

Fire Saturday about mid-morning did considerable damage to old Bonds station building on Bovina's main street.

Extent of the damage was not estimated by N. E. Bonds, owner of the building, which was unoccupied at the time of the blaze.

A Latin-American cafe was the last business to occupy the building.

Origin of the fire was evidently in attic of the building and the flames were probably started by faulty wiring, Bonds says.

"We'll know what the insurance adjuster thinks about the amount of damage in a few days," Bonds says. "Things are pretty well water-soaked and there was a lot of smoke in there." He said the building would probably not be rebuilt.

## No Injuries In Monday Wreck Here

There were no injuries, but more than \$300 in damages in a two-vehicle collision at intersection of Avenue E and Boyce Street about 8:40 Monday evening.

Involved in the accident was Vernon Estes of Bovina, who was driving a 1963 Chevrolet pickup, and Mrs. Zora Rader of Hereford in a 1952 Chevrolet automobile.

Estes was going west on Avenue E and Mrs. Rader was driving south on Boyce at the time of the accident.

Left front of Mrs. Rader's car struck right side of Estes' pickup.

Damage to the pickup was estimated at \$235 with some \$100 in damages to the car.

The impact spun the pickup around. It was facing east when it stopped.

## Weather by Willie

I don't think we will get uplift enough to bring us anymore than very scattered showers this week.

--Willie

## Exchange Student To Arrive July 22

Adalheidur Jonasdottir, exchange student from Iceland is to arrive in Amarillo, July 22, according to Mr. and Mrs. R. E. Wilson, host family for the student.

Heidi, was to have made her home with the Charles Thomp-sons, but due to their moving

she will live with the Wilsons. She is from Reykjavik, one of the larger cities in Iceland. Her father is a teacher and she has one brother, 15, and three sisters, 20, five, and three years of age.

She is a member of Lutheran church.

### ON SCHOOL FACULTY --

## Board Signs 2; 6 Posts Open

Two new teachers for Bovina Schools were signed for 1963-'64 school year at a special school board session last week. Positions of high school science instructor and junior high coach were filled.

Named to the science post was Jerry Myers, who taught last year at Azle, which is near Fort Worth.

Last year was Myers' first in the teaching profession, Superintendent Warren Morton reports. He is a graduate of Texas Christian University at Fort Worth. A native of Corsicana,

Myers is married. James Hyatt, whose home is in Olton, will be junior high coach and will also direct physical education program for the entire school.

## Plans Made For Kindergarten

Tentative plans are being made by Mrs. Vernon Estes to teach a kindergarten here next fall.

Pre-school age children will be taught basic fundamentals preparing them for first grade.

Hyatt was graduated from Texas Tech last January. This will be his first teaching position. He is single.

(Continued on Page 2)

FIRE -- Members of Bovina Volunteer Fire Department are shown extinguishing flames which erupted Saturday morning in Bonds station building on Main Street. Faulty wiring was blamed for the cause of the fire which was put out by the firemen in a matter of minutes.

# Reflections

From  
*The Blade*

SIX YEARS AGO  
 July 3, 1957

Bovina's annual Fourth of July picnic will be Thursday at local ball field and city park.

J. W. Wright was installed as Lion Boss for the coming year at regular Lions Club dinner Thursday evening.

Six boys and one adult from Bovina are making final plans this week for the National Boy Scout Jamboree. Local boys who will make the trip are Jerry and Jimmy Wright, Ronnie Sudderth, Roger Ezell, Don Caldwell and Roy Charles Dodson. Bob Willis, coach at Bovina schools, will accompany the boys.

The Bovina Blade has been judged second best in Texas Press Association 1957 contest for newspapers in towns of less than 2000 population.

The roadside park was the site of a picnic and social for members of Town and Country Club Friday evening.

Mr. and Mrs. E. C. Berry announce the engagement and approaching marriage of their daughter, Ellen Ann, to Neil Smith, son of Mr. and Mrs. Frank Smith.

THREE YEARS AGO  
 July 6, 1960

For the fifth time in seven years, rain hampered Bovina's July 4th celebration. In a drawing conducted in the slowly-falling rain, A. J. Barton of Bovina was named winner of a boat and trailer given away by the fire department.

A petition bearing 25 signatures of persons living in the area of town where a cantaloupe shed seeks to operate this summer was ready for presentation to the planning and zoning board last week but the meeting wasn't held.

R. T. Harbour of Bovina entered Veterans Hospital in Amarillo Tuesday for a knee operation.

New crops in vegetable picture. Practically any vegetable the average housewife has heard of and a few she doesn't know about are being planted, hoed, cultivated and irrigated in what is fast becoming a genuine vegetable growing section. Youth week slated by Methodist M.Y.F.

Whittlin --

somebody has figured out, "ain't going to be nothing but nice."

The width of the streets is their long suit, we think, and this adds greatly to property which adjoins the improvements.

An out-of-towner pointed out to us several weeks ago the beauty of the Poplar trees which landscape several homes on Highway 86. The additional paving along with the curbing adds to the already-pretty scenery.

If you haven't noticed this, drive around and see for yourself in a few days when all the paving is completed.

It looks so nice that we might even start referring to Highway 86 as Dimmitt Road. That sounds more "up-townish" anyway.

The \$2 per foot which property owners paid for their curbing and guttering on the three streets which are receiving the additional paving at state expense is apt to be the bargain of the year in Bovina.

We know of nowhere else that so much improvement could have been purchased for so little . . .

If you think we're proud of the street improvement, you're right.

We are!

## Joe Pinner's Mother Dies

Mrs. Verga Pinner 82, mother of Joe Pinner, died last Saturday, June 22 at Lockney.

Funeral services were conducted Monday at First Methodist Church at Lockney.

She was preceded in death by her husband, Coy, and one child. Survivors are Joe of Bovina, Harvey, Ahilene; Ray, Bentonville, Ark; Cecil and Jim of Lockney, Faye of Dimmitt; May Teaff of Bentonville, Ark; Bertie Ritchie, Eugene, Ore.; and Tiny Rexrode of Lockney.

The community singings which have been conducted each month at the Pentecostal Holiness Church have been discontinued for the months of July and August, Rev. Archie Cooper, church pastor, announces.

## 39ers Honor Mrs. Read

Mrs. Nola Read was honored with a party Friday evening by members of 39ers Birthday Club.

The group had a cook out at the home of Mrs. Jesse Walling. Attending were the honoree, Mrs. Paul Jones, Mrs. Joe Wilson, Mrs. Pete Davies, Mrs. A. E. Crump, Mrs. Odis White, Mrs. Robert Read and Cindy and the hostess.

## At Home

Joe Langer was released from Parmer County Community Hospital last Thursday and is reported to be improving. He is convalescing at home.

## Boards Signs --

(Continued from Page 1)

Mrs. Ruth Carter, who has been a member of the faculty for past three years, submitted her resignation as a sixth grade teacher last week.

Mrs. Carter's resigning brings the number of vacancies in the faculty to six.

Positions open include those for a homemaking instructor, a high school commercial teacher and teachers in first, third, fifth and sixth grades.

Morton says he expects at least one of the positions to be filled at the board's regular meeting for July, which will be Monday night.

AT MID-SEASON --

# Little League Tied-Up Tight

Bovina's Little League wound up the first half of season play and took a week off for the all-star game knotted tighter than a four-year-old's shoestring.

All of the teams are tied--Lions of Texico-Farwell and First National Bank-Lawlis Gin are tied for first and second, Bovina Wheat Growers-Bovina Insurance and Oklahoma Lane are tied for second and third while tied for fifth and sixth places, but just two games off the league leaders' pace are Red Tops of Texico-Farwell and Three-Way Chemical-Bovina Gin.

In Thursday night action last week, Bank-Lawlis edged Oklahoma Lane, 6-5, and the Lions slipped by Wheat Growers-Insurance, 8-5.

## Charles-Blade Wins 2 In BR Baseball

Babe Ruth baseball action saw Charles Oil-Bovina Blade sweep a doubleheader Tuesday night of last week.

In first game, Charles-Blade had an easy time in running over Texico-Farwell, 21-9, Charles Kitten was the winning pitcher, Charles Wade Norton with three singles and Kent Stanberry with a single and a double led the hitters.

In second game Charles-Blade came from behind with seven runs in last inning to nip Sherley Grain-H&M Garage, 11-9.

Foy Lee Stowers was winning pitcher, Norton again had three hits to pace the winners' offense, Kitten blasted a home run.

Scotty Rundell paced Shey-H&M at the plate with a double and a single.

## Housewarming For Johnsons

Mr. and Mrs. Levi Johnson were honored last Sunday evening with a surprise housewarming at their home.

Guests presented them with a set of china.

Attending were Mr. and Mrs. Don Stone, Mr. and Mrs. Marilyn Ferguson, Mr. and Mrs. Thomas Rhodes, Mr. and Mrs. James Boardman, Mr. and Mrs. Billy Marshall, Mr. and Mrs. Buck Ellison, Mr. and Mrs. Howard Ellison, Mr. and Mrs. Robert Calaway, Mr. and Mrs. Robert Read, Mr. and Mrs. Richard Roberts, Mr. and Mrs. Paul Jones, Mr. and Mrs. Billy Johnson, Mr. and Mrs. E. O. Johnston, Mr. and Mrs. Lee Capps, Mr. and Mrs. William Gromowsky, Mrs. J. R. Caldwell, Mrs. Mel Gunn and James Clayton.

## Catholic Groups Have Joint Meet

Mrs. Gil De Leon and Mrs. H. R. Denney were hostesses for St. Ann's Society and St. Theresa of Jesus Society recently at parish hall.

Fr. Claver Giblin, S. A. continued his series of talks on marriage. Title of talk was "The Big Self in Marriage." During a business session, Mrs. Leon Schilling, Mrs. Leo Ruzicka and Mrs. Gil De Leon were appointed to purchase more pamphlets for the pamphlet rack, Mrs. John Baca and Mrs. H. R. Denney were asked to order religious articles.

The group discussed plans for square dances to be held in the near future.

Friday night saw Oklahoma Lane hang on to outscore the Red Tops, 16-14, even though the red capped boys rallied for seven runs in the last inning.

Three-Way-Bovina Gin pulled the upset of the season and threw the league in the tied setup its in now by polishing off the league leading Lions, 13-3, in a game called at end of four innings because of the 10-run rule. Before the game, the Lions were in undisputed possession of first place and Three-Way-Bovina Gin was in the cellar all by itself.

Following the July 4th week-all-star game break, the league returns to regular schedule for the last half of play Monday. First game has Bank-Lawlis taking on the Lions in a game which will decide which of these teams will be in first place for the next three days. The night-cap has the Red Tops meeting Wheat Growers-Insurance.

## PCFS Tops PW League

With a re-organized schedule and a four-team league, pee-wee baseballers took a fresh start here last week.

The re-organization was necessary because two teams from Texico-Farwell failed to participate in the league.

League members now are Oklahoma Lane Eaglets, Dairy Freeze, Cicero Smith and Parmer County Farm Supply.

In first game under the new setup Thursday, Cicero Smith laced Oklahoma Lane, 12-1, Friday, Parmer County whipped Dairy Freeze, 7-3.

In a doubleheader Monday afternoon, Parmer County beat Cicero, 12-5, and Dairy Freeze whitewashed Oklahoma Lane, 12-0.

Another pee-wee doubleheader is slated for Friday night with Oklahoma Lane meeting Parmer County in first game, which will begin at 5:30, and Cicero playing Dairy Freeze in night-cap.

Monday of next week, Oklahoma Lane meets Cicero Smith in a single game at 5:30.

## Widow's Club In Glover Home

Mrs. J. R. Glover entertained members of Widow's Club Friday at her home with a covered dish luncheon.

Assisting the hostess was her daughter, Mrs. A. E. Steelman. During the afternoon the group played quiz games and visited.

Those present were Mrs. Ola Free, Mrs. J. H. Steelman, Mrs. J. Sam Gaines, Mrs. Pearl Walden, Mrs. Pearl Hastings, Mrs. Margaret Caldwell, Miss Ellen Feminsider, Miss Rita Caldwell, Miss Lula Smith, Mrs. Lillian Wheeler, Mrs. Mel Gunn and Mrs. J. R. Caldwell.

Special guests were Mrs. Neal Mager of Hackensack, N.J.; Mrs. Lady Armstrong and granddaughter, Sheila Barbee.

SPOKESMAN SAYS

## Strong Domestic Industry Averted U.S. Sugar Crisis

A strong domestic sugar industry anchored the United States against what might have become a national sugar crisis in recent weeks, it was declared by Dennis O'Rourke, President of Holly Sugar Corporation.

Addressing the annual meeting of stockholders, the chief executive officer of one of the nation's largest beet sugar companies reviewed recent headline events in the sugar world and gave credit for prevention of critical consumer problems in these terms and in this order:

1. "The strong and substantial United States beet sugar industry, as well as the U. S. cane sugar industry, were important factors in assuring American consumers of adequate sugar supplies. Far from being held back, deliveries by beet sugar processors were stepped up to meet increased demand."
2. "The administrators of the Sugar Act (U. S. Department of Agriculture) have taken forceful actions to assure United States consumers an adequate supply of sugar through this year which, on a world-wide basis, is one of sugar shortage."
3. "The United States Sugar Program, as embodied in the Sugar Act, has been shown once again to be of great national value. While it has provided stable prices and assured an

adequate supply of sugar for many years, it has also proven flexible enough thus far to permit the Department of Agriculture to meet the recent serious threat of sugar shortage."

O'Rourke said recent sugar price increases in the United States and elsewhere in the world resulted directly from a sharp change in the relationship between supply and demand, that world production had fallen behind world consumption.

The sugar executive declared that even with recent price increases, the U. S. price remained one of the lowest in the world in terms of earning power. He told Holly stockholders that both sugar beet farmers and beet sugar companies were entitled to some price increase to offset, in part, accumulated cost increases.

The president reported that Holly's earnings for the fiscal year ended March 31, 1963, amounted to \$2,608,482 compared to \$1,616,826 for the preceding fiscal year. Net income, he reported, after preferred stock dividends, was \$3.75 per share of common stock compared to \$2.25 per share the preceding year.

O'Rourke reported that the corporation's construction of a new \$21,000,000 beet sugar factory at Hereford, Texas, was proceeding on schedule and was expected to be completed in time

to process the 1964 beet crop in West Texas and eastern New Mexico. He emphasized that Holly's expansion was in direct line with the declared national policy to encourage enlarged domestic sugar production as a safeguard against too great reliance on distant and uncertain sources of supply.

"Recent events put more of a premium than ever on the current expansion of the domestic beet sugar industry in which Holly Sugar Corporation is leading the way in the building of its new, large plant in Texas," O'Rourke emphasized, adding, "The beet sugar industry which is now building several plants and which has others scheduled for building, will have made material contribution to the nation's sugar security when these new production facilities are in operation."

The annual meeting of Holly Stockholders was held June 26 at Colorado Springs, Colo.

## Holly Directors Are Re-elected

All directors of Holly Sugar Corporation, one of the nation's major producers of sugar, were re-elected here today at the annual meeting of stockholders.

Following the stockholders' meeting, directors re-elected six officers of the Corporation.

Directors re-elected are: Edwin F. Blair, New York, partner in the law firm of Hughes, Hubbard, Blair and Reed; John Evans, Denver, Honorary Chairman of the Board, First National Bank of Denver; B. Barret Griffith, Colorado Springs, partner of Wood, Walker & Company; Dennis O'Rourke, Colorado Springs; Ben Slothower, Salt Lake City, engineer with Kennecott Copper Corporation; Russell T. Tutt, Colorado Springs, President and Director, El Pomar Investment Company; Walter H. Ziegler, Woodland, California, farm owner and operator; Henry C. Breck, New York, partner of J. & W. Seligman & Company; Merrill E. Shoup, Colorado Springs, Chairman.

Officers re-elected are: Merrill E. Shoup, Chairman of the Board; Dennis O'Rourke, President and Chief Executive Officer; C. M. Nicholson, Vice President and Director of Agriculture; Joseph A. Ash, Vice President and Treasurer; E. E. Corbin, Vice President and Director of Sales; John B. Evans, Secretary.

# Wheat Harvest In County Was As Expected: Slim

Parmer County's 1963 wheat harvest is for the most part complete, and a survey of the county's elevators this week revealed that the slimmest crop in years was harvested.

Isolated individuals throughout the county were able to make good yields, and some areas, where hail damage was light, had fair crops. But for the most part, wheat had a rough year in Parmer County in 1963.

The Farwell area probably made the best average yield considering the county as a whole. Herb Potts, manager of Worley Grain, said his elevator would come close to equalling last year's volume.

"We'll handle 80 to 90 per cent of the wheat we had last year," Potts said. Bill Dollar at State Line Grain echoed that opinion. "We're actually going to handle more grain this year than last, but as far as this year's crop being better, I don't think it was," Dollar said.

Some farmers around Farwell reported good yields. Glen Phillips made 60 bushels per acre, and W. F. Gable had 61 and three-quarters bushels. At Bovina, the story was not quite as good. Russell James, at Bovina Wheat Growers, said he estimated the 1963 crop at a little more than half of the 1962 production.

Harry Johnson, speaking for Sherley-Anderson Grain Company, said "I think of 1961 as a good wheat crop. Last year we made about two-thirds as much wheat as we did in 1961, and this year we made about two-thirds as much as we did last year. All things considered, we

did better than I thought we would."

Still, some farmers around Bovina reported good yields. A. B. Kent made 64 bushels on 35 acres. Herman Gerles made 53 bushels on 200 acres, Leon Ware 53 bushels on 84 acres, and O. H. Jones made 52.6 bushels per acre.

However, there were some yields as low as seven and eight bushels per acre, and some fields weren't even harvested. It was the general feeling around Bovina that the hail reduced the yields by as much as one-half.

The wheat volume around Friona will do good to equal half of the 1962 crop. Irrigated wheat, plagued by dry weather and a hard freeze last winter, then hail and wind in the spring, is making from 30 to 35 bushels on the average. Dryland wheat is ranging from nothing to about 10 bushels per acre.

However, some are making a fine crop despite the adversities. Gordon Massey reported a yield of 76 bushels per acre. M. A. Black averaged 55 bushels on a 155-acre field.

"The wheat has been the driest we've harvested in recent years, ranging around nine to 10 per cent moisture," said Arthur Drake, manager of Friona Wheat Growers.

"The sedimentation quality

is actually better than last year," commented Preach Cranfill at Continental Grain Company. The cash market is a little better than the government loan, Cranfill pointed out.

Down in the Hub area, which was perhaps the hardest hit by hail, only about 10 per cent as much wheat was marketed as was harvested last year.

"Practically no one bothered to harvest right around Hub," said Weldon Stringer of Hub Grain. He said almost all of the elevator's receipts came from outlying areas, since the wheat around Hub was completely leveled by the hail.

At Lazbuddie, farmers made about half as much as they did in 1962, although some were also totally wiped out. Joe Moore of Sherley-Anderson's elevator said his concern would handle about as much wheat as last year, but added that last year the newly-completed elevator got in only about half of the crop.

Hoyt Eubanks' 49-bushel yield on 54 acres was one of the top in the Lazbuddie area. Harvest results were also

varied in the Black community, although elevator officials there declined to comment.

Sedimentation quality as a rule was good throughout the county, with protein either average or slightly below. With sedimentation premiums split up with protein this year, a maximum of 12 cents was possible under the sedimentation reading, and many farmers will get this bonus, although the protein premium will add only two or three cents in most cases.

Last year, sedimentation's maximum premiums under the Commodity Credit Corporation were 24 cents.

### NEWS FROM THE FARM BUREAU BY RAYMOND EULER

We are experimenting with various treatments on Arizona Cyprus trees that are in various stages of dying. If they improve appreciably, we will tell you what we did to them. In the meantime, if you wish, you may try what Mr. and Mrs. Bill Buchanan say has saved and revived some of their trees.

The treatment they used is primarily for borers, and it is called Borer Sol. You can either paint it on the lower trunk of the tree, or pour it around the lower part and let it run down.

We are also spraying with copper sulphate for some kind of fungus. We don't know much about these tree troubles, and find that we have lots of company, both among laymen and professionals. The caretaker at the local hospital showed us some trees they have been treating for borers, and apparently that was the trouble, because some of them are making remarkable recovery.

We have now been told by both professional and lay people that a few moth balls around the base of the trees will prevent and kill borers, but that it is a little slower on the kill of existing borers than chemicals prepared for that purpose.

We would like to remind you to file for state and federal non-road used gas tax soon. It seems that several farmers forget this every year, and lose considerable money needlessly.

We would like to say thank you to Congressman Walter Rogers for his vote against increased appropriations for the Area Re-development Act. It is thought that projects authorized under this act could best be handled by the state and local groups, and thus prevent increased deficit spending from the federal budget.

We hope you notice from day to day, as you may cross county lines, the difference in bindweed infestation in Parmer County and adjoining counties.

This, we believe, can be credited almost entirely to the Parmer County Farm Bureau Weed Committee workers and the splendid cooperation they have received from individual farmers and state and county road officials, railroad officials and ASC and county extensions service personnel, and others.

CONSIDER THIS: The fear of the Lord is the beginning of knowledge; but fools despise wisdom and instruction. Proverbs 1:7

## Pecans Expected Plentiful

Pecans should be plentiful once again this fall following a disappointing crop in 1962, says F. R. Brison, Professor of Horticulture at Texas A&M College. Several factors were to blame for the scanty 79,000,000 pounds produced in Texas last year, says Brison. But he predicts that the 1963 yield will again be as large as was the 1961 crop when 240,000,000 pounds were grown.

"The crop looks very promising this year," says the horticulturist. "Shoots are heavily loaded with clusters and many clusters have 4 to 8 pecans in them."

Below average populations of nut casebearers is another reason he gives for the bright pecan crop outlook. These pests have been more effectively controlled due to better spraying programs and better chemicals. Malathion and Sevin were widely used last year and gave good control of casebearers, Brison says.

Producers may receive slightly lower prices for their nuts this fall due to larger yields but the quality of the pecans will also greatly affect the price, he says. The size and number of pecans produced by a tree has a physiological effect on the quality of the pecans it bears, he adds.

The horticulturist explains that the leaf-nut ratio has an influence on both the size and the number of pecans a tree produces. There should be about 11 compound leaves for each pecan on the tree, he says, and the maintenance of a good leaf-nut ratio is an important production practice. Controlling leaf destroying insects will help accomplish this.

Another production practice that is especially important during dry weather is the controlling of competitive vegetation. This may be done in the way commonly used by the producer whether by grazing, mowing or cultivation, Brison says.

Arriving late at his son's fraternity house, the father banged on the door.

"Does Jim Smith live here?" he asked.

"Yeah," came a shout from upstairs, "carry him in."

## At Home In Parmer County

By CRICKET B. TAYLOR County HD Agent

Since arriving in Parmer County to take up the duties of a Home Demonstration Agent, most of the time has been spent getting acquainted with the County Situation and Extension Club Activities.

The first visit made to a Home Demonstration Club member's home was that of Mrs. Davis Gully in the Midway community. A real inspiration it was too.

Mrs. Gully told of her many years as an active Home Demonstration Club member and it was quite obvious that she not only had acquired a great deal of useful information in the management of a home but she applied the information as well.

One outstanding feature about her home that was impressive was the way in which she used a small closet and developed a convenient sewing center. By

having all tools needed for the job conveniently arranged, it not only saved time and energy but made it possible for her to do the job more efficiently, she said.

There is no doubt that Mrs. Gully has applied "work simplification" ideas to other homemaking jobs, as she has time for many other activities in community and county affairs.

The Gully family has a project under way now and that is a combination "fallout shelter and storm cellar", which may also be used for food storage. This seems to be a good idea. We cannot do anything at all about the weather, even though we talk a lot about it, and the cyclones have a way of striking where least expected.

The Gullys hope, as we all do that it will never be needed as a fallout-bomb shelter, but just in case of one, they will soon be prepared and yet the space can well be useful to the home.

It was learned too that James and John, the two sons of the Gullys, are active 4-H club members, even though it means going 17 miles for club meetings. Mrs. Gully feels it is well worth the time and effort.

The warm friendly atmosphere of the Gully home and their interest in home and community life was truly an inspiration to the agent.

Japanese Group Stops In Parmer County While On Tour

Forty-three feed manufacturers, poultry and livestock industry leaders and government officials from Japan made two stops in Parmer County Saturday as part of a tour appraising grain sorghum production, utilization and marketing in the High Plains area.

The notion that massive federal intervention is the only solution to the problem confronting American education has been called "bunk" by Ladd Plumley, President of the Chamber of Commerce of the United States. He pins the same label on ideas that Russia is turning out super-scientists "while our own schoolmasters fumble along with inadequate schools and inept students (and) that everything will be worse tomorrow."

The group visited the A. W. Anthony and Ernest Anthony farm north of Friona and the Sherley-Anderson Grain Company in Bovina as part of its tour itinerary.

At the Anthony farm, the visiting delegation saw cattle being pen-fed on a diet consisting mainly of grain sorghum. At Bovina, they saw an example of the marketing phase of sorghum.

The group had just completed a two-week Feed Nutrition Short Course at Oklahoma State University, under the auspices of the U. S. Feed Grains Council through which Grain Sorghum Producers Association conducts its foreign market development program.

The delegation represented Japanese firms who are expected to buy some 800,000 tons of grain sorghum this year, which will be almost a 50 per cent increase over last year. The Farm and Ranch Council

of the Amarillo Chamber of Commerce joined with GSPA in arrangements for hosting the agriculturists and developing the schedule so that they could learn more of the value of grain sorghum while in the area.

The group started the tour by stopping at the Hereford Feed Yards, then a combination grain production-irrigated pasture-feedlot operation at the Anthony farm, grain grading and storage at the Sherley-Anderson Grain Company in Bovina.

After lunching with farm and business leaders at the Holiday Inn at Clovis, N.M., the delegation toured the new Lucerne Milk Plant, the Swift and Company Packing Plant, and Worley Feed Mills in Clovis before returning to Amarillo.

On Saturday night, the men were guests at the opening session of the Range Riders Rodeo, where they also received special recognition.

Nolan Chandler of GSPA accompanied the group on its tour.

SEEING HOW IT'S DONE... Tadakazu Togari, center, branch manager of Toyohashi Feeds Product Company of Chiba, Japan, is shown how a feed mixture is used for pen-fed cattle on the

Anthony farm north of Friona. On the left is Nolan Chandler of Grain Sorghum Producers Association. At right is A. W. (Dub) Anthony, and in the background is Ernest Anthony.

On The Farm In Parmer County

By DERYL COCKER County Agent

We are finishing harvesting one of the sorriest wheat crops in years. Probably a good bunch of us don't really know why our yields were so poor. It seems the hard winter freezes thinned our stand so drastically, that most wheat didn't have enough plant population. R. J. Mears, Extension Agronomist had the following to say about winter hardness of wheat. "Fields of wheat were winter killed or stands damaged over most of the Panhandle in 1963. It is estimated that at least 31 per cent of the crop was lost. In many instances the variety was of some importance but frequently the soil elevation, (i.e. terraces, lister beds etc.), soil firmness, grazing treatment, time of seeding or time of irrigation had more influence than variety. In some fields Tascosa was injured more than other varieties. This variety has been under test for some 10 years and for most seasons is sufficiently hardy."

For the last several days you could look in any direction and see smoke or wheat stubble being burned off. If you haven't burned your straw, why don't you try to keep it and see if you can work it into a rotation with other crops. The organic matter content of our soil is going down each year and in time we will wish we had saved that straw. Soil that is low in organic matter becomes hard, and is hard to irrigate. Stubble mulching has proved to be worth while and recent study shows that yields have been increased, wind and water erosion slowed down, and water evaporation slowed down. Everybody is having problems with weeds. If you have weeds in your cotton check into the use of Karmes D, L, as a post-emergence spray. It will do a nice job of controlling weeds in cotton and won't cost near as much as hoeing.

\*A female housefly may become a great-grandmother in 60 days, and one housefly may lay 2,500 eggs during a lifetime in three months.

GETTING THE PERSPECTIVE of things during their visit at the Anthony farm north of Friona last Saturday is a portion of the 43 Japanese men who visited the United States studying the grain sorghum industry.

LOOKING THINGS OVER at the Anthony farm near Friona is part of the Japanese delegation which stopped there and in Bovina during a tour of the High Plains last Saturday.

Cattle Raisers Voice Concern Over Proposed Bracero Ban

Directors of the Texas and Southwestern Cattle Raisers Association meeting here last week expressed concern over proposed legislation which would make it difficult to employ farm and ranch laborers, asked that action be taken to insure continued operation of the screwworm eradication program to completion, and urged that every precaution be taken to prevent the entry of Foot and Mouth disease into the United States through the importation of affected carcass meat from any countries not known to be

free from the disease. Outlining possible effects of the veto of \$300,000 from funds appropriated for the screwworm eradication program, the TSCRA board recommended to the trustees of the Southwest Animal Health Research Foundation "that such action as may be necessary be taken immediately to investigate all possible sources of funds and eventualities required to complete eradication." Two resolutions dealing with ranch labor were passed. In one, the TSCRA directors

pointed out that passage of Senate Bill 528 would make employment of farm and ranch labor prohibitive, and that this would further increase unemployment in the United States. The other resolution dealt with three identical bills which would authorize the Secretary of Labor to further regulate methods of recruiting, training, transporting and distributing agricultural workers. The resolution pointed out that it has been clearly demonstrated through the administration of Public Law 78 (the bracero program) that under such authority as granted in Senate Bill 527, the Secretary of Labor will not necessarily develop and maintain improved, voluntary methods of recruiting, training, transporting and distributing agricultural work-

ers. The cattlemen called for defeat of Senate bills 527 and 528. The cattlemen expressed grave concern over efforts being made to expand the types of meat permitted to enter the United States to include uncooked carcasses from countries or areas affected with Foot and Mouth disease. They emphasized that no short term gain should be considered at the risk of endangering the food supply of the American public, and urged all officials to use every precaution to prevent the entry

of the disease. The cattlemen were heartened by a report on legislation affecting beef promotion. Bills authorizing the National Livestock and Meat Board to operate its educational, research and promotion activities through funds obtained by deductions from sale proceeds of livestock passed the House and Senate Agricultural committees unanimously. The bill also passed in the house with a unanimous vote, and quick action in the Senate was forecast.

President Leo Welder of Victoria reported that participation in the Association's rural youth awards program promises a bright future for the cattle industry of Texas, and that committees of working cattlemen are watching a number of developments which could affect the cattle business in the near future. Joe Fletcher of Fort Worth, TSCRA general manager, reported that the Association membership is at an all time high of 12,696.

Range Management Journal In Spanish

Agriculture has taken a new step in international cooperation with the issuing of a Spanish language edition of the Journal of Range Management. The first edition, published at Texas Tech, summarizes 12 months of articles in the English language edition of the Journal, official periodical of the American Society of Range Management. "The Society is making a special effort to make its information available in other languages because we feel this will speed and extend the dissemination of research information in range management," according to Dr. Gerald Thomas, a Society director when the project was started. "We hope other societies will join us in emphasizing this policy." Requests for the edition already have come from ranchers and researchers in Latin American countries, Spain and the Philippines. The edition began almost two years ago in a coffee-shop conversation between Dr. Thaddeus Box of Tech and Dr. Martin

Gonzales, a faculty member at the University of Chihuahua, Mexico, and a Rockefeller Foundation scientist. The following January, the two presented plans for the special edition to Society directors. It was approved, Box and Gonzales were appointed to a committee to publish the first edition. Other committeemen were Dr. Robert S. Campbell, director of the Southern Forest Experiment Station, New Orleans; Dr. Gene F. Payne, range management department head at Montana State College; and Dr. Thomas, Tech agriculture dean. Dr. Gonzales was principal translator and editor for the special edition. Dr. Box completed the editing and worked with the Tech Press in the publishing. Society members compiled and supplied an initial mailing list.

Dr. Thomas said the next Spanish-language edition will be published early in 1964. "We hope to provide key workers in Spanish-speaking countries with continuing access to new ideas and developments in ranching," Dr. Thomas said.

Open up a new comfort world with Electric Heating! Those who have electric comfort heating in their homes... and there are over a million American families enjoying it... are high in their praises. In fact, it's like a whole new world of comfort... a pleasant warmth that lets you feel "just right," not too cold and not too hot. You can enjoy electric comfort heating in your home next winter because your Recommended Reddy Kilowatt Electric Heating Dealer will install complete home winterizing. Now's the time to do it, too! # New Sunflower Strains Resist Turbulent Weather

Sunflowers may be a new crop for the High Plains of Texas within the next three years. Research at the High Plains Research Foundation indicates that a profitable variety will soon be available for commercial production.

Seven hundred and twenty strains from seed selected in the breeding program in 1962 are growing at the Foundation Farm at Halfway. These strains were planted on April 24 and many of them will be ready for harvest in early August. These plants have stood up under adverse weather conditions of wind, hail and hard rain. They are resistant to the ravages of the Sunflower Moth, which has been the scourge of sunflower development in the area in the past.

Scientists at the Foundation are seeking a plant with one head to the stalk; a bent or crook stem which makes it difficult for birds to feed on; and a seed yield from 3,000 to 4,000 pounds to the acre. Most of the desirable strains are 30 to 36 inches which make them easy to combine. The sunflower plant has a low water requirement which makes it fine for the area.

The best sunflower strains have 22 per cent protein and 30 per cent high quality vegetable oil. Sunflower meal or flour contains about 50 per cent protein, is unusually rich in calcium, an excellent source of thiamine or vitamin B1,

and particularly outstanding in its supply of niacin. The meal is also highly digestible.

Barry Love, Assistant Agronomist in charge of sunflower research, is seeking a combine-type variety with desirable chemical qualities.

The market for sunflower seed is for human food, and as a protein feed for cattle, hogs, poultry, and birds. It was used for food by the Indians before

the white man came, and it is an important crop in Russia, South America and Canada. Sunflowers are subsidized in Canada as an oil seed.

Dr. Earl Collister, Director of the Foundation, who has conducted breeding work with sunflowers in Texas for fourteen years, stated that it offers great potential as another cash crop that can be grown in the diversified farming system on the High Plains.

## Department Of Agriculture Gives '63 Cotton Loan Rate

The United States Department of Agriculture has announced the premiums and discounts for cotton qualities eligible for the 1963 Government loan, according to W. K. Palmer, Lubbock Cotton Classing Office.

To be eligible for the 1963 loan cotton must be classed by one of the Agricultural Marketing Service's cotton classing offices.

Mr. Palmer stated that the basis Middling 1 inch remained at 32.39 for the immediate Lubbock area. Most other qualities are 25 cents to 2 dollars per bale lower. This difference was brought about by the widening of prices paid for cotton purchased during the 1962 season.

The new loan rates for some

of the predominate grades and staple lengths as compared to the 1962 loan rates are as follows: Strict Middling 15/16, 31.54 - 31.59; Middling 15/16, 31.14 - 31.14; Strict Low Middling 15/16, 29.74 - 29.94; Strict Middling Light Spotted 15/16, 30.54 - 30.59; Middling Light Spotted 15/16, 29.79 - 29.94; and Strict Low Middling Light Spotted 15/16, 28.54 - 28.94.

Anyone desiring additional information on the 1963 loan rates should contact the Lubbock Cotton Classing Office.

## The HAPPY HOMEMAKER

BY JUNE FLOYD

How long has it been since you have made a tray of fried pies? In recent years nutritionists have discouraged homemakers from serving this treat, which was considered standard desert for a number of years. From a dietitian's standpoint anyone who eats fried pies consumes too much fat.

This point can be partially eliminated if you will bake the pies instead of frying them. And, if there's anything that tastes better than baked dried apple, dried apricot or dried peach pies, it surely is good eating.

Next time you want to serve a special treat, just bake a dozen or two pies made like our mothers and grandmothers used to make fried pies and you are sure to have many calls for a repeat performance.

\*\*\*\*\*

Do any of our readers have a recipe for salad made with drained sauerkraut as a base? If so, I's surely appreciate receiving a copy of it.

Mothers who have difficulty getting any family members to eat enough green vegetables should try the following recipe.

**ASPARAGUS SALAD**  
1 #300 can asparagus  
Lettuce leaves  
Garnish: Pimientos, fresh

green peppers or hard boiled eggs.

Drain the can of asparagus. Salt and pepper. Place into ice-box to chill for one hour. Arrange asparagus on a lettuce leaf, with strips of pimiento laid over four asparagus tips, or use chopped peppers on top with slices of hard boiled eggs. Add a teaspoon of salad dressing, if desired.

\*\*\*\*\*

Another recipe which tempts lagging appetites at this time of year is:

**TANGY BEETS**  
1 #303 can beets, whole, sliced or diced  
1/2 cup vinegar  
1/2 cup water  
4 tablespoons cornstarch  
2 tablespoons sugar  
1/4 teaspoon salt

Mix the vinegar, water, sugar, salt and cornstarch and form a sauce by cooking over medium heat until almost ready to boil. Add the beets and turn the heat low for at least 15 minutes, so that the sauce flavors can penetrate the beets well.

Serves four.

\*\*\*\*\*

Do olives sometimes get old in your refrigerator? If so, try the following method of keeping them fresh. Pour a small amount of olive oil into the olive bottle. The olive oil acts as a seal for the remaining olives and juice and prevents scum from forming over the top.

If you wish to keep canned olives in this manner, transfer them from the can into a glass container before pouring in the olive oil.

\*\*\*\*\*

If left over roast and gravy is a problem at your house, try using it this way:

Fashion left-over roast gravy into a delicious meat pie by cubing the roast into the warmed gravy. Add peas and carrots and top with a can of canned biscuits.

Bake in a greased baking dish in a moderate oven for about 15 minutes. Be sure the meat, gravy and vegetables are warmed before putting into the baking dish, since it only takes the biscuits a short time to rise and become golden brown and ready to eat.

When cutting marshmallows, use scissors rather than a knife and dip the scissors often in a glass of cool water.

\*\*\*\*\*

Frank S. Meyer in National Review says: "Communism... is a power machine whose essence is the drive to world conquest, a drive conducted on all levels but backed always by the threat of ruthless use of armed force and limited by no moral criterion, only by the criterion of probable success. It can be stopped only by force greater than the force of which it disposes."

# Effects Of Fertilizer On Late Cotton Is Discussed

With almost half or approximately one million acres of this year's High Plains cotton crop being planted in June, good management decisions and proper production practices could well mean the difference between a cotton crop or no crop at all for many farmers this fall. One of the major decisions which must be made at this time is whether or not to fertilize and if so when and how much.

Realizing the importance of this problem, the Plains Cotton Growers, Inc. contacted the Extension Service, The Texas Experiment Station, Lubbock, and the High Plains Research Foundation, Halfway for information on this subject which might be helpful to area farmers.

Harvey Walker, Agronomist, TAES #8, stressed that fertilizer cannot be used to gain time or hasten maturity. He further stated that on heavier soils such as those found north of Lubbock, where a good fertilizer program has been followed in previous years and the nutrient level is high, profitable returns from the use of additional fertilizer would be highly unlikely. In the lighter soils south of Lubbock and especially in those areas which have experienced torrential rains, 30 to 50 pounds per acre of Nitrogen could possibly be used to good advantage. Response from the use of Phosphorus is highly doubtful except in cases where the level of this nutrient is known to be low.

In considering the use of additional fertilizer it should be remembered that the plant's highest nutrient requirements come before the first bloom and that fertilizer should be applied before squaring if at all possible. This is especially important in working with a late crop which could run into serious difficulties such as increased vegetative growth and a large percentage of green bolls and immature cotton at frost if certain conditions such as low night temperatures and excess water, are combined with a high nutrient level. The end result would be decreased yields and a high per cent of wasty cotton which carries a discount in the market place and in the government loan.

Delbert Langford, High Plains Research Foundation stated that cotton in the Halfway area and surrounding territory which was planted after June 10 would probably not benefit from the application of additional fertilizer. Earlier planted cotton could possibly benefit from the use of Nitrogen depending on the stage of growth and the nutrient level of the soil. He cautioned however that careful consideration should be given to the growth pattern and size of the plant, along with the planting date.

Under prevailing weather conditions May planted cotton could be well behind the normal stage of development and would not respond as expected to fertilizer. The cotton plant re-

quires time to utilize Nitrogen and benefits derived will depend to a large extent on the amount of time available. Plants which have been stunted by seedling disease and unfavorable growing conditions should therefore be fertilized moderately if at all. Vigorous, healthy plants in an advanced stage of growth will naturally benefit from larger amounts of Nitrogen.

Langford noted the effects of Nitrogen on cotton quality and pointed out that although under favorable growing conditions Nitrogen could improve quality, the reverse would be true under unfavorable growing conditions. He also felt that response from the use of Phosphorus would be highly unlikely at this time.

In summary, the ultimate decision regarding the use of fertilizer must be based upon individual circumstances and conditions. Previous crop history, soil nutrient level, available moisture, stage of growth and condition of the plant, and other factors must be considered. In view of the present crop situation, the importance of this production practice cannot be overemphasized and every farmer is urged to use all the information available along with his own good judgment in arriving at the proper course to follow for the production of a good quality crop. Additional information may be obtained through your local county agent or the Plains Cotton Growers, Inc.

## Farm Bureau Urges Defeat Of Senate Farm Labor Bill

Harry Hamilton, president of the Parmer County Farm Bureau, urged this week that Parmer County residents write their senators, Ralph Yarborough and John Tower, voicing opposition to Senate Bill 527, which is currently in the senate Committee on Labor and Public Welfare.

"This is a bad bill from start to finish," said Hamilton. Known as the Farm Labor Recruitment Act, the major provisions of the bill are:

1. Gives the Secretary of Labor authority to fix minimum wages for farm workers at any level he chooses.
2. Authorizes a compulsory program of recruitment at the discretion of the Secretary of Labor.
3. Gives the Secretary of Labor authority to compel a "closed shop" in agriculture, actually allowing labor unions to come in and take over.
4. Authorizes the Secretary to write labor-management contracts.
5. Gives the Secretary dictatorial powers to decide which prospective employees are willing, able, and qualified workers; to determine that transportation, meals, housing,

insurance, and medical care provided by farmers are adequate; to determine what records will be kept by farmers; to decide what areas need additional workers; to decide when

farmers have violated any provision of the law; and to establish substantial contractual responsibility by farmers with no comparable responsibility by workers.

## Castro County Farm Gets Soybean Test

C. Palmer Norton, member of the Board of Trustees of the High Plains Research Foundation, has arranged for farm centered research on soybeans at the Charles Frye farm at Easter in Castro County. Frye with the assistance of Barry Love, Assistant Agronomist, and Paul Belcher, Laboratory Assistant, will conduct the research program.

Eight experimental strains developed at Halfway will be compared with the Lee and Hill varieties which are adapted to the area. Forty plots of soybeans were planted on the Frye farm on June 11. These are next to paved Farm-Market 1306 just south and west of Easter.

The HINN variety has been certified by the Plant Board of the Texas Department of Ag-

## Texas Business Closely Aligned With Agriculture

It is common knowledge that the number of people on Texas farms and ranches is declining. But it is less commonly known that many of the people leaving the country are not leaving the agricultural industry.

Today nearly 40 per cent of all Texans derive their income wholly or in part from farming and ranching or connected businesses, says John McHaney, economist with the Texas Agricultural Extension Service. These businesses supply the production needs of farmers and process and distribute agricultural products, he adds.

Many agricultural processes

that were once handled on the farm are now performed by these businesses and likewise much labor that was once needed on the farm is used by them. As one example, farmers today purchase most of their power in the form of gasoline and machinery instead of raising animals and feeding them, says McHaney. Therefore, workers that supply these production needs perform a service for the farmer and are partially dependent on him for their living. About 96 per cent of the agricultural production in Texas must pass through the business firms of the state before reaching the final consumer, he points out.

There are many reasons for the growing interdependence of agriculture and business, says McHaney. Some of them are that farming and ranching require a large capital investment, more cash is spent for living expenses and crop production today, and farmers are more dependent on the market place.

Increased efficiency in farm and ranch production has released much labor to the urban areas but much of this labor retains its connection with agriculture. Today's agricultural industry involves more than farming and ranching, the economist concludes.

## Insect Problem Requires Thought, Investigation

Killing crop insects is a lot like a marriage proposal. A little thought beforehand may prevent a pack of grief afterwards.

Fortunately, farmers can learn from their previous errors in insect control and making the same mistake twice can usually be prevented. And the Texas Department of Agriculture entomologists are under pressure now for some quick answers to our pest problems.

The most common error is spraying the right chemical at the wrong time. Application of pesticides too early or too late in the season has two inevitable results--wasted money and an insect damaged crop. This error can be avoided by checking with your county agent or a Texas Department of Agriculture official--plus following the directions of correct application issued by the chemical company.

There are some insects

against which current products on the market offer little defense. The pink bollworm must be controlled primarily by planting and plow up deadlines in Texas. Late planting cuts down the time for a destructive buildup of the bollworm population and a good, early cleanup of the stalks in the field destroys the winter nesting place.

The grasshopper is an annual visitor to Texas crops and can be dealt with effectively most of the time. But some seasons, he gets completely out of hand and emergency measures are necessary. The more we can learn about the causes of the rise and fall in numbers of the grasshopper, the better we can forecast and prevent these epidemics and the resultant dam-

age. It is essential that our techniques of survey and identification be rapid, certain, and inexpensive.

This year, keep in touch with the federal and state agricultural people in your area when planning your insect control program. Their recommendations and advice may save you much time, money and effort.

# Of Interest To THE WOMEN

## Pre-Nuptial Courtesy Fetes Miss Bradshaw

Miss Dyalitha Bradshaw, bride-elect of Larry De Fever, was honored with a pre-nuptial courtesy Thursday afternoon at First Baptist Church Fellowship hall.

Mrs. Troy Christian presided at the guest registry. Gracing the table was an arrangement of yellow and white rosebuds in a crystal vase.

Greeting and receiving guests were the honoree, her mother, Mrs. H. D. Bradshaw and her grandmother, Mrs. J. T. Hulsey of Farwell, Mrs. Dolph Moten and Mrs. Glenden Sudderth.

Miss Elaine Fuller and Mrs. Bobby England provided piano selections.

The refreshment table was laid with an ecru lace cloth over yellow, the bride's chosen colors, and centered with an artificial arrangement of yellow roses behind which a miniature bride was placed. Refreshments of cake decorated with wedding rings, lemonade and nuts were served by Mrs. Wallace Rogers and Mrs. A. L. Glasscock.

The honoree presented each hostess with a sachet hat.

Approximately 25 guests called at the come and go occasion.

Hostesses were Mmes. A. L. Glasscock, Ovid Lawlis, Earl Ware, Earl Stevenson, Reagan Looney, F. O. Turner, J. E.

Ownes, Glenden Sudderth, Wallace Rogers, Travis Lloyd, Jesse Walling and Dolph Moten.

## Visit Parents

Mr. and Mrs. Don Sides visited his parents, Mr. and Mrs. H. H. Sides of Lubbock over the weekend. His father underwent surgery Monday morning at Methodist Hospital in Lubbock.

## Local

Mrs. Neal Mager is visiting in the home of her mother and sister, Mrs. J. Sam Gaines and Mrs. Lady Armstrong, Mrs. Mager is from Hackensack, N.J.

## Mrs. Murphy New Prexy

Mrs. Don Murphy was elected president of W.M.U., Tuesday morning at a meeting at First Baptist Church.

Other officers elected were Mrs. Keith Garner, vice-president; Mrs. A. D. Cumpton, recording secretary; Mrs. Charles Embry, corresponding secretary; Mrs. Cumpton, publicity chairman, Mrs. Ovid Lawlis, program chairman; Mrs. Wendol Garner, prayer chairman; Mrs. Embry, community missions; Mrs. John Ferguson, mission study; and Mrs. W. W. Wilcox, stewardship chairman.

During the business session the group also voted to change their meeting time to 2:30 p.m. Tuesday afternoon instead of Tuesday morning.

## Housewarming Honors Edens

Mr. and Mrs. Robert Edens were honored with a come and go housewarming and reception Saturday afternoon at their remodeled home.

Refreshments of white cake decorated with red roses, coffee and iced tea were served to hostesses.

Hosting the courtesy were Mrs. Ralph Straw and Mrs. Bob Edens.

Calling during the afternoon were Mrs. Vernon Ward, Mrs. Frank Hastings, Mrs. Lester Williams and daughter, Francis, Mrs. L. D. Knight of Hub, Mrs. Shirley Adams, Mrs. George Straskulic and Mrs. Fred Batterman of Dimmitt, Mr. and Mrs. Jess Stowers, Mrs. Lottie Riley, Mrs. Herman Estes, Mrs. Joe Wilson, Mrs. Paul Jones, Mrs. Lady Armstrong, Mrs. F. O. Turner, Mrs. John Sikes, Mrs. Pete Davies, Mr. and Mrs. J. V. Bouldin, Mr. and Mrs. L. M. Alexander of Olton, Mrs. Hodge Rigdon, Mrs. Reagan Looney, Mrs. Pearl Boatman, Mrs. Joe Bell and Mrs. F. F. Pritchard of Friona.

## Circle Honors

### Mrs. J. B. Jones

Mrs. Joe Bob Jones was honored with a lullaby shower, Tuesday morning at Bovina Methodist Church.

Hosting the courtesy were Mrs. Vernon Willard and Mrs. Glenden Sudderth.

Preceding the shower, Mrs. Jimmy Clements presented circle program, titled, "God Never Turns His Back."

Attending were Mrs. Jimmy Ware, Mrs. Ted Tipps, Mrs. Ralph Roming, Mrs. Jimmy Clements, Mrs. Sudderth and Mrs. Willard.

Sending gifts but unable to attend were Mrs. Leon Ware and Mrs. Oakley Stevenson.

## Fermon Kelso At ROTC Camp

Cadet Harold F. Kelso of West Texas State College, son of Mr. and Mrs. H. H. Kelso of Bovina is one of 1891 Reserve Officer Training Corps cadet attending summer camp at Fort Sill, Okla.

The camp began June 15 and will continue through July -- six weeks.

## Shower Fetes Miss Steelman

Miss Vivalliah Steelman, bride elect of Gene Hutto, was honored with a come and go bridal shower Tuesday afternoon at the home of Mrs. Connie O'Brien.

Receiving guests were the honoree, her mother, Mrs. A. E. Steelman, the groom's mother, Mrs. D. W. Hutto of Tulsa and the bride's grandmothers, Mrs. J. R. Glover and Mrs. J. H. Steelman.

Miss Carole Jean Hastings presided at the guest book. Miss Elaine Fuller played selections on the piano.

The serving table carried out the brides chosen colors of apricot and white. A white linen cloth covered the table in which an arrangement of apricot and white cut flowers were centered. Refreshments of cake, apricot punch, nuts and mints were served to guests by Misses Vicki Strawn and Dixi Hartzog.

## Dinner Honors

### Mrs. Armstrong

Mrs. Lady Armstrong was honored with a birthday dinner Sunday at the home of her son and family, Mr. and Mrs. S. A. Barbee, Jr.

Following lunch the group had homemade ice cream and birthday cake.

Attending the celebration were the honoree, her mother, Mrs. J. Sam Gaines; her sister, Mrs. Neal Mager of Hackensack, N.J.; her brother and wife, Mr. and Mrs. Herbert Gaines, and A. E. Taylor from New Kirk, N.M.; Mrs. Mel Gunn, Mrs. J. R. Caldwell and her granddaughters, Shella and Rhonda Barbee.

## Attend Workshop

Mrs. Joe Pinner and Mrs. Mark Charles attended a writers workshop in Portales last week at Eastern New Mexico University.

The course was taught by Colonel Wilferd McCormick, author of several books.

The names of the parties to the nature of this suit is as follows, to wit:  
Suit in trespass to try title to: All of the Northeast 33 feet 10 inches of Lot 2, Block 36, of the Original Town of Bovina, Parmer County, Texas, described by metes and bounds, as follows:

BEGINNING at an iron rod set for the most Westerly corner of Lot 2, Block 36, said Original Town of Bovina, Parmer County, Texas;  
THENCE South 39 deg 17 min East along the boundary line between Lot 2 and Third Street, 33 feet 10 inches to the most Westerly corner of a tract of land heretofore conveyed to J. T. Jones;  
THENCE North 50 deg 43 min East, 140 feet along the Jones line to an iron pin, the most Easterly corner of this tract;  
THENCE North 39 deg 17 min West, along the boundary line between Lot 2 and the alleyway through said block, 33 feet 10 inches to the most Northerly corner of Lot 2;  
THENCE South 50 deg 43 min West along the boundary line between Lot 2 and Avenue C, 140 feet to the place of beginning, Plaintiffs alleging that they are the owners in fee simple of said real property and that the Defendants have unlawfully entered thereon and ejected them therefrom and, in the alternative, pleading the 5-year statute of limitations insofar as same applies to land titles in the State of Texas, and asking for judgment for title to and possession of said land, and for writ of restitution, as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.  
The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.  
Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this the 11th day of June A.D. 1963.

Attest:  
Dorothy Quicfel Clerk,  
District Court,  
Parmer County, Texas.  
(SEAL) 51-4tc

## Father Buried Wed. At Nocona

Walter Reagan, 73, father of Mrs. Billy Whitecotton, was buried Wednesday at Nocona. He passed away recently after a lengthy illness. Survivors include his wife, Myrtle, two daughters, Mrs. P. J. Thomas of Naylor, Mo. and Mrs. Whitecotton of Bovina, five grandchildren and one great grandchild.

hand and the Seal of said Court, at office in Farwell, Texas, this the 20 day of June A.D. 1963.

**SAVE 10% with GULF**  
LP Gas  
**WARRENGAS**

**Save up to 10% OR MORE... on tractor fuel and upkeep costs**

**REDUCE TOTAL TRACTOR COSTS.** Save money with Gulf-Warregas® fuel over diesel, the so-called economy fuel—and over gasoline, too. Consider all costs.

**SLASH REPAIR AND UPKEEP COSTS.** Cut these costs about one-third with Gulf-Warregas, compared with gasoline engines. Save more than \$100 a year for 1000 hours of use with a 4-plow tractor.

**FEWER OIL AND FILTER CHANGES.** You go three times as long as diesels and one and one half times as long as gasoline engines between changes. Spark plugs last longer—no foul-up due to fuel residues.

Gulf-Warregas® is the LP-Gas member of the Gulf family of quality petroleum products.

OUR PROMISE! You'll have better living and better farming with Gulf-Warregas.
