Reports are coming in from many sections of the state, telling of the appearance of the Cotton-leaf Worm or the "army worm. It is probable that this pëst will prove serious in some of these sections. The following suggestions for the control of the pest are taken from the recomendations of the State Entomologist of the A & M College, College Station, Texas. Paris Green is not a good poison to use as it will seriously burn the foliage of the cotton and reduce the yield. It will also blister people and animals that come in contact with it. London purple and white arsenic should never be used as a spray for cotton. The best material to use in the control of the army worm is powdered arsenate of lead, as a dust spray. This is best applied by suspending two sacks from the end of a pole which is carried on horseback down the cotton rows. The amount to be applied depends upon the size of the cotton, usually from two to five pounds per acre. This poison should not be diluted with any meterial. It is not adviseable to use a liquid spray in controll ing a cotton pest. The fight upon this pest should not be delayed.

F. B. Paddock, Asst. State Entomologist.

"I Don't Like to Admit It, But I Have To."

Said a business man the other day. "I always had an idea that a business college training did not amount to much; that I could take beys and girls into my office, and make them over for my purposes a great deal better than you could, and I have held to this idea pretty firmly for a long time.

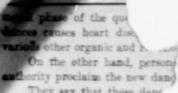

"I have changed my mind since I had that young man from your school recently. He stepped into my office, and was able to pick up the details of the work in two or three days, and could do more then than even my selftrained boys have been able to do in three years."

"You may keep me on your list for promising young men." The above is similar to many letters and conversations which Mrs. W. J. Hardy of Goodnight come to us every month. The

That kind of thing is all very well for the young people whose parents and friends can afford it. .

What about their feelings when they have to show themselves to the public in father had lifted the original Catfieb Art and Buddhism and true Symbolism less elaborate and expensive dresses than the others? What about those whose friends have no money for American Beauty roses to send them?

I firmly believe that nothing is so undemocratic as to bring forward in this way the differences between the two groups of pupils. Is anything more likely to inspire class distinctions?

And in the place of all places where such distinctions ought to be most severely avoided?

How many young girls have entered matrimony knowing Captain's Table. He had rolled them nothing about the health of their husbands? How many diseased or deformed children have been born and cared for every year?

If children were properly taught in the home much said along these lines could be avoided. Too much false modesty has been a fault of women in the past and through it some have been made to suffer. Never has there been a time when women were better fitted for the rearing of a family than they are today.

With the passing out of the good old-fashioned mother comes the modern scientific woman and for the sake of a future generation we can be thankful.

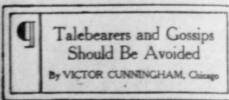

mistakes which are of daily occurrence is simply that people are in the wrong places. If they were somewhere else they might do very creditably, but in their present positions they are misfits. People frequently do not know what

they are capable of. They either minimize their ability or overestimate it, and in consequence they are content with inadequate opportunities, or else they are attempting more than they are equipped to handle. Spiritual mistakes go the same way. There are underestimates and

overestimates in religious life. Some declare they are not good enough to be Christians, while others are eager to make an impression with their sanctity. In either case what they produce is likely to be a mistake. God has given every one some sort of spiritual ability and the apostle reminds us that we are to use it conscientiously "as every man hath received." That involves two things-confidence and patience. We must be sure

that God has some mission for us to perform, whether great or small. We must also have patience to perform it and leave the results with him. Christ said, "Be not anxious." Live up to the best of your spiritual ability and let God attend to the rest,

HOME TRADE BOLL

Paying the Fiddler

E ALL realize that when there is dancing going on, whether it be the new-fangled tango or the old-fashioned polka or waltz-some one must pay the fiddler.

We cannot have music without paying for it, nor can we have much of anything in this world without paying for it.

If we expect any person to do something for us, we expect, naturally, to do something in exchange for such favors as we receive. If we accept favors, but evade the responsibility of making any returns for them it will not be long before we discover that the unpaid for favors become curtailed.

Probably we become provoked, after the favors have stopped, and acknowledge our own stupidity. It is generally too late when we wake up and then it is merely the old story over again-of locking the door after the horse has been stolen.

Many of us in this community devote more or less of our thee to the raising of produce of various kinds. We have vegetables, butter, eggs, milk, etc., to sell

We find it a convenience to sell such products in the local stores. Some of our business men buy up the small quantities, as well as the larger lots, and ship all together to the more central markets.

This racility for disposing of such articles is a great convenience to us. If the local storekeepers did not buy our produce it would be difficult for us Wind cuts like a Chisel and the to find a market. In fact, there would be no market for small quantities except at ruinous prices.

Therefore we are favored, to a very considerable extent, by the fact that our local storekeeper stands ready to buy from us. This places us under certain obligations. The local storekeepers are entitled to some consideration from us in return.

HOW MANY OF US APPRECIATE AND ACKNOWLEDGE THIS FACT? How prany of us think of this when we have some cash to spend? How many of us consider that the local storekeeper is entitled to our trade and that we are morally bound to consider him as the proper repository for our

orders and the recipient of our trade? It is recrettable that many of us must plead guilty to an entire forgetfulness of any feeling of obligation. Therefore, we send our orders, with the cash, to the mail order houses, to whom we owe nothing.

We are enticed by cleverly written advertisements and neatly worded descriptions of goods and merchandise so that we deceive ourselves into belleving them to be true. We forget the local storekeeper and his favors; we forget that he is a benefit to the community and to every individual in the community; we forget that he is affording us an opportunity to dispose of our produce—that he has his money invested in a stock of merchandise that he has selected because he believed we would need such articles and would wish to buy them at home.

Every dollar we send away from home to the mail order houses brings us closer to the limitations of our local opportunities. Every dollar diverted from local trade adds to the restrictions of our trade facilities at home so that we are not only permitting, but we are inviting, our local merchants to close up shop and go out of business; or to move to some community where their efforts will be more appreciated.

By our lack of appreciation we are urging our local storekeepers to re-strict their efforts to carrying only the lines of merchandise that are the most profitable for them and to cut out all goods that we can buy in the city. We are actually inviting disaster.

LET US AWAKEN TO A REALIZATION OF THE CONDITIONS WHICH CONFRONT US. LET US PLACE SOME LIMITATIONS ON OUR DISRE-GARD FOR EXISTING CONDITIONS AND LOOK INTO THE FUTURE.

We can see what the consequences must be if we fail to do our share toward supporting the establishments of our business men in town, for the handwriting is written plainly on the wall.

Shall we read the writing and profit by the message or shall we continue to dance merrily and foolishly on until the time shall come when we must pay? And how shall we pay?

There will be only one way to pay and that will be with much more than the profit we shall have derived from our dealings with the mail order houses. WE WILL PAY DEARLY UNLESS WE AWAKEN TO A FULL SENSE OF OUR RESPONSIBILITIES, AND AT ONCE.

We wish to dance, but let us change the tune or the fiddler

GETTING OUR MONEY'S WORTH

When we buy merchandise from our local storekeepers we examine everything with the utmost care, we test for strength and look for quality. We discuss with the merchant the desirability and value of everything and after we shall have decided that we will effect a purchase we are convinced that we have obtained full value and that we can depend on our purchase as being what we want.

Then, again if for any reason we have reason to be dissatisfied with that which we have bought we can talk it over with our merchant and any discrepancy will be readily adjusted.

This is the principle of all good business. The buyer meets the seller face to face and examines the goods before closing the deal. The so responsible for his representations and the buyer can always find him as

adjust any differences which may occur. On the other hand there is the mail order method. We receive a book from the mail order house, illustrated with expensive

pictures of various articles. The descriptions of these articles are always optimistic and gloriously pleasing. Our minds are impressed by the charmcape something usually find Something ing wording of the descriptions and the selection of adjectives creates in our minds a desire to possess these wonderful things.

All sorts of promises are made in the book, or catalog. We will be accorded the greatest possible consideration, we will be allowed all kinds of privileges; we can return the goods at the expense of the house if not satisfactory; shipments will be made with promptness and despatch; any damages in shipping will be adjusted at once; "Our Mr. So-and-So will give your orders his personal attention," etc. We are flattered and cajoled by the clever wording of the catalogue and

the statements made in the "fake" personal letters sent to follow up the catalogue. We are touched in that tiny spot of vanity which, though small, seems to be everywhere and to respond to the slightest touch. We are allured by the prospect of obtaining such magnificent and desir-

able articles at such remarkably low (?) prices and we are flattered by the statement that Mr. So-and-So will give our order personal attention.

We begin to believe ourselves to be "some punkins" and we are inclined swell up and look askance at our less fortunate townsmen who have not been singled out for such distinction as a letter, signed in person by Mr. So-and-So.

Therefore, we decide that we will send an order for something. We forget that we can go into the store of our own local So-and-So, whom we know and to whom we are perhaps responsible for past favors. But it is easy to forget all this in the happiness and exultation of having been singled out by the great mail order "boss" as a desirable person with whom to do business. John Vallant, a rich society favorite, suddenly discovers that the Vallant corporation, which his father founded and which was the principal source of his wealth, has failed. He voluntarily turns over his private fortune to the receiver for the corporation. His entire remaining possessions consist of an old motor car, a white bull dog and Damory court, a neglected estate in Virginia. On the way to Damory court he meets Shirley Dandridge, an auburn-haired beauty, and decides that he is going to like Virginia immensely. Shirley's mother, Mrs. Dandridge, and Major Bristow exchange remridge, an auburn-haired beauty, and decides that he is going to like Virginia immensely. Shirley's mother, Mrs. Dandridge, and Major Bristow exchange reminiscences during which it is revealed that the major, Valiant's father, and a man named Sassoon were rivals for the hand of Mrs. Dandridge in her youth. Sassoon and Valiant fought a duel on her account in which the former was killed. Valiant finds Damory court overgrown with weeds and creepers and decides to rehabilitate the place. Valiant saves Shirley from the bite of a snake, which bites him. Knowing the deadliness of the bite, Shirley sucks the poison from the wound and saves his life. Valiant learns for the first time that his father left Virginia on account of a duel in which Doctor Southall and Major Bristow acted as his father's seconds. Valiant and Shirley become good friends. Mrs. Dandridge faints when she meets Valiant for the first time. Valiant discovers that he has a fortune in oid wainut trees. The yearly tournament, a survival of the jousting of feudal times, is held at Damory court. At the last moment Valiant takes the place of one of the knights, who is sick, and enters the lists.

Where the Red Road stretched level before them, he threw the throttle open for a long rush through the thymy-scented air. The light, late afternoon breeze drew by them, sweeping back Katharine's graceful sinuous veil and spraying them with odors of clover and sunny fruit. They passed orchard clumps bending with young apples, boundless aisles of green. young-tasseled corn and shadowy groves that smelled of fern and sassafras, opening out into more sunlighted vistas overarched by the intense penetrable of the June sky.

John Valiant had never seemed to her so wholly good to see, with his the pink-and-yellow of those grain fields fades into the purple of the hills. Very few painters have ever captured a tint like that. It's like raspberries crushed in curdled milk."

"I've quite lost my heart to it all," she said, her voice jolting with the speed of their course. "It's a perfect pastoral . . so different from our terrific city pace. * . . course it must be a trifle dull at times • • seeing the same people always • • and without the theater and the opera and the whirl about one-but . . the kind of life one reads about . . in the novels of the South, you know . . . The expression, a "two-story bungalow"-which we often hear-is a misnemer. Properly speaking, a bungalow is but one story high, and is covered with a roof having very little pitch to it. But we are always improving things. It would be utterly impossible for the bungalow to travel across the continent from California as far east as Chicago without receiving the inventive attentions of the western sons of our "Down-East" Yankee ancestors.

Another feature in this little house, that is quite new, is the stairway built around the big chimney. It not only looks well from the large living room, but it occupies the least important corner of the house; and it lands you upstairs in the middle of the hall, in close proximity to the doors leading into the different rooms. Under this stair are the steps leading to the cellar, so that space is economized to the best advantage.

How Parnell Left the World. Among the curious characteristics of Parnell as a leading statesman was his film which gave some scenes from the capacity for avoiding publicity. It is not only that he disappeared for weeks and months. But he evidently achieved the habit in early years of cutting himself off at will from the outside world. At the first meeting with Mrs. O'Shea in Palace Yard he confessed that he had not answered her invitation to dinner because "he had not opened his letters for days." There are probably men who, like

myself have achieved the art of now and then cutting off communications. Telephones, telegrams, letters will pour in upon you if you let them. But recommend the Parnellite method. DUKE IN MOVING PICTURES

Titled Englishman Takes Part in In portant Scene in "The Million-Dollar Mystery."

The duke of Manchester has gone into pictures. England's titled son appeared in a scene of "The Million Dollar Mystery" at a studio a short time ago. It was the distinguished foreigner's first view of motion picture making. He likes it. Charles J. Hite, president of the company, escorted him through the studio. Biblical Films Barred in Prussia-There must be no biblical films in Prussia, according to a ruling of the highest administrative court of the kingdom. The Berlin police president had prohibited the production of a life and sufferings of Christ. The court sustained the action of the police on the ground that the Christian religion is a part of the public order which the police are bound to uphold. The court also held that such a film grossly wounds the sensibilities of religious people, particularly in view of the fact that it is given along with light and humorous productions.

Miss Anderson silently cautioned those present to remain perfectly quiet. They did. And to their astonishment, "Mozart' slowly but surely, and with a true sense of musical accuracy, played the opening strains of "This Is the Life," whereupon all who heard declared he couldn't be a very nice monkey.

Farnum Saves Life of Lady. Dustin Farnum, long a hero on the

egitimate stage, enrolled himself as a real (also reel) hero at Escondido. Cal., when he saved the life of Winifred Kingston, his leading woman. Miss Kingston was participating in the making of the photoplay, "The Virginian," when she missed her footing and fell into a river at a point where the water ran to a depth of twelve feet. In the fall she struck her head against a piece of driftwood and was stunned. Farnum, who was only a few feet away, hastily cast off his coat and plunged into the water, swimming to shore with the actress upon his back.

A great crowd of onlookers had gathered to see the picture players at work, and wild cheers greeted the eading man's act of heroism. It is doubtful if Farnum ever received a bigger "hand" in all his career as a natinee idol

Paragraph on Film Footage.

The vast extent of the motion picture industry may be surmised by the amount of Vitagraph film used. The weekly output of this company's plant is about ten reels, each reel averaging 1,000 feet in length. America uses about 60 copies of each picture, while the European Vitagraph plant, located in Paris, France, makes more than 250 opies of each picture. This Parisian plant supplies the entire world excepting the United States and Canada Computation shows that in all more than three million feet of film is used weekly by this one concern. In one year it uses enough film to extend around the world.-Popular Electricity.

NOW IN ORDER.

Little Economy That Was Popular a Generation Ago Might Well Be Copied Now That Prices Are Somewhat High.

The rhubarb does not thrive in the warm climates, but seems specially designed by nature to fill a long-felt want in the cold North, where winter stretches out a wearisome length of days, and this first home-grown green fruit is welcomed with much gladness. Although it is known as pie plant more generally than rhubarb among the country folk of the North, its use is not confined to pie-making. Its agreeable and healthful acid juice makes it fine fruit for sauces, jellies and ices, as well as hot desserts and pies, although it has no relation to the fruit aristocracy, is not even a distant cousin except by courtesy and custom. It cannot rank with green vegetable leaves, shoots or stalks, its chief value being the acid flower of its juice when young, the stalks cooked to a soft pulp, so that without the addition of water you have a sauce of just the right consistency. For most tastes a large amount of sugar is required to make it quite palatable. Much less sugar will be required if the rhubarb is scalded after cutting it up, and previous to cooking. This was one of our foremothers' little economies that seems to have been forgotten. Some idea of the extent of the pie-plant belt may be gained from the list of recipes our friends have sent us from the bleak New England coast to "where rolls the Oregon." From these we se lect a number that were "recipes mother and mother's mother used."

Aunt Juliet's Rhubarb Pie .- Doubtless, if you are a pie baker you have a good recipe for a plain good crust. Peel some garden rhubarb or ple plant and cut in small pieces. After lining a pie plate with the pastry, fill with layers of rhubarb and sugar, and if a emon is available use the grated yel low rind for flavoring. Cover the pie, wetting the edges of pastry to make it adhere. Make several cuts in the top crust and bake in a moderate oven until the bottom and top are nicely browned. If the bottom cooks faster than the top, put a second plate under it. When pie is done dust top with powdered sugar.

Cream Rhubarb Pie.-One cupful of rhubarb peeled and chopped fine; one cupful of sugar, grated peel of lemon. Moisten a tablespoonful of cornstarch with cold water; then fill the cup up with boiling water and add to the rhu Add well beaten yolks of three eggs. Bake in an under crust and when done and cold cover with a meringue made of whites of the eggs, and half a cupful of powdered sugar. Place in the even just long enough to brown delicately. This is very fine.

Rhubarb Cobbler .- Measure two cupfuls of sifted flour: add two teaspoonfuls of baking powder and half a teaspoonful of salt, and mix well. Rub in two tablesponfuls of butter. Beat an egg very light and stir into threequarters of a cupful of milk. Mix the flour making rather a soft dough. Line sides of a baking dish or oblong shallow pan with the crust. Take a quart of the chopped rhubarb, sweetened with three cupfuls of sugar and fill the pudding dish. Roll out the remaining crust, cover the top of the dish and bake half an hour.

Rhubarb Lemon Ple.-One cupful of stewed rhubarb, one cupful of sugar. one lemon, a little ginger and three eggs. Mix ingredients together leaving out one egg white to be used for a meringue to cover ple when done.

Business men about to start on their summer vacations are advised to read dime novels, smoke cornsilk cigarettes and act like "kids" again, by Dr. Louis R. Welsmiller, physical director of the West side Y. M. C. A. of New York. His prescription for the rejuvenation of business-worn members of the association has been posted all over the association's building. It reads:

"Forget your dignity, throw away your staidness, and be a kid againa wholesome, fun-loving, boisterous, dime-novel reading kid-during your vacation. Many of you men, when youngsters, used to think it great fun to sneak out behind the barn, with a cigarette made of cornsilk and brown wrapping paper. It won't hurt you to try the same thing again. You won't be able to smoke enough to hurt yourself, and there's no danger of con-

tracting the cornsilk habit. "Dime novels make good summer reading. They are next to the Bible for vacation reading, but take the Bible along, of course. Many great men read Nick Carter, Jesse James and like writings for relaxation. Most of you men have come to New York and have made good. Help yourselves to make good again next winter by being a boy on your vacation.

Artificial Wood From Straw. Information has been made public in Lyons, France, concerning an artificial wood which, it is stated, will be of great value as a substitute for natural wood. The new product has been found, after years of study and practical experiments, the most recent of which have given eminently satisfactory results.

The process consists in transforming straw into a solid material having the resistance of oak. The straw, after being cut into small pieces, is reduced to a paste by boiling, to which certain chemicals are added. When the pasts has been reduced to a homogeneous mass it is put into presses, and planks, beams, laths and moldings of all sizes are readily made. This new material can be sawed like natural wood. As a fuel it emits a bright flames and little smoke. It is further stated to be adaptable to the manufacture of match
