PANHANDLE FAIR AND EXPOSITION

The Panhandle Fair and Exposition association herewith make the announcement that Oct. 9th and 10th will be our Fair dates.

Never before in the history of our association have we made such preparation for your enter tainment and elevation. We have endeavored to make this strictly in agricultural and stock exhibition. As you will note from the catalogue just issued, we have given liberal cash premiums upon all the leading farm products and livestock to be found in the country. In addition to to the cash prizes given by the associatioe, the business men have supplemented same with liberal merchandise prizes, ranging in value from one to ffteen dollars.

Also notice that no charges are made for entries or stall rent. We want everyone to understand that the only charge made for anything is admission to the grounds.

Now, in conclusion, we have done our part and it's now up to

you to do yours. First, we must have the pro-

ducts to show. presence and support.

This is your Fair as well as ours. Let no one say "They" are the Panhandle. We have the family Sunday. products in the country if you will just bring them in. We have just prepared a place to store them and will take care of

what you bring in from now on. nation about catalog that you sippi. don't understand, call on J. T. Patman, secretary, who will give you any assistance possible, supply you with entry blanks, receive entries, etc.-Clarendon News.

A good rain came last Friday. We get one every few days.

GOOD SAMARIATANS

The neighbors of T. F. Hefner showed they were neighbors in the true sense last week by all going to his field and gathering his feed. Mr. Hefner's boy has been sick with fever several weeks, requiring a great deal of his attention at the bedside. Life PHILATHEAS ENTERTAINED is worth living in a community of good neighbors.

A Few Comments (n

Old Lady Fighting has been fiercest on the Number 31

French Take Village.

Around Rheims itself matters have een about equalized, as the Germans

"Distinguished for a tenderness of sentiment that warms the heart, and a kind of homely humor of situation and phrase that keeps one smiling in every chapter."

—Vogue, New York.

Every line of the narrative is replete with "Blended homely pathos and senting and they awalt in the trenches until army opposes them, while the Gertheir adversaries are so close that a mans have retired beyond the frontier quick dash brings them together.

I Lordon—One of the flarcest battles Galicia differ and one goes so far as "It is altogether one of the most originand attractive stories it has been our g fortune to read in a long time"-Allees, New York.

"The narrative is that of life at the five, and, of the happiness brought by unexpected affluence. A little gem, and deserves wide reading." — Plaindauler, Cleveland, O.

You Can't Afford to Miss It

crets where we can see syn ference what occurs, we may he will not be a talebearer of licks one's hands. He may stan

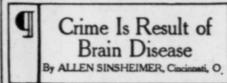

that you too was like a man without a country and had to travel hit.

the middle of the night when many people are protecting "shooting irons," with the possibility of mistaking a member of the fast ily for a burglar, the watchful dog guards you from all harm. He w defend you from all intruders, or give a bark that will startle the neigh

When you speak to him in the night, "thump-thump-thump-thumpthump," comes back the answer, as his tail strikes the floor. You shout back "Keep still!" and "thump-thump" comes back another message with possibly a yawn thrown in, as much as to say, "One o'clock and all is well." You then turn over and sleep like a baby, feeling absolutely secure until the dawn of day.

In the streets one sees two men on each side of a boxed-up wagon, with looped wires in their hands ready to hook the first unlicensed dog they see. As one of these men starts after a thirsty, half-starved cur, which is unable to run fast, with that spirit of American liberty that flows in one's veins, one hopes deep in his heart that the poor brute has strength enough to make his "getaway." But, no, he is looped and he lets out a short yelp as he is thrown in with the other jailbirds to be tried, convicted and shot without a jury trial, unless some one appears to take his part, buy him a license to live, pay his back board and take him home.

If one does this, but fails to give him good cold water to drink whenever he wants it and necessary nourishment, it were better that he had been left where he was. It behooves every person who owns a dog to give him the necessary care to avoid the terrible rabies. There is untold satisfaction in caring for the dumb as well as for those who can speak.

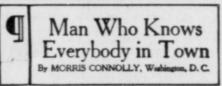

Disease or imperfection

There is no cause without an effect. Is a "moral defect" a lack of net, the wide velvet girdle, the very conscience? Conscience is different in every one. A pickpocket's son skirt, bordered with embroidered net, trained in the steps of his father has no qualms of conscience when steal not omitting the pumps of dull kid might easily be serviceable at other ing and may be very conscientious in other respects.

No white man's conscience would allow him to scalp a man, while an Indian has no conscience while doing that act.

It is my belief that crime is a result of disease of the brain and may be due to the organization of the brain in the man whose brain was so or original. ganized at birth or to hereditary traits or environment.

I regard my soul as a purely physiological function and as material as my stomach or heart, and I therefore hold to the belief that crime is a disease of the brain, and that as no man's will is free no man can be said to merit punishment for committing a crime. At the same time I concede that many a criminal's diseased mind can be cured by proper saching, whereas, in other cases, while the criminal should be kept out of the community for the benefit of the community, he should not be punished for committing an act effected by a cause.

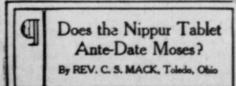

Did you ever meet the man who knows everybody he sees and is continually shaking hands

I know a fellow out in Iowa who never fails to ask who a person is if he

happens not to know him. He prides himself on his wide acquaintanceship. If he sees a man he doesn't know, he makes it his business immediately to find out who the man is, and it doesn't take bong for him to get acquainted. The fellow is absolutely obsessed with the idea of knowing everybody. You've seen the type? Once introduced a man, the next time he sees that man he greets him as a lifelong friend. Of course, such men have a marvelous memory for faces and names. It's too bad all of us who have to campaign can't keep a mental index of every person we

One time not so long ago I was visiting Denver with some friends. who were likewise friends of the man of whom I speak. It's true, the fellow knew a lot of people in Denver. For a joke we telegraphed him that we had scoured Denver and were surprised to find there were two persons in the city who were unacquainted with him. "Please wire an explanation," we requested.

Our friend was right there with an answer. He admitted there might be a few persons in Denver who didn't know him by his right name, but suggested that at times he traveled under an alias, and while perhaps the men who disclaimed acquaintance with him didn't know him by name. they undoubtedly knew him by one of his aliases.

There are appearing in the press comments upon the Nippur tablet now being translated, said to antedate Moses by 1,300 years and to contain such accounts of the creation and

the fall of man as show that Moses was not the author of the record credited to him. Swedenborg says that there was a Bible before the one we have—that from it Moses copied the first seven chapters of Genesis and most of chapters eight to twelve. He says that three books named and tonholed scallops quoted in our Bible (Num. 21:14, 15, 27-30; Josh. 10:12, 13; Sam. 1:17. 18) were books in that more ancient Bible.

He says ideas from that Bible were widely disseminated in Asia and the East-that they became embodied in myths and gradually spread to Greece and Rome; that there are points of resemblance between the various ethnic religions is due to the fact that each of these religions derived truths some more directly, some less so-from that more ancient Bible.

Swedenborg says that the people who had that Bible were not expected to understand it literally, but that they understood the symbolism in a cordance with which it was written-s symbolism not artificial but natur-

Lingerie Favored for Summer Wear

sheerest of batiste or nainsook or cross-barred muslins, linen and cotton crepe de chine. The latter and linen lawns seem to be in highest favor at

For decoration, well-made French or German val laces, cluny and shadow laces hold sway, with hand embroidery always the most elegant of all. If fine hand embroidery is to be used, linen lawn, crepe de chine, or very fine batiste will make the work worth while. Hand embroidery in simple design and neatly done is the most desirable of all decorations for lingerie. Durable laces in narrow insertions and dainty edges are quite often used with it. But the majority of hand-embroidered garments have no further decoration than ficwer sprays of embroid-ery and all edges finished with but-

A gown of batiste is shown in the picture cut in the simplest manner possible. A plain kimono pattern does away with armholes or separate sleeves. The round neck and short sleeves are finished with buttonholed scallops, and these are placed, in-stead of a nem, about the bottom. A flower spray appears on each sleeve and in the front of the garment.

Made with much less work and very pretty is the gown shown in the second picture. The yoke and sleeves, in one piece, are made of German val green and vivid yellows lace insertion finished with edging. young girls of all ages.

NIGHT DRESSES designed for sum. The shaping is managed by basting all terretions are made of the lightest and terretions. mer are made of the lightest and ternating rows of narrow and wide insertion to a light paper pattern. The lace is brought to a "V" shape in the lawns, and also of wash silks and back. The shoulders are fitted with narrow seams. The insertings are whipped together.

The lower edge of the yoke is stitched to a beading embroidery about an inch in width, to which the body of the gown is set on. The sleeve por tion and bottom of the gown are finished with a wide edging, and the neck with a narrow one of corre sponding pattern. Ribbon run through the beading adjusts this pretty empire pattern to the figure.

In nightgowns and in other lingerie of the best designs the makers steer clear of much elaboration. Ribbon form a highly important decorative feature, and special designs in bows and rosettes are made to be adjusted when required.

uamental Principles of Health

By ALBERT S. GRAY, M. D.

(Copyright, 1914, by A. S. Gray) WHEAT FLOUR.

Of the protein substances used for food none is of more importance than those contained in wheat. Next to rice, it is today the most largely used

The wheat berry is a fruit and not a seed. The actual wheat seed is the germ or embryo, a kidney-shaped body which is found at the base of the berry and connected with the root through the placenta, which is in effect a cord joining the berry with its stalk. Botanists distinguish six skins on the wheat berry-epicarp, mesocarp, endocarp, episperm, tegmen and

Wrapped up and thoroughly sealed within these many skins lies the floury kernel, the endosperm, in intimate contact with the inner skin. The endosperm consists of starch granules held in a network of minute fibers of gluten. This glutinous portion is of great importance to the baker, because on its quantity and quality depends the "strength" or raising power of the flour.

The placenta serves to filter the food which the plant sucks up from the ground. First the mineral and gluten skeleton is formed and then the berry fattens by extracting out of the air under action of sunlight the carbon necessary to build up the starches and sugar. A good deal of the matter filtered by the placenta is mineral in nature and such portions as are not digested remain in the crease. A grain of wheat is composed approximately as follows: Water, 12 per cent; protein, 13 per cent; fat, two per cent; carbohydrates, 71 per cent; mineral salts, two per cent These mineral salts consist of potassium, sodium, calcium, magnesium, iron, phosphorus, sulphur, silicon, chlorine, iodine and manganese.

Until recent years the whole berry was broken up and triturated in one oferation, and the flour necessarily contained a large proportion of branny particles, in which cerealin, an active digestive constituent, was present in dry it was difficult to produce a good keeping flour.

the berry in such a manner as to chip off the woody skins and flatten the germ. Thus their removal by mechanical means is made easily possible. In this way is removed from the is chiefly used in the arts and for feed- efficiency from the oil consumed. ing animals. The rest of the wheat berry constitutes several grades of more than 13.5 per cent moisture.

the mineral matter and the digestive elements are eliminated from flour, better the flour keeps under all conditions of climate.

Moisture and the diastase cause the catalyzers to work and digest or decompose the flour. It is in just this difference between the contents of the whole wheat berry and the flour from which "the staff of life" is made that undoubtedly will be found the key to much of our trouble. It is admitted that neurasthenia-"Americanitis," as it is jokingly called by the rest of the world—is due to some type of "mal-nutrition," meaning, in plain English, starvation-a lack of balance between the energy expended and that developed. How much of this is due to devitalized food? Hunt reports in letin 69, hygienic laboratory, United States treasury department: "In extreme cases mice after having be fed upon certain diets recovered from forty times the dose of acetonitrile fatal to mice kept on other diets. is, moreover, possible to alter the sistance of these animals at will, to overcome the effects of one diet combining it with another"-the po he was working to establish being th unnatural diets lower resistance restoring the diet balance raises eistance

Life in the furnace giving o conserving heat into the house that somsthing has to be co uously "dying" in the furnace. For to maintain that heat some of potential energy has got to be continuously released in the furnace, and this is achieved by digesting, or decomposing, or in plain English, by burning coal or some other form of carbon in the firebox. Whether it be in your furnace or in your own body, in the wheat plant or in the singlecelled amoeba, life is a continuous process of dying.

All organic life exists in a state of continuous decomposition and rebuilding, a perpetual state of mutation. What is true of the fire is equally true of ourselves, the principles being identical. As soon as decomposition ceases, reconstruction ceases; as soon as we cease dying, we cease living. Life in man, plant, amoeba or the furnace is merely vibration, an individual transformation of potential energy that varies only in degree.

All living matter contains substances of peculiar molecular structure and composition far more complex than any compounds found in inorganic nature. But the difference between these organic and inorganic substances is only a difference of degree, and many of the most characteristic of the substances have been artificially made in

the chemical laboratory. Built up out of the commonest elements on the surface of the earth these organic compounds are grouped into three classes: Carbohydrates (sugar, starch and cellulose), fats and proteins. Of these three compounds the proteins are by far the most important, for while the molecule of fat, or carbohydrate, consists entirely of various combinations of the three element, carbon, hydrogen and oxygen, the protein molecule always contains, in addition, nitrogen and sulphur.

The carbohydrate and the fat, so far as we know, appear to be only heat and energy-giving compounds exactly equivalent to the coal we burn very sensible proportions. Unless the in the furnace or in the firebox of a wheat was thoroughly matured and steam engine. But the proteins have at least a double function to perform -and probably others we have not yet grasped-for not only must they sup-The patent roller process crushes ply energy but also the structural material, the brick, stone, mortar, iron and other inorganic material out of which our bodies are composed.

But with the sublime one per cent. The more thoroughly assurance of ignorance we step in and deliberately break this cycle of life by discarding elements that offend our the whiter bread it makes and the color sense or that interfere with our

If, for instance, wheat flour will not keep, we remove the bran, the woody matter and the mineral salts, together with a portion of the protein matter and the germ; it makes a much whiter and lighter bread, anyway, and the experts tell us that it is more digestible, too; and besides, the "insoluble by-products" make fine food for stock. Cattle, chickens and other forms of life grow fat and sleek on a diet to which these "waste by-products" are

Evidently these "waste products' have a very profound influence on the metabolism of the lower forms of life, but it is argued that that has nothing to do with man. We are still hitched to the idea that man is a thing apart from all the rest of creation and that if anything becomes the matter with his machine it is because an evil spirit gets in and he must pour some vile tasting combination down his throat to rive the evil thing out. Meantime the fact that some fifteen millions of our nineteen-odd million children enrolled in the schools are shown to be more or less physically defective from insufficient building material supplied in their food, and the fact that we are experiencing a constantly increasing nomic loss through the premature death of our matured lives, do not appear to be so important to us as that we shall have nice white foods that will keep.

Valiant saves Shiriey from the blace. Valiant saves Shiriey from the blace. Valiant learns for the first time that his father left Virginia on account of a duel in which Doctor Southall and Major Bristow acted as his father's seconds. Valiant and Shirley become good friends. Mrs. Dandridge faints when she meets Valiant for the first time. Valiant discovers that he has a fortune in old walnut trees. The yearly tournament, a survival of the jousting of feudal times, is held at Damory court. At the last moment Valiant takes the place of one of the knights, who is sick, and enters the lists. He wins and chooses Shirley Dandridge as queen of beauty to the dismay of Katherine Fargo, a former sweetheart, who is visiting in Virginia. The tournament ball at Damory court draws the elite of the countryside. Shirley Dandridge as queen of beauty to the dismay of Katherine Fargo, determining not to give up Valiant without a struggle, points out to Shirley how terrible it would be for the woman who caused the duel to meet Valiant, who looks so much like his father. against his prosecutor. Valiant pleads against his prosecutor. Valiant pleads with Shirley, but fails to persuade her to change her decision. Major Bristow is fatally wounded by Greef King, but before dying he confesses to Mrs. Dandridge that he had kept a letter Valiant had written to her after the duel.

In the little haircloth trunk back in her room lay an old scrap-book. It held a few leaves torn from letters and many newspaper elippings. From these she had known of his work, his marriage, the great commercial success for which his name had stoodthe name that from the day of his going, she had so seldom taken upon her Some of them had dealt with his habits and idiosyncrasies, hints of an altered personality, and aloofness to clothe with subtle colors the voice or loneliness that had set him apart and made him, in a way, a stragger to those who should have known him

CHAPTER XXXI.-Continued.

best. Thus her mind had come to hold a double image: The grave man the doctor, its saturnine grimness these shadowed forth, and the man strangely moved, and beyond him, she had loved, whose youthful face was Shirley and her mother. Many glanced in the locket she wore always on her at them, for the major's will had been breast. It was this face that was opened that morning and few there printed on her heart, and when John had been surprised to learn that, save Valiant had stood before her on the for a life-annuity for old Jereboam, porch at Rosewood, it had seemed to he had left everything he possessed have risen, instinct, from that old to Shirley. had said, but a little later, as he and Valiant sat beside the couch, the major opened his eyes suddenly. 'Shirley," he whispered. "Where's

Shirley?" She was sitting on the porch just outside the open window, and when she entered, tears were on her face. The doctor drew back silently; but when Valiant would have done so, the

major called him nearer. "No," he panted; "I like to see you two together." His voice was very

weak and tired.

As she leaned and touched his hand, se smiled whimsically. "It's mighty eurious," he said, "but I can't get it out of my head that its Beauty Valiant and Judith that I'm really talking Foolish-isn't it?" But the idea ed to master him, and presently he began to call Shirley by her mother's name. An odd youthfulness crept nto his eyes; a subtle paradoxical ss. His cheek tinged with

smoothed miraculously out.
"Judith," he whispered, "—you-

sure you told me the truth a while ago, when you said-you said-"

"Yes, yes," Shirley answered, putting her young arm under him, thinking only to soothe the anxiety that seemed vaguely to thread some vague hallucination.

He smiled again. "It makes it easier," he said. He looked at Valiant, his mind seeming to slip farther and farther away. "Beauty," he gasped, you didn't go away after all, did you! dreamed it-I reckon. It'll be-all right with you both."

He sighed peacefully, and his eyes turned to Shirley's and closed. "I'm-so glad," he muttered, "so glad I didn't really do it, Judith. It would have been the only low-down thing -I-ever did."

The doctor went swiftly to the door and beckoned to Jereboam. "Come in now, Jerry," he said in a low voice, 'quickly.'

The old negro fell on his knees by the couch. "Mars' Monty!" he cried. "Is you' gwine away en leabe ol' Jerry? le yo'? Mars'?"

The cracked but loving voice struck across the void of the failing sense. For a last time the major opened his misting eyes.

"Jerry, you-black scoundrel!" he whispered, and Shirley felt his head grow heavier on her arm, "I reckon it's -about time-to me going-home!

CHAPTER XXXII.

Renunciation. The grim posse that gathered in haste that afternoon did not ride far. Its work had been singularly well done. It brought back to Damory court, however, a white bulldog whose broken leg made his would-be joyful bark trail into a sad whimper as his owner took him into welcoming arms. Next day the major was carried to

his final rest in the myrtled shadow of St. Andrew's. At the service the old church was crowded to its doors. Valiant occupied a humble place at one side—the others, he knew, were older friends than he. The light of the late afternoon came dimly in through the stained-glass windows and seemed of the rector as he read the solemn The responses came brokenservice. ly, and their were tears on many faces.

Valiant could see the side-face of side them, and between, wan with He had not kept silence! He had weeping, sat Rickey Snyder. Shirley's shoulders as if it would stay the pr ant was gone with her youth; in the sion of grief that from time to time

> The evening before had been further darkened by the child's disappearance and Miss Mattie Sue had sat through half the night in tearful anxiety. It was Valiant who had solved the riddle. In her first wild compunction, Rickey had gasped out the story of her meeting with Greef King, his threat and own terrorized silence, and when heard of this he had guessed her hereabouts. He had found her at he Dome, in the deserted cabin from ich on a snowy night six years ago. there in her shabblest dress, her toys and trinkets left behind, taking with er only a string of blue glass beads

The voices of the unvested choir rose clearly and some one at his side was whispering that this had been the major's favorite hymn. But he loving labor, would lie again as it lay scarcely heard.

When the service was ended the people filled the big yard while the last reverent words were spoken at the

She Tried to Imagine That Letter's Coming to Her-Then. Thirty Years Ago!

grave. Valiant, standing with the rest, saw Shirley, with her mother and the doctor, pass out of the gate. She was not looking toward him. A miet was in glass cases, and prints in bright before his eyes as they drove away, and the vision of her remained wavering and indistinct-a pale blurred face under shining hair.

He realized after a time that the yard was empty and the sexton was locking the church door. He went the kitchens, and Aunt Daphne sitting slowly to the gate, and just outside under the trumpet vine piecing a ninesome one spoke to him. It was Chis- patch calico quilt with little squares holm Lusk. They had not met since of orange and red and green cloth. the night of the ball. Even in his own preoccupation, Valiant noted that on the ground looking up at her with Lusk's face seemed to have lost its round serious eyes, while a wary banexuberant youthfulness. It was worn tam pecked industriously about their as if with sleeplessness, and had a bare legs. look of suffering that touched him. written! It pealed through her brain arm lay shelteringly about the small And all at once, while they stood look. Aunt Daph?" ing at each other, Valiant knew the other had waited to say.

"I won't beat about the bush," said Mars' Lusk stammering. "I've got to ask young Mars' come!" En dey all mighty you something. I reckon you've skeered, 'case Mars' John he cert'n'y guessed that I-that Shirley-

Valiant touched the young fellow's arm. "Yes," he said, "I think I know." "It's no new thing, with me," said the other hoarsely. "It's been three years. The night of the ball, I thought perhaps that-I don't mean to ask what you might have a right to resent -but I must find out. Is there any reason why I shouldn't try my luck?" Valiant shook his head. "No." said heavily, "there is no reason."

The boyish look sprang back to Lusk's face. He drew a long breath. "Why, then I will," he said. "I-I'm sorry if I hurt you. Heaven knows I didn't want to!"

He grasped the other's hand with a man's heartiness and went up the road with a swinging stride; and Valiant stood watching him go, with his hands tight-clenched at his side.

A little later Valiant climbed the sloping driveway of Damory court. It seemed to stare at him from a thousand reproachful eyes. The bachelor red squirrel from his tree-crotch looked down at him askance. The redbirds, flashing through the hedges, fluttered disconsolately. Fire-Cracker, the peacock, was shricking from the upper lawn and the strident discord emed to mock his mood.

The great house had become home to him; he told himself that he would make no other. The few things he had brought-his books and trophiesgrown to be a part of it, and they should remain. The ax should not be laid to the walnut grove. As his father had done, he would leave behind him the life he had lived there, and the old court should be ones more closed and deserted. Uncle Jefferson and Aunt Daphne might live on in the cabin back of the kitchens. There was pasturage for the horse and the cows and for old Sukey, and some acres had already been cleared for planting. And there would be the swans, the ducks and chickens, the

A letter had come to him that me The corporation had resu ing. business with credit unimpaired. Public opinion was more than friendly now. A place waited for him there and one of added honor, in a concern

al. itself and ard to a new ca-

He paced up and down the porch un-Valiant name—in that clarifying in-stant he knew that all these, from that May day on the Red road, had clung creeper, trailing over its end, waved to and fro with a sound like a sigh. How long would it be before the lawn was once more unkempt and draggled? Before burdock and thistle, mullein and Spanish-needle would return to smother the clover? Before Damory court, on which he had spent such that afternoon when he had rattled thither on Uncle Jefferson's crazy hack? Before there would be for him, in some far-away corner of the world. only Wishing-House and the Never-

Never Land? In the hall he stood a moment fore the fireplace, his eyes on its carven motto, "I clinge:" the phrase was like a spear-thrust. He began to wander restlessly through the house, up and down, like a prowling animal. The dining-room looked austere and chill-only the little lady in hoops and love-curls who had been his greatgrandmother smiled wistfully down from her gilt frame above the console -and in the library a melancholy deeper than that of yesterday's tragedy seemed to hang, through which Devil-John, drawing closer the leash of his leaping hound, glared sardonically at him from his one cold eye. The shutters of the parlor were closed, but he threw them open and

let the rich light pierce the yellow

gloom, glinting from the figures in

the cabinet and weaving a thousand

tiny rainbows in the prisms of the

great chandelier.

He went upstairs, into the bedrooms one by one, now and then passing his hand over a polished chair-back or touching an ornament or a frame on the wall: into The Hilarium with its records of childish study and play. The dolls stood now on dress-parade colors, dear to little people, were on the walls. He opened the shutters here, too, and stood some time on the threshold before he turned and went

heavily downstairs. Through the rear door he could see

"En den whut de roostah say, "Ol' roostah he hollah to all he

wifes. Oo-ooo! Oo-ooo! Young come!-Young Mars' fond ob fried chick'n. But de big tubkey gobbler he don' b'leeve et 'tall. 'Doubtful-doubtful-doubtful!' he say, lak dat. Den de drake he peep eroun' de cornah, en he say, 'Haish! Haish! Haish!' Fo' he done seed Mars' John comin', sho' nuff. But et too late by den, fo' Aunt Daph she done grab Mis' Pullet, en Mars' John he gwineter eat huh dis bery evenin' fo' he suppah. Now you chillun runs erlong home ter yo' mammies, en don' yo' pick none ob dem green apples on de way, neidah."

It was not till after dark had come Valiant said goodby to the garthat pergola overlooking the lake, where of silence,

hing and chuckling down over their rounded outlines to the shrouded level below. The moon lifted finally and the little lamps of stars. Under light a gossamer mist robed the land-scape in a shimmering opalescence, in which tree and shrub altered their values and became transmitted to silver sentinels, watching over a demesne of violet-velvet shadows filled with sleepy twitterings and stealthy rustlings and the odor of wild honey

At the last he stood before the old sun-dial, rearing its column from its pearly clusters of blossoms. "I count no hours but the happy ones:" he read the inscription with an indrawn breath. Then, groping at its base, he lifted the ivy that had once rambled there and drew up the tangle again over the stone disk. His Bride's-Gar

In the library, an hour later, sitting at the big black pigeonholed desk, he

wrote to Shirley: "I am leaving tonight on the midnight train. Uncle Jefferson will give you this note in the morning. I will not stay at Damory court to bring more pain into your life. I am going very far away. I understand all you are feeling—and so, goodby, goodby. God keep you! I love you and I shall love you always, always!"

CHAPTER XXXIII.

The Voice From the Past. Though the doctor left the church with Shirley and her mother, he did not drive to Rosewood, but to his office. There, alone with Mrs. Dan-dridge while Shirley waited in the carriage, he unlocked the little tin box that had been the major's, with the key Mrs. Dandridge gave him and put into her hands a little packet of yellow oiled-silk which bore her name. He noted that it agitated her profoundly and as she thrust it into the bosom of her dress, her face seemed stirred as he had never seen it. When he put her again in the carriage, he patted her shoulder with a touch far gentler than his gruff goodby.

At Rosewood, at length, alone in her room, she sat down with the packet in her hands. During the long hours since first the little key had lain in her palm like a live coal, she had been all afire with eagerness. Now the moment had come, she was almost

REALLY USED COTTON BALES!

Popular Idea Concerning Battle of New Orleans Has Been Found to Be Correct.

Interest in the slumbering cottonbale theory of the battle of New Orleans was aroused by the finding of a water-color picture map of the original battle plan in an abandoned trunk in the celler of the St. Charles hotel. Little is known about the drawing or the other contents of the trunk which has remained unnoticed for years in a dark corner.

Five veterans of the battle have added their signatures to the remarkable map to attest the fact that it is a true representation of the battle plan as made under the direction of Andrew Jackson by his military engineer, H. Laclotte. It shows a line of cotton bales which a marginal note says was 1,000 feet long with a pro-longment extending 600 feet into the woods. Some historians deny the about the use of cotton bales.

The live veterans who say they fought behind cotton bales were Joseph St. Cyr, Jean Lamothe, P. M. Lapice, Charles Raymond and Jean Gervais. Pen pictures of these men appear in the footnotes.

The finding of the picture is time-ly, says the New Orleans Item, as it will be of service for the staging of the battle, which is to be one of the leading features of the Exposition of Big Ideas.

Translator of "Arabian Nights." The "Arabian Nights" did not be familiar to Europeans until 1704, when Galland translated them into French. Scholars cast doubt on the authenticity of some of Galland's work, accusing him—like Fitz-Gerald and Omar Khayyam—of inventing rather than translating, but with the ublic the success of the tales Galland used to complain that the students, re-turning home in the early hours of

Invitation and Answer.

Mr. F. C. Phillips in his book, "My Varied Life," tells how the late Sir George Honeyman, an infamous writer, sent down from the bench to a friend of his, a leading Q. C., a little note. Not able to make head nor tail of it, the barrister scribbled something equally undecipherable upon a half-sheet of notepaper, and passed it up to the judge. Sir George looked annoyed, and when the court rose, said to his friend: "What do you mean by this? I asked you to

Memoirs of Napoleon

In Three Volumes

This man caused the last general European war.

His personal memoirs, written his secretary, Baron De Meneval, are full of the most absorbing incidents, especially in view of the present great European struggle.

Just a hundred years ago, his ambitions bathed the Continent in a sea of blood. France alone, under his leadership, fought Germany, Russia, Austria, Italy, and Great Britain—and awas.

AIDED BY "FAKEO" PICTURE

French Statesman Kellad in Election by Means Which Might Well Be Called Dublous.

Monsieur Richepin and Monsieur Ceccaldi were opposing candidates for a seat in the French chamber of deputies. At one of their meetings an affray occurred in which one of M. Richepin's partisans was struck down by an assassin supposed to be of the Ceccaldi party. The Paris journals have reproduced this scene. The truth was that in the riot it was impossible to photograph the scene. But the picture furnished by M. Richepin was dramatic in the extreme and doubtless aided in his election. M. Richepin was on his way home, accompanied by a number of faithful friends and some photographers, when this dramatic picture was posed. He stopped at a bridge. There with his friends crowded about him, an excited throng, steed M. Richepin, one hand leaning upon the bridge, the other hand holding a handkerchief dripping with the blood of the murdered man. The blood for the handkerchief, it is said, came from a neighboring wine shop and was poured from a bottle of red ink. With this beginning a background was set in representing M. Ric win standing on the steps of the ho where the tragedy occurred.

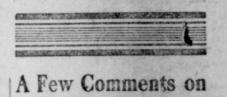

EASY TO DECEIVE THE EYE

Many and Varied Are the Optical Illusions That Have Been Placed on Record.

A curious optical illusion is sometimes seen as a motor car passes, the wheels of the moving vehicle appearing for an instant to stop or even turn backward. In an investigation reported to the British Royal society Prof. A. Mallock mounted a cardboard disk with spokes on a flywheel. and when this was revolved so rapidly that the sf could not be seen or easily t w the eye. and a slight me of almost any kind w the spokes appe ary for a fraction having this effect weways, such as in the contafeet with the ground as in walls 31 by tapping the head or body, or even by rapidly blinking the eyes. It was proved that the appearances depend on the speed of rotation, the brightness of illumination, and to some degree on the nature of the shock. The explanation was offered that the shock produces a momentary loss or variation of sensation. This variasame time in different persons, but is always very short, and usually

Old Lady Number 31

Our next serial

"Distinguished for a tenderness of sentiment that warms the heart, and a kind of homely humor of situation and phrase that keeps one smiling in every chapter."

—Vogue, New York.

"Some of the earlier parts of the story are exquisitely pathetic, but as the plot develops and more sunshine comes to the lives of Angelina and Abraham, there is a quaint humor. The plot is ingeniously worked out and there is a happy ending."

— Democrat and Chronicle, Rochester.

"Every line of the narrative is replete with feeling and humer, a truly delightful com-panion." — Public Ledger, Philadelphia.

"Blended homely pathos and sentiment with simple humor, a combination which discreetly handled is an almost infallible recipe for popularity. The writer has dis-played all due discretion and is reaping her just reward."—Transcript, Doston, Mass. "It is altogether one of the most original and attractive stories it has been our good fortune to read in a long time"—Ainslees, New York.

"The narrative is that of life at the home, and of the happiness brought by unex-pected adduence. A little gem, and deserves wide reading." — Plaindealer.

The Tailor Who Paid Too Much.

I was buying a cigar last week when a man dropped into the shop and after making a purchase told the proprietor that he had started a clothes shop around the corner and the mistake of thinking that the showquoted him prices, with the assurance of best garments and terms.

After he left the cigar man turned to me and said:

"Enterprising fellow, that; he'll get

"But he won't," I replied, "and. furthermore, I'll wager you that he hasn't the sort of clothes shop that will enable him to."

"What made you think that?" queried the man behind the counter

"His theories are wrong," I explained, "he's relying upon word of mouth publicity to build up his business and he can't interview enough Individuals to compete with a merchant, who has sense enough to say the same things he told you, to a persons pass continually, is more dethousand men, while he is telling it to sirable than one in a cheap, sparsely one. Besides, his method of adver- settled neighborhood. An advertisetising is too expensive. Suppose he sees a hundred persons every day. First of all, he is robbing his business of its necessary direction, and besides he is spending too much to reach every man he solicits."

"I don't quite follow you." "Well, as the proprietor of a clothes shop his own time is so valuable that

I am very conservative in my esti- tributed among "alley-dwellers." mate when I put the cost of his soliciting at five cents a head. "Now, if he were really able and

clever he would discover that he can talk to thousands of people at a tenth of a cent per individual. There is not a newspaper in town the advertising rate of which is \$1.00 per thousand circulation, for a space big enough in which to display what he said to you.' "I never looked at it that way," said

the cigar man. It's only "the man who hasn't looked at it that way" who hesitates for an instant over the advisability and profitableness of newspaper publicity.

Newspaper advertising is the cheapest channel of communication ever established by man. A thousand letters with one-cent stamps will easily cost fifteen dollars, and not one envelope in ten will be opened because the very postage is an invitation to the waste-basket.

If there were anything cheaper rest assured that the greatest merchants in America would not spend individual sums ranging up to half a million dollars a year and over, upon this form of attracting trade.

The Dollar That Can't Be Spent. merchant who imprints clinching argu-

Every dollar spent in advertising is not only a seed dollar which produces ing sections of newspapers are no difa profit for the merchant, but is actu- ferent than farming lands. And it is ally retained by him even after he has as preposterous to hold the publisher paid it to the publisher.

to the cost of the publicity.

Advertising really costs While it uses funds it does not use the same number of readers from them up. It helps the founder of a publisher and the same readers-after Susiness to grow rich and then keeps that it's up to him—the results fluctuhis business alive after his death.

It perpetuates confidence in the store | which is inserted. and makes it possible for a merchant to withdraw from business without having the profits of the business withdrawn from him. It changes a increases little, if at all name to an institution—an institution a considerable gain, whi which will survive its builder.

costs nothing-pays a premium each declining. The festive goat of angora year instead of calling for one and persuasion is multiplying his offspring tire personnel of a business without day before mohair takes a leading post- long before they had reached matur- tepec as she passed his dwelling. The disturbing its prosperity.

Advertising renders the business stronger than the man-independent of his presence. It permanentizes systems of merchandising, the track of which is left for others to follow.

A business which is not advertised must rely upon the personality of its proprietor, and personality in business is a decreasing factor. The public does not want to know the man who owns the store-it isn't interested in him, healthy state of affairs for the world But the girl of twenty who, in povbut in his goods. When an unadver- at large. Viewing the situation broadly, erty, has brought into the world four tised business is sold it is only worth as much as its stock of goods and its fixtures. There is no good will to be paid for-it does not exist-it has not been created. The name over the door turers and governments. - Chicago means nothing except to the limited stream of people from the immediate neighborhood, any of whom could tell you more about some store ten miles away which has regularly delivered its shop news to their homes

It is as shortsighted for a man to build a business which dies with his death or ceases with his inaction, as it is unfair for him not to provide for the continuance of its income to his

The Perambulating Showcase.

The newspaper is a huge shop window, carried about the town and de-livered regularly into thousands of homes, to be examined at the leisure of the reader. This shop window is unlike the actual plate glass showcase only in one respect—it makes display of descriptions instead or articles.

You have often been impressed by the difference between the decorations of two window-trimmers, each of whom

in pr must mak "His copy has rie must not only make things that are attractive but are attractive to the people as well.

The window-trimmer must not make iest stocks are the most salable. The advertiser must not make the mistake of thinking that the showlest words are the most clinching.

Windows are too few in number to be used with indiscretion. The good merchant puts those goods back of his plate glass which nine people out of ten will want, once they have seen them

The good advertiser tells about goods which nine readers out of ten will buy, if they can be convinced.

Newspaper space itself is only the window, just as the showcase is but a frame for merchandise pictures. A window on a crowded street, in the best neighborhood, where prosperous ment in a newspaper with the most readers and the most prosperous ones, possesses a great advantage over the same copy in a medium circulating among persons who possess less means. It would be foolish for a shop to build its windows in an alleywayand just as much so to put its advertising into newspapers which are dis-

The Difference Between Amusing and Convincing.

An advertiser must realize that there is a vast difference between amusing people and convincing them. It does not pay to be "smart" at the line rate of the average first-class paper. I suppose that I could draw the attention of everybody on the street by painting half of my face red and donning a suit of motley. might have a sincere purpose in wishing to attract the crowd, but I would be deluding myself if I mistook the nature of their attention.

The new advertiser is especially prone to misjudge between amusing and convincing copy. A humorous picture may catch the eye of every reader, but it won't pay as well as an illustration of some piece of merchandise which will strike the eye of every buyer. Merchants secure varying results from the same advertising space. The publisher delivers to each the same quality of readers, but the advertiser who plants flippancy in the minds of the community won't atten the benefit that is secured by the ments there.

Always remember that the advertisresponsible for the outcome of unin-Advertising creates a good will equal | telligent copy as it would be unjust to blame the soll for bad seed and poor culture. the heart of Mexico looking for the

men folks, writes W. A. Du Puy in ture anywhere to be seen.

There are two dominating ideas in the mind of the resident of the United Mexico. Light opera is responsible for both. The first is the picture of the man-a creature of an inconceivto the ankles, of flowering, scarlet sash and colorful blanket. And the picture is true in its minutest details. No stager of light opera has ever exaggerated the man of Mexico. loafs today in magnificent ennui about the railway stations at Chihuahua and Saltillo and San Luis Potosi so arraved as to defy exaggeration.

The second Mexican idea of the man from the states is of the senorita, gay clad, bespangled, jangling her tambourine and with a dagger, for jealousy, hidden in her bosom. But this maiden is as conspicuous for her absence as is the male of the species for his omnipresence

Poverty Prevents.

it must be remembered that the people of Mexico are inexpressibly poor. It is of the masses I am writing, the 98 per cent. When Diaz became president there was an occasional opportunity for the native to earn 15 cents a day at hard labor. Diaz let in foreign capital for the development of industry and in 30 years these same men could earn 60 cents a day and had more opportunity to work. Yet even this was not luxury. And the boys and girls grew up as

PLACING DOORS AND WINDOWS

Only Recently Have Matters Such as This, Which Really Are of Great Importance, Been Given the Attention They Deserve-For Eighteen-Room Home.

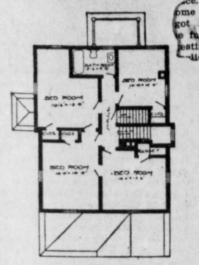

By WILLIAM A. RADFORD. Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this control of his wide experience. subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only enclose two-cent stamp for reply.

Houses today, in general, are not so large as they used to be, when measured by size alone. The increasing cost of lumber, labor, and other building items of expense have induced many economies; but inventive architects have made better use of the smaller space, so that an eight-room modern house contains a great deal more convenience than an eight-room house built twenty years ago, although the outside dimensions of the older house may be very much the larger. Twenty years' study in this direction has resulted in many improvements, both in design and by the way of add-

sheep farming should likewise be in-

strumental in making a decision. If

winter lambs are to be produced a

breed must be secured that will breed

at the right season of the year, and

not all will do this. The Dorset, Me-

rino and Tunis have given the best

have its effect in influencing one's decision. Some breeds have been de-

veloped under conditions that are

more general, or else they have a

wider range of adaptability than oth-

ers. The popularity of several breeds

in this country is due to this fact. No

better illustrations of these can be

mentioned than the Merinos and

to California. Some of the minor

breeds need men who will place them

before the public, as there can be no

doubt as to the effect of a wide-awake

breed association in advancing a

It is well before making a selection

to consider carefully the most popu-

lar breed in your community. There

is usually some good reason for its

being popular, but occasionally be-

cause of a fashion a breed will enjoy

a "boom" that it does not rightly de-

serve. In some states at the present

time there are colonies of breeders

handling certain breeds, and buyers

are attracted there because there are

excellent opportunities for selection in

the neighborhood. There are also ad-

vantages connected with buying stock

near home. The keen competition of-

fered by some of the classes in the

show ring has been a lure that has

caused some men to take up a cer-

tain breed. Others have been con-

tent to win more often in the smaller

classes where the winnings are easier.

ing more care than others; at any rate

they become more unsightly if denied

this attention. However, no flock

will thrive upon mismanagement.

Good appearance is always desirable,

and sometimes it is of prime impor-

tance. The use of sheep for keeping

the lawns of parks and country places

in trim has been in effect in this coun-

try for years and here attractiveness

is indispensable. The Southdown has

proved very popular for this purpose.

SWEET CLOVER GAINS FAVOR

Increasing Attention Being Given Crop

as Forage Plant-Used Success-

fully as Ensilage.

(Prepared by the United States Depart-ment of Agriculture.)

For the past two years increasing

attention has been given to sweet

clover as a forage plant. County agri-

cultural agents in several states last

year gave the crop some attention in

an experimental way. Those in Kan-

sas and South Dakota were particu-

larly active, and the results were so

satisfactory that the area seeded this

year has been enormously increased.

A report from Allen county, Kansas,

states that more than 2,000 acres were

seeded in that county this year. Last

year a farmer in Clinton county, Iowa,

conducted an excursion to a farm on

which is grown annually 60 to 100

acres of sweet clover for hay and pas-

ture on land worth more than \$100

per acre. On June 9 and 10 this year

two Illinois county agents joined in an

excursion to a 300-acre sweet clover

farm in Ogle county, Illinois. One

county sent 21 automobiles with 109

farmers representing 25 townships. A

total of 45 automobiles made up the

train. Among the interesting things

done on the farm visited is the pas-

turing of 60 head of cattle on 40 acres

of sweet clover. The clover is also

Some breeds are regarded as need-

The popularity of a breed will often

satisfaction thus far.

(Prepared by the United States Depart- | cialize upon some particular line of

ment of Agriculture.) All the domestic sheep in America have originated from importations, most of which have been made from European countries since the beginning of the nineteenth century. The fine wools are found upon the western ranges and to a lesser extent through the Ohio fine-wool region. They are undergoing some changes to improve the carcass and increase the length of wool; some foreign blood is being used to do it; nevertheless these sections may still be regarded as being fine wool in character.

In Tennessee, Virginia and Kentucky, the spring lamb region of America, Southdown rams are very popular. Through the central farming sections of the country the medium-woo breeds have taken possession, the long wools largely being in locations more favorable to them in the North and Northwest, notably Canada, Utah, Idaho, Montana and Oregon.

It is not always possible to say that there is one best breed for any section. There may be two or three that would do equally as well, but it is undeniable that some breeds are far more suitable than others for a given location. All the breeds have their good qualities and most of them, if properly handled, will give good results in some section of America. The problem is to get the ones best adapted to particular conditions. Some breeds have a larger number of highclass individuals than others, but a truly successful breeder can improve any of them.

As a rule, but one breed should be selected. Where there is more than one breed upon a farm it is a difficult matter to keep the gates all closed at the proper time and prevent crossing. If several farms are available mor breeds can be handled, but the difficulties in management are much increased. The most successful sheep breeders in America handle but one breed. The fact that there are more breeds than in any other class of farm animals may in itself make the selection of one breed rather difficult. Some of the deciding factors should be climatic conditions, feeds available, altitude, the particular line of the industry to be followed, and popularity of the breed in the section in which the farmer is located.

The effect of climate is strikingly illustrated in the evolution of the sheep industry of the extreme Northwest. The Willamette Valley in Oregon, now so famous for its long wools, was once partly occupied by finewool sheep. The large amount of rainfall, which comes in a long-continued drizzle, caused the hay and weed seeds that became lodged in the wool to grow and become green upon the sheep's back. The Merino breeds were decidedly out of place there. After a time the Lincoln and other long-wool breeds were introduced and the industry assumed a different aspect. Their long locks act as a thatch, carrying the water off, and these breeds thrive as they do in few places except their native counties in England.

The kind of feed produced is of importance. The large breeds have been veloped upon land that has produced abundantly. They are capable of taking care of a larger amount of feed, such as the moist fertile lowlands produce, while the smaller breeds succeed better upon the less abundant fare of drier and less fertile pastures. There is evidently some connection between the general high quality of the smaller breeds and the scanty, more nutritious feeds that they receive under natural conditions. If they are removed to the lowlands they lose much of their

characteristic type and quality. The effect of altitude upon a breed is also apparent, but how much of this effect is due to the amounts and kinds of feed it is difficult to determine. Certain it is that the mountain breeds are smaller, more active, more hardy, and better able to care for themselves

than their lowland neighbors. The importance of hardiness in the ountain breeds was shown during the last century along the Scottish border. The Cheviot had for a number of years been displacing the blackfaced Highland breed because finer quality of wool and som what better carcass. A number of severe winters worked havoc among flocks of the former breed by ng a very heavy lamb loss, and the Highland breed, because of its hardi- of sllage, though small silos are now s, came back into its own.

SPUR FARM LANDS

Many farmers are making a hard or doubtful living on high-priced lands in localities cursed with insect pests, or ods, or drought, or weed plagues, or other enemies to successful farming. The end of each year finds time and energy practically wasted-no progress made. Spur Farm Lands offer relief from these conditions.

The tenant on the high-priced lands further east can make a payment and be master of his own acres here. Any good farmer can pay for them from the products thereof. The Spur Farm Lands offer productive, virgin landseasily cultivated-at low prices and on easy terms. Splendid crops are raised without irrigation. No boll weevil ever known here. Altitude 2,000 to 2,600 feet.

Considering the reliable production of these lands, prices are lowest in Texas; new country, settling fast; splendid climate, no malaria, chills or fever; good churches and schools. We offer the homeseeker a wide range for selection and are selling directno commission to anyone. The purchaser receives full value in his lands in dealing direct with the owner as opposed to paying a middleman several dollars per acre.

Stock Farms and Small Ranch Tracts. We also offer fine grazing tracts, perfectly adapted to this purpose-one section to fifty—at prices from \$5.00 per acre up.
