N. the three places above named Naylor and family Tuesday. will donate something like \$2500.

in good shape to the Wilson ranch Greer farm. and Wellington and Quail will do the rest. Commissioner Fryar has expressed a willingness to do all he possibly can on the road in this county if the people Bland July 18, a fine boy. will do their part.

people cannot afford to pass over, as the greater part of the work is in the territory that Hedley Dr. F. B. Erwin has long wanted to build good roads in, and the work is to be given mostly by Collingsworth county and her citizens. The road will be a drawing card for Hedley in that it will give the Quail country a better road to [32-4p] this place; also it will open up a highway from Oklahoma through to Hedley for auto travel, which at present is detoured around by Quanah and other points down the line. This alone means a big thing.

Let's build the road. A committee composed of T. R. Moreman, D. C. Moore, J. G. Mc-Dougal, G A. Wimberly and J. C. Wells has been appointed to solicit for the road, and they expect to get busy.

HEDLEY For The Homeseeker

To the man of moderate means who would like to farm on a moderate scale and who would diversify to the end of living at home for the home's sake, there is a section in the southeastern part of Donley county that holds out exceptional opportunities.

Hedley, a small but growing town on the main line of the Ft. Worth & Denver Railway, is the trade and business center of this favored agricultural district

Hedley has a population of about six hundred. It is located fourteen miles southeast of Clarendon, the countyseat. It's altitude is 2800, and in many respects it is a modern little village. Surrounding Hedley there is a trade territory containing multiplied thousands of acres of fertile lands. This area is dotted with prosperous homes, productive farms and cattle pastures, The science of agriculture is comparatively a new enterprise in these parts, but the last few years has demonstrated beyond all question that it is the natural home for the man of the soil. .

Perhaps not more than fifty per cent of the land in the Hedley territory is now under cultivation. Of the fifty per cent these feed crops, the territory a very substantial poultry, dairy. ing and stock farming section. The common soils of the country are sandy and dark sandy loam. a maximum depth of one hunbetween \$15 and \$20. Country Divided Into Two Factions By R. M. MILLER, Evanston, Ill.

In war times people think a little more deeply, sympathize a little more freely, and forget for the moment their own troubles in the great sorrows of others. In war times the country

seems divided into two great factions, not German-Austrians and allies, but rather pessimists and optimists. And in war times the pessimists are prone to brag. They poke cold, dismal noses into the societies of optimists and nod their wise old heads in an "I told you so" manner as unbearable as it is uncalled for.

Why is it that the optimist cannot hold his own? Is it because he is depending too much on the intellect? An intellect is a narrow thing, compassed by a great wall which it cannot overcome. The wall extends on one side around birth and hems in this little world on the opposite side by a thing we call death. How can the intellect be anything but narrow if it can see only within this circumscribed span of life?

Let's try faith for a while. Even if this is a scientific age, let us go beyond science and believe in, if we cannot understand, the ultimate good of all things. Let us learn in the examples of science itself that all things are working toward something higher and better than we know, that there is a mind infinitely wise and infinitely good which we cannot begin to fathom, but which we can only believe is true.

In the face of powerful evidence of infinite wisdom, what man with his narrow perspective will dare to say that evil is the conqueror? Who will dare to say that infinite goodness and wisdom cannot overcome the evil, cannot "wipe away all tears," cannot build nobler mansions from these poor, shattered lives lost to us, but not to their Maker in this awful sin of war?

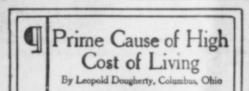

Sidereal Monarch of Summer Nights By Charles Nevers Holmes, Boston, Mass.

Like some huge sidereal dipper, spectacular and shining, hangs the famous seven-starred sky figure in the constellation Ursa Major, or the Greater Bear, against the bespangled

background of the dome of night. This huge sidereal dipper has been may be seen. given different names, as the Plow in England, Charles' Wain, and so on; and it possesses in common with other suns and constellations an apparent revolving movement around a pivotal sort of sun—the sun Alpha in Ursa Minor (the Lesser Bear), or Polaris, the North star, "friend of the mar-

Each of the seven conspicuous suns constituting this Great Dipper | Mound the ridge of ground which has an individual name, as, beginning with the end sun in the "handle," Benetnasch (a white sun), Mizar (white and emerald), Alioth (very bright), Megrez (yellow), Precda (yellow), Merak (greenish white), and flat country made flatter still. Dubhe (yellow). Of these seven sky gems, Merak and Dubhe are well known as the "pointers," pointing out the sidereal situation of Polaris, the

In addition to Merak and Dubhe, Alioth, Mizar and Benetnasch may also be called "pointers," for the curved line of these three suns points accurately toward the gigantic and glittering sun Arcturus, harbinger of spring, and the sidereal monarch of evening's summer skies.

Inefficiency is one of the prime causes of the high cost of living. If you pay a man 40 cents an hour for his work, and he loafs away two hours a day, which many do, you actually pay

people. Thus one faithless man spreads wide the loss, while everybody recoups by charging him more for his goods and for his time. While shiftless work may make a demand for more work, it is at the

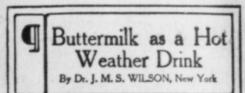

him \$3.20 for \$2.40 worth of work. And then to make up the loss you

charge the 80 cents to somebody else, and he passes over the debit to other

expense of everybody else, including the worker. This is plain as a practical matter, but as a moral question it is easily discernible. Inefficiency is dishonest, and dishonesty is costly. If a man is paid

for work which he doesn't do, there is a loss that the man himself must make good in some way. He may not pay back that day, but he will some day in some way, or God doesn't run this world.

If a man wastes the time for which he is paid, and thinks he makes

Buttermilk is a beverag which deserves every en couragement, especially as a hot-weather drink. Most of the fatty elements are making butter, but a num-

of other valuable nutritive qualities are left. These become even more | which Wellington fell back only a few gable when the buttermilk is taken with other foods. Thus buttermilk days before the great battle. ntains a certain amount of casein, which will enable one to make a most satisfying meal off a glass of buttermilk plus a very small amount its history, it is a most unprepossess of meat and potatoes.

It also has an excess of lactic bacteria, the foes of nearly all the harmful germs in our digestive systems, which give it a slightly laxative property. It has a decided acid flavor which makes it a thirst quencher.

As the fats have been extracted during the butter-making process, it has practically no body-heating properties. The casein is valuable because it supplies the repair elements needed to replace the wear and tear of muscular tissue.

Many Persons "Visit" Over Telephone By J. L. Hubbard, Minneapolis, Minn.

sels the little local train that still know the battle of Waterloo. ambled to Charleroi by way of Luttre used to stop at a wayside station that hundreds of thousands of British tourists know so ell-Braine-l'Alleud. What has been "fog of war" has effectively obscured; but in those days before the war, Braine-l'Alleud was the startingpoint of a pilgrimage few visitors to Brussels ever missed. It was the station nearest to the Field of Waterloo, says William Bateman in the London Magazine. From Braine-l'Alleud the pilgrim

would wander by one way or another to the shrine of his pilgrimage, "Le Lion de Waterloo," the great Belgian Lion cast in metal taken from the guns captured in the great battle, standing at the apex of a pyramid of earth some two hundred feet high that dominates the whole of the flat landscape for miles around. The Lion Mound stands as a monument to the memory of all the brave men who fell on that June day. Beneath the great bank of earth, as they tell you, rest the bones of thousands of soldiers of varied nationality. From the summit of the mound practically the whole area of Waterloo's battlefield

Probably there is not in the world a more striking memorial than this hill of memory rising from the rolling plain that stretches all around. Yet, to create it, one of the most important features of the battlefield was destroyed. In the building of the Lion formed part of the Mont St. Jean, so important a position in the battle, was removed, and the surrounding

You ascend the mound by a seem-

UST thirteen miles from Brus- battle, and by its name the Germans

Close at hand is undoubtedly the most beautiful monument on the whole field-and one of the most recent. It shows a wounded Imperial Eagle dying in defense of a broken standard. happening there in the past months It bears the simple legend "Aux Derniers Combatants de la Grande Armee, 18 Juin 1815." To the last of those who fought in the Grande Armee of Napoleon, to the gallant veterans of those wonderful soldiers the Little Corporal led through Europe, Frenchmen erected this striking monument only a few years since.

From Belle-Alliance the pilgrim's road led generally to the right along the narrow lane that runs through the very center of the battlefield to perhaps the most historic of all its remains, the Chateau de Hougomont. The story of this chateau is one that can never die.

Hougomont was one of the advanced posts of the British lines and the key of the British position. If it had fallen, the history of Europe would have been differently written.

At the time of the battle, Hougomont was an old, partly-ruined chateau, surrounded by numerous outbuildings. By the Great Duke's own orders the place was hurriedly turned into a fort. Here, throughout practically the whole day, the Coldstreamers, who fought the bulk of the defending force, held back the most violent attacks of the action.

With the circuit from the Mound to Belle-Alliance, and back to Hougomont, the tourist generally contented himself; but in Waterloo itself, and in Mont St. Jean, there are scores of memorials of the famous day.

Waterloo was the Duke of Wellington's headquarters from June 17th to the 19th. The church contains a bust of ingly endless series of steps until you | him, by Geefs, and numerous memorial

LOOKING OVER THE BATTLEFIELD .

from which the pedestal of the Lion of those who fell in the battle. rises. That pedestal bears the simple inscription-"June 18, 1815." The Lion itself, so your guide would tell

you, weighed twenty-eight tons. Many Monuments There. The Lion Mound occupies a sixe that was about the center of the British lines, a front pot two miles long. Behind lies the village of Mont St. Jean, and further back the little town of Waterloo, with the forest of Soignies near at hand. Before it stretches the flat field of Waterloo, waving with corn in the summer, deep in mud in removed in the process of the winter, across which two cobbled main roads run away to the south in the direction of Quatre Bras, from

The whole battlefield can be covered on foot in a few hours. But for ing spot. Ditches and muddy roads intersect the fields from which, even today, the plough will turn up rusty

arms and bleached bones. But the pilgrim can never forget that he is on unusual ground. The place bristles with monuments.

You descend from the Lion Mound. At its base stands a little group of houses, chief of which is the Museum Hotel, so named from the museum of Waterloo relics attached to it. A few hunderd yards to the east and you find r to the memory of

reach the platform at the summit | slabs and tablets to the memory

And in the midst of the sublime there is, only a few paces away from the church, the ridiculous. In a cottage garden stands a monument to the leg of Lord Uxbridge, who commanded the cavalry in the battle. The leg was amputated immediately after the victory, and lies buried here with an epitaph and a weeping widow

Saluting the Quarter-Deck.

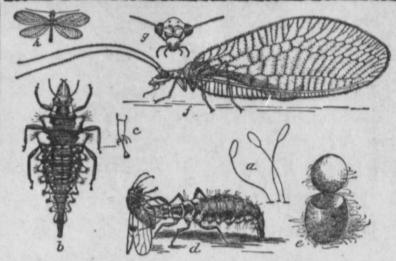

Every time an officer or a seaman goes upon the quarter-deck he salutes He never by any chance forgets this, one of the regular customs on board, says Pearson's Weekly. The quarter-deck is that part of the deck reserved by officers, and many people think that the reason why it is saluted is out of respect for those officers. The why and wherefore of the saluting has a far more interesting origin than that, however, and one has to go back hundreds of years to find the beginning of the custom. In the old days a crucifix used to stand on the quarter-deck. In those days all the sailors were Catholics, and, of course, every time they approached the crucifix they crossed themselves to show their reverence for the holy symbol. It is many a long year ago since the crucifix was there, but the custom of saluting the quarter-deck, which was a result of it, has been handed down in the navy ever since.

Investigate, Anyway. "Mr. Speaker," quoth the member of the house, "I would like to ask if there are any committees investigating any. thing?" "There are none," replied speaker. It was a moment of intense though suppressed excitement. move," exclaimed the member with deep feeling, "the appointment of a committee to investigate why nothing is being investigated. If the conditions are become such that there is

nothing to investigate, they should be

met with appropriate legislation."-Given Away. Bored Husband (after reluctant visit)-"Good-by, Mrs. Jackson-enjoyed however, has much myself immensely." Wife-"There

HUNDREDS OF DIFFERENT INSECT PESTS

Lace-Wing Fly-A, Eggs; B, Larva; C, Foot; D, Larva Devouring Pear Tree Psylla; E, Cocoon; G, Head; F and H, Adult.

A field of red clover in full bloom is alive with insects. Such a profusion of insect visitants, both as regards number of individuals and number of species at one and the same time is afforded by no other plant that we know of, with the possible exception of alfalfa. In the clover fields of our experimental farm we have taken two hundred species of insects-not all of them injurious, though more than half of them feed on the plant, adding to these the other species that have been listed as feeding on clovers, vetches and alfalfa, it is seen that these plants are food for more than two hundred different kinds of insects. A hundred or more are predaceous or parasitic on these clover insects, or else feed on animal or vegetable matter in the soil of the clover field.

No part of the plant escapes attack. The roots are eaten by the larvae and the beetles of the root-borer, as well as by those of half a dozen other species, and are drained of their sap by the mealy bug. The stem is hollowed out by the common stem-borer.

Clover Root Borer-Beetle, Larva and Pupa.

Both the stems and the leaves are pierced by many hemipterous insects, especially aphids and jassids, and are eaten by a great variety of caterpillars, beetles and grasshoppers, as are also the heads of the flowers. The ovule is destroyed by the maggot of the seed-midge, and the developing seed is eaten out by the seed-chalcid. Even the hay is the special food of a certain caterpillar, hence called the clover hav worm.

Some of the insects of the clover field are, of course, beneficial. Such are those that pollinize the flowersbumblebees and, to some extent, honey bees, as well as those that act as checks on the injurious insects.

Most of the clover insects are not limited to clover, but to other food plants as well. The seed-midge and the seed-caterpillar are, however, confined to the clovers, and the seed chalcid to clovers and alfalfa so far as known. The root-borer is said to eat peas as well as clover. The hayworm has been found only on hay as yet, but the moth has been raised from masses of dead grape leaves taken in a vineyard. The leaf weevil is reported from beans and timothy, as well as clover and alfalfa. The clover louse has been a pest of the worst kind on peas and has a long list of food plants. Of the less important clover insects, a few have no other food plant; but the majority can easily maintain their existence when no clover is at hand.

The combined efforts of all the insects are sufficient to reduce the hay crop materially every year. Aside from the occasional conspicuous injury, there is every year a steady drain on the plant through the attacks of insects. This annual drain is not noticed for the very reason that it occurs every year. If we could keep all the insects out of the clover field,

Eggs, Larva and Pupa of Cloverseed Chalcid.

we should get more hay. If we could exclude all except the bumblebees and the honeybees, we should undoubtedly get an immense increase in the yield of seed.

Those who raise clover seed on a commercial scale owe their success to methods which operate chiefly against the insect enemies of seed-whether the growers are aware of it or not. Under the same conditions of soil and climate, one man is able to get a good crop of seed and his nearest neighbor

Many farmers do not attempt to raise their own clover seed. Those who do, get more or less of a crop according to effcumstances. In the black soil of the corn belt, one and one-half bushels of seed per acre is about the average yield for clover; the soil is not the best for this crop. the soil is not the best for this crop. weed crop. Have the plows bright. Frequently, too little seed is sown, and the harrows and the disks mended and always the seed insects ravage the all ready to use.

crop unless certain precautions are taken. Many influences combine to reduce the crop of seed. The worst injuries to the seed are insidious in their nature, and are caused by insects. These injuries are of three classes: (1) Those of a negative kind, due to lack of pollination. (2) The positive injuries due to miscellaneous insects that eat clover heads in an incidental way. (3) The postive injuries caused by insects that feed solely upon clover seeds or florets. The first two groups are relatively unimportant in comparison with the last

The importance of the bumblebee in the pollination of red clover is so well established as to need no discussion. That of the honeybee, however, is not sufficiently recognized. The honeybee pollinizes clover to some extent, even though its tongue is two millimeters shorter than the average coralla tube. A field of red clover is always thronged with honeybees if any of them are being kept within a mile or two of the place; and these bees secure nectar from flowers that are undersized, especially in times of drought, when most of the flowers are smaller than usual; also from flowers that secrete a copious amount of nectar. The bees, bumblebees especially, should be protected always. They are the best friends of the clover grower.

Early pasturing is the secret of a good seed crop, as the growers in New York, Ohio, Michigan and other states have found. The explanation is sim-The fact is that pasturing gives a good seed crop for the reason that it delays the heading of the plant until a time when the seed-midges and seed chalcids are no longer on the wing and laying eggs. When precautions are not taken against these pests, they can be counted upon every year to destroy most of the clover seed. In some localities these two insects eat from 50 to 75 per cent of the red clover seed every year without

hindrance. The farmer gets only what the insects leave. If he gets two bushels of seed to the acre, the insects have, perhaps, already eaten from two to six bushels off the same acre.

CARE FOR THE LITTLE CHICKS

Especial Attention Must be Given During First Ten Days-Essentials for Successful Brooding.

(By H. L. KEMPSTER, Missouri Experiment Station.) New hatched chicks require special food and care, especially during the first ten days. After they are ten days old the following mixture should be kept in a trough where the chicks can run to it at all times. Thirty parts cornmeal, 30 parts wheat midlings, 10 parts pure beef scrap sifted fine and one part bone meal, and finely cut green food.

As the chicks increase in size the mixed chick food can be replaced by coarser grains. At this stage it may be advisable to feed a wet mash once a day, about 4 p. m. The chicks should be given no more feed than they will eat up before going to As they increase in size they should have access to dry mash in a hopper, where they can help them-

selves. Some essentials for successful brooding are, clean food, consisting of both cracked grains and ground feed; animal food, such as milk, buttermilk or commercial beef scraps; extra bone-making material, such as bonemeal; clear water; plenty of shade; comfortable dry quarters; freedom from lice, and access to clean, fresh earth.

European Food Supply. This year the entire world will look very largely to the United States for its supply of food. Every possible ef-

F. C. Howe On The Advantages of Free Ports

Mr. F. C. Howe, Federal Commissioner of Immigration, who is one of the best American authorities on marine commerce, in discussing the relation of free ports to the development of sea trade said in part:

"Ships will go hundreds of miles out of their way to avoid ports surrounded by a tariff wall. The only way, avoid ports surrounded by a tariff wall. The only way, therefore, for a country with a tariff to compete in the shipping world with a free trade country is to establish free ports at strategical points along its coast line. Germany has done so, and in a comparatively short period has built up a carrying trade which before the war was released threatening England's supremacy. Hamburger threatening England's supremacy. seriously threatening England's supremacy. Hamburg, one of the three German free ports, now ranks as the second greatest seaport in the world, its total foreign commerce in 1913 being only \$6,000,000 under that

The free port would offer great opportunity for financial operations, now The free port would oder great opportunity for mancial operations, now made possible by the recent currency act. It would stimulate international banking, and would tend to shift the financial center of the world to this country. And America, by the logic of events, has become the natural center for the world's financing, just as London became that center several centuries ago, when it shifted from the cities of the Netherlands. But the financial will only move to this country when it becomes a clearing hear ago, when it shifted from the cross of the returning. But the financial center will only move to this country when it becomes a clearing house of goods as well as of money. For credit the world over is created by currently created wealth in transit or change so that even our financial expansion ently created wealth in trainint or change so that even our mancial expansion is dependent upon the opening up of American ports to the clearance of the wealth of the world. A port should not operate to yield a return on the investment, but to develop the prosperity of the country." In recapitulating the advantages, Mr. Howe brings out the importance of the free port in developing our shipping, and linking us with South America, Asia and Africa. and then concludes:

"The most important gain is the direct gain to America. It will cheapen commodities by bringing great quantities of goods to our doors for importation or export, as trade needs demand. It will stimulate the growth of exporting or export, as trace or exporting houses, which can hold goods for an indefinite period without the payment of tariff dues (often equal to the cost of the article itself) for disposal to meet the trade demands of the whole world. It will upbuild international credit and shift to America an increasing and ultimately a predominant share in

and shift to America is the natural country to be the counter of the world. Its seaccasts face every other continent; it is the greatest of all reservoirs of raw materials and foodstuffs. In iron and steel and standardized producof raw internal and roots and in hold and steel and standardized production it is in a position to compete with the world. But international trade (and this is always overlooked) must be reciprocal. It cannot be one-sided and credit balances cannot for any prolonged period be paid in gold. They can only be paid by exchange of wealth."

Ben B. Cain On Good Work of the Farmers' Union

For years the Farmers' Union has endeavored to bring about a cotton warehouse and marketing system. Their slogan has been co-operation and education.. Those familiar with the work of that organization know that its members are in hearty accord with the movement to build warehouses. They have been building warehouses for years past. But they also know that it is going to take organization and persistent energetic effort to in duce the people to hold cotton in the warehouses. It can only become a reality by showing the benefits to be derived. The farmer must be convinced that the expens of housing and holding his cotton plus the interest he is

compelled to pay for morey borrowed to tide him over, is not in excess of the probable increase in the price of cotton during the same period. The suffering and many deaths.-New York farmer cannot afford to speculate. He must play the safe game. His big brother in business must manifest a true spirit of co-operation; that is, he must do as he expects of the farmer. He must make some sacrifice when it comes to cotton. He must assist in building warehouses without expecting to make money from their operation. Then, too, he must assist in getting the lowest possible interest rate on cotton as collateral, if stored in these

It would seem that a receipt issued under this law furnishes all the safeguards necessary. The banks have approved it, hence there are no objections except such as may be raised by the grower, the ginner and the warehouse man I shall not attempt in this article to answer the objections which have been raised. I do not believe the three samples which must not exceed 51-3 ounces each, or a total of one pound, would exceed the amount taken out of the bale under the present sampling method, without taking into consideration the benefit which comes to the grower and buyer from being able to get a fair correct sample and having the cotton completely covered. Indeed, the three samples taken are not lost to the buyer. One of them must be preserved by the ginner and eventually sold for the credit of the owner and the other two samples are given to the owner, one of which he must deposit with the cot ton if stored and the other to be used by him as he sees fit.

It may be admitted that some extra expense over present methods is oc unless I keep on seeing you.
Attractive Thing — Why shouldn't casioned by the better wrapping and the sampling but this should not exceed fifty cents per bale. It is worth fifty cents per bale for the grower to have a bonded sample if he never uses it except for street sales; tecause under present methods his cotton is not only cut and disfigured, causing some los from bad order, but he is at the mercy of the man who takes the sample and

E. P. Ripley

On Relation of Railroads and People.

The industrial leaders of this nation are talking to the public face to face through the columns of this paper The time was when if a corporation had anything to say to the people they sent a hired hand, whispered it through a lawyer or employed a lobbyist to explain it to the legislature, but the men who know and the men who do are now talking over the fence to the man who plows.

When the leading business men of this nation get "back to the soil" with their problems, strife and dissension will disappear, for when men look into each other's faces and smile there is a better day coming.

Mr. E. P. Ripley, president of the Santa Fe Railroad. when asked to give his views in reference to relations existing between the

railroad and the public said in part:

"Frequently we hear statements to the effect that these relations are improving, that the era of railroad baiting has passed and that public sentiment now favors treating the railroad, fairly. As yet this change in public sentiment, if any such there be, is not effective in results.

It is true that in the legislatures of the southwestern states during the

past winter there were fewer unreasonable and unreasoning laws than usual, but a consideration of the hestile bills introduce show there is still reason for much disquiet even though they we more or less of a majority.

Moreover, the idea that the railroads have been has not seem to prevail in the offices of the State Railroad Com-seem to cherish a notion that their business is not to act as between the railroads and the people, but which proceed the railroads are able to take care of themselves and act as attorney for the people even though in so deing to the railroads. It requires no argument to demons are entitled to justice equally with other citizens an have not received it and are not receiving it is proof. That they have practically no recourse in the

The situation therefore is that the people, through must elect whether the services of the railroads shall rated or not; and it requires no fortune teller or sooth in the long run the service will take the class that is The natual competition between the railroad

SAY! did you ever have to leave Aunt Miranda explained; "just make the soothing influence of your yourselves at home, children." own rattling radiators in the Big City and go romping off to a rich relation's car for another minute, then he turned for the Christmas week-end?

Well, don't do it, if you can help it, John?" and if you can't help it get back home as soon as possible.

When Uncle Gilbert Hawley sent us an invitation to run up to Hawleysville for a day or two I looked at York for your nephew—nix! Where's Peaches and she looked at me—then your family pride?" we both looked out of the window.

We knew what a wildly hilarious time we'd have splashing out small talk to the collection of human brica-brac always to be found at Uncle Gilbert's, but what is one going to do when the richest old gink in the family waves a beckoning arm?

I'll tell you what one is going to do one is going to take to one's O'Sullivan's, beat it rapidly to a choo-choo and float into Uncle Gilbert's presence with business of being tickled to death-that's what one is going to do.

You know nature has a few immutable laws and one is that even a rich old uncle must in the full course of time pass on and leave nephews and nieces. Leave them what? Ah! that's it! Where's that time table?

Hawleysville is about forty miles away on the P. D. & Q., and it is some burg. Uncle Gilbert wrote it all him-

Uncle Gilbert has nearly all the money there is in the world. Every time he signs a check a national bank touch with the quadruplex while the goes out of existence. He tried to apex of the left knee is pressed over count it all once, but he sprained his the spark coil and the right ankle wrists and had to stop. On the level, when he goes into a

bank all the government bonds get up and yell, "Hello, papa!"

When he cuts coupons it's like a sheep shearing.

He has muscles all over him like a prize fighter just from lifting mort-

When Peaches and I finally reached car?" the Hawley mansion on the hill we found there a scene of great excitement. Old and distant relations were bustling up and down the stone steps, talking in whispers; servants with scared faces and popping eyes were peeping around the corner of the house and in the roadway in front of a sobbing automobile stood Uncle Gilbert and Aunt Miranda, made up to expedition at the Pole.

After the formal greetings we were soon put hep to the facts in the case. "You see, John," bubbled Aunt Miranda, while a pair of great green goggles danced an accompaniment on her

Uncle Gilbert continued to eye the to me and said, "Want to try it,

"Nix, Uncle Gilbert," I protested. "What would the townspeople say? You with a new motor car, afraid to run it yourself, had to send to New

"My family pride is all right," answered Uncle Gilbert; "but there's a lot of contraptions in that machine I don't seem to recognize."

"Oh, thats' all right: you're a handy little guy with machinery," I reminded him. "Hop in now and break forth. Don't let the public think that you're afraid to blow a bubble through the streets of your native town. The rubber sweater buttoned to the chin and the Dutch awning over the forehead for yours, and on your way!"

Reluctantly Uncle Gilbert and Aunt Miranda climbed into the kerosene wagon and I gave him his final in-

"Now, Uncle Gilbert," I said, "grab that wheel in front of you firmly with both hands and put one foot on the accelerator. Now put the other foot on the rheostat and let the left elbow gently rest on the deodizer. Keep the rubber tube connecting with the automatic fog whistle closely between the teeth and let the right elbow be in works the condenser."

Uncle Gilbert grunted. "Why don't you put my left shoulder blade to work?" he muttered. "It's the only part of my anatomy that hasn't got

"John," whispered the nervous Aunt Miranda, "do you really think your Uncle Gilbert knows enough about the

"Sure," I answered, and I was very serious about it. "Now, Uncle Gilbert, keep both eyes on the road in front of you and the rest of your face in the wagon. Start the driving wheels, repeat slowly the name of your favorite coroner and leave the rest to fate!" And away they started in the Whiz Wagon.

Before they had rolled along for half look like two members of the Peary a mile through the town, the machine suddenly began to breathe fast and then, all of a sudden, it choked up and stopped.

"Will it explode?" whispered Aunt

Miranda, pleadingly.
"No," said Uncle Gilbert, jumping nose; "your Uncle Gilbert loaned the out; "I think the cosmopolitan has money to a man to open a garage in buckled with the trapezoid," and then Hawleysville. But automobilists never with a monkey wrench, he crawled un-

Aunt Miranda Wanted to Know for the Tenth Time If It Would Explode.

hoarse "Toot Toots!" from the horn, whereupon the woman in the road threw up both hands and leaped for the man. The man threw up both feet and leaped for the fence.

The last Aunt Miranda saw of them they were entering their modest home neck and neck, and the divorce court lost a bet.

Then the machine began to climb a telegraph pole, and as it ran down the other side Aunt Miranda wanted to know for the tenth time if it would

"How did John tell you to handle it?" she shricked, as the Rowdy Cart bit its way through a stone fence and began to dance a two-step over a strange man's lawn. "The only way to handle this in-

fernal machine is to soak it in water," yelled Uncle Gilbert as they hit the main road again. "I don't see what family pride has to do with it; there isn't a soul look-

ing," moaned Aunt Miranda. "Oh! if I could only be arrested for fast riding and get this thing stoppe wailed Uncle Gilbert as they headed for the river.

"Let me out! Let me out!" pleaded Aunt Miranda, and the machine seemed to hear her, for it certainly obliged the lady.

I found out afterwards that in order to make good with Aunt Miranda the machine jumped up in the air and turned a double handspring, during the course of which friend uncle and his wife fell out and landed in the most generous mudpuddle in that part of the state.

Then the Buzz Buggy turned around and barked at them and with an excited wag of its tail scooted for home and left them flat.

Late that evening Uncle Gilbert explained that there would have been no trouble at all if he had removed a defective spark plug.

But I think if Uncle Gilbert would go to Doctor Leiser and have his parsimony removed he'd have more fun as he breezes through life.

Peaches thinks just as I do, but she won't say it out loud. She's a fox,

It contains the rich elements from Wheat and Barley in form for easy digestion; and so quickly absorbed that it makes itself felt in body and brain.

"There's a Reason"

A Physician on Food.

A physician of Portland, Oregon, has

views about food. He says:
"I have always believed that the duty
of the physician does not cease with treating the sick, but that we owe it to humanity to teach them how to protect their health especially by hygienic and

dietetic laws.
"With such a feeling as to my duty I take great pleasure in saying to the public that in my own experience and also from personal observation I have found no food to equal Grape-Nuts and that I find there is almost no limit to the great benefit this food will bring when used in all cases of sickness and

"It is my experience that no physical condition forbids the use of Grape-Nuts, To persons in health there is nothing To persons in health there is nothing so nourishing and acceptable to the stomach especially at breakfast to start the machinery of the human system on the day's work. In cases of indigestion I know that a complete breakfast can be made of Grape-Nuts and cream and I think it is necessary not to overload the stomach at the morning meal. I also know the great morning meal. I also know the great value of Grape-Nuts when the stomach

is too weak to digest other food. "This is written after an experience of more than 20 years treating all manner of chronic and acute diseases, and the letter is written voluntarily on my part without any request for it." Name given by Postum Co., Battle Creek.

Look in pkgs. for the famous little book, "The Road to Wellville."

SYNOPSIS. -10-

Is the New York home of James Brood, his son, Frederic, receives a wireless from him. Frederic tells Lydia Desmond, his fancee, that the message announces his father's marriage, and orders Mrs. Desmond, the housekeeper and Lydia's mother, to prepare the house for an immediate home-coming. Brood and his bride arrive. She wins Frederic's liking at first meeting. Brood shows dislike and veiled hostility to his son. Lydia and Mrs. Brood met in the jade-room, where Lydia works as Brood's secretary. Mrs. Brood is startled by the appearance of Ranjab, Brood's Hindu servant. She makes changes in the household and gains her husband's consent to send Mrs. Desmond and Lydia away. She fascinates Frederic. She begins to fear Ranjab in his uncanny appearances and disappearances, and Frederic, remembering his father's East Indian stories and firm belief in magic, fears unknown evil. Ranjab performs feats of magic for Dawes and Riggs. Frederic's father, jealous, unjustly orders his son from the dinner table as drunk. Brood tells the story of Ranjab's life to his guests. "He killed a woman's who was unfaithful to him. Yvonne plays with Frederic's infatuation for her. Her husband warns her that the thing must not go on. She tells him that he still loves his dead wife, whom he drove from his home, through her, fvonne. Yvonne plays with Brood, Frederic and Lydia as with figures on a chess board. Brood, madly jealous, tells Lydia that Frederic is not his son, and that he has brought him up to kill his happiness at the proper time with this knowledge. Frederic's infatuation for her again, Lydia goes to beg Brood not to tell Frederic of his unhappy parentage, but is turned from her purpose. Frederic, at dinner with Dawes and Riggs, is seized with an impulse of filial duty, and under a queer impression that he is influenced by Ranjab's will, hunts up his father, who gives him the cut direct. in the hope held out by her mother as they sat far into the night and disbut disaster, and she could think of nothing but her own lamentable weakthat might have made the present situlight of the situation, however, propheafter he had slept over his grievance, less exaggerated. She promised to go with Lydia to see James Brood in the most earnest opposition. and received instructions not to awak-

CHAPTER XV.

A Mother Intervenes.

Long past midnight the telephone in the Desmond apartment rang sharply, insistently. Lydia, who had just fallen asleep, awoke with a start and sat bolt upright in her bed. A clammy perspiration broke out all over her body. She knew there had been a catastrophe.

She sat there chattering until she heard her mother's door open and then the click of the receiver as it was lifted from the hook. Then she put her fingers to her ears and closed her eyes. The very worst had happened, she was sure of it. The blow had fallen. The only thought that seared her brain was that she had failed him, failed him miserably in the crisis. Oh. if she could only reclaim that lost hour of indecision and cowardice!

The light in the hallway suddenly smote her in the face and she realized for the first time that her eyes were rail. tightly closed as if to shut out some abhorrent sight.

"Lydia!" Her mother was standing in the open door "Oh, you are awake?" Mrs. Desmond stared in amazement at the girl's figure.

What is it, mother? Tell me what has happened? Is he-

"He wants to speak to you. He is on the wire. I-I- His voice sounds ing, waiting for a chance to speak to

very queer-

The girl sprang out of bed and hurried to the telephone.

"Don't go away, mother-stay here," she cried as she sped past the whiteclad figure in the doorway. Mrs. Desmond flattened herself against the wall and remained there as motionless as Good morning, gentlemen. I trust you a statue, her somber gaze fixed on her

"Yes, Frederic-it is I-Lydia. What is it, dear?" Her voice was high and

His voice came jerking over the wire, sharp and querulous. She closed her eyes in anticipation of the blow, her body rigid.

"I'm sorry to disturb you," he was saying, "but I just had to call you The words were disjointed, as if he forced them from his lips one by one in a supreme effort at coher-

"Yes, yes-it's all right. I don't excitement she could not conceal. Netmind. You did right. What is it?" ther spoke for a moment. "I want you to release me from my promise."

"You mean—the promise—but, Freddy, I can't release you. I love you. I will be your wife, no matter what has

happened, no matter-"Oh, Lord, Lyddy-it isn't that! It's the other—the promise to say nothing

to my father-"O-oh!" she sighed weakly, a vast

wave of relief almost suffocating her. "He has made it impossible for me to go on without-

'Where are you, Frederic?" she cried, in sudden alarm.

"Oh, I'm all right. I shan't go home, you may be sure of that. Tomorrow

will be time enough." "Where are you? I must know.

How can I reach you by telephone-"Don't be frightened, dear. It's got to be, that's all. It might as well be ended now as later on. The last straw was laid on tonight. Now, don't ask questions. I'll see you in the morning. Good-night, sweetheart. I've-I've told you that I can't stick to my promise. You'll understand. I couldn't rest until I'd told you and heard your dear voice. Forgive me for calling you up. Tell your mother I'm sorry. Good-

"Freddy, listen to me! You must wait until I-Oh!" He had hung up ly?" cried Yvonne, angrily. the receiver. She heard the whir of

ously "If what I fear should come to pass,

he will not stay in this house another hour. He will go forth from it, cursing James Brood with all the hatred think of you?"

"No, it isn't at all necessary. sides, I've changed my mind. I'd like you to remain. I do not want to mystify you any further, Mrs. Desmond, in his face and cried out, unafraid, 'I'm but I now confess to you that I am glad you call me a bastard! By God, losing my courage. Don't ask me to I'd rather be one than to be your son. tell you why, but-"

"I suppose it is the custom with to be proud of-a real father." those who play with fire. They shrink when it burns them."

Mrs. Brood looked at her steadily for a long time without speaking. The rebellious, sullen expression died out of her eyes. She sighed deeply, almost despairingly.

"I am sorry you think ill of me, yet I cannot blame you for considering me to be a-a-I'll not say it. Mrs. Desmond, I-I wish I had never come to the morning, and to plead with him to this house."

be merciful to the boy she was to "Permit me to echo your words." "You will never be able to understand me. And, after all, why should girl at first insisted on going over to see him that night, notwithstanding I care? You are nothing to me. You the hour, and was dissuaded only after are merely a good woman who has no real object in life. You-" It was four o'clock before they went

"No real object in life?" back to bed and long after five before "Precisely. Sit down. We will wait here together, if you please. I-I am worried. I think I rather like to feel Mrs. Desmond, utterly exhausted, that you are here with me. You see, was the first to awake. She glanced at the little clock on her dressing-table the crisis has come."

"You know, of course, that he turned one wife out of this house, Mrs. While she was dressing, the little maid Brood," said Mrs. Desmond, deliberservant brought in her coffee and toast ately. Something like terror leaped into the other's eyes. The watcher expe-

rienced an incomprehensible feeling of pity for her-she who had been despising her so fiercely the instant before "He-he will not turn me out," murmured Yvonne, and suddenly began pacing the floor, her hands clinched.

"I'd Like You to Remain."

Stopping abruptly in front of the other woman, she exclaimed: "He made a great mistake in driving that other woman out. He is not likely to repeat it, Mrs. Desmond."

"Yes-I think he did make a mistake," said Mrs. Desmond, calmly. "But he does not think so. He is a man of iron. He is unbending." "He is a wonderful man-a great,

splendid man," cried Yvonne, flercely. "It is I-Yvonne Lestrange-who proclaim it to the world. I cannot bear to see him suffer. I-"Then why do you-"

"be d-d" instead, so narrow was his escape from having his nose banged. Mrs. Brood flushed to the roots of He emphasized the declaration by her hair. "I do not want to appear unfair to my husband, but I declare The two women faced each other. to you. Mrs. Desmond, that Frederic is For the first time since she had know fully justified in the attitude he has Yvonne Brood Mrs. Desmond observed taken this morning. His father hua high touch of color in her cheeks. millated him last night in a manner Her beautiful eyes were alive with an that made forbearance impossible. That much I must say for Frederic. And permit me to add, from my soul, "You are accountable for this, Mrs. that he is vastly more sinned against Brood," said Lydia Desmond's mother, than sinning."

"I can readily believe that, Mrs.

storm of indignant protest. Instead, Brood." "This morning Frederic came into the breakfast room while we were having coffee. You look surprised. Yes, I was having breakfast with my husher coolness there was a perceptible band. I knew that Frederic would That was my reason. When I heard him in the hall I sent the servants out of the dining-room. He had spent the night with a friend. His to do so when he came here this first words on entering the room were these-I shall never forget them: 'Last night I thought I loved you, father, but I have come home just to tell you "I think he has them on," said that I hate you. I can't stay in this house another day. I'm going to get out. But I just wanted you to know moment in perplexity. Then her eyes flashed dangerously. "I do not think that I thought I loved you last night, as a son should love a father. I just you misunderstood me, Mrs. Brood. wanted you to know it.' He did not even look at me, Mrs. Desmond. had touched th I don't believe he knew I was there. unhappy question "I am not accustomed to that tene I shall never forget the look in James Brood's face. He sprang to his feet, and I've never seen such a look of rage. that his soul can possess. And now, I thought he was going to strike Fred-Mrs. Brood, shall I tell you what I eric and I think I screamed-just a little scream, of course. I was so terrified. But he only said—and it was horrible the way he said it—'You fool you bastard!' And Frederic laughed

> It would at least give me something "Good heaven!" fell from Mrs. Desmond's white lips.

> Yvonne seemed to have paused to catch her breath. Her breast heaved convulsively, the grip of her hands tightened on the arms of the chair. Suddenly she resumed her recital, but her voice was hoarse and tremulous.

> "I was terribly frightened, I thought of calling out to Jones, but I-I had no voice! Ah, you have never seen two angry men waiting to spring at each other's throats, Mrs. Desmond. My husband suddenly regained control of himself. He was very calm. 'Come with me,' he said to Frederic. "This is not the place to wash our filthy family linen. You say you want some thing to be proud of. Well, you shall have your wish. Come to my study.' And they went away together, neither speaking a word to me-they did not even glance in my direction. They went up the stairs. I heard the door close behind them-away up there. That was half an hour ago. I have been waiting, too-waiting as you are waiting now-to comfort Frederic when he comes out of that room a wreck."

> Mrs. Desmond started up, an incredilous look in her eyes.

"You are taking his side? You are against your husband? Oh, now I know the kind of woman you are. I know-'

"Peace! You do not know the kind of woman I am. You never will know. Yes, I shall take sides with Frederic." "You do not love your husband!" A strange, unfathomable smile came

into Yvonne's face and stayed there. Mrs. Desmond experienced the same odd feeling she had had years ago on first seeing the Sphinx. She was suddenly confronted by an unsolvable mystery. "He shall not drive me out of his

house, Mrs. Desmond," was her answer to the challenge. A door slammed in the upper re-

gions of the house. Both women started to their feet. "It is over," breathed Yvonne, with

a tremulous sigh. 'We shall see how well they were able to take care of themselves, Mrs. Brood," said Mrs. Desmond in a low

"We shall see-yes," said the other, mechanically. Suddenly she turned on the tall, accusing figure beside her. "Go away! Go now! I command you to go. This is our affair, Mrs. Desmond. You are not needed here. You were too late, as you say. I beg toward the door. As she was about to place her hand on the knob it was opened from the other side, and Ran-

jab stood before them. "Sahib begs to be excused, Mrs. Desmond. He is just going out." "Going out?" cried Yvonne, who

shrunk back into the room "Yes, sahibah. You will please excuse, Mrs. Desmond. He regret very much.'

Mrs. Desmond passed slowly through the door, which he held open for her. As she passed by the Hindu she looked full into his dark, expressive eyes, and there was a question in hers. He did not speak, but she read the answer as if it were on a printed page. Her shoulders drooped.

She went back to Lydia.

CHAPTER XVI.

"To My Own Sweetheart." When James Brood and Frederic left the dining-room nearly an hour prior to the departure of Mrs. Desmond, there was in the mind of each the resolution to make short work of the coming interview. Each knew that the time had arrived for the parting of the ways, and neither had the least desire to prolong the suspense.

The study door was closed. James Brood put his hand on the knob, but, before turning it, faced the young man with an odd mixture of anger and pity in his eyes.

"Perhaps it would be had nothing more to er," he said, with a changed my mind. thing to you that I-" "Has it got Yvonne and me

his new-found inside," he said in have warned th

so prophetic Now it was laid bah an after that reckless, delit It had been in James

Brood advanced a few steps toward him. In the subdued light of the room his features were not clearly distinguishable. His face was gray and shadowy; only the eyes were sharply defined. They glowed like points of light, unflickering.

"I shall be sorry for Lydia," he said levelly.

"You needn't be," said Frederic hotly. "She understands everything." "Have you told her that you love her and no one else? "Certainly!"

"Then you have lied to her." There was silence-tense silence.

Do you expect me to strike you for that?" came at last from Frederic's lips, low and menacing.

You have always considered yourself to be my son, haven't you?" pursued Brood deliberately. "Can you say to me that you have behaved of late as a son should-

"Wait! We'll settle that point right now. I did lose my head. Head, I say, not heart. I shan't attempt to explain -I can't, for that matter. As for -well, she's as good as gold. She understands me better than I understand myself. She knows that even honest men lose their heads sometimes. I can say to you now that I would sooner have cut my own throat than to do more than envy you the possession of one you do not deyour son. I have no apology to make for my-we'll call it infatuation. I shall only admit that it has existed and that I have despaired. As God is my witness, I have never loved any one but Lydia. I have given her pain, and the amazing part of it is that I can't help myself. Naturally, you can't understand what it all means. You are not a young man any longer. You cannot understand."

"Good God!" burst from Brood's lips. Then he laughed aloud-grotesquely. "Yvonne is the most wonderful thing that has ever come into my life. adored her the instant I saw her. I have felt sometimes that I knew her a thousand years ago. I have felt that I loved her a thousand years ago." A calm seriousness now attended his speech, in direct contrast to the violent mood that had gone before. "I have thought of little else but her. I confess it to you. But through it all there has never been an instant in which I did not worship Lydia Desmond. I-I do not pretend to account for it. It

is beyond me." Brood waited patiently to the end. "Your mother before you had a some-what similar affliction," he said, still in the steady, repressed voice. "Perhaps it is a gift-a convenient giftthis ability to worship without effort."

"Better leave my mother out of it," said Frederic sarcastically. A look of wonder leaped to his eyes. "That's the first time you've condescended to acknowledge that I ever had a

mother." Brood's smile was deadly. "If you have anything more to say to me, you would better get it over with. Purge your soul of all the gall that embitters it. I grant you that privilege. Take your innings."

A spasm of pain crossed Frederic's face. "Yes, I am entitled to my innings. I'll go back to what I said downstairs. I thought I loved and honored you last night. I would have forgiven everything if you had granted me a friendly-friendly, that's all-just a friendly word. You denied-"

"I suppose you want me to believe

that it was love for me that brought other ironically. "I don't expect you to believe any-

thing. I was lonely. I wanted to be derstand how lonely I've been all my life? Can't you understand how hungry I am for the affection that every other boy I've known has had from his parents? I've never asked you about for me to tell you the truth about this my mother. I used to wonder a good deal. Every other boy had a mother. I with you. I am not your father. You never had one. I couldn't understand. are no longer wonder. I know now that she must have hated you with all the that my mother was not a good women strength of her soul. God, how she an, I want to go on record in advance must have hated to feel the touch of of anything you may say, as being your hands upon her body! Something glad that I am her son no matter who tells me she left you, and if she did, I my father was. I am glad that she hope she afterwards found someone loved me because I was her child, and who-but no, I won't say it. Even now if you are not my father then I still I haven't the heart to hurt you by say- have the joy of knowing that she loved ing that." He stopped, choking up with the rush of bitter words. "Well. broke off the bitter sentence and with why don't you say something?"

"I'm giving you your innings. Go on?" said Brood softly. "She must have loved you once or

she wouldn't have married you. She must have loved you or I wouldn't be here in this world. She—" "Ha!" came sharply from Brood's stiff lips.

MISTAKES OCCUR IN BEST OF FAMILIES

Every week this paper, and every other paper in the country, has a number of errors-typo graphical and otherwise. That's people think the editor should, have been a blacksmith. But what of the editor's viewpoint? If there's one thing better calto get death notices and weather Amarillo July 29 and 30. predictions mixed so that the thing comes out in the paper "Mrs William Williams died last here Saturday. night. She has gone where it is -116 degrees in the shade and morrow."-well, we'd like to scribers concerning the eternal know what it is. Maybe you think it is pleasant to walk down the street and hear some fellow with a head like a German pan cake and a brain like an addled egg, holding up the sheet to caustic criticism and the editor to consciousless scorpa Maybe you think it is nice to hear some member of the vacuum family remark that the editor must make up his paper with a shovel! Or some Pinhead Percy wonder why the editor doesn't learn how to set type! It is excruciatingly delicious when an item announce ing that Miss Mary Merryvale is to be led to the alter gets into the paper as "led by a halter! Funny, isn't it? Yes it is. It depends on the point of view. Some people may think a para lyzed man with the itch is the height of the ridiculous, but what does the paralyzed man think about it? We are all apt to make mistakes. What would you think if the editor put some of your mistakes into the paper? Remember when---, who shaves bimself, came to church with a fine patch of whiskers on his chin which he had overlooked And when Miss --- let the shoe string on her switch hang down her back? And how Elder --- caught the tail of his long coat over the neck of the bottle in his hind pocket and went down the street showing that some times the strongest in faith are the weakest in flesh? But we have no intention of telling these things. As an editor we wouldn't be much of a hair pin if we were bent that way. Just remember, though, that we are all prone to errors, and the next time you see something in the paper which you regard as a sure sign of the editor's feeble nindedness, just say the devit did it, and by heck, we'll back

OUR PUBLIC FORUM

Clarence Ousie On the Law of Supply a d Demand

I am amazed that so long the cotton industry should have suffered the grave disadvantage of an entirely onesided representation concerning supply and demand. We need not deceive ourselves with the notion that by any act of legislation or any concert of action we'can suspend the trade law of supply and demand, but we cannot ascertain economic value without knowing cemand as well as supply. When you plant your cotton in the spring the Federal Government counts our acres and publishes to the consuming world the precise figures of cotton acre age in the United States which furnishes two thirds of the production and thereby constitutes two-thirds of the

productive influence upon the cotton market. The government reports the condition of the crop and continues month by month to report its condition until the crop is picked and then it begins in September to count and report the bales that are ginned and continues to count and report the bales ev ery month until the ginning is concluded. So that from the time the crop s planted until the last bale is ginned the buying world knows by accurate fficial representation the acreage, the condition and output from month to month, and yet at no time does the producing world know the condition of the consumption of the product.

Those of us who have been laboring in this field have made reported efforts by formal communication and by personal interview with congressiona and administrative officials at Washington but have been utterly unable DR. J. W. EVANS to obtain the desired results.

I am compelled to state this blunt fact, not in any captious spirit but for the purpose of demonstrating to you that relief in this important particular must come through the cotton states themselves.

We Democrats have talked so long about State sovereignty as a negative quality in resistance to the encroachments of the Federal Government and as a bulwark against the usurpation and the tyranny, actual or potential th'ch follow from the concentration of political power in the hands of the Federal government, that we have forgotten the positive qualities of State sovereignty. We have lost sight of the fact that the State possesses al powers except in so far as it has conferred certain powers upon the Federal Government and in so far as the sovereign people have reserved certain powers to themselves. Sovereignty in the political sense means state omnipotence within the limits of human endeavor. Except as to the limitation to which I have already referred, the sovereignty of the State is as complete and as boundless as the sovereignty of the monarch who assumes the divine right of kings. In an emergency of this kind, the State is warranted, and indeed, under the very obligation of legislation, this body is commanded t conserve the public welfare by any device of legislation that does not pal pably offend the Constitution.

principal roughage, cottonseed meal overhead charges is not needed to properly balance the ration for farm horses. Any of the hens on each acre without materially grains mentioned are sufficient. Its interfering with the regular orchard value is more apparent where farmers must rely mainly on timothy or prairie to get at it and do it. hay or some of the coarse fodders for roughage.

CRUDE PETROLEUM AS MANGE REMEDY

Hogs Afflicted Should Be Given Thorough Treatment at Intervals of Eight Days.

(By M. H. REYNOLDS, Minnesota Ex-

periment Station.)
Treatment of hogs for mange should begin with a vigorous scrubbing with brush, soap and soft water so as to remove the crust. A veriety of coal tar dips are on the market. Most of these are quite satisfactory if of sufficient strength and warm enoughabout 110 degrees, but do not boil. The hog should be given a good thorough soaking in the dip, not less than two minutes. The hog must go under head and all at least once. Treatment must usually be repeated one or more times at intervals of eight days. Treat the whole herd and do it thoroughly

An effective dip can be made from crude petroleum as follows: Four gallons crude oil, 16 gallons of water and one pound of soap. The soap should be dissolved in the water by heating. An emulsion is then made by adding the oil and thoroughly churning the mixture. Water in different sections differs very greatly in the way it will the winter winds is alone sufficient. combine with soap. If this amount of soap does not give a good emulsion simply add more soap. Avoid oily ish almost every class of weed.
dips in cold weather. While the hogs Sixth—Sheep admittedly in are taking the dip, thoroughly clean soil fertility. Their manure is rich and then disinfect the pens. In case and uniformly distributed. of true mange the fence' posts, trees and everything against which the hogs of the year, less time and attention rub must also be disinfected. Use a need be bestowed upon the care of strong disinfectant and plenty of it. sheep than in the case of almost any After treatment do not put the hogs other animal without thereby endanback into lousy or mangy pens.

FRUIT GROWING AND

POULTRY COMBINED

Satisfactory Results Secured by Trees Offer Great Advantage in Providing Shade and Insect Food for Fowls.

One man is carrying an annual flock of 600 birds to the acre where there are no trees and we do not see how the simple matter of trees has anything to do in curtailing the proposition when as a matter of fact they offer a great advantage through the shade and the insect food they are all the time propagating.

SOME ADVANTAGES OF SHEEP RAISING

Animal Produces Both Wool and Mutton - Rapid Monetary Returns Are Received.

A few sheep should be kept on Some of the advantages in

keeping them are: First-The sheep is a dual purpose animal, producing both wool and mut-

Second-The initial expenditure is small. Every farmer can well afford the investment of the necessary capital in a few sheep.

Third-Rapid monetary returns are received, the wool clip and the lamb crop being salable annually.

Fourth-Expensive buildings are by no means necessary. A warm lambing pen is required, but for the aged sheep a shelter shed to protect them from

Fifth-Weed destruction represents another asset. Sheep will eat and rel-Sixth-Sheep admittedly improve

Seventh-Except at certain seasons gering successful results.

WOMEN CAN HARDLY BELIEVE

How Mrs. Hurley Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Eldon, Mo. - "I was troubled with displacement, inflammation and female

weakness. For two years I could not stand on my feet long at a time and I could not walk two blocks without enduring cutting and drawing pains down my right side which increased every month. I have been at that time purple in the face and would

walk the floor. I could not lie down or sit still sometimes for a day and a night at a time. I was nervous, and had very little appetite, no ambition, melancholy, and often felt as though I had not a friend in the world. After I had tried most every female remedy without success, my mother-in-law advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and gained in strength every day. I have now no trou-ble in any way and highly praise your medicine. It advertises itself."—Mrs. S. T. HURLEY, Eldon, Missouri.

Remember, the remedy which did this was Lydia E. Pinkham's Vegetable Compound. For sale everywhere.

It has helped thousands of women who have been troubled with displacements, Inflammation, ulceration, tumors, irregularities, periodic pains, backache, that bearing down feeling, indigestion, and nervous prostration, after all other means have failed. Why don't you try it? Lydia E. Pinkham Medicine Co.,

Too Late. Senator Kenyon, congratulated at a June wedding in Fort Dodge on his eloquence, smiled and said:

"Well, let us admit frankly that the gift of the gab is, after all, a good thing.

"For my part, I have never found silence golden except at a wedding or a funeral-when it's too late to say anything."

WONDERFUL HOW RESINOL STOPS SKIN TORMENTS

The soothing, healing medication in resinol ointment and resinol soap penetrates the tiny pores of the skin, clears them of impurities, and stops itching instantly. Resincl positively and speedily heals eczema, heat-rash, ringworm, and similar eruptions, and clears away disfiguring pimples and blackheads, when other treatments have been almost useless.

Resinol is not an experiment. It is a doctor's prescription which proved every farm as they will return good so wonderfully successful for skin profits with very little care or ex troubles that it has been used by other doctors all over the country for twenty years. Every druggist sells resinol cintment and resincl scap.—Adv.

> Of Course. "Did you ever hear such silly rot as that line of Tennyson's: 'Half a league, half a league, half a league, onward'?"

What is there silly about it?" "Why, anybody knows that not more than half a league can be going onward at any given time. For every game one team wins some other team has got to lose one."

It's easier for a young man to raise a row than a mustache.

Let's remember the kind acts of others' but forget our own!

Regular Man Was Away From His Desk.

A good way to save money on your gas and electric light bills is to spend your evenings at theaters and restaurants where the management pays for

the lights. If your husband's hair shows signs of falling out, try pulling his ears instead. They very seldom come loose.

Installment collectors and other undesirable callers can be made to keep their distance by means of ripe tomatoes served at long range.

A society matron whose position de mands that she entertain a great deal more than she can really afford has discovered that by serving a few bird shot with each portion of guinea hen the guests can be made to think they are eating game.

A young wife of our acquaintance tried for years to break her husband of the habit of bringing home unexpected guests to dinner. At last she took the advice of a friend and flirted desperately with the very next man her husband invited to the house. After that there was no more trouble.-New York World.

FINDS A CURE FOR PELLAGRA

Harvey, La.-Mrs. S. W. Spruiell, of this place, writes: "I suppose it will be a great pleasure to you to know that you cured my child. She had pellagra very bad and the doctor said she never would get well. She is well of pellagra and looks fine.

"You may use this letter as a testimonial if you wish. Great benefit have you done my daughter, Mindie Abrams." There is no longer any doubt that pel-

lagra can be cure. Don't delay until it is too late. It is your duty to consult the resourceful Baughn.

The symptoms-hands red like sunburn, skin peeling off, sore mouth, the lips, throat and tongue a flaming red, with much mucus and choking; indigestion and nausea, either diarrhoea or constipation.

There is hope; get Baughn's big Free book on Pellagra and learn about the remedy for Pellagra that has at last been Address American Compounding Co., box 2089, Jasper, Ala., remembering money is refunded in any case where the remedy fails to cure .- Adv.

Victims of the Drug Habit.

According to a recent estimate of the United States public health service, the number of persons in this country who are victims of the drug habit is about 70,000, and the number of doses of narcotic drugs consumed by them annually is about 850,000,000. This estimate is based on figures collected in the state of Tennessee where under a recently enacted antinarcotic law 1,403 permits were issued in six ed to 8,498,200 average doses.

His Excuse.

In his Savannah camp Bill Donovan, baseball manager, had a dusky otel by the name grumbled the editor of the of Sutton. Bill had to reproach Sutton more than once for a lack of agility in arriving with the food. Sutton promised to improve. One morning he brought in a consignment of grid- LADIES! dlecakes that had gone cold.

"What do you mean," said Bill, "by bringing me in cold cakes?" "Well, I tell you, boss," said Sutton.

"I brung them cakes in so fast for you that I guess they hit a draft."

Blissful Ideal.

"I hope," said the applicant for summer board, "that you have no mosquitoes, and that there will be chicken and fresh vegetables always on the table, and that the nights are invariably cool?"

"Great Scott, mister!" exclaimed Farmer Corntossel, "what place are you lookin' fur? Heaven?"

Did Not Hate Him That Bad. "I was telling Titewad this morn ing that shells for a 12-inch gun cost \$500 each."

"Well, what about it?" "He said he wouldn't shoot one o those shells at his worst enemy."

WAVES HIGH UP IN RANK

Sufferer From Effects of High Sea Was Designating Them as He Watched Their Approach.

A New York man was crossing the Atlantic with an army officer who suffered greatly from seasickness.

On entering the stateroom one particularly rough day he found the officer tossing in his berth, muttering in what at first appeared to be a sort of delfrium.

Stooping over to catch his words, the friend heard him say: "Sergeant . . major . . . sergeant . . . major

... brigadier general .. ugh, lieuten ant general ... a-a-a-h!" "What are you saying?" asked the friend in some alarm, as the sufferer looked piteously up at him after his

last gasping "a-a-ah!" "Assigning the waves their rank," said the military man, rolling toward the wall again. "There have been eight lieutenant generals within the last twenty minutes."

Interesting Comparison.
"It beats all how luck does play favorites," remarked Farmer Corntossel.

'I jes' been to see Ezra Hankins." "How's he gettin' along since he hurt his foot?"

"He's purty glum. The doctor charged him a hundred dollars fur cuttin' his foot off. An' when the railroad cut Uncle Jake's foot the com pany paid him six hundred in cash. Maybe these great corporations ain't as graspin' as some people says."

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it
