Windstorm **Damages**

Damage from the Storm will near Lakeview was blown to don Thursday evening in inter- ment from G. A. Wimberly re-Amount to Several Thousand History of the Town.

COVERS BIG TERRITORY BAPTIST REVIVAL

Hedley was visited by a hard wind Monday evening about 4:30 o'clock which did quite a lot of damage to property. According to old timers here, it was the most destructive wind to ever visit this section of country. The wind was from the southwest and was accompanied by a heavy rain and, in some places, by bail.

J. C. Wooldridge lumber yard was the heaviest loser. The enshed blown down and lumber scattered. No insurance The brick buildings of J. Ring, P. C. Johnson and C. B. Battle were damaged by rear walls caving for a few feet.

R. B. Adams new residence was blown from foundation and badly twisted. Insured.

J. B. Turnbow's dwelling was blewn from foundation and considerably wrecked.

Mr. Sullivan's dwelling was blown from blocks. He and his wife left the house and both held to a tree in the yard, where they held on in spite of much whipping by the wind.

The house occupied by Wilborn

Cash was partly wrecked. Hedley Telephone Company had a number of poles blown down and nearly all leading lines put out of commission. A num- a happy and prosperous wedded houses, barns, sheds and windmills.

We are thankful to report no loss of life and none seriously

Lightning struck the dwelling occupied by Chas. Boles, shocking him and his entire family, but all recovered in a short while.

J. T. Craddock's little boy was playing in the yard with his dog. Lightning killed the dog and never harmed the boy.

A score or more windmills were wrecked in the community and water was rather scarce in Hedley for a day or two

Crops were damaged by wind in some places, and by wind and hall in other places. W. M. Mosely, W I Rains, C O Cooper, Clyde Bridges, J. S. Beach, C. P. Doherty, Ellery Lynn and A. A. Cooper and others had crops badly damaged by hail

Several who suffered damage in the storm had tornado insurwhich will replace their losses. It was a lively time for a few minutes, and after it was all over and damage noted, our peo ple, who have always claimed that such a thing as a storm is unknown in this section, were almost ready to take it back.

The gin at Leslie in Hall county was almost a total wreck.

Over in Collings worth county Ed Griggsby's house was completely demolished and contents scattered. Luckily the family were away from home.

Lightning struck and set fire

the barn of J. M. Frell near OFFERS LOVING CUPS Lakeview in Hall county last Monday, destroying the barn and contents consisting of feed. stuff and six bales of last year's Property stuff and six bales of last year's cotton that was stored in the

The revival meeting at the assisted by the pastor Rev. Jas. the "stuff". A Long. Rev. Bogard has been preaching some good plain practical sermons. Some conversions and additions to the church, and the church greatly revived. The meeting will probably close Sunday night.

YATES-WYLIE

Mr. J. C. Yates of Wichita Falls and Miss Rosa Wylie of near Hedley were united in marriage Monday at 2 o'clock p. m. by Rev. M. L. Story. Following the ceremony a big dinner was served at the home of the bride's

The bride is the daughter of Mr. and Mrs. Wylie who live southwest of Hedley, and is a charming young lady who has made a host of friends during her residence in the community.

The groom, we learn, is a young man of good qualities, and stands high in the regard of those who know him.

McAllister-Crawford

Mr. M. C. McAlister and Miss Jessie Crawford were united in marriage Sept. 3 in the County which have been fattened on Treasurer's office at the court house in Clarendon Rev. E Dubbs them man and wife.

The bride is a charming young lady of our community and a daughter of Mr. and Mrs H. M. Crawford.

The groom is a worthy young nan and is said to be able, finan cially and otherwise. to provide a happy home for the young

lady who has become his wife. The Informer joins their friends in extending congratulations and best wishes.

Kaffir and Maize

At the meeting of the Texas Kaffir corn and Milo maize Association, which was held in the rooms of the Board of City Develop ment, yesterday afternoon a matter of extreme interest to the Panhandle, and Amarillo particular received favorable attention. On Saturday of this week, a solid carload of the products this association was formed to promote the sale of, will be loaded at either Amarillo or Memphis. and sent on a most important

The destination will be Mem-

In this car will be Kaffir, Milo Maize and Feterita. It will be shown growing, in the head, threshed, as feed, in flour, mixed products, as a breakfast food, and in every possible manner in which these products may be found. With the exhibit will be taken, mules, cows and hogs these products. Actual demon strations of the proper methods speaking the words that made of feeding these animals, and any others sent to the exhibit, will be a feature of the display. In the booths of the association at the fair, pancakes, bread, biscuit, cakes and poultry products will be prepared right be-

fore everybody, and free samples

will be given out all the time. There will also be half a carload of threshed kaffir, maize and feterita taken along, and given to jobbers and commission men in the Memphis territory. As soon as the fair closes the representatives accompanying the exhibit will call upon all the jobbers and commission men in Memphis, and try to place carload orders of their products. Memphis is one of the leading feed markets in the country. The Mississippi Delta, Arkansas, Louisiana and other border states look to the city for their feed products.

's car starts on Saturday of & and representative of the Santa Fe, Rock Island a he Gould lines, will assist ation representativ (ir, in -ue.

HEDLEY For The Homeseeker

To the man of moderate means who would like to farm on a moderate scale and who would diversify to the end of living at home for the home's sake, there is a section in the southeastern part of Donley county that holds

out exceptional opportunities. Hedley, a small but growing town on the main line of the Ft. Worth & Denver Railway, is the trade and business center of

this favored agricultural district Hediey has a population of about six hundred. It is located fourteen miles southeast of Clarendon, the countyseat. It's altitude is 2800, and in many respects it is a modern little village. Surrounding Hedley there is a trade territory containing multiplied thousands of acres of fertile lands. This area is dotted with prosperous homes, productive farms and cattle pastures, The science of agriculture is comparatively a new enterprise in these parts, but the last few years has demonstrated beyond all question that it is the natural home for the man of the

soil. Perhaps not more than fifty per cent of the land in the Hedley territory is now under cultivation. Of the fifty per cent

which remains in it's natural prairie state it is safe to assume that thirty percent is available for cultivation. The important feed crops of the community which have made good without fail are kaffir corn, milo maize and corn. And because of the

ty of one or all three of pps, the territory abo s developing into a v al poultry, dairyrming section. ing an The c of the country dark sandy loam. f is available in an abundant amounts anywhere at a maximum depth of one hundred and sixty feet. Improved lands immediately contiguous to Hedley are now seling at prices ranging from \$20 to \$35, though unimproved lands at a distance of from six to ten miles are quoted on reasonable terms at prices between \$15 and \$20. The country about is a net work of rural telephones and rural mail routes. Good roads cross the country in every direction and ready and reliable markets for all lines of field and farm products are always found at Hedley, Lelia Lake and Clarendon.

The demonstrated certainty

of diversified farming in the Hedley territory, the available markets already assured and the great acreage of virgin lands contiguous thereto should make the Hedley territory the mecca for the homeseeker.

The dairy business hereabcut has just started. The poultry business is in it's infancy. There are six firms in Hedle handle annually thirty th pounds of poultry. The show that thirty five as bales of cotton were may Hedley last season sixty cars of hogs exp this point while mllon corn and other farm amounted to approxi hundred cars These statistics markable, considering lation is not near wl be and considering ; agricultural enterp country is in it's infa Investigation of

Indication of Economic Intelligence at Least By Isaac Goldberg, Boston, Mass,

Fashions in dress are an index of intelligence from the standpoint of the commercial interests. The wise designers realize that variety is the spice of clothes as well as of existence. It

is also, in this case, the spice of profits. The designers, without having ever read Carlyle's "Sartor Resartus," have nevertheless their own philosophy of clothes, and were you to catch them in an amiable mood they would talk somewhat in the following fashion:

"If there were no styles people could always wear the same material, antil the goods were out. That would mean less work for dressmakers and tailors in general. Prices could not then be boosted because of popular demand for any reigning mode. Besides, people want something new all the time and would make it themselves were we not to do it for them."

So that fashions, considered in this light, show economic intelligence on the part of the originators.

From the point of view of those who merely ape what is in style, regardless of how it becomes their particular person, fashions do not show intelligence. And it must be confessed that this category contains by far the largest number. They say that clothes make the man. That may well be, but how often do clothes unmake the woman! If long lines come into style the first one to make a dash after the vogue will be your woman with an 18-inch waist and a figure that looks like a letter T with the top left off. As if her own self were not long line enough! Or let us imagine the opposite case, the coming into fashion of round lines. Enter the corpulent woman, and with a nonchalance that is at times pitiable she becomes stylish by adding to her natural obesity the optical illusion of lines that seem to add pounds to her weight.

But the women are by no means alone as regards the fashion mania. Of late years there has been a decided tendency to introduce a variety in men's clothes almost as great as in women's. Every season brings its new coats, new hats, new ties; now the coat is loose, now tight. And when the designers exhaust their prolific store, back turn the fashions to those of years ago, and what we would laugh at in a picture book of 1870 we wear proudly to dinner. And consider the days of knee breeches and silk stockings for men, with George Washington as a good example. Go further back still and some of you will make the startling discovery that before modern business developed men were quite as vain with their clothes as are women. And while we are in a scientific mood, it might be well to point out that with the entrance of more and more women into the business and professional world voices of revolt against parrot fashion are being heard on all sides.

It is not hard to imagine a time when clothes will be raised to the dignity of a fine art. For it is nothing less than art when a competent dressmaker originates and fashions a gown for a particular individual.

There may be savages or peasants who have ideally perfect teeth, but they have never yet been discovered, and the myth of their perfection has never survived the establishment of a den-

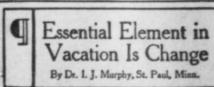

tal clinic among them. To take the situation as we actually find it, the whitest, evenest, most beautiful and enduring sets of teeth to be seen anywhere in the world today are right here in these United States, among people who have had toothbrushes and good dental care from their chilhood years.

The poorest, blackest, most broken and earliest decaying teeth are to be found in fishing villages and sand barrens and mountain valleys and remote, poverty-stricken country districts.

Modern city teeth may require some scrubbing and filling, but they look better and chew better and harbor fewer "bugs" and last longer than any others yet invented or discovered and examined in thousands during life by competent experts.

Some negroes and Indians, for instance, have wonderful teeth, but the majority of them suffer fearfully from toothache, caries, gum abscess and all the faults of civilized teeth.

Brush without ceasing, thoroughly, gums as well as teeth, after every meal and at bedtime, and you can pretty certainly bank upon it that your teeth will stay by you until sixty, sixty-five or seventy. You will probably lose a few, even with the best of care, for some teeth are born soft and pitted, and need filling almost as soon as they cut the gum; but you'll have plenty left to anchor to, and your dental arches will be "disfigured but still in the ring" until you yourself "throw up the sponge."

able. The summer is the best time for recreation. It allows more access to the open air and to outdoor activities. However, a particular season or an exa see are not the important items in one's vacation. The essential element is a change.

HOW NOBEL MADE DISCOVERY

of Handling Nitroglycerin With Safety.

When that very dangerous explosive, nitroglycerin, was first invented extraordinary precautions had to be taken to prevent accidents while the substance was being handled, but, notwithstanding this, so many disasters occurred that there seemed to be strong probabilities that its manufacture and use would have to be prohibited, says an English paper.

After several governments had actually interdicted its use, bowever, means were discovered by which this powerful explosive could be used with minimum of danger to those who handled it.

One of the methods employed was to convert the nitroglycerin into dynamite by its absorption in the infusorial earth known as kieselguhr. This James K. Drinnon came down process, however, involved a reduction glycerin and explosives chemists persubstance which, when added to nitroglycerin, would render it safe for han-Grandma Gant is reported dling without diminishing its explosive

One of these chemists was Nobel. It is on record that one day while Nobel was at work in his laboratory he cut his finger, and in order to stop the bleeding he painted some collodion (a liquid preparation akin to guncotton) over the cut to form a protective artificial skin.

Having done this, he poured some of the collodion, by way of an experiment, into a vessel containing nitroglycerin, when he noticed that the two substances mixed and formed a jellylike

He at once set to work to investigate this substance, and the outcome of these experiments was blasting gelatin, a mixture containing 90 per cent of nitroglycerin and 10 per cent of soluble guncotton. Thus, as a result A very heavy rain and wind of a very trivial occurrence, that vio-

> They Never Die. "There are songs," said the musician, "that have never, never died. They go ringing down the ages."

"That is true, sir," Brown replied. For the last six months and upward I have heard my daughter try to kill two or three each evening, but they never die."—London Opinion.

Amarillo Invites the World

Panhandle State Fair

September 21, 22, 23, 24, and 25, 1916

The combined forces of the Panhandle State Fair Association and the Amarillo Board of City Development are preparing to present to the world this year an exhibit proportionate to the vast extent and stupendous resources of the Panhandle and Plains Country of Texas.

\$12.000.00 in PREMIUMS

With special awards in the Livestock and Agricultural Departments, insure exhibits demonstrating the products of all sections. Racing program and other attractions in keeping with the general high standard set by the Association

> She was traveling for his health. "My room is immediately over the kitchen," she informed Steb.

"The cook hasn't made a kick up to now," Steb went back at her. She started a get-back, but her inin to tell me about the battle of the dignation choked her so she gave Steb Civil War in which his father was the Society sting with both eyes and flounced out.

Steb bit the end off a penholder and said the rest internally. Just then a couple of troupers

trailed in. They were with the "Bandit's Bride "Calm yourself," said Smiling Steb, Co.," and the way had been long and

weary. "What have you got-double?"

asked the villain of the piece.
"Two dollars and up!" said Steb.
"Nothing better?" inquired Low Comedy. He was making a crack, but nobody caught him. "Four dollars, with bath," Steb sug-

"Board?" asked the villain "Nothing but the sleeps and a fresh

cake of soap," said Steb. "Ring down!" Low Comedy put in. Why, we lived a whole week in Pittsburg for less than that."

"You can turn the same trick here if you carry your own cake and sleep

"What's the name of this mint?" asked the villain. Steb told him.

I followed the two troupers out to the dinky barroom, because it looked After looking over the result, I de- about eight to one they'd pull a few

wheezes and I'd get a few guffs. "The woods for ours! Isn't this a bird of a place for a show to get stranded?" groaned the Low Comic, as "Only during a hot wave," said he gave the Reub bartender the high 'most laughed myself sick to the sign, and the latter pushed forward "Going to be with us long?" inquired two glasses and a black bottle.

"I tell you, Mike," the Juvenile went Jabe looked at the Juvenile.

Mike laughed. "It's the old story, my boy; we're a sad bunch of plowboys on this old farm of a world when we haven't a laittle mazuma in the vest pocket. I've got a new bit of recitation spiel I cooked up last night when I couldn't sleep. It's called 'Knock and the World Knocks With You," and I'll put you jerry to it right now before it gets cold:

Knock, and the world knocks with you, Boost and you boost alone! When you roast good and loud You will find that the crowd Has a hammer as big as your own!

Buy, and the gang is with you; Reneg, and the game's all off; For the lad with the thirst Will see you first If you don't proceed to cough!

Be rich and the push will praise you,
Be poor and they'll pass the ice,
You're a warm young guy
When you start to buy—
You're a slob when you lose the price!

Be flush and your friends are many, Go broke and they'll say ta, ta!
While your bank account burns
You will get returns.
When it's out you will get the ha!

Be gay and the mob will cheer you, They'll shout while your wealth en-dures;

Show a tearful lamp
And you'll see them tramp—
And it's back to the woods for yours! There's always a bunch to boost you

While at your money they glance; 3ut you'll find them all gone On that cold gray dawn When the fringe arrives on your pants!

"You've got the game of life sized to a showdown," was the Juvenile's comment.

At this point Jabe, the Reub bartender, pointed a freckled finger at

"Let a Peep Out of Him About the Pie He Had for Dinner."

Mike and butted in with: "Say, you be the fat cuss that cut up with that troupe at the Op'ry House last night, been't you?"

"No, I'm the skeleton man with a circus," Mike answered, and the bartender roared with delight.

"I was at the Op'ry House last night," Jabe informed them, "and I stomach at this yere fat cuss takin' off that Dutch policeman-ha, ha, ha, ha!" "Say, Bub, you're wearing medals on, "I'm too delicate for this one-night was putty good, too," he admitted, "takin' off that newspaper reporte and rescuin' the girl from the burnin' structyure, but you didn't do no funny fall and bust your galluses like this fat cuss-ha, ha, ha, ha!"

"Get him to unhook the laugh; he's a good steady listener," whispered the Juvenile, and Mike started in.

"Fine town this," Mike began. "All the modern improvements, eh? Cows wear nickel-plated bells, streets paved with grass, and the river has running water."

"Ha, ha, ha!" Jabe roared.

"Reminds me of a place we struck out in Missouri last winter," Mike went on. "Same style of public architecture, especially the town pump. But the hotel there was the hit with us. It was called the Declaration of Independence because the proprietor had married an Englishwoman and wanted to be revenged. At supper time I ordered a steak, and they brought me a leather hinge covered with gravy, so I got up to add an amendment to the Declaration of Independence. head waiter was an ex-pugilist, so he put the boots to me and covered my amendment with bruises. Then he made me eat the leather hinge, and for two weeks I felt like a garden gat and I used to slam every time the

Brew Wood SKY MARAUDER IN AIRSHAFT

Birds Cling Fearfully to Fire Escape While Sparrow Hawk Hovers Near.

A servant maid in an apartment on the fourth floor of the Victoria, at street, opened the kitchen window Monday morning and wondered why dozens of sparrows that were huddling on fire escape and window sill did not take fright and scurry away. Then she glanced onward and upward into the airshaft and discovered the reason.

A sparrow hawk, sun glinting on its wings, was wheeling rapidly high up in the airshaft, but below the roof level. Occasionally, when the marauder's keen eye glimpsed a sparrow which hadn't taken refuge it darted like a flash. Twice while the maid watched the hawk made a captive and soared out of the airshaft.

The air pirate worked for about two hours and disappeared shortly before noon, but it was at least half an hour later when the plump, brown spar-rows recovered from the terror caused by the hawk's appearance.

Sometimes Associated, but Not by Any Means Inseparable, as Generally Supposed.

The prevalent idea appears to be that there can be no love without a pretty large admixture of jealousy, and that, conversely, almost every case of jealousy springs from some mis-guided love affair. Whether this idea is the right one or not is decidedly open to question. Ideal love affairs preclude jealousy altogether, and where absolute trust and confidence exist there is no room at all for the

green-eyed moster. One curious attribute of the jealous woman who plans to sweep her rivals out of the way is that she generally shows a marked lack of brains in her methods. Jealousy not only blunts all her finer feelings, but at the same time it causes a curious confusion of mind, which fails to take the proper grasp of consequences and which is utterly illogical and childishly reckless in its

One has only to glance at the daily cording to directions on the bottle and papers to see this fact practically illus- she is cured of this trouble. She was trated. The schemes of the jealous all run down when she started taking woman are the most childishly imma- the Compound and her periods did not ture in the world, and in almost every case fall to pieces and bring speedy weak that I often had to help her dress retribution on her own head. For not alone does the victim suffer. The worst generally comes upon the plotter her-

self. Love very often does bring a certain amount of jealousy in its train. But at the same time it is entirely up to ourselves to curb those feelings and to keep them from outward and visible expression. Moreover, it is perfectly true that, although love generally does admit of jealousy, the latter can exist and flourish pretty successfully without love.

Therefore in the last analysis we may most assuredly claim that jealousy and love are two distinct and Lydia E. Pinkham Medicine Co. (confi-quite separate affairs.—Savannah dential) Lynn, Mass. Your letter will separate affairs.-Savannah quite News.

Two Boys, a Cow and Two Calves. This is a short story of how two Vermont boys, still in their teens, have made some real money on a thoroughbred Guernsey. SYNOPSIS.

Kenneth Griswold, an unsuccessful writer because of socialistic tendencies, sups with his friend Bainbridge at Chaudiere's restaurant in New Orleans and declares that if necessary he will steal to keep from starving. He holds up Andrew Galbraith, president of the Bayou State Security, in his private office and escapes with \$100,000 in cash. By original methods he escapes the hue and cry and goes laboard the Belle Julie as a deckhand. He unexpectedly confronts Charlotte Farnham of Wahaska, Minn., who had seen him cash Galbraith's check in the bank. Charlotte recognizes Griswold, but detailed to write to Galbraith rather than denounce the robber to the captain and so incur unpleasant notoriety.

CHAPTER V-Continued.

"Don't try that again!" he warned, angrily. "If you've got to take it out on somebody, I'm your man."

This was mutiny, and McGrath's remedy for that distemper was ever heroic. In a flash his big fist shot out and the crew looked to see its lighter champion go backward into the river at the impact. But the blow did not Griswold saw it coming and swerved the necessary body-breadth. The result was a demonstration of a simple theorem in dynamics. McGrath reeled under the impetus of his own unresisted effort, stumbled forward against the low edge-line bulwark, clawed wildly at the fickle air and dropped overboard like a stone.

The Belle Julie was forging ahead at full speed. Clearing the intervening obstacles in a hurdler's leap, Griswold raced aft on the outer edge of the guards and jumped overboard in time to grapple the drowning man when he was within a few feet of the churning wheel. The mate was terror-crazed and fought blindly. There was no time for trick or stratagem, and when the thunder of the wheel roared overhead, Griswold felt the jar of a blow and the mate's struggles ceased abruptly. A gasping moment later the worst was over and the rescuer had his head out; was swimming gallantly in the wake of the steamer, supporting the unconscious McGrath and shouting lustily for help.

The help came quickly. The alarm had been promptly given, and the night pilot was a man for an emer-Before the little-used yawl could be lowered, the steamer had swept a wide circle in mid stream and

Griswold's appearance was less forward of merit for having saved the That will be amply sufficient." mate's life, he had been told off to serve temporarily as man-of-all-work the pilothouse was over, and he was cowardly." on his way to the crew's quarters below when he stumbled upon Miss landing ahead of us within an hour Farnham. Mindful of his earlier slip. he passed her as if she had been invisible. She let him go until her opportunity was all but lost; then, plucking courage out of the heart of desperation, she spoke.

"One moment, if you please; I-I want to ask you something," she faltered; and he wheeled obediently and

Followed a pause, inevitable, but none the less awkward for the one who was responsible. Griswold felt rather than saw, her embarrassment, and was generous enough to try to help her.

"I think I know what you wish to say: you are quite at liberty to say he offered, when the pause had grown into an obstacle which she seemed powerless to surmount.

"I thought perhaps-I had hopedoh, for goodness' sake, why did you do it?" she burst out, no longer able to fence with the weapons of indirectness.

He answered her frankly.

"It was the old story of one man's overplenty and another man's need. Have you ever known what it means to go hungry for sheer poverty's sake?-but, of course, you haven't." "No," she admitted.

"Well, I have; I was hungry that morning; very hungry. I know this doesn't excuse the thing-to you. But perhaps it may help to explain it." "I think I can understand-a little.

But surely-He stopped her with a quick little

gesture. "I know what you are going to saythat I should have been willing to work, or even to beg, rather than I was willing to work; I was not willing to beg. I know it is all wrong from your point of view; but I should be sorry to have you think that I did what I believed to be wrong."

"But think of it; if you are right, everyone else must be wrong!"

"No; not quite everyone. But that rudder-work, accomplished as cleverly is a very large question, and we as if the great steamboat had been a needn't go into it. I confess that my power-driven launch to be steered by method was unconventional; a little ize it at all." more summary than that of the usu-All this Charlotte saw. resolution had failed. He had no means of knowing that she had given her letter to the night clerk within the hour of their interview on the saloon deck promenade; nor did he, or anyone else, know that "I know you are not indifferent; you it had lain unnoticed and overlooked on the clerk's desk until the Belle yourself, at whatever cost. Will you Julie reached Cairo. Such, however, was the pregnant fact; and to this purely accidental delay Griswold owed his first sight of the chief city of Missouri lying dim and shadowy under its

The Belle Julie made her landing in the early evening, and Charlotte was busy up to the last moment getting to do. But then I saw what would her own and her aunt's belongings ready for the transfer to the upper river steamer on which they were to complete their journey to Minnesota. "I understand. We must guard Hence, it was not until the Belle Julie against that at all hazards. You must was edging her way up to the stone paved levee that Charlotte broke her self-imposed rule and slipped out upon the port promenade.

mantle of coal smoke.

The swing stage was poised in the air ready to be lowered, and two of "No. If I had, I shouldn't have the deckhands were dropping from the shore end to trail the bowline up the paved slope to the nearest mooring ring. There was an electric arc light opposite the steamer's berth, and Charlotte shaded her eyes with her rewrite it, leaving out your name, and hands to follow the motions of the

One of the men was wearing a cap and there was a small bundle hanging at his belt. She recognized him at once. At the mooring ring he was the one who stooped to make the line fast, and the other, a negro, stood aside. At 'Why mustn't I sign it? They will that moment the landing stage fell, and in the confusion of debarkation which promptly followed, the thrilling bit of byplay at the mooring ring passed unnoticed by all save the silent watcher on the saloon deck.

While the man in the cap was still on his knees, two men stole from the shadow of the nearest freight pyramid and flung themselves upon him. He fought fiercely for a moment, and though he was more than doubly outweighed, rose to his feet, striking out viciously and dragging his assailants up with him. In the struggle the bundle dropped from his belt, and Charlotte saw him kick it aside. The waiting negro caught it deftly and vanished among the freight pyramids; whereupon one of the attacking pair wrenched himself out of the three-man scuffle and darted away in pursuit.

This left but a single antagonist for the fugitive, and Charlotte's sympathies deserted her convictions for the noment. But while she was biting the arc light when the officer snapped the handcuffs upon his wrists.

It was with a distinct sense of culpability oppressing her that she went back to her aunt, and she was careful not to let the invalid see her face. Fortunately, there was a thing to be done. and the transfer to the other steamer came opportunely to help her to reestablish the balance of things distorted.

She was sorry, but, after all, the man had only himself to blame. None leans; you needn't doubt that. And the less, the wish that someone else promising to grow later into remorsedone that, your responsibility ceases. walked up the levee to go aboard the

OUR PUBLIC FORUM

Ed Woodall

On Slow Marketing of Cotton.

I want to commend the efforts of those interested in the movement to hold a large part of this year's cot ton crop off the market, which can only be done by providing in different communities in Texas suitable war house facilities, which will enable the farmers to borro through local banks a sufficient amount of money to tid them over, and permit them to market the crop gradual ly for a period of say, from six to eight months, rather than in the old way of marketing it in three or for months. The northern wheat farmer and corn farmer have long since learned that their crops cannot be marketed in two or three months, and they have provided means for taking care of it, and giving it to th

world as it needs it, and while an emergency now confronts the people of the South in the disposition of their cotton co.p., on account of the war, it has nevertheless always been the worst sort of business to dispose of our cotton

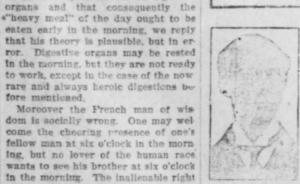

An observation of the fluctuations of the cotton market over a period of years will show that nearly always it reaches the lowest points during the months of October and November, frequently after that time there is an advance of from \$10.00 to \$20.00 per bale. There can be no reason for this except that the men who buy our cotton take advantage of the conditions that we ourselves as a people refuse to remedy, and the result is the result. of the world is richer to the extent of our own folly.

In my opinion, with the prospective size of this crop in view, it is entirely reasonable to expect ten cents per pound for this crop, provided it is jud iously marketed, and while I understand the farmers have got to be edu cated somewhat in this matter, even after ample storage facilities have been provided, at the same time if the banks of Texas are so much interested it. they can induce the farmers of Texas to warehouse a sufficient amount of cotton to hold the price to a reasonable basis under the existing conditions

On the other hand, if we pursue the same policy this year that we have always pursued, we will doubtless see cotton go as low as seven cents basis aiddling. If our people can ever be educated to grow their living at home and to raise cotton as a surplus and the money crop, only raising what the world wants at a fair price, and prepare themselves to market what they do raise judic ously and over a period of eight months in the year, instead of three or four months, as is now done, the South will grow wonderfully prosperous,

and probably more so than any other agricultural section in the country. Therefore, I am pleased to commend the patriotic spirit that prompts the akers of Texas in their efforts to assist the farmers in getting a reasonable price for their chief produce-cotton.

OUR PUBLIC FORUM

R. C. Duff On Cotton As Contraband.

Hon. R. C. Dull, one of the inhest authorities International law in the eation and one of the mean lie citizens in the United States, when using laws of nations on this subject for the America

piowman, said in part:

"Article 28 of the Declaration of London reads as follows: 'The following may not be declared contraband of war: (1) raw cotton, wool, silk, etc.' Great Britain is not only a signatory of the Declaration of London, but in fact called the confere 2 and inslated upon the inclusion of raw cotton on the list of absolute

non-contral and. Under this declaration, which was subscribed to by all maritime nations, we have a right absolutely to ship cotton, not only a neutral ports of Europe, but to Germany and Austria themselves. Humanit shudders at the thought of the death of the splendid Americans who was down on the Lusitania, but humanity would have more cause for shuddering it. ing is a grouch, a silent, comforting if it could have presented to it in some similarly striking and dramatic way the woe, sorrow and suffering that will be occasioned to multiplied thousands of men, women and children in the Southern states as a result of cotton being forced down to starvation prices.

The reason why cotton does not command 18 or 20 cents per pound is simply because Great Britain has a naval strangle hold on our shipments and, therefore, on the world supply. England sends her ahips of war out into the open seas, captures American cotton, no matter to whom the same may be destined, carries it into British ports, sets up prize courts of her own nomination, which prize courts, of course, are operating in her favor and which, under such circumstances, after whotever delay they elect to interest a stress the domination of the course of the course of the domination of the course of th pose, assess the damages of the American shipper at whatever pric fit and then, after having by such process 'hought' our cotton, s ought our cotton, she avails herself of the extraordinary high prices exi produced in part by 'er diversion of our siments, to resell it at a prof. of Great Britain referred to, according to International law constitute war against the United States.

This grievance is now of many months standing and the South is about to bring to market another great crop of cotton. Under such circumstances one would expert that our government, without prompting, would know perfectly A Hungarian officer, describing the fighting on the Tyrolese mountain well how to deal with acts on the part of the British government, amounting to warfare against our trade and country.

peaks, a mile above sea level, states It is not necessary for us to resort to war against Great Britain in re-liation. A simple, adequate and obvious remedy would be for the president that the most difficult problem for the staff is to maintain the supply of food to advise Great Britain that unless she respects the law of nations as regards our foreign commerce, he will call on Congress to adopt a resolution forbidto the troops. On account of the high altitude and the continuous ding the exportation of arms and munitions of war to foreign countries physical strain they need good sup-

WORSHIP HEROES IN EFFIGY

lindus at Native Fair Rear Monstrous Ancient Warriors,

In Kasmir, India, it was once my good fortune to visit a Hindu Dussrah, or native fair. The cantonment of my host was some distance away from the grounds, so we mounted two of his horses and rode through the village out on the road to the fair grounds, where we rode much of the way in the wake of an interminable procession on its way to the Duss-

Above the heads of the multitude three towering figures caught my eyes. They were fashioned after the form of man, but crudely and grotesquely, and they were 100 feet tall. I turned to my companion and asked him what they were. He told me that these monstrous effigies were reared to com memorate an ancient mythological war which, according to Hindu belief, took place in Ceylon in the long ago.

Whether the story is true or not, the figures were undoubtedly real, and became more monstrously real the closer we approached them. Later, when we strolled at their feet. I saw how they were made. Bamboo poles, bound together after the Indian fashion of piecing out scaffolding, formed the framework, and they were ar chored to the ground by ropes hidden under the costumes that were made of coarse cloth. The heads of the figures, grotesque and unreal in their workmanship, were surmounted by fancy crowns of gold and col-

The fair, indeed, was devoted en tirely to the praise of these mythological warriors and the heroic deeds they are supposed to have done in the ancient Ceylon wars.

Magic Washing Stick

This is something new to housewives something they have wanted all their live but never could get before. It makes it possible to do the heaviest, hardest washing less than one-half the time it took by omethods, and it eliminates all rubbing and mu cuiar effort. No washing machine is need Nothing but this simple little preparatio which is absolutely hardest to the fised fahicability occupation. You will be dighted at the clean, spotiess, snow-whit clothes that come out of the rinsing wate and all without any effort on your part. Give the Children The Goody That's Good For Them

The best way in this world to spend a nickel for refreshment is to get

WRIGLEYS

wholesome, impurity-proof chewing gum. It's made clean and kept clean. It's wrapped in waxed paper and sealed. Its two delicious flavors are always fresh and full strength.

It is the longest-lasting, most beneficial and pleasant goody possible to buy. It aids appetite and digestion, quenches thirst, sweetens mouth and breath.

Write for free copy of "WRIGLEY'S MOTHER GOOSE," a handsomely illustrated booklet in colors that will amuse young and old and remind you of this Perfect Gum.

In it the WRIGLEY SPEARMEN have acted all the old familiar Mother Goose scenes to the "tune" of new jingles. Address Wm. Wrigley Jr. Co., 1312 Kesner Building, Chicago.

Chew it after every meal

INJURY BY CORNSTALK BORER SILAGE FOR YEARLING MULES

One of Reasons Why Corn Stubble Should Not Be Permitted to Stand in Field Undisturbed.

reasons why corn stubble should not for 90 days on an average daily ration be allowed to stand in the field all of 6.5 pounds of ear corn. 8.6 pounds winter undisturbed. This insect is one of mixed hay, and 4 pounds of corn of the most notorious corn pests of silage. The mules made a gain of only the South. Without cutting the stalks 4.8 pounds, during the period. No ill the evidence of its work may be seen results were seen from the use of the in every cornfield at the time of her- silage but the mules did not consume vesting by the holes that may occur large quantities of it. This it is on any portion of the stalk. These

holes vary largely in number. The point to be remembered in the life history stages and habits of this insect is its habit of remaining as a lage to horses and mules, conducted larva in the base of corn stubble be- by the North Carolina and Pennsyllow the ground during winter. Here, vania stations have been reported to therefore, is a chance for those farm the department of agriculture. It is ers who are friends of this species to advised that corn silage should always do it a great favor by allowing the be fed in combination with other feeds corn stubble to stand undisturbed in their fields during fall and winter. De- should spoiled silage, either moldy or stroying corn stubble is not very easy, rotten, be fed to horses and mules. except on modern farms where there is sufficient horse power and the stubbles can be turned under thoroughly.

Turning under corn stubble is of great help in reducing the cornstalk Determining Factor in Production of borer for the next season. Where thorough turning cannot be practiced, there are other methods, such as "busting" out the stubble and hauling it to the compost heap for rotting. After the corn is gathered the stalks, stubble and crops of potatoes. everything else may be bursted out. raked in heaps and after a few weeks

for drying, burned. In experimental work a very large percentage of larvae was destroyed during winter where the stubble was plowed out and left exposed to the weather. It can readily be seen that when these methods are practiced by farmers only here and there it does not help the situation very much. The control of the cornstalk borer depends on the co-operative action of the farmws of a community.

Save Hairy Vetch Seed.

Farmers who are growing hairy vetch this year are cautioned by the agricultural department to save their seed if they expect to continue growing this valuable crop. The greater part of the seed has been imported be given a chance to grow and profrom Russia and Germany, and, owing to war conditions, the supply will fences, the walks and other places be necessarily limited, and bring a very high price, as it has in the past This will be another opportunity for the American farmer to demonstrate his independence of foreign conditions as affecting his business.

THEIR SHOPS PALACES

PARISIAN DRESSMAKERS IN FINE ESTABLISHMENTS.

Maintained at Enormous Costs, but Fair Femininity Refuses to Be Satisfied With Anything Not of the Best.

When a woman is not praising her dressmaker she is abusing him. Either he is a treasure, an artist, a genius; or he is just the reverse; his prices word, his materials are bad and he has a hundred petty ways of economizing on them so that renovation is impossible. We hear all this and much more about the sins of the dressmaker, even as we hear a great deal in his praise. Out of all the praise and blame, one point stands out strongly, and that is his prices On this everyone agrees; they are very high, and the time has come to ask ourselves if they must remain so.

For some unknown reason the Paris dressmaker has elected to establish himself in princely mansions instead of in shops. He now inhabits the most luxurious apartments and hotels in the city. His rent is stupendous, his train of attendants is enormous, and until the war came to put a stop to his course, downward or upward. whichever we like to call it, there seemed to be no limit to his ambitions In the old days we read of ministers of state falling through ambition; today, or rather yesterday, it was dressmakers who ran that risk.

It is not surprising that women paid high for a gingham dress when that dress was chosen, fitted and made in a house that was a palace of delight to all who shared the taste for furniture which reminded you in a flash of "Salambo," the "Peau de Chagrin' and the "Empress Josephine." The chair in which you sat was a show piece, the mirror in which you saw your reflection had once thrown back the image of a queen, the halls through which you walked opened on a garden of such dignity and loveliness that its trees seemed to sigh in the wind with memories of past honors. To all this you must add the illustrious name of the dressmaker and the genius of his designers, cutters, makers and saleswomen. It is no wonder the gingham dress cost so dear.

In another palace the furniture is in the style of Versailles in the glorious eighteenth century. The bergeres, the coiffeuses, the chaises longues, the cabinets filled with rare china or priceless lace, the engravings on the walls, the silk which covers the tabourets-everything is quite splendld in its way, and the manikins who float about in models of amazing fashion remind you of tropical birds, beautiful but songless. Is it to be marveled at that a dinner dress of silken splendor costs £50? The very elevator in which you are carried from one floor to another is a gem of eighteenth century design and decoration.

There is yet another reason for these high prices-the wages of the men and women who make the dresses. After the dressmaker, who claims the first profits, come the designer, the cutter, the fitters, the multitude of "little hands" who do the dull, important sewing parts, the brodeuses, and a further crowd of siding genius, the vendeuse. All these people have to be paid. When a dress costs £50 there should be no badly paid labor in it, otherwise its raison d'etre ceases to exist. Before the war I knew that some of the head saleswomen made good incomes, and down to the "little hands" the pay was not The designers were also fairly paid, but the odd workers who were not employed in the house itself did not benefit fairly by the big sums which were paid by the women who dress in the Rue la de Paix.

Change Produced by War. To an unprecedented purchasing power of the British Isles has passed into the hands of women because of the war. Wives of men who have enlisted are receiving all. pay, as well as the allowances made
