

The Hedley Informer

VOL. VI

HEDLEY, DONLEY COUNTY, TEXAS, JANUARY 7, 1916

HARDWARE STORE TO CHANGE HANDS

A deal has been made whereby J. A. Moreman becomes the owner of the Storm Hardware Co. store. We understand he traded his residence property in on the business. Invoicing will be done next week.

First of last year there were a number of changes made in business, but this is the only change so far in Hedley.

PIERGE BABY DEAD

The two and one-half year old child of Mr. and Mrs. Pierce north of Hedley, died Monday afternoon of pneumonia and was buried in Rowe Cemetery Tuesday. Sympathy is extended to the bereaved ones.

We call your attention to the advertisements in this issue wherein many values are offered by the merchants, who believe in the Informer as an advertising medium. Read their ads and profit by the offers they make.

Mrs. Geo. Tomberlin was taken to the Sanitarium at Clarendon Wednesday. This makes the third trip for her, and it seems that her condition does not improve. Mr. Tomberlin is also suffering from a badly crippled foot.

W. M. AUXILIARY

The Woman's Missionary Auxiliary met Monday, Jan. 3, for annual election of officers. The President read the 1st Psalm. After prayer and quarterly reports from officers present, the following officers were elected for the ensuing year:

Mrs. Frank Kendall, President; Mrs. Boston, 1st Vice President; Mrs. Reavis 2nd Vice President, and Mrs. Masterson, assistant; Mrs. Wimberly, Publicity Superintendent; Mrs. Harrison, Social Service Superintendent; Mrs. Scates, Treasurer; Mrs. Bain, assistant Treasurer; Mrs. Davis, Recording Secretary; Mrs. Lively, Corresponding Sec.; Mrs. Bray, agent for "A. M. D." There being no further business the Auxiliary was dismissed, after which Mrs. Scates and Mrs. Bain served delicious refreshments.

Monday, Jan 10 we have our regular "Missionary Voice" lesson. All members are urged to come to the parsonage and bring some one with you. Following is the program:

Opening Song—"A charge to keep I have"
 Sentence Prayer.
 Bible Lesson—My gift of love and gratitude, 2 Cor. 8, 7, 9, Mark 14:19
 Remarks on lesson by leader.
 A glimpse into three of our great Home Institutions—Mrs. Lively.
 Response of Texas to a crying need—Mrs. Battle
 "Itinerating in the Cargo"—Mrs. Harrison.
 What Christ has done for the Korean Home—Mrs. Scates.
 Chinese Idol seller turns to Christ—Mrs. Jno. Moreman.
 Roll Call, Minutes.
 Plan work for the year.
 Close with prayer.
 Hostess—Mrs. Reavis.
 Leader—Mrs. Bain.

RESOLUTIONS

We, your committee on resolutions, beg to submit the following: Whereas in the Providence of Almighty God, it has seemed best to remove from our midst our esteemed and honored friend and our faithful and beloved pastor, Rev. C. W. Horschler.

And whereas the influence of his useful and Christ like life among us, his unselfish devotion to every worthy cause, his true consecration to the cause of his Master, his faithfulness to and his love and devotion for his family and his fellowman, has endeared him to us and made us to feel sorely the loss of his active personal influence.

Therefore, be it resolved: by the First Baptist Church at Hedley in Conference assembled, that we recognize in Rev. C. W. Horschler a true and devoted Christian, a faithful minister of God and a devoted pastor, and we express our appreciation of his pure and unselfish life, his faith in God and his devotion to duty.

That we reverently bow to the will of God, that we extend to his wife and children our deepest sympathy and that we humbly ask God to guide and protect them.

Be it resolved further that a copy of these resolutions be sent to the family, a copy be placed on the church minutes and that they be furnished to the Hedley Informer and the Baptist Standard.

Respectfully Submitted,

W. T. White,
 W. R. McCarroll,
 Mrs. J. G. McDougal,
 Mrs. J. C. Wells,
 K. W. Howell,
 Committee.

Death of Johnson Infant

The infant of Mr. and Mrs. Tom Johnson of this city died Tuesday night of last week and was buried Wednesday in Rowe Cemetery. The Informer sympathizes with the parents in their sorrow.

MRS. J. O. ADAMSON DEAD

Mrs. J. O. Adamson died at the family home north of town Wednesday afternoon, January 5, after suffering several years with tuberculosis.

The funeral service was held at the M. E. Church Thursday afternoon, conducted by Rev. L. A. Reavis, following which interment was made in Rowe Cemetery.

Mrs. Adamson was a devout Christian woman, beloved of all who knew her. While death has been expected for some time, yet when it did come cast a gloom over the entire community. The Informer extends sympathy to the bereaved family.

Jess Boone of Bray bought the J. H. Richey property in east Hedley and moved to same Monday.

J. H. Richey and family moved Saturday to one of the W. E. Reeves residences in west Hedley.

A young man named Frank Reed was accidentally shot and killed by his own gun while out hunting near Brice Wednesday. The young man was a son of Mr. J. E. Reed of this city. The parents were notified soon after the accident and the father went at once to the scene. Death followed the shot in about fifteen minutes. It seems that a number of young men went out hunting. They were in a pasture and the owner went out in his buggy to ask them not to shoot in his pasture. The young men gathered round his buggy and were chatting. Young Reed set his gun down near the buggy wheel and was holding the barrel. The horse started the buggy and a spoke of the wheel struck the hammer of the gun. The result was exploding a full charge of shot into the young man's stomach. No possible blame could be attached to anyone. Reed was 24 years of age and unmarried.—Hall County Herald.

MRS. BUD SKAGGS DEAD

Mrs. Bud Skaggs after a few days illness died Monday morning December 27, and was buried in Rowe Cemetery December 28. Funeral service at Baptist Church conducted by Rev. J. W. Hembree of Memphis.

Mrs. Skaggs leaves a husband and three children and many relatives and friends to mourn her death.

Her mother and brother, Mrs. D. A. Olinger and son Ray of Springfield, Mo., and J. C. Skaggs and family of Wellington came to attend the funeral.

The Informer joins the many friends in extending condolence to the bereaved family.

CARD OF THANKS

We take this method of extending our heartfelt thanks and gratitude to the many good people of Hedley who so kindly assisted us in the sickness and death of our loved one. Be sure your every deed of kindness is fully appreciated.
 Bud Skaggs and Family.

Miss Vida Tarpley, who has been visiting at Lockney, Tex., the past three months, came in last week to spend the holidays with home folks. She was accompanied by her sister Mrs. L. A. Holland.

A mule team driven by Sam A. Hall of the Finch ranch ran about two blocks Wednesday morning and badly wrecked the wagon, but did no damage otherwise.

Dr. Foster and family stopped over Sunday with Mrs. Foster's brother, G. A. Wimberly. They were moving from Booneville to Groom.

Ernest Kelly and Percy Wells were over from Wellington Thursday. W. P. Madden returned to Wellington with them.

MARTIN H. BELL ANNOUNCES FOR PUBLIC WORKS

In this issue of the Informer appears the announcement of Martin H. Bell as a candidate for the office of Public Works Precinct No. 3, subject of the voters in the Democratic primary next July. Mr. Bell has been in Hedley about four years, engaged most of that time in drayage and transfer and is well known to the voters of the precinct and is able, upright and energetic, well qualified for the office to which he aspires. He promises courteous and prompt treatment, and a close attention to business if elected. He asks for the voters to give him a fair and honest vote. He is running for office on his own merits and qualifications.

G. A. Ashwander of Birmingham, Ala., stopped in this week with Mrs. Ashwander, sister, Mrs. J. P. Pool. They were moving to Amarillo where he will engage in the wholesale grocery business.

J. M. Fields moved from this week to the Beedley place, which he bought from Steele, and C. W. Jones to the Fields place from Mr. Steele.

Mrs. Sharp and daughter, Mrs. T. M. Little, returned Tuesday from a visit in Eldorado, Okla.

Travis Lively is teaching in Ring, having been employed by the trustees upon the resignation of Pearl Boston.

Jesse Yates and wife of Wichita Falls visited her parents and Mrs. W. A. Wylie during the holidays.

"The Old New Hampshire Home" was played by Hedley talent at Windy Valley last Saturday night.

Frank Simmons visited his parents and other relatives in Hill and Bosque counties during Christmas.

D. S. Ray died at Lodge last week. He worked for J. Walker Lane several months last year until his health failed.

For Sale—Full blood Plymouth Rock roosters at \$1.00 each.
 J. T. Bain.

Have a Fit with Clarke, The Tailor.

The meeting of the Knights Templar here on Christmas day was quite an imposing gathering. They were in full uniform and looked very fine. There were about 150 of them present at the Methodist church Saturday morning and participated in the ceremonies. Among the number were several from Childress, Clarendon, Hedley, Estelina and other nearby towns. This is a splendid body of men and are enthusiastic over their lodge work. Rev. R. B. Morgan preached a very strong fraternal sermon. Other features of the program were also very much appreciated. —Hall County Herald.

MONEY TO LOAN
 I loan money on Farm and Ranch Lands in this and adjoining counties; look after the removal of all Darlington loans; and buy Vendors Lien. See or write R. R. Sherwood, Wellington, Texas, or over First Natl. Bank.

Rosa Marquis, Director of the Marquis Conservatory of Music at Clarendon will have a class in Music in public schools here and in the school studios every Monday and Friday. Students receive in Piano, Violin and Voice work. Report to Rosa Marquis, Director.

Good clean shaves, haircuts, and first class laundry work can be had at my shop J. B. Lewis.

L. L. Cornelius made a business trip to Clarendon Tuesday.

A JAPANESE GARDEN.

Do you own a Japanese garden? If not, you should get one right away, because it is the latest fad to have one.

First of all, you will need a shallow rectangular pan in which to plant the garden. This may be round or square. The soil you must have sand, and you must also have some coarse pebbles or pieces of broken stone. This can be for the asking some place where building is in course of construction. A handful of sand and several handfuls of pebbles will be enough. In addition, you must buy some bird seed or Japanese grass seed to plant in the soil. The rest of the garden can be picked up at home.

There are any number of arrangements for the garden that can be made, and you can replant you from time to time to make it new.

Fig. 1 shows a good plan for your first one. Fill up around the sides of the pan, hills and hollows, and leave a star-shaped space in the center, and extending over to one side of the pan, for a pond. Make a shore line of pebbles around the pond, and scatter other pebbles here and there over the sand.

One of the hills must be selected as a site for a little Japanese house. This house may be made of cardboard. Fig. 2 shows patterns for the walls. The dotted lines indicate where the pieces are to be folded. The strips outside of the dotted lines are to be turned in and pasted to adjoining surfaces, in fastening the walls, foundation and roof together. Fasten the walls upon a cardboard foundation (Fig. 1), and glue another piece to their tops for the roof.

A high arched bridge must be built over a narrow portion of the pond as shown in Fig. 1. Make this of a piece of a peach-basket handle (Fig. 3), with a cardboard railing (Fig. 4) tacked to each edge. The arch of the

handle will determine the curve of the railings.

The pair of lamps at each end of the bridge (Figs. 1 and 5) have four sides and a bottom, cut in one piece like the pattern shown in Fig. 6. Cut an opening in each side as indicated and punch a hole through the bottom for the supporting post to fit in. Fold on the dotted lines, and paste the turned-in edges together.

There must be a bird house similar to that shown in Fig. 1. Cut and fold the sides in the same manner that you did those of the lamps. Make the roof of a square of paper (Fig. 7), fold from corner to corner as indicated by dotted lines, and pinch up the corners as in Fig. 8.

There must be a number of ducks in the pond, and these are easily made as shown in Fig. 9. The bodies are halves of corks (Fig. 10), and the necks and heads are made of cardboard.

Castors are not necessary, but inasmuch as the desk will be heavy when filled, they will make it easier to move. Two blocks (E, Fig. 6) must be nailed across the bottom box to fasten the castors to.

Figure 6 shows how the two boxes are connected with four corner uprights. Cut these one inch thick, three inches wide and four feet long and nail or screw them to the box ends. Fasten the lower ends of the uprights even with the castor blocks E, and the upper ends so they will extend six inches above the top of the desk.

Two coats of paint will add the finishing touches to the desk. Putty all cracks and nail-holes.

With these suggestions to show you how easily a garden is built, you can use your own ideas for devising other garden accessories.

The design at the left might be made, apparently, from embroidered handkerchiefs. It is merely a fitted band of organza finished at the edges with small buttonhole-stitched scallops and having a flaring piece of the same kind set on at each side. The surface is decorated with scattered embroidered dots and little flower sprays.

The collar at the right is one of several designs in which a double row of tabs is set on about the top. In each of these designs the upper and under row of tabs are unlike in shape and length. Both are finished with fine embroidery, and the effect of the two thicknesses of sheer material is very dainty.

All of these new collars set up very close about the neck and only a few of them are suited to the short-necked figure. These are those having a wide standing band shaped to apparently lengthen the neck, and a flaring portion that extends only about the sides and back. But the girl who cannot wear the wide standing collar may console herself by reflecting on how well she can wear the fashionable evening bodice, which leaves neck and shoulders and arms uncovered.

One should not fail to notice, when considering neckwear, the "choker" of narrow black velvet ribbon, about an inch wide, which is worn so effectively with evening gowns. It is fastened with a little flat bow and a small sparkling jewel in a pin is sometimes set against it.

Convertible Coat of Sealette

One of the handsome long coats of plush which dealers prefer to call by its new name—"fur-fabric"—is shown in the picture above. It merits the consideration of the woman who wants a coat to serve many occasions, and is entitled to be called "sealette," by which name the manufacturers have christened the fabric used in it. This is a rich, glossy plush of so dark a brown that it might be classed among the various blacks.

The coat is long, nearly covering the dress, and hangs almost straight at the front. It is semifitted at the back, but loosely adjusted to the figure. There are wide revers at the front which may be rolled forward when the turnover collar is brought up close about the neck. Large covered buttons, like the material of the coat, are used for fastening at the front—and one is set at each side of the back at the waist line.

The wide collar and deep cuffs of white fur are made separate and fastened to the coat when it is to do duty for evening or dressy afternoon wear. They are not intended for the workaday world of every day, but to convert a very practical coat into a rich-looking garment suited to special occasions. There is nothing

more durable than a coat of this kind in a good-quality of the Landsome pile fabric used for making it.

With the addition of the white fur collar and cuffs, white gloves and white-and-black shoes are donned, and a smart, dressy hat finishes a toilette quite up to the demands of full dress.

Dresses for Girls.

High waist lines are the rule for the little girls' thin dresses. Like grown-up dresses, the skirts of these dresses are very flaring and frilly.

The skirts of tulle and chiffon dresses or those of lingerie, batiste or very thin silk are often finished at the hem with three little ruffles. These are only about three or four inches in width and are not gathered very full. A picot edging is used often instead of lace to finish them, or a very narrow satin ribbon, perhaps in a double lengthwise stripe.

Little puffed sleeves that come only halfway to the elbow are considered very correct, and they go well with the general empire contour of the gown.

In linen dresses the empire waist line has a belt of the same that has a slot inset in the middle of it of another color.

Something New in Neckwear

Something new in neckwear has lately been added to the array of crisp and dainty pieces that came in with the fall season. The new arrivals are made of the same materials but have taken their cue from the high collars of wraps and street gowns, and their foundation is a band, fitting close about the neck, and as wide as it can be worn.

To this band of thin material, wings, tabs, and flaring pieces are added in a variety of shapes and finish that seems unlimited. Fine embroidery on sheer fabrics makes them elegant, but their crisp daintiness is a fragile quality, and hence it is necessary to replace them often, for it is just these qualities that they are expected to lend to the costume. Two good examples of these novelties are pictured here and they serve to show the essential features of all of them.

The design at the left might be made, apparently, from embroidered handkerchiefs. It is merely a fitted band of organza finished at the edges with small buttonhole-stitched scallops and having a flaring piece of the same kind set on at each side. The surface is decorated with scattered embroidered dots and little flower sprays.

The collar at the right is one of several designs in which a double row of tabs is set on about the top. In each of these designs the upper and under row of tabs are unlike in shape and length. Both are finished with fine embroidery, and the effect of the two thicknesses of sheer material is very dainty.

All of these new collars set up very close about the neck and only a few of them are suited to the short-necked figure. These are those having a wide standing band shaped to apparently lengthen the neck, and a flaring portion that extends only about the sides and back. But the girl who cannot wear the wide standing collar may console herself by reflecting on how well she can wear the fashionable evening bodice, which leaves neck and shoulders and arms uncovered.

One should not fail to notice, when considering neckwear, the "choker" of narrow black velvet ribbon, about an inch wide, which is worn so effectively with evening gowns. It is fastened with a little flat bow and a small sparkling jewel in a pin is sometimes set against it.

FLOATING TEETH HORSES AND MULES

Superior Animals for Farm Work.

(By J. M. BELL.)
Some months ago the writer had occasion to purchase two "second-hand" mules to do some farm work. These mules were bought at public auction, and were secured at prices that might be termed cheap. They were shipped to the county and put to work at once, but unfortunately, although they performed their work faithfully, it was noticed that they fell off in flesh.

Upon careful examination of the teeth it was discovered that the grinders were worn and uneven, and that consequently they could not thoroughly masticate their grain or

Therefore it was a case of selling them at a loss or having their teeth repaired.

My mules were shipped to a veterinary surgeon, and after a thorough examination of their mouths, he expressed the opinion that they could be helped.

It was discovered that one of the mules had a boil ulcer in its mouth caused by the loss of an upper grinder. The lower grinders having become elongated, had cut into the upper causing ulceration and much pain when the animal attempted to either grain or forage.

These long teeth were saved but in the attempt the mule became restive and in spite of the efforts of two strong men, pulled back, and tooth was extracted. Her other teeth were filed down and put in as good order as possible. This mule was shipped back to the farm and a few days began to improve in condition. A healing lotion was used in her mouth for several days. The mule disappeared, and after that she had no trouble whatever in masticating either hay or grain, and performed her work so well that she was sold at a profit—a few weeks after being cured.

When she was bought at auction she was a living skeleton and another one, while fat when brought town, had evidently been fed off food, for he could neither masticate hay or grain in sufficient amount to keep him so. In fact, he practically refused to eat corn either on the hoof or shelled and had to be fed on hay and grass.

When his teeth were treated he was able to masticate his food fairly well and did very good work, selling at public auction after hard work at the farm for some months, for which he cost.

There are thousands of horses and mules that, arriving at old age are still capable of performing hard labor every working day in the year, if they can thoroughly masticate their food; and the writer would advise that when horses or mules of this class begin to

HEAVY FEEDING OF SILAGE TO A BULL

Majority of Breeders Feed It in Limited Quantities Together With Alfalfa.

Heavy feeding of silage to a bull at service is not desirable and may render him impotent. Some breeders will not feed silage under any condition, but probably the majority will feed it in limited quantities together with all the alfalfa or clover hay the bull will consume. To supplement this roughage sufficient grain is fed to keep the bull in good service condition but not fat. Restricted and careful feeding and plenty of exercise are the fundamental requirements in keeping a bull in good service condition.

A good ration for the bull will consist of all the clover hay he will consume without waste and ten to fifteen pounds of good silage. If bull is at heavy service or it is necessary in order to keep him in good condition, feed sufficient of a grain mixture consisting of equal parts of dried brewer's grains and ground oats or bran. At \$20 per ton the dried brewer's grains are the cheapest feed, but the oats or bran will add variety and lighten up the ration. If no silage is fed, it may be desirable to feed from a half pound to a pound of oil meal daily, possibly adding corn and cob meal to the regular grain ration.

Real Crop Rotator
A mere succession of the various grain crops is not a rotation that has any real significance. Real crop rotation to be worthy of the name must include some legume.

SALT IS ESSENTIAL FOR DAIRY CATTLE

Important Item Often Overlooked in Cow's Ration—Put in Convenient Place.

(By E. V. ELLINGTON, Idaho Experiment Station.)
An important item that is often overlooked in the management of the dairy herd is the necessity of providing salt in the ration of the cow. All animals that consume large quantities of vegetable food require salt. Babcock of the Wisconsin experiment station found in his experimental work that the cattle when deprived of salt became emaciated and were of low vitality and finally suffered a complete breakdown. He recommended that they should be fed three-fourths of an ounce per day with an additional six-tenths of an ounce for each 20 pounds of milk produced.

While salt may be provided in the daily ration by mixing it with the grain, an equally satisfactory method in practice is to keep it in a convenient place, where the animals may have ready access to it when they so desire. It may be used in the form of rock salt or placed in boxes in the feed lot. However, it should be borne in mind that salt is very essential to the economical handling and health of dairy cattle.

Give Sheep Water.
It is a queer fancy with some men that sheep can get enough drink by eating grass when the dew is on in the early morning. Stop and think how very, very little water a sheep could get that way. Give them a good spring or a trough to drink from.

Naylor Springs

(Sent in last week)

The little snow last Monday night impressed upon our minds that the happy Christmas time was really at hand, while the old year is swiftly passing out and the New Year is just without the door, waiting patiently till Father Time says his year's work is finished. Let us all rejoice that we have seen the close of another year and trust that we may be spared to the end of many more. Let us all shout with one accord, success and happiness, peace and good will to all men throughout the coming year.

Rev. DeBoard and family spent Christmas day in the T. L. Naylor home.

J. S. Hall and family taken dinner with the J. D. Harrison family near Memphis Saturday.

Mr. Johnston and family are now at home to their many friends on the D. M. Latimer farm.

Mr. Latimer and wife have moved, for the time being, into the Guss Hefner house.

Miss Lou Naylor came in Friday to be with home folks during the holidays.

Mrs. Barton and children from the JA ranch came down and spent several days last week with her sister, Mrs. Hefner. Later the families visited their parents, Mr. and Mrs. T. C. Woods.

Mr. DeBoard and family and T. L. Naylor and family were dinner guests at the J. S. Hall home Sunday.

Dr. C. L. Fields and daughter, Ruth, and Messrs. Lewis Fields and Harlan Naylor made a flying trip to McLean, Alanreed, Jericho and Clarendon Saturday.

Sorry to report several of our midst are suffering from colds.

NELDA.

Chas. Boles returned Saturday night from Clarendon where he underwent an operation for appendicitis two weeks before. He is improving nicely and was able to be out in town Wednesday for the first time.

Don't Neglect Kidneys

Swamp-Root, Dr. Kilmer's Prescription, Overcomes Kidney Trouble

It is now conceded by physicians that the kidneys should have more attention as they control the other organs to a remarkable degree and do a tremendous amount of work in removing the poisons and waste matter from the system by filtering the blood.

The kidneys should receive some assistance when needed. We take less exercise, drink less water and often eat more rich, heavy food, thereby forcing the kidneys to do more work than nature intended. Evidence of kidney trouble, such as lame back, annoying bladder troubles, smarting or burning, brickdust or sediment, yellow complexion, rheumatism, maybe weak or irregular heart action, warns you that your kidneys require help immediately to avoid more serious trouble.

An ideal herbal compound that has had most remarkable success as a kidney and bladder remedy is Dr. Kilmer's Swamp-Root. There is nothing else like it. It is Dr. Kilmer's prescription used in private practice and it is sure to benefit you. Get a bottle from your druggist.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Nibbling.

To nibble, or not to nibble; that is the question.

Whether it is better to eat three square meals a day or to take arms against a score of little nagging appetites, and by yielding, end them for the time being.

To bite, to crunch—aye, there's the question—and by a bite to think we end the heartburn and the thousand stomach aches that nibbling is heir to—there's the rub.

Much better were our quietus made with a rare beefsteak.—Life.

THE FARMER'S CHANCE

THE SPUR FARM LANDS IN Dickens, Kent, Crosby and Garza Counties, Texas, offer the farmer his best opportunity to secure productive farms at low prices and on easy terms. Several hundred farmers have already bought from this remarkable body of agricultural lands, and are rapidly paying for the same from the products thereof—in many cases paying notes before they are due. NO BOLL WEEVIL ever known. NO MALARIA. Altitude, 2,500 to 2,600 feet. Wonderful cotton and feed crops grown. For illustrated booklet, address Chas. A. Jones, Manager for S. M. SVENSON & SONS, Spur, Dickens County, Texas.—Adv.

Playing Safe.

"I'm surprised to see you riding in the smoker every day. You never use tobacco in any form, do you?"

"No, but if I ride in one of the other cars my wife expects me to be able to tell her what every lady on the train was wearing, and whether it was becoming or not, and if I tell her she accuses me of taking too much interest in other women. If I can't tell her she says I'm too stupid for any kind of use."

DON'T SNIFFLE!

You can rid yourself of that cold in the head by taking Laxative Quinidine Tablets. Price 25c. Also used in cases of La Grippe and for severe headaches. Remember that.—Adv.

His Sympathy.

"Tut tut, nub brudder!" admonished good old Parson Gagster. "Don't say anything you'll be sorry for."

"Done said it a'ready, pahson!" replied Gin Johnson, the reformed gambling man. "I spoke de name o' Lank Fuller. Well, I'm sorry 'fo' po' Brudder Lank. Come along and see what happens to him, and you'll be sorry for him, too."—Kansas City Star.

ECZEMAS AND RASHES

Itching and Burning Soothed by Cuticura. Trial Free.

The Soap to cleanse and purify, the Ointment to soothe and heal. Relief, rest and sleep follow the use of these supercreamy emollients and indicate speedy and complete healing in most cases of young and old, even when the usual remedies have utterly failed.

Sample each free by mail with Book. Address postcard, Cuticura, Dept. XY, Boston. Sold everywhere.—Adv.

Not Strange.

"Jones and Brown are great pals, aren't they?"

"Yes. You know Brown married Jones' wife's sister."

"I see. Naturally they sympathize with each other."

Important to Mothers

use "Renovine" and be cured. Do not wait until the heart organ is beyond repair. "Renovine" is the heart and nerve tonic. Price 50c and \$1.00.—Adv.

Every divorced man appears to be anxious to serve another indeterminate sentence.

THOROUGH VENTILATION OF CORN CRIB

Perspective of Rat-Proof Corn Crib, Showing Concrete Foundation by Dotted Lines.

As a result of many requests for information regarding a building of this sort, specialists in rural engineering in the United States department of agriculture have worked out plans for a corn crib that will both aid in the drying of corn and protect it from rats. As the accompanying drawings show, there are really two cribs in the complete structure, each 32 by 8 feet, with a capacity of 1,000 bushels. If desired, however, only one of the cribs may be put up at first and the construction of the other left to a more venient time.

The two cribs are separated by a driveway 12 feet wide, and the whole is covered by a gable roof. The driveway floor may be of concrete or dirt. If the ground is well drained, a dirt floor in the driveway will answer very well. If the floor is of concrete, it will also serve as a feeding floor for hogs. A wood floor should not be used, as it would harbor rats.

The details of construction can be used in building cribs of greater or less dimensions or of a different type. The devices for ventilating and rat proofing can be used in new cribs or in remodeling old structures.

As the plan shows, a concrete foundation is put in for all of the walls. This foundation should extend from below the frost level to 6 inches above ground for the outer wall and to 8 inches above for the inner wall. The space between the foundation walls should be filled in with well-tamped cinders or gravel, and on top of this base a concrete floor laid. The difference in height above ground between the inner and the outer concrete foundations will give a 2-inch pitch to the floor toward the outer edge and thus drain off water that may beat through the walls of the crib. The cinders or gravel underneath the floor prevent moisture rising from the ground through capillary action. The floor itself should be constructed of 4 inches of re-enforced concrete, with the surface troweled to a smooth finish.

If a concrete driveway is decided upon, 6 inches of gravel or cinder floor should be first tamped down and a 4-inch concrete floor with a float finish laid on top.

The iron sockets or joist hangers, which can readily be obtained on the market, should be set in while the concrete floor is being laid. As the drawings show, the studs themselves should be 2 by 6 inches. To these is nailed siding for the outer walls. This siding consists of 1 by 6 inch boards with both upper and lower edges beveled at an angle of 45 degrees. They should be set about 1 1/2 inches apart. This permits free entry of air, while the beveled edges lessen the danger of rain beating into the crib. However, the beveled edges are not absolutely necessary. In the complete structure the siding on the walls facing the driveway need not be beveled, as there is no necessity for protection from rain here. On these sides, too, the siding boards should not be carried high-

er than 6 1/2 feet. This permits the crib to be filled by throwing the corn over the boards. If the quantity of corn on hand is sufficient to fill the crib above this point, additional siding boards can be hung on 20-penny spikes driven into the inner side of the studs. The boards have holes at proper intervals to fit over the spikes and are held in place by the pressure of the corn.

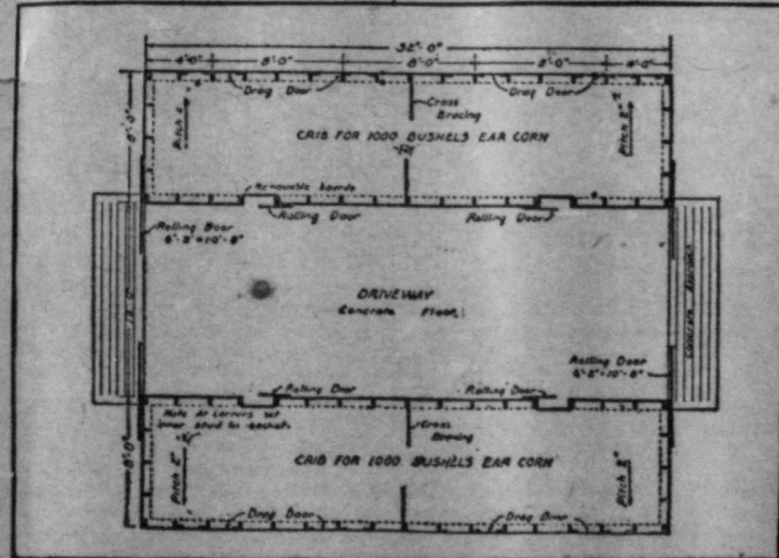

The rat-proofing is an important feature of the design which the farmer can not afford to neglect. One-half inch mesh wire netting is put on all sides of the crib between studs and siding and carried to a height of 30 inches above the ground or above the floor of the driveway. At the top of the wire a strip of 3-inch galvanized iron should be nailed to the outside of the siding. The bottom of the galvanized iron is 2 inches lower than the top of the wire, making a total height for the wire and iron strip of 28 inches all around. This galvanized iron strip will halt any rats that may climb up the walls. The rat-proofing is put on the drive side of cribs so that if the doors are left open rats will still be unable to get at the corn. Care should be taken not to leave any objects near the walls which would enable a rat to jump above the rat-proofing.

Provision is made for 4 drag doors on the outer side of each crib and 2 rolling doors on the inside. The drag doors are so designed that corn will roll out of them on to the conveyer belt of a sheller. The rolling doors on the inside are for access to the crib. They should consist of a frame completely filled with wire netting, with a galvanized iron strip at the same height as on the wall. The drag doors are made of siding nailed to cleats with the wire mesh between.

Movable inverted troughs of slats are placed on the floor lengthwise of the cribs. These are in sections to facilitate handling and are designed to increase the circulation of air through the corn. As a further aid to circulation of air, movable shafts may be placed at the side or on top of the troughs. The shafts are constructed of 1 by 3 inch vertical strips nailed to frames made of 1 by 2 inch stuff. In order to hold the shafts in place while the cribs are being filled, they may be tacked to the cross-ties overhead. The number of shafts to be used will depend upon the amount of moisture in the corn.

Complete working drawings for this crib may be obtained from the office of public roads and rural engineering of the department. A bill of materials to enable those interested in the matter to form some idea of the probable expense in their locality of erecting the structure will also be furnished on request.

As has already been said, however, some of the fundamental principles involved, the rat-proofing, the ventilation, and the protection against ground moisture, may be employed advantageously in smaller buildings.

Floor Plan of Rat-Proof Corn Crib.

Best Trees for Fire Wood.

The man who burns up his post timber in the winter should have no sympathy when he is searching for trees suitable for posts and cannot find them. All gnarled and knotty trees, all crooked and deformed trees, and all partly dead trees should be used up first. This gives room for the good timber to grow larger and gives the woodlot a good appearance.

Advantage of Spreader.

A good reason why the manure spreader is advantageous is because a man who has his money invested in an implement of this sort will take better care of the manure on the farm. It will not allow it to lie around and rot, but will get it back on to the soil where it should be placed.

Marketing Live Stock.

"Every farmer should market his own live stock." This is to be the slogan of the extension work in Minnesota during the coming winter. There are about 200 live stock shipping associations in Minnesota. There should be three or four times as many. Through a co-operative association which is well organized and managed, the farmers can market their own stock to the very best advantage.

Adding Vegetable Matter.

Plowing cowpats under adds vegetable matter to the soil which tends to make it loose and resistant to excessive dry weather or wet weather. It also adds chemical fertility to the soil in the way of nitrogen.

Housework Is a Burden

It's hard enough to keep house if in perfect health, but a woman who is weak, tired and suffering from an aching back has a heavy burden. Any woman in this condition has good cause to suspect kidney trouble, especially if the kidney action seems disordered.

Doan's Kidney Pills have cured thousands of suffering women. It's the best recommended special kidney remedy.

A Texas Case

Mrs. J. M. Ward, Willsboro, Texas, says: "My health was all run down from kidney trouble and I suffered intensely from backache. I had pains in my head, along with blinding dizzy spells. Nothing relieved me until I took Doan's Kidney Pills. They benefited me so much that I can't be too grateful."

DOAN'S KIDNEY PILLS
FOSTER-MILBURN CO., BUFFALO, N. Y.

Great Help.

"Did you have anyone help you when you were hanging the pictures?"
"Oh, yes. My wife stood around and asked me what I was swearing at."

BREAD WITHOUT SALT IS TASTELESS

A medicine chest without Magic Arnica Liniment is useless. Best of all liniments for sprains, swellings, bruises, rheumatism and neuralgia. Three sizes, 25c, 50c and \$1.00.—Adv.

Unhappy.

"I wonder why Jinks always insists on getting a table as far away from the music as possible when he goes to a restaurant?"
"Probably it spoils his appetite not to be able to hear his own voice."

Where He Got It.

Coach—Jones, you look like the "find" of the season. The way you hammer the line, dodge, slug your men and worm through your opponents is marvelous. You must have played considerable, haven't you?
Candidate for Football Team—No; it's my early training. You see, my mother used to take me shopping with her on bargain days.—Judge.

Why the Price Was Low.

A shabby man entered a small general store in a Scotch village and asked the owner, a genuine Scot who was known far and wide for his "pawky" humor, if he might have an empty soap box.
"All right," said the shopkeeper, "ye can have one; but the price is twopence."
"Tuppence!" ejaculated the applicant. "That's too much money altogether. I can get them for less than that."

"Less than twopence? You're dreaming, man," replied the other, who disliked nothing so much as haggling. "Where can ye get them for less?"
"Down at your neighbor's, Tamson's," was the rejoinder.
"Oh," replied the man behind the counter, apparently much relieved; "no doubt ye would get them for less there, but I was never fool enough to leave my boxes outside on the pavement all night."—Youth's Companion.

"BULLS" HEARD FROM PULPIT

Expressions That Make an Appeal to Those Endowed With a Sense of Humor.

A divine in drawing the attention of his congregation to a special communion service on the following Sunday informed them that "the Lord is with us in the forenoon and the bishop in the evening."

A Scotch minister innocently, perhaps, hit the mark by telling his people, "Weel, friends, the kirk is urgently in need of siller, and as we have failed to get money honestly we have to see what a bazaar will do us."

There is a certain amount of exhortation to be made for the young curate remarking that some people can church for no better reason than to show off their best clothes, finishing as he glanced over his audience "I am thankful to see, dear friends, that none of you has come here that reason."

A negro student when conducting the prayers at one of the missionary colleges, said: "Give us all sweet hearts, give us all clean hearts, give us all sweet hearts," to which the congregation made response "Amen."

The giving out of church notices often proved a pitfall for the "During Lent," said a rector, "several preachers will preach Wednesday evenings, but I give their names, as they were found hanging up in the porch."

Daughter's Idea.

Mrs. Brown was in the habit of introducing her big daughter as "Jane is Jane; she is only fifteen—you'd never think it, would you?"
At last the girl protested. "It's mean of you to tell everybody how young I am. I could have a lot better time if you didn't."

"Perhaps you could. But I do propose to have people saying, after you've been out in society a couple of seasons, 'Don't tell me Jane Brown is only twenty—why, she was a grown girl years ago.'"
"Just the same," retorted the daughter, "you wouldn't like it if I introduced you to my friends as 'The mother of my mother. She's only forty-eight—you wouldn't think it, would you?'"—Judge.

Durable Pie.

"How long will pumpkin pie keep?"
"It all depends. I saw a pie at a railroad restaurant on my last trip which I remember having seen early in September."
"What makes you so sure it was same pie?"
"The same three flies were standing guard over it."

Back to Life.

"Did you call me a little while ago?" asked the wife of her husband on the phone twenty minutes after the telephone had rang at home.
"No, I didn't call you."
"Well, I was dying and couldn't answer the phone then," she said.

Hard Enough.

"I want to realize hard cash from my investments."
"Then why not try steel stock?"

And many a man who tries to live right gets left.

Holland's . . . 2 years
 Our Paper . . . 1 year
 Farm and Ranch $\frac{1}{4}$ year

As Reflected in a Mirror

—*you* see in your local paper each week all the news of events taking place around you—among the people you know and love. You'll also find the more important happenings of the world chronicled in this paper—yes, this is your paper in every sense of the word. It leads the fight for everything that will make this community a better place in which to live; it's looking after your interests all the time and right now we have arranged to offer you double value for your money.

Brain Against Brawn

Why do some farmers prosper and enjoy many luxuries, while others, who work just as hard are always hard up? The answer is simple: one has used his brains and kept posted on up-to-date farming methods, while the other has felt that there is nothing for him to learn. He will not even read a first-class farm paper because he thinks no one can possibly tell *him* how to run his farm. FARM AND RANCH is prepared especially for farmers, gardeners, live stock and poultry raisers and fruit growers of the Southwest—the home builders. It has been the Southwestern farmer's right hand man for more than a third of a century.

Double Value This Year

This Year Holland's Magazine is just as large and much more interesting than ever before and the publishers are entering all subscriptions TWO FULL YEARS for the same price you formerly would have paid for a one year subscription. The short stories and special articles are clean, snappy and timely. The departments for the house-keeper are many and complete; the fashion pages show the late styles, and the children have a corner of their own. Holland's is truly a Southwestern Home Magazine of sunshine and good cheer which, in ten years time, has become indispensable to more than three quarters of a million people in the Southwest.

Send us your order for these three publications—our paper one year, Farm and Ranch one year and Holland's Magazine TWO YEARS—right away; also show this BIG VALUE OFFER to your neighbor who is not a subscriber to this paper. New and renewal subscriptions will be accepted at the rate advertised, so bring or mail your order now and get the benefit of the combination price.
