Y FEATURE IN BUNGALOW DESIGN

Story-and-a-Half House Steadily Increasing in Popular Favor.

Arrangement is intended to Meet the Desires of All Members of the Family-External Appearance More Than Usually Attractive.

By WILLIAM A. RADFORD.

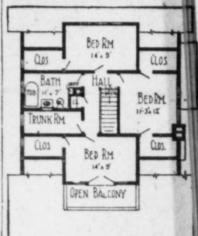

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only enclose two-cent stamp for reply.

Houses of the story-and-a-half type are being built very extensively by those who are inclined toward the bungalow style of architecture, but who do not wish to sacrifice the secondstory bedrooms. In this type they are still able to get much of the distinctive external beauty of the bungalow, yet they may easily have ample room for sleeping accommodations on the second floor. For those who do not object to the first-floor bedroom, and is very convenient. The kitchen is in who do not like the inconvenience of the rear of the dining room, with a climbing stairs, there is usually included in the design of such a house a single bedroom on the first floor. With that its position and equipment make the farm. The returns from some such an arrangement it is possible to it a very decided aid in carrying on selds on a small farm will be equal the family.

Here again is provided the chute to the laundry room, which proves to be an indispensable feature in lightening the housework.

The external appearance of this house is more than commonly attractive. Special attention has been paid to detail in the window arrangement on the front part of the house, and a result which is distinctly artistic has been obtained. The long, narrow panels on each side of the three front entrances, with the small panes of glass in all windows and doors, the neat railings on both the porch and the balcony above, and the wide expanse of porch unbroken across the entire width of the house, are all blended with the exposed rafters of the main ing into the living room and a double roof and the dormer roof to produce glass-paneled door into the dining a very pleasing house front. WISCONSIN TEACHER IS FARMING 40-ACRE PLOT WITH MUCH SUCCESS

To Succeed Farmer Must Enjoy His Work So That It Becomes Pleasure Instead of Task-Study Each Field and Know Its Weaknesses and Possibilities - Secure Good Returns From Alfalfa-Try to Make Each Cow Comfortable.

man who taught school for 23 years, is farming a 40-acre farm with wonderful success. F. F. Showers is this money-making teacher-farmer. He has a herd of cows that made him a net profit of \$72 a head in a year.

Read his suggestions and story: "If you are thinking of joining the union so you will have but an eight or ten-hour working day, do not think of trying to operate a small farm. To succeed in farming you must so enjoy your work that it becomes a pleasure instead of a task.

"In fact, success in farming depends upon the man who runs the farm. For if he thinks enough of his problem he will succeed no matter what lines of farming he may pursue. Love and enjoy your work. Study each of your fields to know its weaknesses and its possibilities. Harvest your crops so that you will receive the largest return from them. Give your herd a chance. Produce, care for, and raise only the best.

Study Each Field. "I study each field so that I know vantage. A farmer can do this on the mall fields. The farmer on the small arm must utilize all the corners of in the following summer.

In Walworth county, Wisconsin, a the seed bed the barley yielded 40 the seed bed the barley yielded 40 bushels to the acre.

'Upon this field last year eight tons of alfalfa hay were cut from every acre. My profit was \$98.40 an acre, after deducting the interest on the land at \$200 an acre, the taxes, the cost of plowing, disking, planting, fertilizing, and liming, besides the expense of cutting, tedding, raking, cocking, capping, shaking out, and hauling the hay.

"In curing alfalfa to get the largest return I cut the hay as soon as the dew is off in the morning and start tedding so that I can cock and cap the hay in the afternoon. About three o'clock the alfalfa is raked into windrows, carefully cocked (not tumbled) and then capped. I leave the hay in the cocks from eight to ten days, depending on the weather. (If necessary to leave the hay in cock for several days the cocks should be moved about so as not to kill or weaken the plants under them.) Then the cocks are opened up, but not scattered out, and the hay placed in layers so that the leaves do not become brittle and rattle off. TOWNS THAT HAVE VANISHED

Napoleon, in Temessee, is One Ex ample, and Indianola, Tex., Once Prosperous, Is Desertes

The older citizens of Memphis will remember the town of Napoleon, that one time was said to be the wickedest town on earth. Many years ago it was wiped out of existence and has long been a memory, and not a very pleasant memory, at that. Pious people have always claimed that the sinfulness of this early river town brought down upon its head the obliterating wrath of Providence, and they may have been right about that. Sodom and Gomorrah and the cities of the plains are said to have sinned away their day of grace and brought upon themselves destruction Nevertheless sometimes the good suffer as well as the bad. Indianola, Tex., furnishes one authentic instance. Indianola was a flourishing and a prosperous coast town that took great pride in its schools and its churches. It had been settled for a long time, and people felt secure and were happy. In 1876 a great tropical storm came up out of the sea and overwhelmed and sadly injured this beautiful place. Many buildings were destroyed and swept away, and even the trees that furnished shade were uprooted. Some people moved away never to return, but the courage of the majority was undaunted, and they began building up the waste places, and soon the town was restored and even enlarged. In 1886 another tropical tidal wave rolled over the little city and carried away everything, leaving the coast naked and unmarked by anything save a few bricks to show that it had ever been inhabited. dren returned from Colorado After the second disaster no one ever dared return, and the site is fast returning to a primeval wilderness. -Memphis News-Scimitar.

Brain Against Brawn

Why do some farmers prosper and enjoy many luxuries, while others, who won just as hard, are always hard up? The answer is simple: one has used his brains and kee posted on up-to-date farming methods, while the other has felt that there is nothing to him to learn. He will not even read a first-class farm paper because he thinks no on can possibly tell him how to run his farm. QUICK PASTURES FOR SHEEP

Rye, Wheat, Barley, Oats, etc., Are All Excellent—Cowpea is Favorite
Among Legumes.

For a quick-growing sheep pasture ome of the grain plants are excellent. Rye, wheat, barley, oats, etc., are all ed. Some of the peas and other legumes are often used, the common cowpea being a general favorite for this purpose. Sorghums are a big help when sown in the spring to furnish sheep pasture during the dry deather of midsummer, when the meadow crasses are brown and the bluegrass is apparently dead.

There is a great list of grasses that may be used in establishing a tempo rary sheep pasture. When a pasture is needed in a short time it is necessary to pick a grass that will astablish itself at once and begin furnishing forage. Timothy is fairly satisfactory and so are all the clovers. Take timothy and red clover as a combination to be sown early in the spring, with a nurse crop of oats and you have a mixture that is hard to beat. Cowpeas sown in the corn will make a fine late pasture for sheep and lambs.

Alfalfa has been recommended as a sheep pasture. It has points in its favor, but these are more than offset by its disadvantages. It will grow quickly and furnish a vast amount of grazing, but unless it is well mixed with other grasses its value is doubtful for this reason: It is likely to cause bloating. This, with the harm to the alfalfa that will be caused by the characteristic close grazing of the sheep makes it a poor plant for a sheep pasture,

SHEEP FLOCK IS PROFITABLE

Particularly Adapted to Rougher and Hilly Regions Where Much Land Is Going to Waste.

When you take into consideration the prices that wool and mutton are bringing at the present time it is easy to see how any farm can support a flock of sheep and make a good profit therefrom. In fact, it is hard to see how any farm in the rougher and more hilly regions, where there is a great deal of waste land, can afford to do without sheep.

A few years ago a good many sheep farmers were holding their lambs over the first winter instead of selling them in the fall for the holiday and winter markets. The demands of the lamb market during the last year have been such to hurry the youngsters into the markets as soon as they would weigh from 55 to 60 pounds. There is every sign that the lamb markets of this season will be fully as active as those of last fall and win-

BUTTON CLOVER A PROMISING NEW PLANT

Bur Clover-Taken at Chico, California.

Button clover is a new pasture plant which specialists in the United States department of agriculture are now advocating for use in the milder districts of the Southwest and along the Gulf, the South Atlantic and the Pacific coasts. This plant will succeed, it is said, wherever bur clover does well, and it is to be preferred to the latter In certain respects. Under favorable conditions it produces more seed and it has no spines on the pod or bur. For this reason it is particularly desirable for ranges where sheep are pastured. The great loss of wool occasioned by the spiny burs of spotted or toothed bur clover getting into the fleece is new publication of the department on with a spineless pod.

If allowed to be come more mature, many of the pods, as well as the leaves, are lost in handling. A supporting crop of oats or barley or some other grain should be sown with the button clover in order to facilitate cutting. There are, however, a number of other legume crops that are more desirable for hay production than button clover, so that its evidence, says Farmers' Bulletin 730, a use for this purpose will no doubt be very limited. RAILROAD WAGES

Shall they be determined by Industrial Warfare or Federal Inquiry?

To the American Public:

Do you believe in arbitration or industrial warfare?

The train employes on all the railroads are voting whether they will give their leaders authority to tie up the commerce of the country to enforce their demands for a 100 million dollar wage increase.

The railroads are in the public service your service. This army of employes is in the public service-your service.

You pay for rail transportation 3 billion dollars a year, and 44 cents out of every dollar from you goes to the employes.

On all the Western railroads in 1915, seventy-five per cent of the train employes earned these wages (lowest, highest and average of all) as shown by the pay rolls-

A 100 million dollar wage increase for men in freight and yard service (less than one-fifth of all employes) is equal to a 5 per cent advance in all freight rates.

The managers of the railroads, as trustees for the public, have no right to place this burden on the cost of transportation to you without a clear mandate from a public tribunal speaking for you.

The railroads have proposed the settlement of this controversy either under the existing national arbitration law, or by reference to the Interstate Commerce Commission. This offer has been refused by the employes' representatives.

Shall a nation-wide strike or an investigation under the Government determine this issue?

Authorof"Keith of the Border,""My Lady of Doubt,""The Maid of the Forest," etc

SYNOPSIS.

Adele la Chesnayne, a belle of New France, is among conspirators at her unle's house. Cassion, the commissaire, has enlisted her Uncle Chevet's aid against La Salle. D'Artigny, La Salle's friend, offers his services as guide to Cassion's party on the journey to the wildersess. The uncle informs Adele that he has betrothed he; to Cassion and forbids her to see D'Artigny again. In Quebec Adele visits her friend, Sister Celeste, who brings D'Artigny to her. She tells sim her story and he vows to release her from the bargain with Cassion. D'Artigny leaves promising to see her at the jance. Cassion escorts Adele to the hall. She meets the governor, La Barre, and hears him warn the commissaire against D'Artigny. D'Artigny's ticket to the ball has been recalled, but he gains entrance by the window. Adele informs him of the governor's words to Cassion.

La Barre and Cassion, enemies of Adele and haters of her protector, Reno d'Artigny, visit a frightful tragedy on this brave little girl-one which marks her for life-all unbeknownat to Rene. How she meets the great sorrow, with what courage she faces a future that looks forever dark, is described with keen sympathy in this installment.

CHAPTER VI.-Continued.

But the speeding canoes, the strange faces, the occasional sound of Cassion's voice, the siumbering figure of Chevet was evidence of truth not to be ignored, and ahead yonder, a mere outline, was the boat which contained D'Artigny. What would he say, or do, when he learned

the truth? Would he care greatly? Had I read rightly the message of his eyes? Could I have trust, and confidence in his loyalty? Would he accept my explanation! or would he condemn me for this act in which I was in no wise to blame? Mother of God! it came to me that it was not so mu Monsieur Cassion I feared, as the Sieur d'Artigny. What would be his verdict? My heart seemed to stop its beating, and tears dimmed my eyes, as I gazed across the water at that distant canoe. I knew then that all my courage, all my hope, centered on his decision—the decision of the man

CHAPTER VII.

The Two Men Meet.

I could not have slept, although I surroundings, for I was aroused by Cassion's voice shouting some command, and became aware that we were making landing on the river bank. The sun was two hours high, and the spot selected a low grasscovered point, shaded by trees. vet had awakened, sobered by his nap, and the advance canoe had already been drawn up on the shore, the few soldiers it contained busily engaged in Starting fires with which to cook our

I perceived D'Artigny with my first glance, standing erect on the bank. his back toward us, directing the men in their work. As we shot forward toward the landing he turned indifferently, and I marked the sudden straightening of his body, as though in surprise, although the distance gave me no clear vision of his face. As our canoe came into the shallows he sprang down the bank to greet us, hat in hand, his eyes on me. My own glance fell before the eagerness in his face, and I turned away.

"Ah! Monsleur Cassion," be exclaimed, the very sound of his voice evidencing delight. "You have guests on the journey; 'tis unexpected.'

Cassion stepped over the side and fronted him, no longer a smiling gailant of the court, but brutal in au-

"And what is that to you, may I ask, Sieur d'Artigny?" he said coldly contemptuous. "You are but our guide, and it is no concern of yours who may compose the company. 'Twill be well for you to remember your place, and attend to your duties. Go, now, and see that the men have breakfast served.'

There was a moment of silence, and I did not even venture to glance up to perceive what occurred, although I felt that D'Artigny's eyes shifted their inquiry from Cassion's face to mine. There must be no quarrel now, not until he knew the truth, not until I had opportunity to explain, and yet he was a firebrand, and it would be like him to resent such words. How relieved I felt as his voice made final answer.

"Pardon, Monsieur le Commissaire, he said, pleasantly enough. "It & true I forgot my place in this moment

of surprise. I obey your orders." I looked up as he turned away and disappeared. Cassion stared after him, smothered an oath, and evidently disappointed at so tame an ending of the and boast. Yet as his lips changed to a grin, I knew of what the man was thinking - he Lad mistaken D'Artigny's actions for cowardice, and felt assured now of how he would deal with him. He turned to the canoe, a new conception of importance in the sharp tone of his voice.

"Come ashore, men; ay! draw the host higher on the sand. Now, Monsleur Chevet, assist your niece forward to where I can help her to land with dry feet-permit me, Adele."

"It is not necessary, monsieur," 1 replied, avoiding his hand and leap ing lightly to the firm sand. "You have forced me into marriage; the law holds me as your wife. I know not how l may escape that fate, or avoid accon panying you. So far I submit, but no further. I do not love you; I do not even feel friendship toward you. Let me pass."

He grasped my arm, turning me about until I faced him, his eyes glaring into mine.

"Not until I speak," he replied threateningly. "Do not mistake my temper, or imagine me blind. I know what has so suddenly changed youit is that gay, simpering fool yonder. But be careful how far you go. I am your husband, and in authority here.'

I released my arm, but did not move, My only feeling toward him at that moment was one of disgust, defiance. The threat in his eyes, the cool insoence of his speech, set my blood on

"Monsieur," I said coldly, although every nerve of my body throbbed. 'you may know girls, but you deal now with a woman. Your speech, your Instituation is insult. I disliked you before; now I despise you, yet I will say this in answer to what you have intimated Monsieur d'Artigey is noth ing to me, save that he hath shows himself friend. You wrong him, even as you wrong me, in thinking other wise, and whatever the cause of misunderstanding between us, there is nexcuse for you to pick quarrel with
