OUR AGENT SAY FARM LABOR IS NOW PLENTIFUL

There seems to be some fear in this county that sufficient labor to gather the crops will not be available on account of the war situation. Now such will not be the case, for I have definite information from the state labor commissioner that plenty of help will be furnished from those who are near and dear to Texas, and at this particular time I wish to call the attention of farmers in Donley county who all comrades and brothers as are going to need help this fall. If you will write or phone me at Clarendon, advising me just how much help you will need I will prepare a list and send it to the state labor commissioner at Austin, and the help will be arranged for. The people in other counties in Texas have been very unfortunate in not making any crops this year, and they are anxious and willing to lend a helping hand in harvesting the bumper feed and cotton crop of Donley county. So don't delay but write me at on e, saying how much help you will need and I will have the mi ter looked

While we sympathize with people of other parts of the state that have been hit so hard by the continued drouth and I feel sure will give them work, let's not forget that we have a wonderful opportuaity to show some fine specimen crops at the Dallas Fair this fall. HELPFUL SUGGESTIONS.

agh the dried corn is so easy to prepare many of our housewives forget that dried corn = to many tastes much superior to the canned kind, Pull the corn and boil it five minutes, cut from the cob

and pack in jars, add a half teaspoonful of salt to every pint can and fill the can with boiling water. Put on the new rubbers and tops and screw them down tight, then turn back a quarter of an inch, place in a boiler on a rack, cover with water to the depth of an inch and boil for three hours, being sure to count the time from the first appearance of boiling. Remove the jars, tighten carefully and to further insure them dip the tops below the rubbers in hot paraffin before storing them in a dark, cool place. If the cans are perfectly sealed the product will keep with no trouble. Corn should be canned within an hour from the time it is picked to insure a good flavor. This is true of other vegetables as well.

Swiss Method of Drying Beans .and wash, then string them through the middle of the bean on a strong doubled cotton thread a yard and a half long, using a needle. String them close, then drop them into boiling water for 15 minutes, then dip in cold water and hang in the sun to dry. Protect from the flies with netting and bring them in before the dew falls. Two or three sunny days will dry them. They are to be soaked before using, but the dried flavor is very attractive.

Corn Chowder .- Take a quart each of corn, either fresh, dried or canned, a quart of potatoes, a three-inch cube of salt pork, a sliced onion. Dice the pork and fry until brown, add the onion and a few tablespoonfuls of the corn, cook until a light brown. By removing the crisp bits of pork they will not overcook and may be put back later. Add the potatoes and rest of the corn in a quart of water and cook until the potatoes are tender, then add a pint of milk, a little butter and six milk crackers that have been soaked in hot milk. Season well with salt and pepper and serve hot.

Corn oil, called mazola, is a most appetizing fat and not too expensive to take the place of olive oil in many dishes. It is especially nice for fried potatoes, either potato chips or the them. The work was done by a black-

Thou shalt not wait for something to turn up but thou shalt pull off thy coat and go to work, that thou mayest prosper in thy affairs.

SOME SUMMER SALADS.

While the delicious summer and autumn vegetables are with us there are new ways of combining them which will occur to the housewife who is tired of the same dishes.

Salad .- Take freshly cooked but cold baked beans, arrange them in the center of a chop plate, and about the edge place overlapping slices of ripe tomato, gar-

nished with sprigs of water cress or heart leaves of lettuce. Serve very tart mayonnaise dressing, passing it in a separate dish. Tomato and Cream Cheese Salad .-Peel chilled tomatoes and slice very

thick, cover each slice with well-seasoned cream cheese that has been mixed with chopped green pepper. Serve with French dressing. salad is placed on a bed of lettuce or water cress. White grapes peeled and seeded.

placed in nests of lettuce and covered with riced cream cheese, served with French or mayonnaise dressing, make a most dainty salad and one not com-

Date and Cheese Salad .- Wash fine large dates, wipe dry and cut open carefully to remove the stone. Stuff with cream cheese, lay on lettuce leaves and serve with mayonnelse dressing. Place a small spoonful of cream on each bit of mayonnaise when serving.

Chicken and Brazil Nut Salad .-- Remove the meats from the nuts in as large pieces as possible, rub off the brown skin and mix with chicken or turkey breast cut in good-sized pieces, with two or three hard-cooked eggs. Serve on lettuce with mayonnaise.

Tomato Salad .- Peel small, evensized, ripe red tomatoes, and cut them in quarters like a flower, not separating the sections; fill the center with chopped onion and dot with riced yolk of egg. Serve with French dressing.

Cream Cheese and Jelly Salad .-Make small balls of well-seasoned cream cheese, and place in nests of lettuce; make a small depression in each ball and put in a small spoonful of currant jelly, or bar le duc if you have it. Serve well-chilled with nicely seasoned French dressing.

makes a product, FEED TROUGHS OF CONCRETE

Doors, Sides and Tops of Device Illustrated Were Constructed of Red Elm Lumber. Grade Milk.

My earliest recollections of hog feeding remind me of the unsatisfactory locks provided on the doors of hog troughs. When we built a new hog house with 22 farrowing pens we made the one shown in the cut after considerable thought, writes F. C. Schroeder in Wisconsin Agriculturist. The troughs were built of concrete. The doors, sides and tops were made of home-sawed, well-seasoned one-inch red elm lumber. The 2 by 4s were hemlock. Elm lumber will withstand very much abuse and is excellent for such

Lever A is 3-16-inch by 114-inch iron, the length being governed by the width of the door. An offset in the ever makes it easier to operate. The distance between bolts M and N is 4 inches, the bolts heads being countersunk to prevent friction on the door. Pick string beans in their prime, string C and B are %-inch round rods flattened where bolted on the lever at M and N and are held in place by clamps

Highly Satisfactory Feeder.

E and E. Clamp D keeps A firmly in position when operated. In four years' time we have experienced no trouble, and to all appearances will last a life-

We constructed the troughs the same on the pen side as shown in the illustration, so that when feeding we could lock them back. The weight of the hogs on the doors did not injure the latches nor were they able to open smith, but could be done at home if supplied with a forge and tools.

SUPERIOR RATION FOR SWINE

Pigs Fattening More Rapidly on Pes Ration Than on Any Other at Washington Station.

(By FRED SCHROEDER.)
Experiments being conducted on the Washington state college farm with a pea ration for pigs shows that the hogs are fattening more quickly than on other standard rations. Fifty hoge Bean and Tomato are being used in the experiment being conducted by Benton M. Bangs. whose work in supervising the experiment will entitle him to master's degree in agriculture.

The animals are divided into four lots, and are being fed as follows: Lot barley 60 per cent, shorts 30 per cent and oil meal 10 per cent; lot 2, peas 60 per cent, shorts 30 per cent, tankage 10 per cent; lot 3, peas 60 per cent, shorts 30 per cent, oil meal 10 per cent; lot 4, barley 60 per cent, shorts 30 per cent, tankage 10 per cent.

Lot 2, handled, is showing the best results, with lot 3 second, both being a major ration of cleanings or cracked peas. The hogs are being weighed every week, the experiment being conducted over a period of eight weeks, being now in the last week.

DEMAND FOR PORK IS SHARP

Farmer Who Does Not Raise Hogs Is Losing Chance to Expand Profitable Phase of Farming.

Disease, such as cholera, has been taking a smaller toll the past season than in recent years; more purebred and high-grade hogs are available than ever before; prices of hogs are now past the 16-cent level; demand for pork for home consumption and for export is keen. All of which means that the farmer who does not raise hogs is losing a chance to increase the supply of pork and thus serve the country and at the same time expand a profitable phase of Arming.-United States Department of Agriculture.

WOVEN WIRE SHEEP FENCE

Two or Three Additional Strands at Bottom of Barb-Wire Fence Is All That Is Needed.

Woven wire makes an ideal sheep fence, but if you have a good, threestrand barb-wire fence, such as every one should have who keeps cattle and desires to be on good terms with his neighbor, all that is needed is two or three additional wires at the bottom, and you have a good sheep fence

Tells How to _ac Up Structure With Little Waste.

LIGHT AND AIR IN PLENTY

lest Possible Sanitary Condition of Utmost Importance in Housing Cattle That Produce First

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Combination barns are often necessary since they may be built at a lower cost per animal than two barns to give the same housing capacity. There is no objection to the combination barn, provided the horse stable and the cow stable are definitely separated, plenty of light is allowed to enter each part and an adequate ventilating system is installed. It is easier to provide for a number of taken care of just as effectively. The thorses in the cow barn than it is to furnish accommodations for a single team of horses, as would be the requirement | The lesser reason is that it prevents

of assuring with the uitary conditions, which possible s. fers that lighting and ventilation mus be carefully treated. It is assumed that at least a part of the animals housed in the barn will be dairy cows, and it is for this reason that the requirements just named are so necessary. Indeed, it is a far-sighted precaution to provide the best there is in lighting and ventilation in any barn in which animals of any kind are housed, for the money spent in this way is returned many times in the improved health of the animals, which means higher sale value, and in the greater ease with which the work in the barn may be done. The secret of maintaining good, clean air in the stables is, of course, in removing the animal waste as quickly as possible. Even extra effort in this direction, however, cannot accomplish successful results if advantage is not taken of the germ-destroying action of sunlight and if an effort is not made to quickly remove what polluted air must of necessity be circulated through the stable due to contact with polluting agents necessarily present temporarily, and to remove the spent alz coming from the lungs of the animals. These things have to be mentioned as having special bearing on the dairy cow stable. There are two good reasons why the horse stable should be most important reason is that it protects the investment in these horses.

if the cow barn happened to be air-pollution in the cow stables by possituated a considerable distance from sible transmission from the horse stathe horse barn. At least one team of | ble. horses is usually needed handy to the be placed in open stalls, which is very must be provided for them, which lighting.

Ordinarily, the combination barn has ley and a tight partition is built between the cow stable and the horse the cow stalls will determine how the alleys are to be used. In case the cows face in, the central alley will be edly be continued through the horse stable, where the horses will also face in. The alleys along the outer walls will then be litter alleys, and these also will continue through the other part of the barn. The most imthe barn should be arranged in the them, same way is that if modern barn equipment is used, its installation is very ranged symmetrically as far as the in the wall of the building at the botalleys are concerned. Composed Opera in Bed.

One, at least, of Rossini's operas was composed in bed. It was when he was young, poor and unknown, and lived in wretched quarters. After writing a duet the composer allowed his manuscript to slip off the sheets and fall under the bed. Rossini was too comfortable to get up, and, moreover, he believed it would be unlucky to collect the sheets, so he went to work to re-write the duet. To his disgust, he could not remember it. It was there fore necessary to write a new onea feat which he accomplished in s couple of hours.

Struggle diligently against your im patience, and strive to be amiable and gentle, in season and out of season be overjoyed if the fortunes of war toward everyone, however much they should cause Bassano to fall into their may vex and annoy you; and be sure hands, for it was before this city that | God will bless your efforts,-St. Fran

NEED MORE DAIRY PRODUCTS

Farmers Have Peculiar Responsibility Placed Upon Them-Better Sires Are Needed.

Dairy farmers have a particular responsibility in this time of strict nomy, says Secretary C. R. George the Indiana State Dairy associa-"The dairy cow," says he, "is unequaled by any other class of live stock in her ability to convert our farm crops, and particularly the roughages, into human food. The production and storing of the greatest amount of these feeds, feeding them in such a way as to get the largest production, and strict economy in the handling and use of the products are

Jersey Bull of Fine Quality.

the things that should receive our es pecial attention at this time.

"Don't sell the dairy cow at tempting beef prices, for in the end she will do you more good as a milk producer and she will produce more food during the coming year than her carcass will furnish now-and you will have her left to do it again. Be sure that proper housing facilities will be available for the next winter so that the cows will be protected from storms and wind and in this way save feed and increase production. Use better sires than ever before and develop the heifer calves with the best of care. The war department is making its plan on a three-year basis. Why shouldn't

SILAGE IS GOOD FOR CALVES

Gradual Introduction of Feed May Be Six Weeks Old.

By the time the calf is six weeks old we may begin to feed stlage, very gradually at first, using care to see that it is free from mold. In a little while the calf will be able to consume quite a quantity of silage and the amount will increase as time advances. The grain fed to the calf always should depend in some degree upon the kind of roughage consumed. There is no better roughage than alfalfa hay. It is easily digested. The leaves of the alfalfa contain a principle indispensable In the development of the young animals and not present in other roughage, but alfalfa hay alone is not good for a calf. Taken in connection with that is to say, the amount of protein animal. This condition is corrected | door of the hall: by the feeding of silage and grain like corn, rich in carbohydrates.

REGULAR MILKING IS URGED

Cow Will Do Her Best When Milked at Regular Periods of About Twelve Hours Every Day.

A cow can do her best only when milked at equal and regular daily periods of about twelve hours each the year around. The full supply of milk is not in the udder, ready to be drawn out before milking time comes, but some of it is produced by the glands during the operation of milking. The udder, however, is usually filled, and the cow becomes accustomed to this, but if the operation of milking is delayed the glands cease to some extent to secrete milk, and they will then not be stimulated to good activity during the process of milking. This injures the glands and produces a decrease in the milk flow. So it is very important that the milking be done regularly at as near the same time each morning and evening as possible

IMPROPER FLAVORS IN MILK

'f Onions or Garlic Are Eaten by Cow Odor Will Pass Into Milk-Feed is important.

Milk has its natural flavor, which is a pleasant flavor to most people, and then it can have acquired flavors. These are of two kinds. First, from the food the cow eats. If onions or garlic are eaten their odor will be passed into the milk. Some weeds also cause flavors in the milk. Second, the milk will also absorb many odors. To produce milk with a good flavor it is necessary that the cow is not fed anything that will be kept where it can absorb any odors. -North Dakota Experiment Station.

A Temperance Lesson.

Newton Newkirk, who has been amusing newspaper readers for a number of years by chronicling the doings of rural folks in the Bingville Bugle, studies local color in the Maine villages during his vacation periods.

On one of the trips he formed the acquaintance of an old resident who had the reputation of being inordinately fond of cider.

Uncle Hez presented a sorry spectacle when Newt him in the road one day.

"What has happened to you?" inquire dthe writer. "I wuz up t' Sam Spradin's and drank a couple o' dippers o' hard

cider." "On my way back here I crossed the bridge over Gander creek-"

"Uh-uh !--" "And just as I reached the middle of the bridge I heard a splash!" "What made the splash?"

"Well, there was a man flounderin' about in the water, and when I looked & around to see who it wuz, derned if it wuzn't me."-Pittsburgh Chronicle.

JOHN SMITH, THE NEW FINANCIAL SECRETARY OF TIM-ANYONI DITCH COMPANY, MAKES A PLAN TO PUT THE CONCERN ON ITS FEET, BUT ENEMIES ARE HARD AT WORK TO THWART HIM.

Synopsis .- J. Montague Smith, cashier of Lawrenceville Bank and Trust company, society bachelor engaged to marry Verda Richlander, heiress, knocks his employer, Watrous Dunham, senseless, leaves him for dead and flees the state when Dunham accuses Smith of dishonesty and wants him to take the blame for embezzlement actually committed by Dunham. Several weeks later, Smith appears as a tramp at a town in the Rocky mountains and gets a laboring job in an irrigation ditch construction camp. His intelligence draws the attention of Williams, the superintendent, who thinks he can use the tramp, John Smith, in a more important place. The ditch company is in hard lines financially because eastern financial interests are working to undermine the local crowd headed by Colonel Baldwin and take over valuable property. Smith finally accepts appointment as financial secretary of Baldwin's company. He has already struck up a pleasant acquaintance with Corona Baldwin, the colonel's winsome daughter.

CHAPTER VIII .- Continued.

"You followed?" queried Stanton. fice with a fellow named Smith. When Ditch." I got a place to listen in they were getting ready to quit, and the colonel catch the name of the place-'and help

street together that Mr. Crawford Stanton had his third morning caller, slacked off on the hawser of secrecy a thickset, barrel-bodied man with a little-just a little. little piglike eyes, closely cropped hair, though not to his face. For though as it isn't-I could go to New York to the fat face was always relaxed in a good-natured smile, the crippled saloonkeeper was of those who kill with

Stanton looked up from his desk when the pad-and-click of the cripple's step came in from the street.

"Hello, Simms," he said, in curt greeting. "Want to see me? Sit down."

Simms threw the brim of his soft hat up with a backhanded stroke and shook his head. "It ain't worth while; and I gotta get back to camp. I blew in to tell y'u there's a fella out there that needs th' sandbag." "Who is it?"

"Fella name' Smith. He's showin' 'em how to cut too many cornerspace-settin', he calls it. First thing they know, they'll get the concrete up to where the high water won't bu'st it

Stanton's laugh was impatient.

"Don't make any mistake of that sort, Simms," he said. "We don't want the dam destroyed; we'd work just as hard as they would to prevent that. All we want is to have other people think it's likely to go out-think it hard enough to keep them from putting up any more money. Let that go. at liberty to explain. But again we're Is there any more fresh talk—among dodging and wasting your time and the men?" Stanton prided himself a ours. Think the matter over—about little upon the underground wire-pull-Simms on the ground as the keeper of the construction-camp canteen. It was a fairly original way of keeping a listening ear open for the camp gossip.

"Little," said the cripple briefly. "This here blink-blank fella Smith's been tellin' Williams that I ort to be run off th' reservation; says th' booze puts the brake on for speed."

"So it does," agreed Stanton musingly. "But I guess you can stay a while longer. I have a notion that Smith's been sent here-by some outfit that means to buck us. If he hasn't any backing-"

The interruption was the hurried incoming of the young man with sleepy eyes and the cigarette stains on his fingers, and for once in a way he was stirred out of his customary attitude of cynical indifference.

"Smith and Colonel Baldwin are over yonder in Kinzle's private office," he reported hastily. "Before they shut the door I heard Baldwin introducing Smith as the new acting financial secretary of the Timanyoni Ditch com-

day and put a million dollars behind our reorganization plan in twenty-four hours. You'd say so yourself if I were ing which had resulted in putting your stock—and let me know before so, but time is precious with us and-

> "You sit right down there, young man, and put a little of this precious time of yours against mine," said Kinzie, pointing authoritatively at the chair which Smith had just vacated. "You mustn't go off at half-cock, that way. You'll need a bank here to do business with, won't you?"

> Smith did not sit down. Instead, he smiled genially and fired his final shot. "No, Mr. Kinzie; we shan't need a local bank-not as a matter of absolute necessity. In fact, on some accounts I don't know but that it would be better for us not to have one."

> "Sit down," insisted the bank president: and this time he would take no denial. Then he turned abruptly upon Baldwin, who had been playing his part of the silent listener letter-perfect.

"Baldwin, we are old friends, and I'd trust you to the limit-on any proposition that doesn't ask for more than the straight-from-the-shoulder honesty How much is this young friend of ours talking through his hat?"

"Not any, whatever, Dave. He's got the goods." Baldwin was wise enough to limit himself carefully as to quantity in his reply.

Again the banker made a comical bristle brush of his cropped mustache, "I want your business, Dexter; I've got to have it. But I'm going to be plain with you. You two are asking me to believe that you've gene outside and dug up a new bunch of backers. That may be all right, but Timanyon Ditch has struck a pretty big bone that RIGHT FEEDING AND maybe your new backers know aboutand maybe they don't. You've had s lot of bad luck, so far; getting your land titles cleared, and all that; and

you're going to have more. I'vein smartly.

The next installment describes a sharp clash between Stanton and Smith. The fight ceases to be merely a battle of wits and becomes deadly and desperate and bloody.

(TO BE CONTINUED.)

GAINS FIFTEEN POUNDS

Nothing Ever Helped Him Until He Started Taking Tanlac-Declares His Health Has Been Restored.

William Ludwig, a retired merchant and prominent citizen of Port Arthur, Texas, made the following statement recently.

"For six years I had suffered from indigestion and painful disordered kidneys and fell off until I was little more than a skeleton. I had no appetite and what little I did eat felt like a lump of lead in my stomach. I was so bloated up that I could hardly get my breath and I couldn't button my clothes. My kidneys disturbed me so I could scarcely sleep at all. I was, productive fand, and do not require any grains. so weak I had to walk with a stick and I couldn't go up the steps at all. I had a nervous cough, my limbs ached and I hurt all over.

sick man and now I'm praising it be- kill weeds, especially in the cotton only for a few weeks. The range of cause it has restored my health. I fields, and their use could well be great- pasture used either for goslings or for have gained fifteen pounds in weight, ly increased for this purpose. They geese should be large enough so that can eat anything I want and sleep as well as I ever could. My cough has disappeared, the gas has stopped forming on my stomach and my kidneys are in good shape. Nothing bothers me now and I have no more use for my walking stick. I have taken many different kinds of medicine and have been coming to San Antonio every year for my health, but nothing seemed to do me much good until I took Tanlac."

There is a Tanlac dealer in your

Extermination of the tick, therefore, will give us quick, direct returns in the form of increased growth of native stock, and it will at the same time lay a firm foundation for the building up of a much more profitable cattle-raising industry in a year or two-while the war still may

be in progress. The tick works for our enemies by keeping down the supply of three of our most important foods. Let us recognize this pest, therefore, as an enemy also. And let us wage against him from today on, without interruption, a war of extermination.

RICHEST PLACE FOR GARDEN

On Too Many Farms Soil Is Never Rich Enough to Grow Finest Quality of Vegetables.

"Rotate the garden crops but not the garden spot," is the good advice given by Mrs. Jane S. McKimmon. On too many farms the garden is never in the same place more than two years in succession, with the result that the land is never made rich enough to grow really fine vegetables. Gardening is an intensive form of agriculture, a form requiring much hand labor in proportion to acreage, and for this reason the garden should always be the richest spot on the farm. Keep it in the same place with a good fence around it and make it as rich as possible.-The Progressive Farmer.

GOOD HOT WEATHER MOTTO

Start Early and Work Late, If Need Be, But Take Good Long Rest After Midday Meal.

"Start -arly and work late, if need be, but rest a good long while after not crowded. In Drainage Terms Main Market Highways Are Main Channels Running Through Country.

Roads upon which traffic is heaviest start from different sections of the country or township and come together at the main market place. In drainage terms, which every farmer will understand, those main market roads are the main channels running through the county or township. They start, traverse, and end according to the natural laws of trade gravitation, and, as in drainage development, these traffic streams are enlarged and improved economically only as their lines of descent toward the market place are followed. To build outside of these lines for heavy traffic where heavy traffic does not exist is false economy, a waste of time and money.

GRASS AND PASTURE PLANTS

Growth Limited by Weeds, Brush, Etc., and by Washing Away Soll on Sloping Places.

Remember there are generally only two conditions which prevent Southern lands becoming covered with grasses or other pasture plants. The most common one is the growth of weeds, brush and other non-pasture plants, but there is another, the washing away of the soll from exposed or sloping places.'

on of Hedley public schools. exercises were held in the Methodist church and quite a Linarge crowd of our citizens gath able tered to show their interest and their willingness to co-operate in the school work.

Fitting addresses were made by County Judge O'Neall and County Attorney Richey of Clarendon, Messrs. J. H. Richey and Frank Kendall of Hedley. These timely talks were helpful and highly appreciated by all present.

The enrollment is now about 275, we understand, with probably another hundred to come as soon as they can be spared from the harvesting. Hedley people should be proud that their school is in such flourishing condition, with everybody working harmo niously in order that the greatest good may be accomplished.

The faculty is second to none in this country. All are competent, earnest and industrious, which means much for the wel fare of the pupils. In addition to the personnel as published a week or two ago, Miss Katie Smith of Clarendon is teaching Expression, and we are told has a good class.

H. D. Heath, who has been holding a meeting at Windy Valley, left Sunday. There had been about twenty conversions and twenty additions to the church when he left. We are told that another preacher has been secured and the meetings will continue longer.

A. L. Miller was a business visitor to Clarendon Monday.
