RESIDENCE BURNS

SUNDAY EVENING

Mr. and Mrs. Frank Clark suffered the misfortune of losing their home by fire last Sunday afternoon. The building and contents were a total loss, as the fire had gained such headway before being discovered there was no time to save anything whatever.

Mr. and Mrs. Clark and their parents, Mr. and Mrs. E. R. Clark, were there at the time, but in a different part of the house, and it took quick work for all of them to get safely out, so fast did the flames spread.

We understand the loss is estimated at about \$3,000, with insurance aggregating perhaps half that amount.

FOR SALE—A cook stove and heater. In good condition; will sell cheap.

W. G. Bridges.

Ed Kinslow, one of Hedley's soldier boys stationed at Camp Bowie, visited homefolks and friends here the past week, from Friday until Sunday. Ed looks entirely "fittin," likes army life, and says all our boys are doing well.

M. O. Barnett was a business visitor to Amarillo this week. He is now the owner of a hand some new Overland.

NEW POSTAGE RATES

The following instructions in regard to postage rates have been received by postmasters:

On and after November 2, 1917 see that postage is paid at the rate of three cents an ounce or fraction thereof on letters and other first class matter except drop letters. All drop letters, that is, letters mailed for delivery from the office at which posted, including those for delivery by city, rural, or other carrier of such office, required to have postage paid on them at the rate of two cents an ounce or fraction thereof. Postal cards are required to be prepaid two cents, and, therefore, the one cent postal cards must have a one cent postage stamp affixed to them in addition to the one cent stamp impressed on such cards. Post cards (private mailing cards) bearing written messages must have two cents postage prepaid on them.

County court convenes in Clarendon next Monday.

G. M. Smith, principal of the Bray school, is a new reader of the Informer. We trust he will have a successful year in that excellent community.

There is as much difference in the kinds of Harness as there is in folks. You can get the best at Kendall's.

LIBERTY LOAN MEETING HERE LAST SATURDAY

According to previous announcement, quite a large crowd of people assembled at the Pleasant Hour Theatre last Saturday afternoon for the purpose of holding a Liberty Bond rally.

About twenty women and men from Clarendon were present, Judge O'Neill being master of ceremonies. After a few pertinent remarks, he introduced the speaker of the occasion, Rev. J. W. Story. Bro. Story proved a very entertaining and instructive speaker and held his audience well throughout his address.

He reviewed, in a brief way, the events leading up to the war, showing most impressively how and why America has entered into the conflict and giving many facts and figures to throw light on the enormity of the task undertaken in the way of finances, men and supplies that will be required for us to win. Bro. Story knows well how to touch the feelings of his audience and the hearty and frequent applause of his hearers showed how eloquent and forceful had been his word pictures. The speaker closed his address with an allusion to the urgent need for money for the successful prosecution of this war and expressed the utmost confidence that the people of Hedley would do their full duty in this respect.

Quite a lot of personal work was done before and after meeting and good results were obtained. Up to this time we are unable to give subscription figures, either for Hedley or Donley county, but our information is that the county's quota was over subscribed.

Among those here from Clarendon were: Mesdames R. W. Talley, J. D. Stocking, J. L. McMurry, J. B. McClelland, Chas. McMurry, W. H. Patrick, T. E. Bugbee, Tom Kennedy; Misses Nora Headrick, Maude Glenn; Helen Bugbee, Lila McClelland, Lora Glenn; Messrs. Tom F. Connally, Sam M. Braswell, R. W. Talley, Mayor W. A. SoRelle, Judge J. H. O'Neill and Rev. J. W. Story.

Mr. and Mrs. J. L. Blankenship returned Tuesday night from Amarillo, where they were engaged three weeks in a revival. The meeting was a wonderful success, there having been about 150 conversions. The Blankenships leave today for Quanah where they will work in another revival. Their services are in great demand.

FRESH FISH AND OYSTERS WEEKLY

We have a standing order for fish and oysters every Friday. Call and see us.

The Busy Bee.

Mr. and Mrs. A. L. Miller and Mrs. G. A. Blankenship were visitors to Memphis Wednesday.

The Informer is in position to make you some close clubbing prices on newspapers and magazines. A family cannot afford to be without good reading material. It isn't a luxury any more—it's a necessity. We will be glad to tell you about them and quote prices. No trouble at all. Call on us.

GOES TO CONFERENCE WITH GOOD REPORT

Rev. John H. Hicks, pastor of the local Church, went to Memphis Wednesday morning to attend the annual Conference of the M. E. Church South now in session there.

We are pleased to know that Bro. Hicks had a splendid report to carry with him, all the Conference collections having been paid in full. Also the pastor's salary was raised \$250 over last year, and paid in full. The church has grown steadily under Pastor Hicks' guidance, more than fifty members being added during the past year.

We voice the sentiment of the entire community when we express the hope that Bro. Hicks will be returned to this charge.

Zero prices on Groceries at Lively's, beginning Nov. 1st. Don't guess at what "Zero prices" mean, but come in and let us show you what we mean.

T. C. Lively.

Fleagle E. Stewart, son of Mr. and Mrs. A. A. Stewart of Quail community, came in last Sunday on furlough and will spend a few days with his folks and friends. Fleagle is in the Navy, stationed at Boston, Mass., when we last heard of him. We have had no opportunity for an interview since he came in.

WANTED

by married man of farm experience, to rent furnished farm on shares, or farm position for year on salary. Write me immediately. Geo. W. Bolander, Box 128, Amarillo, Texas.

Ottie Jones, in writing to his mother at Memphis, stated that he was in New York and just leaving for France. He is a son of L. F. Jones who died only a few days ago.

For insurance that insures, see C. E. Johnson.

A report came last week that J. W. Lyons, formerly a blacksmith and esteemed citizen of Clarendon, was dying at his home in Atlanta, Ga.

We carry a complete line of Builders Hardware. Get our prices. J. C. Woodriddle.

E. H. Kennedy of Lelia Lake has awarded the contract for a handsome new residence to Ed Haskett of Lakeview.

OUR MOTTO IS: "QUALITY UP AND THE PRICE DOWN."

YOURS TO SERVE

T. C. LIVELY

DAIRY MAN HERE

A. K. Short, agricultural agent for the Denver Road, was in Hedley last Friday evening and Saturday, for the purpose of selling dairy cattle to those of our people who desired to buy. On account of the Liberty Loan campaign which was on at that time, the visit was not so successful as it would doubtless have been under different circumstances. However, some interest was manifested, and Mr. Short requested us to announce that in case enough dairy animals were wanted to make a car load, a letter addressed to him at Wichita Falls would receive his immediate attention. The Informer hopes our farmers will order at least one car of them, for they are sure money makers when properly handled.

TOBACCO FUND

FOR THE SOLDIERS

At the suggestion of U. J. Boston, a bunch of Hedley good fellows decided a few days ago to raise a tobacco fund and send to Hedley soldier boys in the training camps.

Something more than \$20 was raised in a short while and the "contribution box" left at the Hedley Drug Co. where others who desired might have a chance to kick in.

If available, a list of the donors will be published in the Informer next week.

A. L. Chapman was in Fort Worth the past week to visit his brother Carlton, at Camp Bowie. Says the young man is getting along fine.

Check Accounts are Welcome Here

Individuals, corporations and societies find it to their advantage to have an account in this institution because.

Our FACILITIES afford the greatest convenience and dispatch in the transaction of their business.

Our POLICY is flexible enough to respond to the needs of our smallest depositors.

Our RESOURCES are fully adequate to meet the utmost requirements of our customers.

Our OFFICERS are readily available. They are well qualified to advise you regarding financial matters and are interested enough in the welfare of customers to furnish just such information as they need.

HELP WIN THE WAR

Our problem is to feed our Allies this winter by sending them as much food as we can of the most concentrated nutritive value in the least shipping space. These foods are wheat, beef, pork, dairy products and sugar.

Our solution is to eat less of these and more of other foods of which we have an abundance, and to waste less of all foods. Have at least one wheatless meal a day. Use corn meal in place of wheat flour. Use more poultry, rabbit and fish in place of beef, pork and mutton. Beans have nearly the same food value as meat. Use all of milk; waste no part of it. Use less sugar in tea and coffee; use honey, maple syrup and dark syrups for hot cakes, and no butter or sugar; use plenty of vegetables and fruits of which we have an abundance. We do not ask the American people to starve themselves, but eat plenty and wisely and without waste.

Also let us remember that every flag that flies opposite the German one is by proxy the American flag, and that the armies fighting in our defense under these flags cannot be maintained through this winter unless there is food enough for them and for their women and children at home. There can only be food enough if America provides it.

Subscribe for The Informer.

ALL COWS ARE NOT WHAT THEY SEEM.

(Prepared by the United States Department of Agriculture.)
The percentage of butter fat in milk cannot be determined from the appearance of the cow and it cannot be changed greatly by care or feeding. Good care and feeding increase the quantity of milk given by the cow, hence the total butter fat produced is increased. The percentage of butter fat, however, remains fairly constant for each individual, except that variations may occur with the period of lactation, the first and last parts of the milking, and the age of the cow.

Calculation of Records.
The daily weights of milk produced by each cow are added and the total for the month multiplied by the percentage of butter fat in the milk to obtain the amount of butter fat produced during the month. For example, the cow Fannie gave 1,105.6 pounds of milk in January, 1915, and it tested 4.9 per cent. Then $1,105.6 \times 4.9$ per cent = 54.17 pounds of butter fat.

The next step is the calculation of the value of the butter fat, which in this case was 35 cents per pound. Thus Fannie produced 54.17 pounds of butter fat, worth \$18.96. Similar calculations are made for the other cows and entered on the milk sheet.

The value of the skim milk is determined by calculating the skim milk as 80 per cent of the whole milk and giving it a value of 25 cents per 100 pounds. Thus, Fannie is credited with 884 pounds of skim milk, which is 80 per cent of 1,105.6, worth \$22.21.

The value of the skim milk is added to the value of the butter fat, and the total cost of the feed consumed is deducted to obtain the profit over the cost of the feed. Thus Fannie's butter fat was worth \$18.96, and the skim milk, \$22.21, a total of \$41.17. Deducting the cost of her feed, \$7.83, leaves \$33.34 profit in January. This cow has a good dairy conformation, a well-shaped udder, and good barrel capacity, indicating that she can turn large quantities of roughage into milk.

Diamond, No. 37, shows a profit of \$6.24 or only about half as much as Fannie. We must take into consideration, however, the fact that Fannie had but recently freshened, while Diamond was well along in her lactation period.

Diana, No. 51, shows a much smaller profit, namely, \$3.01, although she produced within 6 pounds of the quantity of milk produced by Diamond. This is due to the fact that her milk tested 1.4 per cent less, which made a difference of 7 pounds of butter fat for the month, and that she consumed more feed than Diamond.

Pet, No. 67, produced only 451 pounds of milk, but it tested 5.6 per cent, making 25.24 pounds of butter fat. She ate less, so that her feed cost was \$5.13 as compared with \$7.40 for Diana. With a high percentage of butter fat in her milk, and a smaller quantity of feed consumed, her profit was \$4.61 for the month.

Myrtle was near the end of her lactation period, so that her feed cost was \$1.55 more than the value of the milk produced. She has poor dairy conformation and judged only by her January record might have been eliminated from the herd. It must be noted, however, that she was nearly dry. During the year she never produced a very large quantity of milk at a milking, but she was a persistent milker, so that in profit over cost of feed she stood second in the herd.

Ellen was dried off early in the month, and although the cost of her feed was only \$2.72, her loss for the month was \$1.41. She is more of a beef than a dairy type, and her record for the year shows that she was dry four months and produced only 153.6 pounds of butter fat.

Blanche freshened the latter part of the month and showed a loss of 72 cents. Her profit for the year was only \$19.45, owing to her low production and to the large quantity of feed she consumed.

These records clearly show that one month's record is not sufficient evidence to condemn a cow, for the low production may be due to advanced lactation (the cow may be nearly dry), illness, lack of proper feed (the pasture may have dried up), etc. Too often the results shown on the record sheet fail to confirm the judgment of the owner.

Yearly Records.
Every month throughout the year

the milk produced by each cow is added and a sample of the milk is tested about the middle of each month. The value of the butter fat and skim milk is calculated and the cost of the feed consumed is deducted therefrom. These monthly figures are entered on another sheet for the yearly record. Take, for example, the year's record of the cow Fannie. She freshened late in December 1914, dried off October 25, 1915, and freshened again December 25, 1915. Her profit above the cost of feed amounted to \$48.39 for the year 1915.

A comparison of the yearly records of the seven cows with their photographs is interesting. With the pictures at hand it will be seen that one cannot judge the production of a cow for the year from her conformation alone. The cow Myrtle was a surprise to her owner, for while she had never given a large quantity of milk at a milking, her record showed her to be a persistent milker. She stood second in profit over cost of feed and returned to her owner more than the combined profits of Ellen and Blanche. The combined profits of Fannie, Diamond, Pet, and Myrtle amounted to \$182.18, or an average of \$45.04 per cow, while the average profit of Diana, Ellen and Blanche was \$23.76, or about one-half that of the first four cows. If this dairyman had had seven cows as good as his best four, he would have had a total profit of \$317.30 instead of \$253.45, a difference of \$63.95. This amount would be a large return for the time spent in keeping the records.

Value of Dairy Records.
The only safe way of valuing dairy cows is by the quantity of milk and butter fat they produce. This necessitates the keeping of records. These records will point out the good and the unprofitable cows; the dairyman can save the offspring of the good cows, so that he will soon have a herd of large and economical producers.

The dairy milk sheet enables the feeder to prepare proper rations and feed these according to the quantity of milk produced. All cows should not be fed alike; the high producers require more feed than the low producers. When records it is impossible to feed economically.

Three common rules for feeding are: (1) Feed 1 pound of grain to every 3 to 4 pounds of milk produced, or 1 pound of grain daily to every pound of butter fat produced per week; (2) feed all the roughage the cows will eat up clean; and (3) cut down on the expensive feed when the cow begins to gain in live weight.

In addition, the dairy milk sheet enables the dairyman, when a drop occurs in the yield of milk, to detect and ward off or check cases of illness that might become serious if not treated promptly, and it also enables the owner to check up on the thoroughness of the milking of the different employees. Breeding records also should be kept in addition to production records.

Records are not only valuable to the owner in the above-mentioned ways, but they aid in selling his stock. One man in a cow-testing association sold his cows for \$25 to \$50 more because of their records.

TO HELP DIRECT MARKETING
Department of Agriculture to Place Agents in Several Cities to Interest Consumers.

(From the United States Department of Agriculture.)
Renewed efforts through a staff of field agents to bring about an increase in direct marketing by use of the parcel post, express and similar agencies will be made by the bureau of markets of the United States department of agriculture with funds made available in the recently enacted food production bill. Agents will be placed in several large cities throughout the country to awaken interest in direct marketing among consumers. At the same time the agents will work through the postmasters of small towns in their territory to interest producers in furnishing supplies.

This will be the first intensive field work in behalf of parcel-post marketing that the bureau of markets has been in a position to carry on. It should result in the formulation of carefully selected lists of producers who may be depended on to supply various products directly to consumers.

By
Martha McCullough Williams

"Where in the world!" It was the hat that called forth Mrs. Benton's exclamation. She and her family had been coming for years to this mountain resort of South Carolina for the summer holidays. And in the course of that time she had seen much of the mountaineers. But never had she seen anybody like the girl who stood in the shade of the carryall that had just come to rest in the street before the Benton house.

The hat was ten years out of fashion, and must have been a fright to begin with. And the hat was sufficiently startling without the rest of the girl—the rest was largely red hair, fine, lustrous, wavy, very thick and of the truest Titian hue. It was wound in heavy rolls about the girl's head, and entwined with faded blue ribbon. Rhinestone combs of unknown vintage were stuck here and there in the glowing expanse, evidently placed with care that the hat should not obscure them.

The girl stood there searching in the carryall for sundry belongings—a flaming purple parasol, a palm-leaf fan with a long red tassel, a bright-colored handkerchief. The small lad, her brother, on the front seat, holding the meek pair of plow horses, turned to help her. And that is why he did not see the Benton wagon coming down the street at a smart trot, driven by Benly Benton, and laden with the belated band from town, come to this town of Locust Grove to do honor to the Fourth of July. The band had started out valiantly in a motor bus, only to find itself stranded seven miles from its destination. As the town was crowded with merry-makers from

"Isn't Her Get-Up Fierce?"

the surrounding countryside, there must be a band. So when Benly had heard, by telephone, of their predicament, he had set out to rescue them with the farm wagon.

Now the carryall stood on the wrong side of the road, and Benly had right of way. Moreover, he was hurrying to get the belated band to its place before the speaker of the day should arrive. He saw the carryall too late. His shouted warning did no good, and there came a clutch and wrenching of wheels, the carryall skidded quite in motor style, then toppled rakishly to one side, as if bored by the whole proceeding. And nobody was injured; but the carryall was a wreck.

Benly, taking the blame, got down from his wagon, resigning the reins to someone else. After apologizing to the girl, he went to his mother, watching the crowd from the steps. The neighborhood doctor had looked over the girl and her young brother, and, finding no harm done, had given them into his wife's keeping, who stood with her arm protectively around the girl's shoulders.

"It's a shame," said Benly. "Isn't her get-up fierce? But—you can't blame her. Know who she is? Granddaughter of that old miser, Granny Rollins, back in the mountains. Her father let her run wild. Granny's dead now, and those two—brother and sister—are her only heirs. They've come into the farm, the clothes—everything Granny left. But they've found no money. Everybody thought the old skinflint had piles of it; but they had to sell the best of the cows to pay for Granny's funeral. The carryall was a wreck, so rotten and shaky I wonder they got here in it. Of course I'll stand for that—though it never would have got home, the ten miles they must drive through, without falling to pieces. After a while you go to speak to them. They're alone and scared and shy, and you could help them have a good time."

Mrs. Benton nodded—she could not speak. She did so crave a daughter, in spite of her five sons, it hurt to see a girl thus gone to waste. Her heart yearned over the poor thing—no doubt she had been bewitched by her avalanche of macabre possessions.

habit to...
treme—and had...
herself in calico or the coarsest woollens. Stories of her had-gone country-wide—but very few had seen her. She had kept at home steadfastly, save for her yearly trip to town, hated church-going and discouraged all visitors, save such as came in the way of business.

The girl sat apathetic, clutching the purple parasol, which made a violent discord against her red plaid frock. But when the band struck up, she changed—sat upright, eye glowing, lips parted, a deep scarlet showing through the massed freckles all over her cheeks. They were so thick on the nose they made it Indian color; also they powdered her arms well above the elbow. Her shiftless father had been one of granny's coppers until he died, just a year ahead of her. Even then she had not taken home Jincy, her daughter's child, choosing, she said, to die as she had lived, alone. But at the end, when Jincy, venturing in, found her stricken, helpless, speechless, there had been an agony of entreaty in the fierce old eyes. Jincy had known Granny wanted to say something—to tell something—the eyes searched her face so steadfastly, but no words came through the week she fought back death. Jincy shivered still when she let herself remember that time.

She sat through the music spell-bound, wholly transfixed. The speaking wearied her. Brief as it was, the words of the immortal declaration fell on ears unheeding—ears to which it was in an unknown tongue. But when the band struck up again and the crowd rose for the march to dinner Jincy could not be still. She swayed in time and her feet pattered lightly—so lightly Mrs. Bennett's heart yearned more than ever.

The doctor's wife had many friends to see and see about. She was glad to shift Jincy into Mrs. Benton's charge. At first the girl was too shy to do more than nod or shake her head or mumble half articulately. It came with a rush when, after dinner, Mrs. Benton took her apart. Sitting on a shady bank, Jincy gave all her confidence—a story that brought tears to the listener's eyes.

"All she knew was work—field work. She could not read or spell or write, hardly even sew on a patch or do more than cook asheake and fry bacon.

Daddy had done the sewing—when there were any clothes to make. He had likewise done the cooking—if there was wherewithal beyond meat and meal. Daddy had not been busy, as people said. He had done the best he knew; and he was that honest Gran had always got the better of him when it came to dividing the crops. He had been good to his children, too. They had never felt a blow except the time Gran whipped them for chasing her old peacock. After that he would not let them go about her, though he had stayed on in the cabin because Mammy had died there. If only he was here now, there Jincy broke down utterly. "I ain't got nobody but Tawm," she moaned, "and him so little. However will we live? Folks can cheat us outen everything Gran left. I wouldn't mind workin' all my life—if I hadn't never had nothin'. Seems to me we'd be better off dead."

"Try living for a little longer," Mrs. Benton said kindly. "But not all alone. Rent the place; it's too big for you to handle, and come and be my little girl."

It made a nine days' wonder—also almost a scandal. All sorts of things were said. People were slow to credit Mrs. Benton's real motives. When, a year after the girl's adoption, Benly married her, thus taking her legally into the family, the skeptics shrugged and said: "Of course! The farm is rich, even if she hasn't any money." Love and happiness are miracle workers, truly. Within the next two years they transferred Jincy from a freckled fright into the handsomest young matron in the county. Also mother of the finest boy baby—who of course had Dad's name in full. Benly never tired of saying Jincy was the reward of kindness—if he had not helped out the band and run down the carryall, he might never have got her.

He had sold the big farm—Jincy shuddered at even the thought of visiting it. The money was safe at interest, so there should be an accumulation to take Tawm through college. And then one day came a lawyer with many papers to prove Jincy and her brother heirs to \$50,000 secretly invested by Gran in dribslets from her hoardings. The Bentons were no happier—simply because they could not be. But several and sundry of their critics were quite unhappy over this undiscovered turn of luck to people who knew no better than to be generously kind.

Cement From Sugar Beets.
A French chemist has worked out a process for making cement from sugar beets as a by-product in the process of sugar manufacture. The foreign matter which boils out in the process of purifying the beets is mixed with clay, and a high-grade of cement results. The case of cement is a striking illustration of the importance of by-products in modern industry. Not only can cement be manufactured as a by-product of sugar manufacture, but in making cement by the standard process the potash by-product is sometimes valuable enough to pay the entire cost.

Just Once! Try "L. Don's Liver" Patented, Headachy—Don't Lose a

Live up your sluggish liver! Feel fine and cheerful; make your work a pleasure; be vigorous and full of ambition. But take no nasty, dangerous calomel, because it makes you sick and you may lose a day's work. Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel crashes into sour bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.

Listen to me! If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tonic. Your druggist or dealer sells you a 50 cent bottle of Dodson's Liver Tonic under my personal mony-back guarantee that it will be found will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tonic is real liver medicine. You'll know it next morning, because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular.

Dodson's Liver Tonic is entirely vegetable, therefore harmless and cannot salivate. Give it to your children. Millions of people are using Dodson's Liver Tonic instead of dangerous calomel now. Your druggist will tell you that the sale of calomel is almost stopped entirely here.—Adv.

Best for rough work OVERALLS of STIFEL'S INDIGO CLOTH Standard for over 75 Years FOR MEN, and of MISS STIFEL INDIGO CLOTH FOR WOMEN

"Miss Stifel Indigo" the kid glove finish cloth is of the same high quality as her famous big brother. Inch for inch Stifel's Indigo gives greater wear and satisfaction than any other garment fabric. It's the real economy cloth for work clothes.

When you buy, LOOK FOR THE BOOT trade mark on the back of the cloth inside the garment. It's a guarantee of the genuine Stifel's Indigo Cloth. Remember it's the CLOTH in your Overall that gives the wear!

A shrewd man may be both wise and honest, but the chances are that he is neither.

DON'T GAMBLE that your heart's all right. Make sure. Take "Renovine"—a heart and nerve tonic. Price 50c and \$1.00.—Adv.

What He Learned.
Gerald was much depressed on bringing his monthly report card home from school at being scolded severely by his parents because it showed his department had only been 80 per cent out of a possible 100, and thinking she had punished him enough the mother, to cheer him, asked:
"Well, what did you learn this month in school, Gerald? Something nice, I'm sure."
"Didn't learn nothin'," he pouted.
"Oh, you surely must have learned something," the mother insisted.
"Well, nothin', only just how to be good," he conceded.—Indianapolis News

Apology Accepted.
There is a good story of J. M. Barrie in Douglas Sladen's "Twenty Years of My Life."
"It appears that the talented author of 'The Little Minister,' having promised to be present at a dinner of the Authors' club, was late, for which he apologized.
He had, he explained, been to the wrong club. He had never been to the Authors' before, he said, so he asked a policeman the way.
From the way he pronounced the word, the policeman thought he meant Arthur's club, and to Arthur's accordingly Barrie was directed.
When he got there he found it a very grand place. The club porter looked him up and down, and said:
"The servants' entrance is round the corner."
It took the moral courage of a Scotsman (adds Mr. Sladen) to tell that story; but it was infinitely funny, told in Barrie's broad Doric.—Exchange.

Back Lame and Achy?
There's little peace when your kidneys are weak and while at first there may be nothing more serious than dull backache, sharp, stabbing pains, headaches, dizzy spells and kidney irregularities, you must act quickly to avoid the more serious trouble, dropsy, gravel, heart disease, Bright's disease. Use Doan's Kidney Pills, the remedy that is so warmly recommended everywhere by grateful users.

A Texas Case
"Every Picture Tells a Story"
Otto Reeb, 89 Central St., New Braunfels, Tex., says: "I had a sharp pain over my kidneys which bothered me when I stooped. At night, the trouble broke my rest. I had a cure when I first got up. I was sore and lame across my back. Doan's Kidney Pills cured me. That happened four years ago and I haven't had a weak or painful back since."

CHAPTER XVIII.

The Arrow to the Mark.

Smith, concentrating abstractedly, as his habit was, upon the work in hand, was still deep in the voucher-auditing when the office door was opened and a small shocked voice said: "Oh, wooo! how you startled me! I saw the light, and I supposed, of course, it was colonel-daddy. Where is he?"

"Don't let me interrupt you, please. I'll be quiet."

"I don't mean to let anything interrupt me until I have finished what I have undertaken to do; I'm past all that, now."

"I have heard about what you did last night."

"About the newspaper fracas? You don't approve of anything like that, of course. Neither did I, once. But there is no middle way. You know what the animal tamers tell us about the beasts. I've had my taste of blood. There are a good many men in this world who need killing. Crawford Stanton is one of them, and I'm not sure that Mr. David Kinzie isn't another."

"I can't hear what you say when you talk like that," she objected, looking past him with the gray eyes veiled.

"Do you want me to lie down and let them put the steam roller over me?" he demanded irritably. "Is that your ideal of the perfect man?"

"What I said, and what I meant, had nothing at all to do with Timanyont High Line and its fight for life," she said calmly, recalling the wandering gaze and letting him see her eyes.

"I was thinking altogether of one man's attitude toward his world."

"That was some time ago," he put in soberly. "I've gone a long way since then, Corona."

"I know you have. Why doesn't daddy come back?"

"He'll come soon enough. You're not afraid to be here alone with me, are you?"

"No; but anybody might be afraid of the man you are going to be."

His laugh was as merciless as the cracking of a rusty hinge.

"You needn't put it in the future tense. I have already broken with whatever traditions there were left to break with. Last night I threatened to kill Allen, and, perhaps, I should have done it if he hadn't begged like a dog and dragged his wife and children into it."

"I know," she acquiesced, and again she was looking past him.

"And that isn't all. Yesterday Kinzie set a trap for me and bated it with one of his clerks. For a little while it seemed as if the only way to spring the trap was for me to go after the clerk and put a bullet through him. It wasn't necessary, as it turned out, but if it had been—"

"Oh, you couldn't!" she broke in quickly. "I can't believe that of you!"

"You think I couldn't? Let me tell you of a thing that I have done. Night before last Verda Richlander had a wire from a young fellow who wants to marry her. He had found out that she was here in Brewster, and the wire was to tell her that he was coming in that night on the delayed 'Flyer.' She asked me to meet him and tell him she had gone to bed. He is a miserable little wretch; a sort of sham reprobate; and she has never cared for him, except to keep him dangling around with a lot of others. I told her I wouldn't meet him, and she knew very well that I couldn't meet him—and stay out of jail. Are you listening?"

"I'm trying to."

"It was the pinch, and I wasn't big enough—in your sense of the word—to meet it. I saw what would happen. If Tucker Jibbey came here, Stanton would pounce upon him at once; and Jibbey, with a drink or two under his belt, would tell all he knew. I fought it all out while I was waiting for the train. It was Jibbey's effacement, or the end of the world for me, and for Timanyont High Line."

Dexter Baldwin's daughter was not of those who shriek and faint at the apparition of horror. But the gray eyes were dilating and her breath was coming in little gasps when she said:

"I can't believe it! You are not going to tell me that you met this man as a friend, and then—"

"No; it didn't quite come to a murder in cold blood, though I thought it might. I had Maxwell's runabout, and I got Jibbey into it. He thought I was going to drive him to the hotel. After we got out of town he grew suspicious,

and only down the Timanyont river and across to the mining camp of Red Butte. Smith twisted the gray road, and four miles from the turn, shut off the power and got down to continue his journey afoot. The mine workings were tunnel-driven in the mountainside, and a crooked ore track led out to them. Smith followed the ore track until he came to the entrance, and to the lock of a small door framed in the bulkheading he applied a key.

It was pitch dark beyond the door, and the silence was like that of the grave. Smith had brought a candle on his food-carrying visit of the day before, and, groping in its hiding place just outside of the door, he found and lighted it. There was no sign of occupancy save Jibbey's suitcase lying where it had been flung on the night of the assisted disappearance.

Smith stumbled forward into the black depths and the chill of the place laid hold upon him and shook him like the premonitory shiver of an approaching ague. Insensibly he quickened his pace until he was hastening blindly through a maze of tunnels and cross driftings, deeper and still deeper into the bowels of the mountain. Coming suddenly at the last into the chamber of the dripping water, he found what he was searching for, and again the ague chill shook him. There were no apparent signs of life in the sodden, muck-begrimed figure lying in a crumpled heap among the water pools.

"Jibbey!" he called; and then again, ignoring the unnerving, awe-inspiring echoes rustling like flying bats in the cavernous overspaces: "Jibbey!"

The sodden heap bestirred itself slowly and became a man sitting up to blink helplessly at the light and supporting himself on one hand.

"Is that you, Monty?" said a voice tremulous and broken; and then: "I can see. The light blinds me. Have you come to finish the job?"

"I have come to take you out of this; to take you back with me to Brewster. Get up and come on."

The victim of Smith's ruthlessness struggled stiffly to his feet. Never much more than a physical weakling, and with his natural strength wasted by a life of dissipation, the blow on the head with the pistol butt and the forty-eight hours of sharp hardship and privation had cut deeply into his scanty reserves.

"Did—did Verda send you to do it?" he queried.

"No; she doesn't know where you are. She thinks you stopped over somewhere on your way west. Come along, if you want to go back with me."

Jibbey stumbled away a step or two and flattened himself against the cavern wall. His eyes were still staring and his lips were drawn back to show his teeth.

"Hold on a minute," he jerked out. "You're not—net going to wipe it all out as easy as that. You've taken my gun away from me, but I've got my two hands yet. Stick that candle in a hole in the wall and look out for yourself. I'm telling you, right now, that one or the other of us is going to stay here—and stay dead!"

"Don't be a fool!" Smith broke in. "I didn't come here to scrap with you. You'd better—and you'd better make a job of it, while you're about it!" shrieked the castaway, lost now to everything save the biting sense of his wrongs. "You've put it all over me—knocked my chances with Verda Richlander and shut me up here in this hell-hole to go mad-dog crazy! If you let me get out of here alive I'll pay you back, if it's the last thing I ever do! You'll go back to Lawrenceville with the bracelets on! You'll—red rage could go no farther in mere words and he flung himself in feeble fierceness upon Smith, clutching and struggling and wailing the grewsome echoes again with frantic, meaningless maledictions.

Smith did not strike back; wrapping the madman in a pinning grip, he held him helpless. When it was over, and Jibbey had been released, gasping and sobbing, to stagger back against the tunnel wall, Smith groped for the candle and found and relighted it.

"Tucker," he said gently, "you are more of a man than I took you to be—a good bit more. Now that you're giving me a chance to say it, I can tell you that Verda Richlander doesn't figure in this at all. I'm not going to marry her, and she didn't come out here in the expectation of finding me."

"Then what does figure in it?" was the dry-lipped query.

"It was merely a matter of self-preservation. There are men in Brewster who would pay high for the information you might give them about me."

"You might have given me a hint and a chance, Monty. I'm not all dog."

"That's all past and gone. I didn't give you your chance, but I'm going to give it to you now. Let's go—if you're fit to try it."

"Wait a minute. If you think, because you didn't pull your gun now and drop me and leave me to rot in this hole, if you think that squares the deal—"

"I'm not making any conditions," Smith interposed. "There are a number of telegraph offices in Brewster, and for at least two days longer, I shall always be within easy reach."

Jibbey's anger flared up once more. "You think I won't do it? You think I'll be so glad to get to some place where he'll send whiskey that I'll forget all about it and let you off? Don't you make any mistake, Monty!"

"You are a coward," she flashed back.

"I'll show you; show you all the things that you say are now impossible. Did you bring the gray roadster?"

She nodded briefly.

"Your father is coming back; I hear the elevator bell. I am going to take the car, and I don't want to meet him. Will you say what is needful?"

She nodded again, and he went out quickly. It was only a few steps down the corridor to the elevator landing, and the stair circled the caged elevator shaft to the ground floor. Smith halted in the darkened corner of the stairway long enough to make sure that the colonel, with Stillings and a woman in an automobile coat and veil—a woman who figured for him in the passing glance as Corona's mother—got off at the office floor. Then he ran down to the street level, cranked

the tunnel, and to blow off the candle and to pick up Jibbey's suitcase. In the open air he freed captive trapped in sober silence at Smith's heels until they reached the automobile. At the crossing of the railroad main track and the turn into the highway, the river, bassooning deep-toned among its bowlders, was near at hand, and Jibbey spoke for the first time since they left the mine mouth.

"I'm horribly thirsty, Monty. That water in the mine had copper or something in it, and I couldn't drink it. You didn't know that, did you—when you put me in there, I mean? Won't you stop the car and let me go and stick my face in that river?"

The car was brought to a stand and Jibbey got out to scramble down the river bank in the starlight. Obeying some inner prompting which he did

not stop to analyze, Smith left his seat behind the wheel and walked over to the edge of the embankment where Jibbey had descended. With the glare of the roadster's acetylenes turned the other way, Smith could see Jibbey at the foot of the slope lowering himself face downward on his propped arms to reach the water. Then, in that instant, Jibbey, careless in his thirst, lost his balance and went headlong into the torrent.

A battling eon had passed before Smith, battered, beaten and half-strangled, succeeded in landing the unconscious thirst-quencher on a shelving bank three hundred yards below the stopped automobile. After that there was another eon in which he completely forgot his own bruises while he worked desperately over the drowned man, raising and lowering the limp arms while he strove to recall more of the resuscitative directions given in the Lawrenceville Athletic club's first-aid drills.

In good time, after an interval so long that it seemed endless to the despairing first-aid, the breath came back into the reluctant lungs. Jibbey coughed, choked, gasped and sat up. His teeth were chattering, and he was chilled to the bone by the sudden plunge into the cold snow-water, but he was unmistakably alive.

"What—what happened to me, Monty?" he shuddered. "Did I tumble in?"

"You did, for a fact."

"And you went in after me?"

"Of course."

"No, by gad! It wasn't 'of course'—not by a long shot! All you had to do was to let me go, and the score—your score—would have been wiped out for good and all. Why didn't you do it?"

"Because I promised somebody that I would bring you back to Brewster tonight, alive and well, and able to send a telegram."

Jibbey tried to get upon his feet, couldn't quite compass it, and sat down again.

"I don't believe a word of it," he mumbled, loose-lipped. "You did it because you're not so danged tough and hard-hearted as you thought you were." And then: "Give me a lift, Monty, and get me into the auto. I guess—I'm about—all in."

Smith half led, half carried his charge up to the road. A final heave lifted him into his place, and it is safe to say that Colonel Dexter Baldwin's roadster never made better time than it did on the race which finally brought the glow of the Brewster town lights reddening against the eastern sky.

At the hotel Smith helped his dripping passenger out of the car, made a quick rush with him to an elevator, and so up to his own rooms on the fourth floor.

"Strip!" he commanded; "get out of those wet rags and tumble into the bath. Make it as hot as you can stand it. I'll go down and register you and have your trunk sent up from the station. You have a trunk, haven't you?"

Jibbey fished a soaked card baggy check out of his pocket and passed it over.

"You're as bad off as I am, Monty," he protested. "Wait and get some dry things on before you go."

"I'll be up again before you're out of the tub. I suppose you'd like to put yourself outside of a big drink of whiskey, just about now, but that's one thing I won't buy for you. How would a pot of hot coffee from the cafe strike you?"

"You could make it baby food and I'd drink it if you said so," chattered the drowned one from the inside of the wet undershirt he was trying to pull off over his head.

(TO BE CONTINUED.)

and only down the Timanyont river and across to the mining camp of Red Butte. Smith twisted the gray road, and four miles from the turn, shut off the power and got down to continue his journey afoot. The mine workings were tunnel-driven in the mountainside, and a crooked ore track led out to them. Smith followed the ore track until he came to the entrance, and to the lock of a small door framed in the bulkheading he applied a key.

Then he ran down to the street level, cranked

GOOD BUTTER-MAKING RULES

Best Churning Temperature is 58 Degrees on Ordinary Thermometer—Care for Cream.

(Clemson College Bulletin.) Cream is made up of little fat globules floating in milk. In making butter the fat globules are brought together into a mass and the milk is removed as buttermilk. These fat globules will stick better when they are just the right temperature than they will if either too warm or too cold. A good temperature for churning is 58 degrees on an ordinary thermometer. When the cream is the right sourness it churns better than when sweet or too sour. The cream should be kept at 50 degrees or lower till the day before churning. Then warm it up to 70 degrees, or room heat, which will bring about the souring by the next day.

When the barrel churn is used, allow gas to escape every few minutes at first. When the butter begins to come keep a close watch and stop churning when the butter granules are the size of wheat kernels. Draw off the buttermilk and wash in the churn repeatedly with cold water till the buttermilk is all removed. Then remove the butter from churn and work it with a paddle. Add an ounce of salt per pound of butter.

MANNER OF HANDLING SILAGE

When Time for Feeding Top Layer, Which Has Molded, Should Be Removed—Heap Top Level.

(Clemson College Bulletin.) When the time comes for feeding silage the top layer, which will be found to be moldy, should be removed. The moldy part usually extends for several inches below the surface. At least two inches of silage should be fed each day in order to prevent the formation of the mold. The top of the silage should be kept level so as to expose the smallest surface possible to the air. Only enough silage for one feeding should be put out, as it soon dries out if not fed at once.

ROUGHAGE OF HIGH QUALITY

Average New York Cow Credited With \$66.09 Yearly Income—Scrub Cows Responsible.

Success in dairying is based on the production of high quality roughage. The truth of this basic principle of dairy farm management finds support in estimates recently made by the New York State college of the average dairy cow's product in that state. The average New York cow is credited with only \$66.09 total income yearly. The cost of maintaining her is estimated at \$61.85, not including the cost of labor. The difference amounting to only \$4.25 a cow, would give to the man who

WORKING HORSE IN SUMMER

Large Number of Animals Lost Each Year Through Lack of Care and From Excessive Heat.

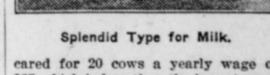

It no doubt would be one of the greatest surprises that we have had for some time, were we to realize the large number of horses that are lost each year from the lack of care and from the heat; the time is here again when we must watch our horses carefully so that they may work safely and to the best advantage for us during the long hot days of summer.

The horse that will stand the hot weather well is the one that has been well groomed and cared for, you must feed your horses well if you want them to work well and if you want to get the most from your feed you must keep them clean and comfortable. The horse that is working hard during the hot weather should be watered at least four or five times each day, and every hour or hour and a half would be still better.

RACK FOR STOCK OPERATIONS

Sometimes Difficult and Lengthy Because of Lack of Secure Place to Hold Animals.

Performing needed operations on live stock oftentimes is rendered a difficult and lengthy job because of the lack of a rack in which the animal can be securely held. Here is one which looks rather complex but which will keep the animal where he can't get away to save himself, hard as he may try. The animal is driven into

Splendid Type for Milk. Cared for 20 cows a yearly wage of \$85 which is less than the lowest wage paid to ordinary farm labor. Scrub cows are largely responsible, it is said, for this poor showing in New York and the college advises that they be weeded out if dairy herds are to be profitable to the farmer. These herds may be improved greatly by better breeding methods and by eliminating the culs. Behind the cows lies the farm on which they are kept. If the farm is not properly managed, the cows are laboring under a severe handicap.

FIRST FEED FOR YOUNG CALF

Skim Milk is Given Soon as Practicable and Continued Until Animal is Six Months Old.

At first the calf is fed whole milk, the quantity being gradually increased. Skim milk is substituted as soon as practicable and, if cheap, is continued until the calf is six months old. Ordinarily the maximum quantity of skim milk that can be fed economically is 20 pounds a day. When the calf is two weeks old, grain and bright, clean hay should be offered; the quantity fed should be increased as the calf's appetite demands.

COMMON CAUSES OF SCOURS

Overfeeding, Milk That is Cold or Sour, Dirty Pails, Troughs or Stalls Are Blamed.

Indigestion is the cause of common scours. This generally occurs when the calf is from two weeks to a month old. Prevention is the best remedy. The common causes of indigestion are overfeeding, feeding milk that is cold or sour, feeding sweet milk one meal and sour the next, dirty pails, troughs or stalls.

MANAGEMENT OF YOUNG COLT

Teach It to Eat Grain and Alfalfa or Clover Soon as Possible—Allow Access to Grass.

As soon as possible teach the young colt to eat grain and alfalfa or clover, and allow it access to grass. Crushed oats and a little bran make the best grain feed, but if these are not available substitute crushed corn and bran in equal parts by bulk with a little linseed meal.

STOCK

RATIONS FOR ORPHAN COLT.

Bottle and Nipple Will Be Found Cheapest and Most Satisfactory Means of Giving Milk.

Raising orphan colts is a hard task which requires time and patience. Cow's milk is the usual substitute for mare's milk. Allowance must be made for the fact that cow's milk is lower in per cent of protein, fat, and ash than mare's milk, while the latter is lower in per cent of water and milk sugar.

At first a bottle and nipple probably will be found the cheapest and most satisfactory means of inducing the colt to take the milk. The milk should always be warmed to body temperature before feeding.

Add enough warm water to a tablespoonful of sugar to dissolve it, then add from three to five tablespoonfuls of lime water and enough milk to make a pint. Feed one-fourth of this mixture every hour for a few days, gradually lengthening the intervals and increasing the amount given at a feed as the colt grows older.

When the colt is three or four weeks old the sugar in the milk may be discontinued. At three months the colt should be put on a ration of all the sweet milk it will drink three times a day.

If the colt scours, cut down on the amount of milk and give two to four ounces of a mixture of two parts castor oil to one part sweet oil.

WORKING HORSE IN SUMMER

Large Number of Animals Lost Each Year Through Lack of Care and From Excessive Heat.

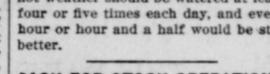

It no doubt would be one of the greatest surprises that we have had for some time, were we to realize the large number of horses that are lost each year from the lack of care and from the heat; the time is here again when we must watch our horses carefully so that they may work safely and to the best advantage for us during the long hot days of summer.

The horse that will stand the hot weather well is the one that has been well groomed and cared for, you must feed your horses well if you want them to work well and if you want to get the most from your feed you must keep them clean and comfortable. The horse that is working hard during the hot weather should be watered at least four or five times each day, and every hour or hour and a half would be still better.

RACK FOR STOCK OPERATIONS

Sometimes Difficult and Lengthy Because of Lack of Secure Place to Hold Animals.

Performing needed operations on live stock oftentimes is rendered a difficult and lengthy job because of the lack of a rack in which the animal can be securely held. Here is one which looks rather complex but which will keep the animal where he can't get away to save himself, hard as he may try. The animal is driven into

Rack for Stock. Behind him one door swings to, preventing him from backing out. In front another door swings to against the left side of the neck and another slides in against the right side. The lever is locked there and the stock is in the stocks, for all the world like an evildoer in ancient times. Once you've got the animal in that position you are at liberty to do your worst. He can't do anything to stop you.—Farming Business.

SORE MOUTH IN YOUNG PIGS

Where Disease Has Advanced to Any Great Extent, Animal Should Be Destroyed—Burn Carcass.

(By I. E. NEWBOM, Colorado Agricultural College, Fort Collins, Colo.) Watch the little pigs for sore mouth. If ulcers are found isolate the litter and treat the affected pigs. Tincture of iodine on a cotton swab used daily will be valuable. If the disease is far advanced the pig should be destroyed and the carcass burned.

MANAGEMENT OF YOUNG COLT

Teach It to Eat Grain and Alfalfa or Clover Soon as Possible—Allow Access to Grass.

As soon as possible teach the young colt to eat grain and alfalfa or clover, and allow it access to grass. Crushed oats and a little bran make the best grain feed, but if these are not available substitute crushed corn and bran in equal parts by bulk with a little linseed meal.

THE HEDLEY INFORMER

ED C. BOLIVER
Publisher

PUBLISHED EVERY FRIDAY
\$1.00 PER YEAR IN ADVANCE

Entered as second class matter October 28, 1910, at the postoffice at Hedley, Texas, under the Act of March 3, 1879.

Four issues make a newspaper month.

Advertising locals run and are charged for until ordered out, unless specific arrangements are made when the ad is brought in.

All obituaries, resolutions of respect, cards of thanks, advertising of church or society doings, when admission is charged, will be treated as advertising and charged for accordingly.

NOTICE.—Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Informer will be gladly corrected upon its being brought to the attention of the publisher.

Business goes where it is invited and stays where it is well treated. The Informer is willing to help you. Advertising rates on application.

A prominent citizen of a near by town, several times larger than this, told the Informer man this week that he had heretofore accused us of "hot air peddling" when we said that farm products brought better prices and merchandise was sold cheaper in Hedley than elsewhere in this section. He finally decided to try it out, however, and now he knows we spoke the truth. It is the truth, and as fast as we are able to spread this truth—just so fast will Hedley's volume of trade be increased.

The Quanah Observer has been sold by Fred Chase to C. T. Wilson who will consolidate it with his recently established Quanah American. We wish Friend Wilson much good luck.

Considerable speculation is indulged in just now as to which will happen first: The end of the world war, or the arrival on time of a Denver passenger train.

Think so well before you speak once that he who hears what you say will think more than once about it.

Our readers will note that we are carrying some out of town ads. These advertisers are all live business men and will treat you right. If you need what they are advertising, and can't buy it in Hedley, trade with them. It is your duty to spend your money with the home merchant. If he can't accommodate you, then trade with the near-home merchant who invites your trade.

Cleanliness in thought is a boon to any man.

Any fool can start an unpleasantness. Remember this next time you feel like stirring up strife.

The Informer needs money—must raise some within the next few days. Help us out of a tight place by paying up your subscription;—DO IT NOW!

"God likes to have a little fun," says Billy Sunday, and an exchange thinks maybe that's the only reason some people are permitted to live.

Many a false rumor is started by an envious tongue.

Seek good and you shall find it, no matter where you seek; seek evil and you'll be found out, no matter how much you try to hide it.

A humorous brother says that many a boy who was pronounced "the picture of his dad" has been known to overcome that handicap.

Many people are beginning to wonder if the government price fixing commission hasn't lost sight of the consumer's point of view.

It is said the scarcity and high price of sugar isn't worrying the citizens of some dry states. Why should it worry them? They haven't anything to mix it with.

The most pious looking man in the neighborhood may be a big hypocrite—and he may really be the most pious man. Don't judge any man by his looks.

It is stated that the Russian government is considering the feasibility of reducing the army. In this they are receiving the full co-operation of the kaiser and his forces.

One reason people do not appreciate their neighbors better is because they do not know them. Most of the misunderstandings arise from the fact that people do not understand each other. A good plan would be to learn more about your neighbors so that you will appreciate them better.

You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Very Likely. "I had an experience yesterday which made me lose my nerve." "Dear me! What was it?" "A senec with my dentist."

AVOID A DOCTOR'S BILL on the first of the month by taking now a bottle of Mansfield Cough Balsam for that hacking, hollow cough. Price 25c and 50c.—Adv.

The Real Thing. "I heard a report that you had an execution in your house." "That probably started from the fact that we were hanging some wall paper."

BROKEN DOWN IN HEALTH

Woman Tells How \$5 Worth of Pinkham's Compound Made Her Well.

Lima, Ohio.—"I was all broken down in health from a displacement. One of my lady friends came to see me and she advised me to commence taking Lydia E. Pinkham's Vegetable Compound and to use Lydia E. Pinkham's Sanative Wash. I began taking your remedies and took \$5.00 worth and in two months was a well woman after three doctors said I never would stand up straight again. I was a midwife for seven years and I recommended the Vegetable Compound to every woman to take before birth and afterwards, and they all got along so nicely that it surely is a godsend to suffering women. If women wish to write to me I will be delighted to answer them."—Mrs. JENNIE MOYER, 342 E. North St., Lima, Ohio.

Women who suffer from displacements, weakness, irregularities, nervousness, backache, or bearing-down pains, need the tonic properties of the roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

Georgia Farmer Says Tanlac Relieved His Rheumatism Entirely.

SUFFERED 45 YEARS

"I Am a Well Man in Every Way and Feel as Strong and Healthy as I Ever Did," He Says.

"I wouldn't take five hundred dollars in cash for the good four bottles of Tanlac did me," said J. M. Mallory, a well-known farmer of Stonewall, Georgia, a short time ago. "For forty-five year I suffered almost every day," he continued, "and was so crippled up with rheumatism that I had to hobble around on crutches. My knees were so stiff I could hardly bend them and often I have been so weak that I have had to take to my bed for weeks at a time. More than half the time I couldn't do any work. I had indigestion and stomach trouble, too, and my back hurt so bad that I couldn't lay on my left side at all. I tried every medicine I saw advertised and many prescriptions besides, but kept getting worse.

"My brother living in Atlanta told me what Tanlac had done for him and begged me to try it. Well, sir, I have taken four bottles in all and have thrown my crutches away for the rheumatism is entirely gone and I can jump two feet off the ground without it hurting me a bit. I am a well man in every way and feel as strong and healthy as I ever did in my life." There is a Tanlac dealer in your town.—Adv.

An Old-Timer. "Here's Uncle Jed. He can reminisce with Uncle Peleg." "How far back can Uncle Jed reminisce?" "To the Civil war, of course." "That won't suit Uncle Peleg. He reminisces back to the Black Hawk and Mexican wars."

THIS IS THE AGE OF YOUTH. You will look ten years younger if you darken your ugly, grizzly, gray hairs by using "La Creole" Hair Dressing.—Adv.

Classic Poses. "About our tableaux." "Yes?" "Mrs. De Style has consented to pose as Minerva." "There's one bit of news we'll have to break to her gently." "What is that?" "Minerva didn't use a lozenge."

Constipation generally indicates disordered stomach, liver and bowels. Wright's Indian Vegetable Pills restores regularity without griping. Adv.

Many more men would buy heavenly shares if they could be had on the installment plan.

PLAN GIVEN BY GOVERNMENT

Some of Measures Advocated Are Not New in Principle and Have Stood Test of Years—Check Ravages of Weevil.

(Prepared by the United States Department of Agriculture.)

Destruction of weevils in the fall by plowing under or by uprooting and burning the plants. Destruction in their hibernating places of weevils that survive the first operation. Locating cotton fields where heavy infestation may be avoided. Early and thorough preparation of the land to obtain an early crop. This means fall plowing and winter working of the land, or the use of cover crops. Determination by experiments on local soils of best methods of spacing, both between rows and between plants in the row. Insuring an early crop by early planting of early-maturing varieties and by fertilizing where necessary.

These are the main points of the formula set out in Farmers' Bulletin 848, "The Boll Weevil Problem," by which larger war crops of American cotton can be grown without increasing, and possibly by decreasing, the present acreage in this crop.

Some of the measures are not new in principle. They are old methods which, modified and improved, have stood the test of years. They represent plain and practical farming methods, and, although they may appear less attractive than many of the fantastical panaceas which spring up from time to time in cotton-growing sections, they are sound and reliable. Individually, they are effective in checking the ravages of the weevils and collectively they offer a practical system which, if followed carefully, will insure a crop in spite of this pest. The system may have to undergo slight modifications to meet local conditions. For example, in some localities hand picking of weevils and infested squares at times may prove a profitable measure.

Problem of Control. The case cannot be rested, however, with the announcement of this anti-boll weevil control becomes more serious as the pest continues its invasion of the cotton belt. Eastern planters must expect a more serious problem than that which confronted the farmers of Texas, because the humid conditions in the East are more favorable to the life of the weevils. Better means of control must be devised for the region that is becoming invaded, and, if possible, other means must be developed to reduce the enormous loss that is suffered, especially during unfavorable seasons in Texas. The principal work of the bureau of entomology at this time is in attempting to devise means for this requisite additional control.

Much has been learned about the habits of the boll weevil. Many seemingly excellent theories of control have fallen before this newly discovered information. A few may be mentioned: Repellents do not repel the boll weevil. Sprays innumerable have been tried unsuccessfully. Nor are the weevils attracted to light. Lantern traps have been hung in cotton fields by many farmers, but only occasional stragglers are caught in this way, the specialists learn.

Machines Are Injurious. Machines employing suction and jarring devices, designed to pick weevils and infested squares or to shake the weevils to the ground, have proved in-

creasing acreage. En-

It is estimated that boll weevils now cause to the cotton industry a loss of 400,000 bales of cotton annually. Although farmers in older regions, in many cases, are increasing their production, there is loss in the newly infested regions which offsets that gain. A conservative estimate shows that since the weevil has invaded this country it has caused a loss of 4,550,000 bales of cotton, with a value of about \$250,000,000.

The figures which have been cited show clearly the enormous reduction in cotton production which the boll weevil causes.

In order to make the picture complete, however, it is necessary to call attention to the effect the weevil has on the production of crops other than cotton. Wherever the insect invades a region, diversification of crops and animal husbandry receive a powerful impetus. This is shown, for instance, in the state of Mississippi. For many years preceding the advent of the boll weevil, namely 1904-1908, the average value of all crops was \$116,783,104. For the boll weevil years, 1909-1913, the average was \$132,031,500. The loss in cotton production was more than offset by the increased planting of corn, forage and other crops.

General Account of Problem. The bulletin mentioned above, which will be sent to anyone on request, contains a general account of the boll weevil problem. It deals with the history of the insect in the United States, the damage it has done in different regions, the reasons for local variations in damage, the indications for the future, the habits of the weevil as far as they are related to control measures, and ways of reducing the injury it causes by methods which have been tested in many experimental fields and by large numbers of practical planters.

MATERIAL FOR WEANING PIGS

Concentrates That Are Rich in Muscle and Bone-Making Essentials Are Necessary.

(Clemson College Bulletin.) Weaned pigs need good concentrates that are rich in muscle and bone-making material to insure thrifty development. Accustom them to their feed gradually, as overfeeding will readily produce scouring. From ten to twelve days are essential in getting young pigs adjusted to the change. However, they should be fed lightly at least three times daily during this time.

The following rations are good for young pigs: (1) Skim milk and wheat middlings. (2) One part ground grain of some kind to two parts wheat middlings or rice meal. Ground oats and rice meal make a splendid mixture. Feed as indicated above with skim milk.

CONVENIENT PLACE FOR SILO

Should Be Located Outside Rather Than Inside of Barn—Allow Space for Feed Room.

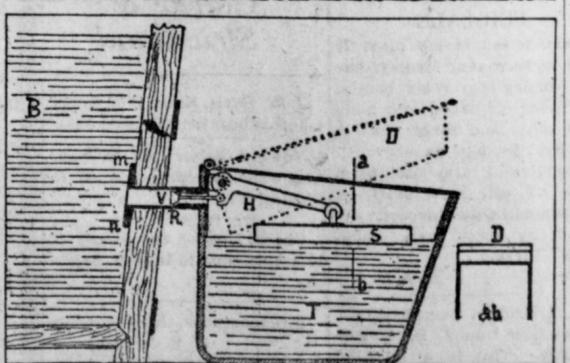

In general the silo should be located outside rather than inside the barn. Place it a few feet away from the barn so that a small feed room may be built between. This arrangement not only provides a convenient place for the silage cart but also a means of separating the silo from the milking barn where silage odors are undesirable.

MILK RECORD IS BENEFICIAL

Farmer Who Wishes to Carry on Work in Businesslike Way Will Keep Tab on His Cows.

Any farmer who is making a specialty of milk production and wishes to carry on his work in a businesslike way will keep milk records, individual performance records for each cow in the herd, says John M. Scott of the University of Florida experiment station.

CONVENIENT DRINKING TROUGH FOR SWINE

WATER FORCED INTO TANK AUTOMATICALLY.

A simple form of automatic drinking trough for pigs is illustrated above. The trough T, is provided with a cover D under which the float S is situated. The lever H connects the float with the valve V. When the trough is used the float sinks, and by means of the lever pushes the valve open so that the water from the tank or water pipe B can flow into the trough through the pipe R; m is a flange. To the right is illustrated a section through the cover along the line ab. The cover D is necessary to prevent the animals touching the float and attached parts with their snouts.

Mrs. Mary Fennell, R. F. D., Pomona, Missouri, writes:

"I wish to say a few words in the praise of Peruna. I have used it with good results for cramps in the stomach. Also found it the very thing for catarrh of the head. My sister was cured of catarrh of stomach by the use of Peruna." Mrs. E. T. Chomer, 69 East 42nd St., Chicago, Ill., says: "Manalin best laxative on the market for liver and bowels, very good for indigestion and heart burn." Those who object to liquid medicines can secure Peruna Tablets.

Cruel Comment. Miss Uglygirl—Do you know, I actually changed countenance. Miss Pert—I should think you would have been glad of the chance.

Whenever You Need a General Tonic Take Grove's

The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System 60 cents.

Not a Lame One. "They've got all sorts of modern improvements down to the place where Jim works. One's an excavator that people stand on and don't have to walk upstairs." "Why, down at our Tom's place they've got a rheumatic tube."

CLEAR AWAY PIMPLES

Does Cuticura Ointment—Assisted by Cuticura Soap—Trial Free.

On rising and retiring smear the affected surfaces gently with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. When the skin is clear keep it so by using Cuticura for every-day toilet and nursery purposes.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Might Work.

"We are extending too many speeches in the Congressional Record." "What's the remedy, Senator?" "When a member gets tired let him continue his speech by means of a graphophone."

HEADACHES

This distressing ailment should be relieved at once and save strain on Nervous System. CAPUDINE gives quick relief. It's a liquid—Pleasant to take.—Adv.

Pleasant Thought. "I love to hold the ten of diamonds." "The ace is a much better card." "I like the ten. Think of a cluster of diamonds that size!"

Help to Save Nation's Food Supply

In this time of high cost of living, everybody should use all possible means to prevent waste and to help save food. No one means can be more effective than a vigorous campaign to exterminate rats which destroy over two hundred million dollars worth of foodstuffs annually. Keep garbage in rat-proof cans, stop up their holes and above all exterminate them with Stearns' Paste, which can be bought for a few cents at any store. A two ounce box will usually rid a house or barn of every rat. It destroys mice, cockroaches and waterbugs as well. Adv.

The Optimistic Papa.

Again the kid was delving into literature, and again he sought from his father solution of his difficulties. "Fa" he said.

Father looked up from his paper in that kindly, patient way of his. "Well, my son?"

"It says here in this literature lesson: 'At the age of twenty, Coleridge was graduated from the university and admitted to holy orders.'"

"Well, what are 'holy orders?'" "Holy orders? Why—oh—the Ten Commandments, of course."

"But what does that—?" "Now go on with your book, and don't interrupt me again."

Mer Skill.

"So Mrs. Tart has that fierce-tempered husband of hers tamed, has she?" "I should say she has. She's got him that tame that she takes money out of his hand without him snapping at her."

The Alibi.

A college president known for his droolery was describing the Home Guard of Connecticut—an admirable force whose service will be confined to the state except in case of invasion.—Christian Register.

Many a convincing political speaker can't get a hearing at home. "Edith, I love you." "Is—that all you have to say, Reggie?" "Great Scott, Edith, it has taken me eighteen months to say that."

All That a Vacation Does.

"Get rested on your vacation?" "No; just got tired in new ways."

Sold by druggists for over forty years. Price 75c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

Gives Library as Memorial. Medfield, Mass., has dedicated a new library, gift of a private citizen, as a memorial to his wife.

Girls! Use Lemons! Make a Bleaching, Beautifying Cream

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It naturally should help to soften, freshen, bleach and bring out the roses and beauty of any skin. It is simply marvelous to smoothen rough, red hands. Adv.

Connect Georgia Cities.

Atlanta and Anderson, Ga., are to be connected by a new interurban electric railway.

PROMPT RELIEF.

can be found in cases of Colds, Coughs, La Grippe and Headaches by using Laxative Quinine Tablets. Does not affect the head or stomach. Buy your winter's supply now. Price 25c.—Adv.

Limited Credence.

"Don't believe any news you hear except when given out officially." "Yes. And if it's given out by Germany you can't even believe that."

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—it's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority. For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.—adv.

A Feet in Itself.

"Edith, I love you." "Is—that all you have to say, Reggie?" "Great Scott, Edith, it has taken me eighteen months to say that."

All That a Vacation Does.

"Get rested on your vacation?" "No; just got tired in new ways."

The Icy Blasts of Winter

NEED NOT AFFECT YOU. We have the Warm Garments for every member of the family

Come and Outfit Yourself Comfortably

WE HAVE THE MOST COMPLETE LINE OF Coats, Coat Suits, Skirts, Underwear, Hosiery and every article of wearing apparel to make pleasant your going out during the chilly weeks to come.

Winter Underwear

We are proud of our stock of Winter Underwear. We can please the whole family---at very moderate prices

School Shoes

and Fine Shoes for ladies and gentlemen. The first signs of approaching cold weather are here and it is time that you should think of the things that keep you warm. Your feet are the most exposed members of your body hence you should think of them first. That old saying "A Warm Heart and Dry Feet Keep You from Many Ills" holds good today.

Last Call on Groceries

Our Grocery stock will soon be closed out. Make use of the very cheap prices we're making.

Richerson & McCarroll
